STATEMENT OF CLAIMANT REQUESTING RECERTIFIED CHECK				Form Approved OMB No. 0730-0002 Expires Dec 31, 1996						
Public reporting burden for this collection of information is estimated to average 5 per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Defense, Washington Headquarters Service, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0730-0002), Washington, DC 20503.										
PLEASE DO NOT RETURN YOUR COMPLETED FORM TO EITHER OF THESE ADDRESSES. RETURN COMPLETED FORM TO THE ADDRESS OF THE AGENCY WHO PROVIDED THIS FORM.										
PRIVACY ACT STATEMENT										
AUTHORITY:		31 CFR 245.8.								
PRINCIPAL PURPOSE:		To request a recertified check.								
ROUTINE USE(S):		Information is used by the Disbursing Office as the basis for issuing a recertified check and for canceling the original. It is also used to verify how original check was lost, stolen, etc., and to establish a proper mailing address. This information may also be used for other lawful purposes, including law enforcement and litigation.								
DISCLOSURE:		Voluntary; however, if payee does not provide information, a recertified check cannot be issued.								
WARNING: Title 18, Sec 287, US Code: "Whoever makes or presents to any person or officer in the civil, military, or naval service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent, shall be fined not more than \$10,000 or imprisoned not more than five years, or both."										
1. PAYEE <i>(Show business name or financial organization, if applicable)</i> Ida M. Jones				2. SSN <i>(or employee identification number)</i> 345-00-6789						
3. CO-PAYEE OR PAYEE TO BE CREDITED IF ITEM 1 IS A FINANCIAL ORGANIZATION										
4. ADDRESS TO WHICH CHECK WAS MAILED <i>(Include 9-digit ZIP Code)</i> 123 Apple Tree Lane New City, FL 12345-0000			5. CORRECT MAILING ADDRESS <i>(if different from Item 4)</i>							
6. PURPOSE FOR WHICH CHECK WAS ISSUED <i>(Check applicable box)</i>					7. DATE DUE <i>(Approximate)</i>					
<input checked="" type="checkbox"/>	REGULAR PAY	<input type="checkbox"/>	TRAVEL PAY	<input type="checkbox"/>		VENDOR PAY	<input type="checkbox"/>	OTHER <i>(Specify)</i>

CHAPTER 9

CHECK-ISSUE REPORTING★0901 CHECKING ACCOUNT REPORTS

★ 090101. General. All disbursing offices are required to report their check issue data in Treasury Department Level 8 format through their respective DFAS Center. The DFAS Center will use the Defense Check Reconciliation Module (DCRM) as a management control for reporting check issue data to the Treasury Department. The reporting of detailed check issue information by file transfer through telecommunications networks to the servicing DFAS Centers is the preferred method of check issue reporting. This method shall be used whenever possible. DOs should contact their servicing DFAS Center for information on availability, method, and instructions for use of the file transfer reporting method. The DOs who cannot report by the preferred method will report their check issue in conformance with the method provided by their servicing DFAS Center.

★ 090102. Requirements. Detailed check-issue data is reported in groups of checks called "transmittals" that uniquely identify the DSSN, issue month and year, and check series. A new transmittal is required each time a break in check numbers occurs or the issue month and year changes. For DOs reporting check-issues for multiple DSSNs, a separate transmittal is required for each individual DSSN as well as for each break in check numbers or change in issue month and year within each DSSN. One submission of detailed check-issue data may consist of one or more transmittals. All DOs submitting check-issue file transfer data or using any other method to transfer the data, to their DFAS Center, shall forward the data no later than 4 workdays after close of business of the week in which the issue dates occur and no later than 2 workdays after month end. If any applicable documentation is required by the servicing DFAS Center when using any other method of transferring the data other than file transfer, that documentation should be sent with the check-issue data.

★ 090103. Transmittal Structure. Transmittals shall conform to the basic structure shown in table 9-1. Standard issue record layouts for header records, issue records, and trailer records are shown in tables 9-2, 9-3, and 9-4, respectively.

A. The check-issues reported shall be in consecutive ascending order within each submission.

B. If multiple transmittals are on a transmission, the individual transmittal trailer records shall contain the count and amount totals for only one transmittal. There is no cumulative total between transmittals.

C. Check serial numbers and DSSNs shall be valid in the DCRM data base.

D. Each transmittal shall balance internally; the item count and total dollar amount computed from the check-issue detail records shall equal the totals on the transmittal-trailer records.

E. A single transmittal may not exceed 9,999,999 individual check-issues or \$99,999,999.99 total dollar value.

F. Voided checks shall be reported in serial number sequence as zero amount issues. The serial numbers shall be reported in the proper sequence with those of other checks issued within the same check range.

★ 090104. When Computer Facilities Are Not Available. Larger disbursing offices with computer capabilities exercising control over multiple DSSNs are requested to furnish their servicing DFAS Center with consolidated check-issue file transfer transmission (multiple DSSNs and issues consolidated on the same file transfer) for the smaller activities that are unable to use the file transfer method and/or unable to format their data to Treasury Department Level 8 format reporting because they lack computer facilities. To facilitate the conversion to Level 8 report format, check-issue detail records and supporting adjustment documents (FMS Forms 5206 and OFs 1017-G) shall be forwarded by the smaller activities to the designated disbursing offices in a satisfactory time frame for those offices to meet their deadline of reporting to their servicing DFAS Center.

★ 090105. Disbursing Office Responsibility for Quality Assurance of Data Submitted. The disbursing office is responsible:

A. to quality assure all Level 8 check-issue data submitted to its supporting DFAS Center for processing;

B. when notified of a rejected transmittal within a file transferred or sent by magnetic tape, to submit a corrected transmittal(s) within 10 workdays of the notification date;

C. when a transmittal has been rejected, to continue to submit subsequent transmittals; and,

D. to be able to recreate the check-issue data for a period up to 180 calendar days following submission or replacement of rejected data.

★ 090106. Inquiries. Inquiries concerning Level 8 check-issue reports/transmittals should be directed to the DOs servicing DFAS Center.

★0902 CHECK-ISSUE REPORTING VIA MAGNETIC TAPE

★ 090201. General. Disbursing offices that have been directed by their supporting DFAS Center to use magnetic tapes vice file transfer for reporting check-issue information shall

forward the magnetic tapes and the required supporting documentation via express mail or other expeditious means to their DFAS Center. In the case of Navy or Marine Corps DSSNs, forward the tapes to the applicable DFAS operating location (OPLOC) or central disbursing office (CDO) if so directed by their servicing DFAS Center.

090202. Tape Requirements. Magnetic tapes used in Level 8 reporting shall meet the following criteria:

A. The magnetic tape shall be unlabeled (that is, no internal magnetic tape labels or markings).

B. The magnetic tape shall be a 9-track EDCDIC tape prepared with 6250 bpi density. If 6250 cannot be produced, 1600 bpi is acceptable. No 800 bpi will be accepted.

C. The block size is 15,600 bytes (240 records per block). If 15,600 block size cannot be produced, 7,800 bytes (120 records per block), 3,900 bytes (60 records per block), or 1,950 bytes (30 records per block) may be used.

★ D. Each reel of magnetic tape shall be identified by having the following information externally affixed to the reel and not to the case: Treasury Check-issues - Level 8; User Reel No. (up to 6 characters), First Transmittal No. "XXXX-YYYY-ZZZZZZZZ" (this number shall agree with the first header record on the check-issue tape and the first line of TFS 3510), block size 15,600 (or 7,800, etc.), BPI 6250 (or 1600), Track 9, Reel Sequence No. ____ of ____ (for example, reel 1 of 2 on multi-reel submissions).

★ E. Each reel of magnetic tape shall have an address for returning processed tapes. The name of a contact person and the submitting organization's area code and commercial telephone number or DSN number shall also be provided. The information should be externally affixed to the reel and not to the case.

★ F. Each reel shall also have a separate unique "LVL8" label. The label shall be large enough to accommodate all the required information.

★ G. The Magnetic Tape Control Record (TFS 3510) shall be signed and shall accompany all Level 8 magnetic tapes.

★ H. A self-addressed, postage-paid envelope or postcard with the DO's complete official address shall be included with all magnetic tape submissions. The envelope or postcard shall contain the DSSN, reel number, and transmittal number to identify the item received. The envelopes or postcards will be dated, signed, and returned to the DO as positive confirmation of receipt by the servicing DFAS Center, OPLOC or CDO.

0903 SUPPORTING DOCUMENTS FOR MAGNETIC TAPES

090301. Magnetic Tape Control Record (TFS 3510). Magnetic tapes shall be submitted to the servicing DFAS Center (OPLOC or CDO if applicable) supported by a properly completed and signed TFS 3510. Multiple DSSNs may be reported on one tape; however, the TFS 3510 shall be identified uniquely by DO symbol number, the controlling check symbol number, and the first check serial number contained in the first transmittal included on the tape. Only one DO symbol and check symbol shall be on each transmittal, and checks shall be in consecutive ascending serial number order within each transmittal. A new transmittal shall be created for each break in the DO symbol number, check symbol number, check serial number, or month and year of issue. Examples of properly completed TFS Forms 3510 for a single transmittal and for a tape containing several transmittals are shown as figures 9-1 and 9-2, respectively.

090302. Preparation of TFS 3510

A. For a Single Transmittal on One Tape. Complete the blocks of the TFS Form 3510 for a single transmittal on one tape as follows:

1. TRANSMITTAL NUMBER. Enter the DSSN-DSSN-First check number of the transmittal.
2. NUMBER OF CHECKS. Enter the inclusive number of checks in the transmittal.
3. TOTAL ISSUE AMOUNT. Enter the total dollar amount of the checks in the transmittal.
4. DISBURSING LOCATION. Enter the city or name of the base or station where the disbursing office is located.
5. DO SYMBOL NUMBER. Enter the DSSN.
6. CHECK SYMBOL NUMBER. Enter the DSSN.
- ★ 7. ISSUE DATE OF CHECKS. Enter the inclusive dates during which the checks were issued. For example: June 1-5, 1995 or May 15-31, 1996.
8. DATE TAPE CREATED. Enter the date the tape was created.
9. TAPE REEL NUMBER/DENSITY. Enter the reel number and the BPI (1600 or 6250, as appropriate).
10. SERIAL NUMBERS. Enter the serial number of the first and last checks included in the transmittal.

11. MONTH AND YEAR FOR WHICH RENDERED. Enter the issue month and year.

12. DISBURSING STATION AND LOCATION. Enter the complete disbursing office address, area code, and commercial telephone number.

13. TAPE TYPE. Enter "Level 8".

14. DISBURSING OFFICER'S SIGNATURE. Self explanatory.

B. For Multiple Transmittals on One Tape. Complete the blocks of the TFS Form 3510 for multiple transmittals (transmittals for more than one disbursing office) on one tape as follows:

1. TRANSMITTAL NUMBER. Enter the DSSN-DSSN-First check number of transmittal. The first transmittal on the tape shall always be for checks issued by the disbursing office preparing and submitting the tape. The first transmittal on a tape determines to whom the tape is returned and notices of acceptance and/or rejection are provided.

2. NUMBER OF CHECKS. Enter "See Attached".

3. TOTAL ISSUE AMOUNT. Enter "See Attached".

4. DISBURSING LOCATION. Enter "Various".

5. DO SYMBOL NUMBER. Enter "Various, See Attached".

6. CHECK SYMBOL NUMBER. Leave blank.

7. ISSUE DATE OF CHECKS. Enter "Various, See Attached".

8. DATE TAPE CREATED. Enter the date the tape was created.

9. TAPE REEL NUMBER/DENSITY. Enter the reel number and the BPI (1600 or 6250, as appropriate).

10. SERIAL NUMBERS. Enter the serial number of the first check included in the transmittal. Leave the block for Last Check Number blank.

11. MONTH AND YEAR FOR WHICH RENDERED. Enter "See Attached".

12. DISBURSING STATION AND LOCATION. Enter the complete address, area code, and commercial telephone number of the disbursing office preparing and submitting the tape.

13. TAPE TYPE. Enter "Level 8".

14. DISBURSING OFFICER'S SIGNATURE. Self explanatory.

15. A listing similar to that shown in figure 9-2 shall be attached to the TFS Form 3510. The listing shall contain the DSSN, Date Created, First Check Number, Last Check Number, Transmittal Amount, Number of Checks, and Month and Year for which Rendered for each transmittal included on the tape. The first transmittal listed shall be the first transmittal on the tape (i.e., the one actually listed on the TFS Form 3510). At the end of the list, the grand total of all transmittals included on the tape and the grand total of the number of items shall be shown.

0904 REPORTING DOCUMENTS REQUIRED

090401. General. The SF 1179 (Month End Check-Issue Summary) shall be used by disbursing offices for monthly reporting of Level 8 check-issue transmittals. At the end of every month, a consolidated SF 1179 shall be submitted to summarize the check-issues for the month. The total dollar amount of issues submitted by transmittal (each listed individually) shall be summarized on the SF 1179. It shall also show current and prior months' adjustments to check-issue totals as effected by the documents listed in paragraph 090104 of this chapter. The total amount shown on the SF 1179 shall agree with the amount shown in Part A, Column (2), on the reverse of the SF 1219.

090402. Check-Issue Reporting for Depositary Checking Accounts. Depositary checking account reports shall be prepared and submitted following the procedures in Chapter 14 of this volume.

090403. Preparation of the SF 1179. The SF 1179 is prepared in an original and 2 copies. DOs shall ensure that all blocks of the SF 1179 are properly completed, including page and location, DO's signature, and the month and year for which rendered. The blocks of the SF 1179, as shown in figure 9-3, shall contain the following information:

A. DISBURSING OFFICE NAME/ MAILING ADDRESS. Enter the name and complete mailing address of the issuing disbursing office.

★ B. TELEPHONE NO. COMMERCIAL OR FTS. Enter only the area code and commercial or FTS telephone numbers. Do not enter AUTOVON or DSN numbers.

C. D.O. NAME. Enter the name and rank or grade of the DO.

D. D.O. SIGNATURE. The DO shall sign in the space provided.

E. CHECK SYMBOL NO. Enter the four-digit DSSN.

F. MONTH AND YEAR FOR WHICH RENDERED. Enter the month and year during which the checks being reported were issued.

G. D.O. SYMBOL NO. Enter the four-digit DSSN for the first transmittal only. The block may be left blank for any additional transmittals listed on this summary.

H. CHECK SYMBOL NO. Enter the four-digit DSSN for the first transmittal only. The block may be left blank for any additional transmittals listed on this summary.

I. BEGINNING CHECK NO. Enter the beginning check serial number for each transmittal.

J. ENDING CHECK NUMBER. Enter the ending check serial number for each transmittal.

K. REPORTING METHOD. Enter "TAPE (Level 8)". Enter the method for the first transmittal listed only. Beneath the method, list by each transmittal the inclusive dates for which checks were issued. (For example: Tape (Level 8); 12/1-15/88 or 12/16-31/88).

L. TOTAL DOLLAR AMOUNT OF ISSUES (FOR EACH TRANSMITTAL). Enter, adjacent to each transmittal, the total of the issue amounts of all checks reported on each transmittal.

M. SUMMARY: LINE 1. Enter the total dollar amount for all transmittals listed in the above blocks. The total shall agree with the total of checks issued as reported in Column (2), Part A, Section II, on the reverse of the SF 1219.

N. SUMMARY: LINE 2(a). Enter the net total representing adjustments to current and prior months' issues for which FMS Forms 5206 have been received from the Treasury Department and taken up in the accounts of the DO. The amount on this line shall agree in net with the amount shown in Column 3, Part A, Section II, on the reverse of the SF 1219.

O. SUMMARY: LINE 2(b). Enter the net total representing adjustments to current and prior months' issues made by the disbursing office and recorded on OFs 1017-G. Copy 2 of the OF 1017-G should be attached to the SF 1179 in support of the amount entered. The amount on this line shall agree in net with the amount shown in Column 4, Part A, Section II, on the reverse of the SF 1219.

P. SUMMARY: LINE 3. This line represents the net total of lines 1, 2(a), and 2(b). The net total shall agree with the amount shown in Column 5, Part A, Section II, on the reverse of the SF 1219 and shall agree with the amount reported on line 2.1, Part A, Section I on the front of the SF 1219.

★ 090404. Distribution of SF 1179. Except as provided in this paragraph, DOs are required to submit the ORIGINAL of the SF 1179 on or before the 10th of the month following the close of the check-issue month, with copies of supporting documents (FMS Forms 5206 and OFs 1017-G) to: Financial Analysis Branch, Financial Management Service, Department of the Treasury, Room 600E, 3700 East-West Highway, Hyattsville, MD 20782. The second copy shall be forwarded with the financial reports to the servicing DFAS Center. The third copy shall be retained in the disbursing office files. Navy and Marine Corps DOs submitting check-issue reports to a DFAS OPLOC or another disbursing office for conversion to magnetic tape shall submit the ORIGINAL of the SF 1179 with the detail of checks issued to the DFAS OPLOC or disbursing office. The office converting the check-issue data to magnetic tape shall be responsible for submitting a properly prepared SF 1179 to FMS. The second copy shall be submitted with the monthly financial reports. The third copy shall be retained in the disbursing office files.

★ 090405. Spoiled Checks. Do not forward spoiled checks to the Treasury Department. Spoiled checks are retained at the disbursing office. When a check is spoiled, no reference will be made on the record of checks issued that a recertified check has been issued.

★ 090406. Voided Checks. Voided checks shall be reported on magnetic tape as zero amount issues. Serial numbers are recorded in the proper sequence with those of other checks issued in the same check range. Voided checks shall not be forwarded to the Treasury Department. Voided checks shall be disposed of as prescribed in Chapter 8 of this volume.

★ 090407. Advice of Check-Issue Discrepancies. When the issue amount reported by a disbursing office differs from the amount printed on the check, the Treasury Department will report the discrepancy on an FMS Form 5206. The three computer-generated copies of the form provide the disbursing office with a full description of the error. If the payee has not been overpaid or under-paid, but incorrect check-issue information has been reported to the Treasury Department, the FMS Form 5206 shall still be processed as prescribed in Chapter 7 of this volume.

★ 090408. Audit of Treasury Department Checking Accounts. The audit and reconciliation of checks for symbol number checking accounts is accomplished by the Treasury Department. The Treasury Department uses an electronic payment and reconciliation system under which controls are maintained over the amounts of issues and payments for each individual check serial number of each DSSN. Each paid check is reconciled with the amount of issue as reported by the DO on the check-issue report (weekly and end-of-month TFS Forms 3510 and monthly SF 1179). The Treasury Department will not furnish reconciliation statements or outstanding check lists. However, each DO will be advised by the Treasury Department as to each check-issue discrepancy of \$1.01 or more detected during the check reconciliation process. The Treasury Department will adjust check-issue discrepancies of \$1 or less, without notification to the DO. In addition, the Treasury Department will advise each DO of all checks paid for which a report of check-issue has not been received or accepted.

Figure 10-4. Sample DD Form 1131 (Cash Collection Voucher)

CHAPTER 10

COLLECTIONS1001 TYPES OF COLLECTIONS

100101. Introduction. There are three types of collections: receipts, reimbursements, and refunds. Collection of a DD Form 2657 or SF 1219 receivable (such as losses of funds, dishonored checks, or other receivables not creditable to an appropriation or fund) is not one of the three types of collections because a formal collection voucher is not prepared.

★ 100102. Receipts. Receipts are collections creditable to Treasury Department miscellaneous receipt accounts or other accounts or funds as authorized by legislation. Receipts are collected into the DO's accountability by use of a DD Form 1131 (Cash Collection Voucher). Receipts are recognizable by the absence of a fiscal year/program year in the appropriation accounting classification. Occasionally, negative receipts occur. Since disbursements from a receipt account cannot be made, "adjusting out" an over-collection involves processing as a negative receipt.

100103. Reimbursements. Appropriation reimbursements are amounts earned and collected for property sold or services furnished to the public or to another U.S. Government agency. Reimbursements are recognizable by the presence of an accounts receivable sales code within the accounting classification. Reimbursements are shown as a positive amount on the DD Form 1131. If a reimbursement is over-collected and funds must be returned to the remitter, a negative reimbursement results. A negative reimbursement may be vouchered as a bracketed (negative) amount on a DD Form 1131 or as a positive amount on a disbursement voucher. An accounts receivable sales code shall be present within the accounting classification for either type voucher.

100104. Refunds. A refund is a recoupment (collection) of payment made in error. The voucher accounting classification is the same precisely as that shown on the associated disbursement voucher. A refund may be a true collection and be collected into DO accountability (as a positive amount) by a DD Form 1131. A refund also may occur as a bracketed amount (negative amount) on a disbursement voucher, being then considered as a reduction in disbursements (i.e., a negative disbursement) rather than a collection. On rare occasions, a refund is complicated by the occurrence of negative refunds. (An example occurred when Braniff Airlines issued checks to a DO in exchange for the DO return of unused plane tickets. The checks were properly collected into the accounting system as a refund. The checks were subsequently dishonored because of Braniff bankruptcy, and were properly treated as a negative refund.) Accordingly, the refund would be reversed in a negative refund situation. Refunds from collection vouchers are reported separately as refunds on the DD Form 2657. However, refunds occurring as a negative disbursement are not separately tracked as a collection

on the DD Form 2657 (i.e., they are simply reported as a reduction of disbursements). On the DD Form 1329, Statement of Transactions and the SF 1219, there is no separate reporting of refunds; they are all included as net disbursements.

100105. Collection Transactions

A. General. A collection can be either a vouchered or unvouchered transaction that increases the DO's accountability. Each collection received by a DO shall be scheduled on the appropriate collection voucher form, verified, and recorded in the accounting records.

1. Voucher Supported Collection. A voucher supported collection effects a credit to a receipt or deposit fund account or to an appropriation, and involves either:

a. direct receipts such as cash, checks, drafts, and money orders;

b. deductions on payment vouchers to cover an indebtedness due the U.S. Government;

c. other deductions on payment of vouchers such as deductions for purchase of savings bonds and Federal taxes;

d. or a transfer between appropriations or funds, or corrections of charges against and credits to them, using an SF 1080 (Voucher for Transfer Between Appropriations and/or Funds) or an SF 1081 (Voucher and Schedule of Withdrawals and Credits). Voucher-supported collections also can be effected through the Treasury Department's On-Line Payment and Collection (OPAC) System. See chapter 24 of this Volume for detailed information regarding the OPAC system. In some instances, such as collections from dining facilities, only one collection voucher number is assigned for the entire accounting period (month) and the formal collection voucher is prepared as of the last business day of the month. Daily receipts of this nature are recorded on the DD Form 2657 as Other Transactions (Line 2.3) and U.S. Currency/Coinage on Hand (Line 6.2A). At the end of the accounting period when the formal DD Form 1131 is processed, the accumulated collections are removed from Line 2.3 and included on Line 4.1E as Reimbursements.

2. Unvouchered Collection. An unvouchered collection occurs when the DO receives cash (or negotiable instruments) from an individual or organization that is not credited to an appropriation or fund and, therefore, not supported by a formal collection voucher. Examples of unvouchered collections include collections for: dishonored checks cashed; losses of funds; some check issue overdraft discrepancies; and, agent returns. These transactions are documented for record purposes by use of an OF 1017-G.

★ B. Vouchering. To expedite the flow of funds to the government, collections (checks, money orders, etc.) shall be separated from accompanying accounting documents at the

initial stage of processing and deposited as prescribed in paragraph 050201 of this volume. If identification of the appropriation account to be credited cannot be made, the collecting office shall prepare a DD Form 1131 for credit to either the **F3875, budget clearing account (Suspense) or the **X6875, deposit fund account, as appropriate and deposit the remittances. When the proper accounting classification has been identified, the collecting office shall prepare an SF 1081 charging **F3875 and crediting the proper appropriation or fund. No check shall be issued for this transfer.

C. Remittance by Mail. DOs shall establish procedures to control the receipt and processing of checks and other negotiable instruments received in the mail. At a minimum, a person from outside the disbursing office shall be designated to receive all mailed remittances. The individual designated to perform this function shall not be the same individual maintaining accounts receivable records. The DD Form 2658 (Returned and Undeliverable Check/Bond Record) may be used as the control record and a record of the transmittal of the instruments between functional areas.

D. Collections by Remote Cashiers. Collections made by remote cashiers shall be acknowledged only after receipt by the DO of the actual monetary amount.

100106. Method of Remittance

A. Monies Received as Contract Bid Deposits or Deposits for Plans. For these types of transactions, the Federal Acquisition Regulation (reference (o)) prescribes acceptance of cash; certificates of deposit; other cash equivalents with a federally-insured financial institution; state warrants of the sovereign States of the United States; or irrevocable letters of credit (ILC) issued by a federally-insured financial institution in the name of the contracting agency and which identify the agency and solicitation or contract number for which the ILC is provided.

B. All Other Indebtedness. Collections representing all other indebtedness may be accepted in cash, check, or any other recognized form of credit instrument payable on demand. For example: personal or corporate checks (certified or uncertified) or bank drafts; Treasury checks with issue dates less than 1 year old; travelers checks; postal money orders; money orders issued by banks or other financial establishments; and credit union share drafts. Warrants may be accepted in lieu of checks provided the warrants are payable on demand. Instruments shall be drawn in favor of DOs in their official capacity (not by name). Visa and MasterCard credit cards may be accepted when presented for payment at locations participating in the credit card collection network (CCCN).

C. Commissary Sales Collections. Commanders may authorize commissary officers to accept Treasury checks from authorized patrons in payment for sales when available banks and other facilities are unable to furnish adequate check-cashing service. Commanders shall not authorize or require DOs or their agents to advance additional change funds to

commissary officers for the purpose of cashing Treasury checks received by the commissary. Moneys generated from sales shall be used for this purpose. See 31 U.S.C. 3302 (reference (e)).

100107. Performance and Bid Bonds (Storage and Safekeeping)

A. Negotiable Instruments. When the DO receives remittances (such as checks, bank drafts, and money orders) as deposits for performance or bid bonds, such remittance shall be deposited immediately in deposit fund account **X6875, Suspense, to be held pending settlement with the contractor.

B. United States Bonds or Notes Deposited in Lieu of a Surety. As authorized by the Federal Acquisition Regulation and Treasury Department Circular 154 (reference (ac)), contractors may deposit, with the contracting officer, certain U.S. bonds or notes instead of furnishing corporate individual sureties on performance and payment bonds. DOs should not accept possession of these bonds or notes (whether electronic or hardcopy) for other than temporary safekeeping, such as overnight or over a weekend. The DO may provide space in the safe or vault for temporary safekeeping by placing the notes or bonds and related documentation in a sealed package indicating custodianship. Provide the contracting officer a receipt for the package. Transfer of the bonds or notes to the FRB is the responsibility of the contracting officer. See Treasury Department Circular 154 for procedures.

100108. Method of Drawing Negotiable Instruments

A. For Deposit to the Credit of the U.S. Treasury. To facilitate Treasury Department identification of the depositing organization (many endorsements are illegible because of light ink, smears, over stamping, etc.), DOs, deputies, agents, and cashiers shall require remitters to make checks and other negotiable instruments payable to the accepting organization, rather than to the Treasury Department. Examples of such inscriptions are: Disbursing Officer, Camp Lejuene NC 28542 or Disbursing Officer, FPO AP 96604-8405. The above are the preferred methods of inscription. Checks received bearing inscription to the Treasury Department should not be returned for reaccomplishment. Similarly, checks made payable to the DO or agent by proper name, or the absence of a ZIP code, does not render an instrument unacceptable. Modify the examples to fit the situation. For example, substitute "A&D Agent" for "Disbursing Officer" if appropriate. Display inscription instructions in strategic locations at cashier cages, commissaries, and other locations where instruments are received. Instruments drawn payable to remitter are acceptable as inscribed, providing the remitter properly endorses them for credit to the U.S. Treasury. Deposit the above negotiable instruments in any FRB or branch or an established and approved general depository to the credit of the U.S. Treasury.

B. For Deposit in Limited Depository. Limited depository accounts (LDAs) are maintained in the name of the DO or agent. Inscriptions should be required similar to the third example in paragraph 100108.A, above. Instruct the remitter not to inscribe instruments payable to the DO or agent by name. Endorsed instruments should be to the credit of the DO or agent (by position).

100109. Endorsements on Negotiable Instruments. Detailed requirements for placing endorsements on negotiable instruments are contained in Chapter 5 of this volume.

1002 ISSUANCE OF RECEIPTS FOR COLLECTIONS

100201. Turning in Funds to DOs

A. Indirect Collections. Individuals (other than DOs, deputies, agents, or cashiers) who receive funds belonging to the United States (including those funds which are to be held in trust) will promptly turn over such funds to their servicing DO or deposit the funds in an authorized general depository. Examples of such individuals are commissary officers, sales officers, property disposal officers, personnel officers, and other officers authorized to receive funds due the United States. These persons are solely responsible for safekeeping of funds in their possession until the funds are deposited or turned over to the DO. The collecting officer shall number documents in sequence by fiscal year. Two copies of each collection voucher (other than the original) signed by the DO, deputy, or agent who receives the funds shall be returned to the collecting officer. Distribute additional copies as required.

B. Direct Collections. When a DO, deputy, agent, or cashier receives a collection directly from the remitter, he or she shall prepare a receipt for the amount collected. The number of copies of the receipt provided to the remitter shall be determined by the servicing DFAS Center. Receipts for payment of bills received by mail in the disbursing office shall not be issued unless requested by the remitter. If a DD Form 1131 is not prepared, use the DD Form 634 (Receipt for Miscellaneous Collections) if a receipt is required. Furnish receipts only for amounts received and verified by actual count. Do not issue receipts "subject to verification" or give or take receipts "in blank."

C. Receipt Acknowledgement. At those locations where a mechanized system is operational, cashiers are authorized to sign receipts in their own name; otherwise DOs, deputies, or agents shall sign receipts for remittances. Signatures are not required when collection vouchers are validated by a cash control machine. Before signing, the cashier or collecting official shall ensure the remittances are authorized collections in the correct amounts. In no instance shall the person accepting the remittance also be responsible for updating the accounts receivable record.

100202. Preparation and Distribution of DD Form 634. DD Form 634 can be used as a receipt document when it is inappropriate to use DD Form 1131 or other type of receipt document.

A. Preparation. DD Form 634 shall be prepared in as many copies as necessary. When preparing the form, DOs shall enter, immediately following the name and SSN of the individual from whom the collection was made, the current duty station of the individual. Where a collection is being effected for more than one item of indebtedness, overpayment, or

under-deduction, a separate DD Form 634 shall be issued for each item in the amount of the particular item. The type of collection, such as Overpayment, or Government Property Lost or Damaged (GPLD), shall be entered in the Type of Collection block in the upper right corner. When a collection voucher number is entered on DD Form 634, as in the case of copies sent to other fiscal installations, the number shall be the same collection voucher number assigned to the DD Form 1131 on which the DD Form 634 is scheduled. Figure 10-1 shows a properly completed DD Form 634.

B. Distribution

1. Original. Provide the original to remitter.
2. First copy. The first copy shall be kept in the disbursing office's files.
3. Other copies. Distribute other copies as required.

100203. Collections by Deductions from Vouchers. Give receipts for collections made by deductions from vouchers if requested by the payees or if notices of collection are to be furnished other divisions or activities. Use DD Forms 634 but do not consider them as subvouchers.

100204. Collections by Agent Officers

A. Collections Received by Agents. Agents receipt for funds as agents of their appointing DO.

B. Proceeds of Sales Received by Agents. When funds are deposited with agents, the agents complete receipts on the original and three copies of the DD Form 1131 as agents of their principal DO, and submit the original and two signed copies of the DD Form 1131, together with supporting documents, with their financial reports to the principal DO. The format for the receipt is shown below. Return one signed copy to the appropriate collecting official as receipt for the funds.

Richard Roe, Lt Col, (Component)

By: _____
(Name and Type of Agent).

1003 RECORDING AND CONTROLLING COLLECTIONS

100301. Pending Payment File. Unless otherwise directed by the supporting DFAS Center, the pending payment file shall be maintained by the applicable functional area using the triplicate copies of uncollected billing documents. The original and duplicate copy shall be sent

to the subscriber. The files shall be arranged in the order most convenient to the individual maintaining the file. The file shall be reconciled to the accounts receivable subsidiary ledgers at least quarterly.

100302. Collection of Accounts Receivable

A. Payment of Bills. When payment is presented to the cashier, a copy of the bill shall be annotated as PAID with date of payment and initials of the cashier. If the original of the bill is presented to the cashier, it shall be stamped or noted PAID with date of payment and initials of the cashier and returned to the remitter. When a receipt is requested, procedures prescribed in paragraph 100202.A, above, for preparing DD Form 634 shall be followed. Cashiers shall accumulate the receipts until the end of each business day and prepare a covering DD Form 1131. Paid copies of bills shall be attached to the DD Form 1131 and sent to the applicable functional area on a daily basis to record the voucher. When mechanized billings are prepared, the responsible functional area should prepare the DD Form 1131 (cash payments) or SF 1080 (payroll deductions) as part of the automated collection posting process.

★ B. Clearance of Component Bills. An individual being transferred from the Component shall notify the appropriate functional area and billing office to ensure that all unpaid telephone bills, utilities, and similar liabilities have been settled. The responsible functional area shall ensure that all pending bills are collected. Adjustment, if required, shall be made by the responsible functional area on a new bill. The old bill shall be marked VOID, attached to the paid copy of the new bill, and the clearance form shall be appropriately completed.

100303. Collections for Other Agencies

A. Identifiable Collections. Upon receipt of an identifiable collection applicable to an account maintained by another fiscal station, a receipt shall be issued, if requested or required, and the transaction processed as a transaction for others (TFO). The DD Form 1131 shall indicate the complete identity of the remitter, account, fiscal station, and appropriate fiscal data.

B. Unidentifiable Collections. When a collection is made for another fiscal station and the reimbursement or collection accounting classification cannot immediately be determined, that collection shall not be processed as a TFO. In this case, the DO shall deposit the collection into deposit fund account **X6875 or the budget clearing account, **F3875. When the correct accounting classification is determined, the DO shall prepare and process an SF 1080 (TFO) to clear the suspense account. The voucher must be supported by complete collection data and must be in the amount of the collection and chargeable to the deposit fund account **F3875. No check shall be issued in payment of the voucher.

★ 100304. Overages. Whenever an overage occurs in the DO's account, do not credit the amount immediately to Treasury Department receipt account Forfeiture of Unclaimed Money and Property, **R1060. Instead, process the overage as a collection for credit to budget clearing

account **F3875 no later than the business day after the overage occurs. Voucher any overages which occur on the as-of-date of the SF 1219 on the same date the overage occurs. Make a careful review to determine the source of the overage, with particular regard to collections and returns from agents. To the extent reasons for overages are explained and there is reasonable assurance that no claim will be made against such funds, credit may be made directly to **R1060.

100305. Collection Voucher Control Log. The DD Form 2659 (Voucher Control Log) shall be maintained daily for each collection voucher received or prepared in the disbursing office. The DO shall determine the functional areas and assign an individual or individuals the responsibility for maintaining the DD Form 2659. The DO should require DD Form 2659 to be prepared daily by each functional area and/or branch disbursing office when these areas or offices are assigned a separate series of voucher numbers. The log shall contain: the collection voucher number; identification of the remitter (individual's name or organization making the remittance); amount; and form of remittance (cash, check, EFT, etc.). An example of DD Form 2659 is provided as figure 10-2.

100306. Collections Overpaid or Underpaid by \$10 or Less. If a remitter overpays the amount due by \$10 or less, collect the overpayment into receipt account **1099, Fines, Penalties, and Forfeitures. Do not refund to the remitter unless a refund is specifically requested by the remitter. Similarly, if the amount due from a payee is underpaid by \$10 or less, do not try to collect the underpayment. In this instance, the DO shall prepare an SF 1080 to charge the DoD Component's Operations and Maintenance (O&M) account and credit the applicable appropriation (or receivable) for the amount of the underpayment.

100307. Collections Made at Agencies Not Having a Disbursing Office. When collections are by other agencies not co-located with or supported by a disbursing office, the following procedures shall be used.

A. Collection Control Log. A control log shall be used to control the collections from the time they are received until such time as they are transmitted to the disbursing office. At a minimum, the control log will show: the date the collection was received; remitter; check or money order number; collection voucher number; amount of collection; and the date transmitted to the disbursing office.

B. Collection Voucher. The collection voucher shall be prepared the same day the collection is received by the DoD Component.

★ C. Safeguarding the Collection. The collection and supporting documents shall be safeguarded consistent with standard security regulations prescribed in subparagraph 030304.B of this volume.

1004 DOCUMENTING AND PROCESSING OF COLLECTIONS

100401. Verification of Funds Received

A. Verification. Applicable functional areas have complete responsibility for assuring that collections are proper, that vouchers have complete and accurate data, and that the right number of voucher copies are prepared. When the disbursing office detects a voucher was improperly prepared, the voucher shall be returned to the functional area for correction.

B. Funds Deposited by Collecting Officers. Where funds have been deposited directly to a general depositary by the collecting officer, the collection shall be processed in the DO's account upon receipt of the collection voucher (or receipts for collection). Verification of receipt of the funds with related collection vouchers shall be accomplished from a copy of the SF 215. If the confirmed copy of the SF 215 has not been provided by the depositor (collecting officer), the collecting officer shall be notified to furnish the confirmed copy of the SF 215 upon receipt.

★ C. Purpose of Collection. The purpose of a collection may be included on the collection voucher or attached to it. The purpose of a collection may be a contract lease, applicable regulation, schedule, cost list, or any other document which authorizes the collection. Where a sales contract is involved, the reference information shall include a citation to the contract. Any collection received by a DO, for which the purpose cannot be determined, shall be accepted and accounted for in the **F3875, budget clearing account (Suspense) or the **X6875 Deposit Fund Account, as appropriate. Deposits in these accounts shall not be held any longer than necessary. The account shall be reviewed at frequent intervals, not less frequently than every 3 months, to determine whether proper disposition of funds can be made. During the closing month of the fiscal year, efforts shall be made to clear balances in these accounts. For amounts less than \$100, if a determination is made that further attempts to identify the proper account is not cost effective, such amounts may be credited to the Treasury Miscellaneous Receipt Account (3210) on a case-by-case basis. This does not constitute authority to ignore identification of the proper account. It only provides the authority to transfer amounts of \$100 or less after documented attempts have been made to identify the proper account.

D. Signatures. Signatures and other handwritten information becoming an integral part of original vouchers shall be written in permanent, non-erasable ink.

100402. Vouchers for Collections by Other than Disbursing and Agent Officers. Collections received by sales and other collecting officials shall be accounted for on the proper forms.

A. DD Form 707 (Report of Deposit). Commissary officials shall prepare and submit the DD Form 707 to the DO under whose DSSN deposits are made. For example, if the commissary deposits daily sales receipts to the credit of the DO, DFAS-Columbus Center, the DD Form 707 shall be prepared and submitted to the DO, DFAS-Columbus Center for each day's deposit(s). See figure 10-3.

B. DD Form 1131 (Cash Collection Voucher). These forms are submitted when the governing directives do not prescribe specific collection vouchers. They may serve as cover vouchers for other receipt forms.

100403. Preparation of Documents Used to Transmit Funds

A. Responsibility. Preparation of the forms listed in paragraph 100402, above, is the responsibility of the officer depositing or transmitting the funds to the disbursing office. Except for collections arising from over-the-counter sales (for example, commissaries), each collection document shall contain the name of the remitter, the specific authority for the collection, and sufficient information for the DO to identify the collection and determine that it is the correct amount. It also is the responsibility of the officer preparing the form to furnish the complete accounting classification as prescribed, fiscal code, including the DSSN of the station maintaining the appropriation cited, and the country code if the collection is made in an overseas area.

B. Preparation and Distribution. At a minimum, each collection voucher shall be prepared in duplicate. Additional copies will be prepared and provided as required.

100404. Collection Documents Prepared in the Disbursing and Agent Offices

A. SF 1098 (Schedule of Canceled or Undelivered Checks). The SF 1098 collects the proceeds of an available canceled Treasury check.

B. DD Form 1131. Use this form to schedule receipts of cash collections when other forms are not prescribed. The DD Form 1131 also serves as a cover voucher for supporting receipts (DD Forms 634).

C. DD Form 634 (Receipt for Miscellaneous Collections). The DD Form 634 may be issued as a receipt for those cash collections received directly by the DO. This form is not a collection voucher even in those specifically authorized instances when it is used to transmit collections to a DO. The DD Form 634 shall be used as the source of information for scheduling the cash collection on DD Form 1131.

D. SF 1096 (Schedule of Voucher Deductions). The SF 1096 is used as a collection voucher for off-setting deductions on related disbursement vouchers.

E. SF 1080 (Voucher for Transfer Between Appropriations and/or Funds). The SF 1080 transfers amounts between appropriations and/or funds.

F. SF 1081 (Voucher and Schedule of Withdrawals and Credits). Similar to SF 1080, this form also transfers amounts between appropriations or funds and can be used for corrections of charges and credits.

G. DD Form 139 (Pay Adjustment Authorization). The DD Form 139 is used to collect by salary offset.

100405. Numbering Collection Vouchers. Collection voucher numbers shall be assigned consecutively starting at the beginning of each fiscal year. Voucher numbers assigned to collection vouchers shall be identified with the disbursing office and not the disbursing officer. The servicing DFAS Center or OPLOC to whom financial reports are submitted will provide the DO with instructions for numbering vouchers.

100406. Preparation and Distribution of DD Form 1131. The blocks of the DD Form 1131 shall be completed as prescribed in this paragraph. See figure 10-4.

A. Disbursing Office Collection Voucher Number. The applicable functional area shall enter the voucher number in this block.

B. Receiving Office Collection Voucher Number. Use of this block is optional. If the receiving official controls collections by locally assigned number, the receiving official shall enter the number in this block.

C. Receiving Office

1. Activity. When collections are made by other than the disbursing office cashier, the receiving official shall enter the name and location of such activity. Leave blank when collections are made by the disbursing office cashier.

2. Received and Forwarded By. Enter the printed name, title, and signature of the designated receiving official. If a debtor turns in the remittance to the DO or cashier personally and the Receiving Office block is completed for reference, no signature is required. Normally, this block is left blank when collections are made by the disbursing office cashier.

D. Date. Enter date of the last collection shown on the DD Form 1131 or the date the DD Form 1131 is prepared by the collection official.

E. Disbursing Office. Enter the name and location of the disbursing activity and the printed name, title, and signature of DO, in the applicable blocks. Signature is not required when the DD Form 1131 is validated by a cash control machine.

F. Disbursing Station Symbol Number. Enter the four-digit DSSN.

G. Date Received Subject to Collection. This is the primary voucher date assigned by the functional area. It is the DO or agent accountability date.

H. Period: From -- To. Enter the specific period encompassing collections reported on the form. For example: the date of the first collection on the voucher is the "From" date; the date of the last collection on the voucher is the "To" date. If all collections on the voucher are applicable to a specifically designated period, such as an accounting month, enter inclusive dates (1 Mar XX to 31 Mar XX, for example). If all collections are made on a single date or no specifically designated period is applicable, leave the "From -- To" blocks blank. Dates may be entered by the receiving official or disbursing office, as applicable.

I. Date Received. Enter the date cash (or negotiable instruments) is received from a remitter, or other date of incident (for example, date money found on base). If the DD Form 1131 is being used as a cover voucher and not all collections were made on the same day, enter "various."

J. Name of Remitter/Description of Remittance. Enter the name of the individual remitter or company. Except for collections from over-the-counter sales (i.e., commissaries) and locally billed items (telephone service, housing, etc.), show each remitter's name and SSN if collection is received from a military member or civilian employee. If a name is not applicable (for example, money found on base), enter a description of the remittance. If the DD Form 1131 is being used as a cover voucher, enter "See Attached" and attach a copy of each DD Form 634 to the original and duplicate of the DD Form 1131.

K. Detailed Description of Purpose for Which Collections Were Received. Enter the purpose for collection. If information entered in the name of remitter and description of remittance block satisfactorily describes the purpose of the collection, leave blank.

L. Amount. Enter the individual amounts collected from each remitter or each incident by accounting classification. When the DD Form 1131 is used as a cover voucher, enter overall totals by accounting classification.

M. Accounting Classification. Enter the complete accounting classification for the amount of each collection. If the DD Form 1131 is being used as a cover voucher, enter the accounting classification for each amount included.

N. Distribution. The original DD Form 1131 shall be forwarded as directed in paragraph 100409, below. Provide a duplicate to the remitter and retain a copy for the disbursing office. Extra copies shall be prepared as required.

100407. SF 1096, Schedule of Voucher Deductions. Schedule collections deducted from disbursement vouchers on SFs 1096 except when the disbursement voucher is used for both disbursement and collection. Examples of exceptions are: civilian payroll deductions, civilian indebtedness to hospitals, no check drawn SFs 1080, SFs 1081, and military payroll deductions. Functional areas assign collection voucher numbers for voucher deductions and process the SFs 1096. The functional areas also enter the voucher numbers assigned to the SFs 1096 on the related disbursement vouchers. Also, they include voucher deductions shown on voucher copies

received from other functional areas on the SFs 1096 of the receiving functional areas. In all cases, copies of vouchers or properly supported notifications shall be forwarded to the functional areas accountable for the collections.

100408. Legibility of Carbon Copies. DOs shall take extra precaution to ensure that all carbon copies of vouchers prepared for distribution are completely legible.

100409. Routing Original Collection Vouchers. The disbursing division of each disbursing office shall route the original collection vouchers to the servicing DFAS Center as prescribed in Chapter 20 of this volume.

100410. Signature on Collection Vouchers. DOs, deputies, or agent officers shall sign the original collection vouchers. Signing shall not be delegated or reassigned. Officers using cash control machines or mechanized equipment to validate vouchers are exempted from the signatory requirements of this paragraph (except when DD Form 1131 is being processed for further action by a disbursing office not co-located with the processing disbursing office) provided the machines, and control thereof, meet minimum security and audit requirements. Keys for cash control machines shall at all times remain under the control and security of the DO or a deputy. The DO shall maintain controls to ensure that all funds received by the cashier are properly accounted for. Copies of the vouchers bearing initials of the cashier shall be held in the custody of the DO or the deputy. In making daily settlement with the cashier at the end of the business day, these voucher copies shall be used to determine whether or not the amount of the collection reported by the cashier was proper. The receiving officer's signature is required, where applicable as prescribed in paragraph 100406.C, above. Transfer, cancellation, or adjustment vouchers (SFs 1081, 1096, 1098, etc.) may be signed by personnel appointed in writing by the DO. When the same voucher is used as both a disbursement and collection voucher, the disbursement is considered the original and subject to the signature requirements above. The collection side (or portion) is not considered an original voucher and does not require a signature.

1005 UNVOUCHERED COLLECTIONS

100501. Accountability of Unvouchered Collections. DO's may record unvouchered collections on the DD Form 2657 as an increase to line 4.2a (or 6.2a) but not as an increase to line 4.1b, 4.1d, or 4.1e. The corresponding entry on the DD Form 2657 is normally a decrease to lines 6.5, 7.2a, 7.2b, 7.3, 7.4, 9.2a, 9.2b or 9.3. These transactions are documented for record purposes on OF 1017-G.

CHAPTER 11

DISBURSEMENTS1101 INTRODUCTION

★ 110101. Description of a Disbursement. In most instances, a disbursement is a payment to an individual or organization for goods furnished or services rendered. In some cases, a disbursement is made solely to transfer funds from one appropriation or fund to another. This is a disbursement made by voucher deduction or by "no check drawn" transactions involving SFs 1080 or 1081 and no payment by check or cash. Disbursements also may be made via Treasury's On-Line Payment and Collection (OPAC) System. See Chapter 24 of this volume for detailed information regarding the OPAC system. A disbursement voucher may also be a combination of a payment and a collection by voucher deduction; for example, a civilian payroll voucher where deductions for Federal tax, U.S. savings bonds, and civil service retirement are credited to the appropriate accounts and the net pay is disbursed to the payee. All disbursements must be supported by one of the types of formal disbursement vouchers. Occasionally, disbursements are made on formal vouchers, but are not immediately charged to an appropriation or fund. These payments are referred to as deferred charges - vouchered items. A negative disbursement is, by definition, a refund. Disbursements of Foreign Military Sales funds require the request and receipt of expenditure authority prior to making a disbursement. Consult Chapter 4, Volume 15 of this Regulation for specific guidance.

110102. Disbursement Vouchers - General

★ A. Authority. The disbursement voucher is the authority for DOs to make payments of government obligations and are the source documents for liquidation of obligations. It is imperative that disbursement vouchers contain complete and accurate data and that only forms approved by the Comptroller General of the United States are used. Contents of disbursement vouchers and supporting documents may vary slightly depending on the type of disbursement and form used. Signatures and other information becoming an integral part of original vouchers must be written in permanent, non-erasable ink. Handwritten information must be legible. Corrections to vouchers are lined out once in ink or by typewriter and are not obliterated. The correction is initialed by the person making the correction. Voucher corrections cannot be made by disbursing section personnel. Do not use white out ink or correction tape since these methods aren't permanent. A legible copy of a signed travel voucher(s) and its supporting documents received, in lieu of the original signed voucher(s) and supporting documents, should be accepted for processing and payment as if it were the original. This includes travel vouchers and supporting documents received by facsimile transmission.

B. Essential Data. To be recognized as a valid transaction, all disbursement vouchers shall contain the minimum essential data shown in the following subparagraphs.

1. Voucher Heading and Date. The voucher heading and date area includes the complete name and mailing address of the paying disbursing office, the date the

voucher is prepared, the disbursing office voucher number, and the information required in the "Paid By" or "Brief" block.

2. Accounting Classification. Each charge to an appropriation or fund shall be coded with a complete accounting classification and country code, when applicable. If the space available for the accounting classification data is insufficient, list the information on a continuation form. The type of payment or the servicing DFAS Center shall dictate acceptable continuation forms. Titles of appropriation or deposit fund accounts, either in full or abbreviated form, shall not be shown on disbursement vouchers. Entering extraneous information, such as voucher collection data, results in operational delays and may cause erroneous information to be entered in accounting records and reports. More than one appropriation or deposit fund account or more than one subsidiary account may be charged on the same disbursement voucher. Where two or more subsidiary accounts of the same appropriation are cited, they shall be grouped by appropriation. On foreign disbursements, show the amount of foreign currency and conversion rate to U.S. dollars for each accounting classification cited. Entries in accounting records are always in U. S. dollars.

3. Amount to be Disbursed. The total amount to be disbursed shall be shown on the disbursement voucher in conjunction with the related accounting classification. The amount shall not be changed or altered in any way.

4. Method of Disbursement. In the space provided on the disbursement voucher, annotate whether the disbursement was made by EFT, Treasury check, cash, or as a no check/voucher for transfer.

5. Payee. The payee listed on each disbursement voucher shall be the individual or organization entitled to the proceeds of the payment.

★ C. Voucher Storage. Original paid vouchers shall be safeguarded consistent with standard security regulations prescribed in subparagraph 030305.B of this volume.

1102 PROCESSING DISBURSEMENT VOUCHERS

110201. Numbering Disbursement Vouchers. Disbursement voucher numbers shall be assigned consecutively starting at the beginning of each fiscal year. Voucher numbers assigned to disbursement vouchers shall be identified with the disbursing office and not the disbursing officer. The servicing DFAS Center or FIPC to whom financial reports are submitted will provide the DO with instructions for numbering vouchers.

110202. Disbursement Voucher Control Log. The DD Form 2659 (Voucher Control Log) shall be maintained daily for each disbursement voucher received or prepared in the disbursing office. The DO shall determine the functional areas and assign an individual or individuals the responsibility for maintaining the DD Form 2659. The DO should require personnel to prepare the DD Form 2659 daily in each functional area and/or branch disbursing office when these areas or offices are assigned a separate series of voucher numbers. The log shall contain: the

disbursement voucher number; name of the payee; amount; and form of payment (cash, check, EFT, etc.). An example of DD Form 2659 is shown at figure 11-1.

110203. Certification of Vouchers. The applicable functional areas have complete responsibility for assuring that payments are proper, that vouchers have complete and accurate data, that the right number of voucher copies are prepared, and that certifying officer signatures on vouchers prepared (and certified) outside of the disbursing office are authentic. Accordingly, the appropriate functional area shall maintain a file of approved DD Forms 577 for any certifying officers working outside the disbursing office. When the disbursing division detects a voucher was improperly prepared, the voucher shall be returned to the functional area for correction. The disbursing division has complete responsibility for authenticating certifying officer signatures on vouchers prepared within the disbursing office. The disbursing division verification is made against the list of personnel designated as disbursing office certifying officers by the DO. A request for payment of a voucher on behalf of another DoD Component disbursing office shall be accompanied by a copy of a certifying officer appointment letter or a DD Form 577. Unless these payments are recurring, signature substantiation need not be maintained on file in the disbursing division, but may be included as supporting documentation to the original voucher. DOs may, at their option, waive the above general rules and require that the disbursing division verify the authenticity of all certifying officer signatures on vouchers by comparing them to the disbursing office list of certifying officer signatures or DD Forms 577 from within or outside the disbursing office. Accordingly, the disbursing division would maintain the disbursing office file of all DD Forms 577 and disbursing office certifying officer appointment letters. An example of DD Form 577 is shown at figure 2-4.

110204. Identification of Payees. The accountable individual making cash or check payments shall positively identify each payee. If the payee is not known personally, the accountable individual making the payment shall examine an appropriate identification card which includes both the payee's picture and signature. A comparison of the payee's signature shall be made with that appearing on the identification card. For military personnel, the DD Form 2 (Armed Forces Identification Card) should be used. Other means of identification are a driver's license or other standard identification normally acceptable in the business community for cashing checks or bonds. The responsibility for identification of the payee shall not be delegated.

110205. Cash Payment Vouchers. Responsible functional areas send or deliver these vouchers to the cashier area. Where the distance between functional area and cashier area makes this impractical, vouchers may be hand carried by the payee provided the total amount of the voucher is inscribed in words on the bottom of the voucher (for example, sixty dollars and twenty cents). Space words or enter lines in a manner to preclude alteration by insertion of additional words, particularly at beginning of writing (for example, altering by inserting one hundred immediately preceding sixty dollars and twenty cents).

A. Cashier Responsibilities. On payment vouchers, the cashier shall verify that the voucher deduction block, if used, contains an appropriation and that the total to be paid shows decrease of any deductions, if applicable. The cashiers shall initial the original voucher or use the cash control machine to identify the specific cashier who made the payment.

1. Payee Signature and Identification. The cashier must obtain the payee's signature in the space provided, or in the case of multiple payments, on the sub-voucher or supporting documentation. The payee must sign for receipt of cash using indelible ink. Facsimile signatures and signatures in pencil are unacceptable. When signatures of payees are on a sub-voucher or supporting documentation, annotate the "payee signature block" on the cover voucher with the words "See attached". Payments by cash shall not be made until positive identification of the payee has been established. The signature obtained on vouchers shall be compared to signatures on identification cards or other acceptable forms of identification. The form of the signature shall be the same as the name of the payee as shown on the voucher. However, in the signature, the first name shall be used with additional initials, if any, followed by the surname except as explained below.

a. Unable to Write. If unable to write, the payee may indicate receipt of payment by signing the mark "X". In such instances, the signing must be witnessed by a disinterested party and the disinterested party's address must be given. If the payee is physically unable to write and asks someone to sign the payee's name in the payee's presence, such signature is regarded as a signing by the payee. A physician's certificate about the affliction should be filed with the original disbursement voucher. The signing of the payee's name by another person must be certified by a disinterested witness.

b. Mental Disability. A payee with a mental disability that precludes an ability to comprehend a signature cannot be paid until a committee or guardian has been appointed. Certified copies of court papers appointing a guardian shall be filed with the original disbursement voucher. The guardian shall sign the name of the payee, followed by his or her own signature as guardian. Future payments shall make reference to the first disbursement voucher by disbursing officer voucher number and date paid. If the payee is in an asylum, the superintendent's certificate that the payee was alive at the time payment was due shall be filed with each disbursement voucher.

2. Voucher Validation. The voucher is validated by completing the Paid By (or Brief) block with the paying office location, DSSN, and business date of payment. Use a typewriter or rubber stamp for this purpose. If the disbursing office has a classified address, do not show the geographical location. Examples of the Paid By block are shown in figure 11-2.

110206. Release of Cash. Cash payments must be picked up and the voucher signed by the individual who is entitled to the payment (the payee). The DO, deputy, accounting and disbursing agent, or disbursing agent may personally make cash payments to high ranking officers or civilian personnel or other personnel for whom waiting in line at a cashier's cage would be considered a discourtesy, awkward, or otherwise inappropriate. Otherwise, the DO or agent may appoint an aide, secretary, driver, etc., as a paying agent for purposes of making a cash payment to these payees. Refer to Chapter 2 of this volume for appointment of paying agents. The DD Form 1081 shall be used to document the transfer of cash to the paying agent. The appointed paying agent shall sign the DD Form 1081 to indicate receipt of the cash and voucher. Upon return of the properly signed payment voucher to the disbursing division, the DD Form 1081 may be destroyed.

110207. Check Disbursement Vouchers, Manual Voucher Processing. Responsible functional areas shall forward these vouchers to the check issuing area for preparation of the checks. The check issuing area shall enter the check number on the voucher in the space provided. Normally check numbers are not entered on duplicate copies of vouchers except for payroll and group travel vouchers. When payment is made by check and the disbursement is supported by an SF 1034, the instructions in the following subparagraphs apply.

A. Checks Drawn on the U.S. Treasury. For payments by check drawn on the U.S. Treasury, enter the check number in the block near the bottom of the form titled "Check Number on Account of U.S. Treasury."

B. Checks Drawn on LDAs. For payments by checks drawn on LDAs, enter the check number and the name of the limited depositary bank on which drawn in the block near the bottom of the form titled "Check Number On (Name of bank)". For "no check drawn" vouchers, so state.

C. Check Usage. Make checks payable to the payee stated on the disbursement voucher. Disbursement vouchers shall be numbered in numerical sequence with the lowest check used to pay the lowest numbered disbursement voucher or first name on a payroll. Maintaining the series of check numbers and the series of voucher numbers of the related vouchers in unbroken sequence will facilitate check issue auditing and reporting. Multiple payments to the same payee on the same day should be consolidated and paid by one check. Because many losses have been attributed to altering of payee names, addresses, and amounts on checks, the DO shall make certain that the inscribed checks duplicate the voucher information. At the DO's option, this review may be accomplished either before or after the checks are signed. The DO shall ensure appropriate check records that provide control over check writing are completed. Automated systems producing disbursement vouchers must contain edit and validation controls ensuring exact information appearing on the vouchers is passed to the check printer.

D. Paid By. Complete the "Paid By" block as in prescribed in paragraph 110205.A.2, above.

E. Automated Disbursement Vouchers. The entry of a check number on automated disbursement vouchers is not required as long as the voucher processing system is carefully structured and monitored to ensure complete audit trails are maintained between disbursement vouchers and hard copy records.

110208. Disbursements Overpaid or Underpaid by \$10 or Less. If a disbursement to a payee is overpaid by \$10 or less, do not try to collect the overpayment. In this instance, the DO shall prepare an SF 1080 to charge the DoD Component Operations and Maintenance (O&M) account and credit the appropriation charged when the payment was made. Similarly, if a disbursement to a payee is underpaid by \$10 or less, do not issue a supplemental payment unless specifically requested by the payee.

110209. Transmittal of Vouchers and Recording. Deputies, agents, and cashiers shall include payment vouchers on the DD Form 2665, Daily Agent Accountability Summary as

prescribed in Chapter 19 of this volume. At the end of each business day, deputies, agents, and cashiers settle with their DOs or agents, who forward the original vouchers and report copies to the accountability area. If a mid-day return of cash on hand or an additional advance of funds is required, these transactions shall be accomplished using DD Form 1081. Functional areas forward transfer and correction vouchers and other disbursement vouchers not for payment by cashiers directly to the accountability area. Voucher copies are returned to the accountable functional area.

110210. Certification Restrictions. The supervisor of the disbursing division, even if he or she is also a deputy, should not routinely certify vouchers for payment. For convenience, however, the supervisor of the disbursing division may certify cover vouchers supported with proper, certified sub-vouchers. In those cases, the approving official of the supporting documentation must be other than the cover voucher certifier. If an emergency exists and the deputy who is also supervisor of the disbursing division must certify a voucher for payment not supported with certified sub-vouchers, the DO or another deputy shall date and sign somewhere on the voucher a statement similar to the following: "Payment approved by Lt John Doe, Disbursing Officer." To assure adequate internal control, the supervisor of the disbursing division or other disbursing division personnel should not have the opportunity to input data into the computerized accounting system.

110211. Documentation Supporting Delivery of Payments. Documentation which supports delivery of payments includes a copy of the payment voucher, annotated copies of invoices, or check-stub data with check or cash payments for delivery to payees as prescribed by functional area directives. For travel payments, documentation includes a copy of the travel claim. For vendor payments produced by standard automated accounts payable systems, check-stub data normally is sufficient for vendor accounts receivable posting. If the vendor reports that check-stub data is insufficient for posting needs, a copy of the payment voucher or an annotated invoice should be included with the payment as instructed by the responsible functional area.

110212. Deferred Vouchers. A deferred voucher is any paid voucher that has not been recorded in the accounting system. The usual cause is a paid agent voucher that must be returned to the agent for correction. In addition, agent vouchers that have not yet been examined by the DO may be deferred until this review is completed. Responsible functional areas must take all required actions to clear deferred vouchers promptly. Maintain a chronological record of actions taken, showing for each voucher the date on which clearance is expected. DOs or their deputies shall review those actions each week to make sure that the irregularities causing deferment are corrected without delay. Refer to subparagraph 190205.L of this volume for instructions on reporting deferred vouchers on the DD Form 2657 and the Daily Statement of Accountability.

110213. Classified Payments

A. General. When it is necessary for the DO to make payments that are classified, a covering disbursement voucher shall be prepared as prescribed in this paragraph. Disbursement vouchers covering payments which are classified for security purposes shall not contain information which requires a security classification. The original and all copies of such dis-

bursement vouchers shall contain only the: name and address of the payee; amount; date of payment; complete accounting data; voucher number; check number; DO's name; DSSN; and, disbursing office payment data in the "Paid By" (or brief) block. In the case of payment under classified contracts, the contracts should contain instructions requiring the supplier to limit information on invoices so that supplies or services may be identified only by reference to the contract. The DO (for collateral classified programs) or the voucher preparing office (for special access programs) shall allow access to classified documents only to those persons who require access for the performance of their official duties (refer to appropriate security regulations, if necessary). Personnel who process classified documents must possess a security clearance level equal to or higher than the documents they process. DOs or voucher preparing offices shall assign duties, such as the preparation of vouchers, so that a minimum number of persons require access to the classified information. Mark and store classified documents following prescribed security regulations.

B. Preparation. When essential supporting documents, invoices, or certificates are classified, they shall not be attached to the original disbursement voucher, but shall be identified by the name of the DO, voucher number, DSSN, and the period of the account. The supporting documents shall be retained at the paying disbursing office (for collateral classified programs) or the voucher preparing office (for special access programs) with other classified material. The original and all copies of the covering disbursement vouchers shall contain only the essential information described above. The portion of the voucher for the description of the articles or services purchased shall contain one of the following statements:

1. For collateral classified programs: "The documents necessary to support this voucher have been retained at the payment site with other classified material in accordance with (insert the applicable security regulation)."

2. For special access programs: "The documents necessary to support this voucher have been retained at the voucher preparing office with other classified material in accordance with (insert the applicable security regulation)."

C. Declassification. Refer to the appropriate security regulations for instructions on downgrading and declassifying, and for reporting classification abuses and improper classifications.

D. Distribution. The original and required copies of the covering disbursement voucher shall be distributed in the normal manner. However, as described above, the classified supporting documents shall not be attached.

110214. Payments from Contingency Funds. The DD Form 281 (Voucher for Emergency or Extraordinary Expense Expenditures) is used to make payments from contingency funds.

A. Preparation. The form itself shall be prepared so as not to require classification. Supporting documents are classified according to their content. Covering disbursement vouchers as described in the preceding paragraph are not prepared.

- B. Transmittal of Vouchers and Recording. See paragraph 110209, above.

110215. Hand-Carrying Disbursement Vouchers

A. Vouchers Prepared Outside the Disbursing Office. Disbursement vouchers prepared outside the disbursing office shall be forwarded to the disbursing division so that the payee does not have access to the voucher.

B. Vouchers Prepared Within the Disbursing Office. The responsible functional area forwards or delivers these vouchers to the cashier area. Where distance between the functional area and cashier section makes this impractical, see 110205, above.

110216. Distribution of Paid Vouchers. The disbursing division of each disbursing office shall forward the original and appropriate number of copies of paid vouchers to the appropriate DFAS Center as prescribed in Chapter 20 of this volume.

1103 DISBURSEMENTS FROM DEPOSIT FUND AND BUDGET CLEARING ACCOUNTS

110301. Disposition of Funds in Deposit Fund Accounts

A. Method of Disposition. Applicable functional areas shall dispose of collections received for deposit fund accounts by one of the methods shown in the following subparagraphs.

1. Payment to Other Individuals or Organizations. The disbursement shall be made on an SF 1034. See figure 11-3.

2. Refund to the Remitter. The disbursement shall be made on an SF 1049. See figure 11-4.

3. Withdrawal for Application to an Appropriation, Receipt Account, or Other Deposit Fund Account. The disbursement and collection shall be made on an SF 1081. Submit the original SF 1081 as the disbursement voucher and a copy as the collection voucher. No check or cash payment is made on the SF 1081. See figure 11-5.

B. Vouchering. Normally more than one deposit fund account is charged on a single disbursement voucher. However, voucher separately those charges to accounts **F0109, Federal Tax Withheld from Payments to Non-resident Aliens, and **X6875.XXXX, Withheld Individual Income and Federal Insurance Contribution Act Taxes.

C. Civilian Pay Deductions. In preparing SFs 1081 for adjustment of deductions from civilian pay, show deposit fund account symbols, and amounts for withheld taxes and savings bonds, on the same SF 1081 containing the necessary information.

D. Withdrawals Involving Foreign Currency. If it is necessary to repay foreign currency deposits at a U.S. dollar equivalent different from that at which deposited, see Chapter 13 of this volume.

110302. Budget Clearing Account **F3875, Suspense

★ A. Disburse Funds. Upon determination of the proper disposition of funds in this account, the amount will normally be disbursed on an SF 1080 or SF 1081. See figures 11-5 and 11-6. The disbursing officer must explain the charges on the SF 1080 or the SF 1081.

B. Disbursements Representing Funds Received for Other Government Agencies. The disbursement voucher shall be prepared to show the officer and agency to receive payment. A check payable to the Department of the Treasury and a copy of the disbursement voucher shall be forwarded to the official of the agency requesting collection, except as stated below.

1. Checks Made Payable to the United States Postal Service. The check and a copy of disbursement voucher shall be forwarded to the Third Assistant Postmaster, Division of Finance, U.S. Postal Service, Washington, DC 20260, if the collection is for credit to a U.S. Postal Service appropriation or receipt account citing departmental prefix "18."

2. Checks Made Payable to Other Government Agencies. If a collection was made for another government agency, and it is impracticable to send the amount to the official or agency, the check and a copy of the voucher shall be forwarded to the Department of Treasury, Chief Disbursing Officer, ATTN: Disbursing Operations Section, P.O. Box 37067, Washington, DC 20013. To facilitate handling, the check shall be accompanied by a: DD Form 1131; transmittal letter showing the source and reason for collection; and account symbol and title of the agency's funds for which the collection was made. Disbursements shall not be delayed and, when practicable, the check shall be forwarded on the same day that collection was made.

C. Deposits Representing Collections for Unofficial Telegraph and Telephone Service. Amounts representing federal taxes for unofficial telegraph and telephone services shall be disbursed to the appropriate District Director, Internal Revenue Service.

110303. Overages

A. Disbursement Action. If it is determined that an overage should not have been accounted for as a collection, disburse the overage on an SF 1049 made payable to Adjustments. The SF 1049 shall be prepared by the responsible functional area. Do not issue a check or make a cash payment for this voucher. This action reverses the erroneous collection and allows the funds to be accounted for in the proper manner.

B. Adjustments. If it is discovered that the amount should have been reported as a collection under an accounting classification other than **X6875, as in the case of a cash collection from a sales official, make the adjustment by requiring the responsible functional area to prepare an SF 1081 charging **X6875 and crediting the proper appropriation or fund.

C. Removal. After every reasonable effort to discover the source and disposition of the funds has proved unsuccessful, prepare an SF 1081 to remove the amount from deposit fund **X6875 and credit to Forfeitures of Unclaimed Money and Property, **R1060.

1104 PAYMENTS IN SUPPORT OF ADVANCE PAYMENT POOL AGREEMENTS

110401. General. Advance payments are sometimes used for financing the performance of more than one contract. This is accomplished under a single advance-payment agreement called an advance-payment pool agreement. Advance-payment pool agreements are often used for the financing of cost-type contracts with nonprofit educational or research institutions for experimental, or research and developmental work, when several contracts or a series of contracts require financing by advance payments. More than one agency or department may have their funds cited on contracts which are part of the pool agreement. When more than one contract is involved in the pool agreement, one or more of the contracts is designated as the contract to which the advance payments are applied. This is normally a large dollar-value contract. Advance payments will be handled in accordance with current procedures. Revised procedures will be issued upon completion of a review being conducted by the DoD Contract Finance Committee. (Refer to Volume 10 of this regulation for specific details.)

1105 INTERAGENCY DISBURSING SUPPORT

The Disbursing and Cash Management Activity, located at the DFAS-Kansas City Center, is responsible for coordinating all disbursing matters relating to interagency disbursing support agreements. For example, in October 1993, the Department of State (DoS) was given payment approval authority for various types of disbursements. Any disbursements presented to the DoS which are not included in the approved payment listing will not be processed by the DoS. In order for unlisted payments to be accepted and processed by the DoS the disbursement document must be accompanied by a properly executed DD Form 577 (Signature Card).

★1106 LARGE DISBURSEMENTS

110601. Reporting Large Disbursements. Since the Treasury Financial Management Service (FMS) solely is responsible for the management of the government's daily cash position, disbursement transactions by check or electronic fund transfer (EFT) affecting the cash position shall be made known to the FMS in advance of the time of actual disbursement. DOs disbursing \$50 million or more in a single transaction, or in multiple transactions of a common nature shall report to FMS the following information at least two business days prior to the payment date. For example, if the DO issues 350 various vendor payments totaling \$50 million or more on the same day or issues a payroll totaling \$50 million or more on one day, a report to the Treasury is required. If a disbursement of over \$500 million is anticipated, a minimum of five business days advance notice is required. When specific disbursement information has not been finalized, inform FMS daily (by 9:30 a.m. eastern time) of approximate amount(s) and approximate date(s). Information on large disbursements should be reported by facsimile transmission (FAX) to FMS at (202) 874-9945 or (202) 874-9984 using FMS Form 187, Advance Notice of Large Deposits or Payments of

\$50 Million or More. If the report is provided to FMS on other than FMS Form 187, at a minimum the report shall contain:

- A. Name and address of the DoD Component (e.g., Navy);
- B. Name and telephone number of disbursing officer;
- C. Disbursing station symbol number (DSSN);
- D. Appropriation or fund account charged (minimum of six digits, with the first two identifying the department);
- E. Description of transaction;
- F. Transaction settlement date;
- G. Amount of the disbursement;
- H. Payment mechanism (wire transfer or check);
- I. Check number for check payments;
- J. Payee name and address.

A copy of the report shall be retained with the DO's monthly retained financial records.

110602. U.S. Military Electronic Fund Transfer (EFT) Payroll. Defense Finance and Accounting Service (DFAS) Centers are required to report in advance to FMS all military pay and all military retiree pay made by EFT for each payroll reporting period. Pay totals should be reported as far in advance of the pay date as possible, however, a minimum of two business days advance notice is required.

A. U.S. Military Pay. U.S. military pay includes the following pay classifications: active duty pay, reserve pay, and cadet pay, active salary allotments, active blanket pay, and voluntary separation incentives. Active duty payments usually occur on the 1st and the 15th calendar days of each month. If the 1st or 15th fall on a weekend or a holiday, the payment will be made on the prior workday. Military pay should be reported by facsimile transmission (FAX) to FMS at (202) 874-9945 or (202) 874-9984 using FMS Form 188 (Military Report for Treasury Cash Forecasting, Advance Reporting of U.S. Military Pay).

B. U.S. Military Retiree Pay. U.S. military retiree pay includes the following pay classification: retired pay, retired allotments, retired annuities, and retired blanket pay. These payments usually occur on the 1st calendar day of the month. If the 1st falls on a weekend or a holiday, the payment will be made on the next workday. Military retiree pay should be reported by facsimile transmission (FAX) to FMS at (202) 874-9945 or (202) 874-9984 using FMS Form 190, Military Report for Treasury Cash Forecasting, Advance Reporting of U.S. Military Retiree Pay.

C. Data to be Reported. If the report for military pay or military retiree pay is provided to FMS on other than FMS Form 188 or FMS Form 190 (as appropriate for the type of pay being reported), at a minimum, the report shall contain:

1. Defense Finance and Accounting Service Center location;
2. Disbursing station symbol number (DSSN);
3. Name and telephone number of contact (or disbursing officer);
4. Name of Federal Reserve bank location where pay files are transmitted;
5. Name of U.S. Military branch (e.g., Navy);
6. Military pay classification;
7. Pay date;
8. Pay amount for each classification;
9. Total pay amount.

A copy of each report shall be retained with the DO's monthly retained financial records.

110603. Electronic Funds Transfer (EFT) Vendor Payments. All DFAS Center and other DoD Component installations that make EFT payments to vendors are required to report daily the following information to FMS. Information on EFT vendor payments should be reported by facsimile transmission (FAX) to FMS at (202) 874-9945 or (202) 874-9984 using FMS Form 189, Defense Report for Treasury Cash Forecasting, Advance Reporting of Defense Department Payments to Vendors. If the report is provided to FMS on other than FMS Form 189, at a minimum, the report shall contain:

- A. DFAS Center or other Defense location;
- B. Disbursing station symbol number (DSSN);
- C. Name and telephone number of primary and alternate contact;
- D. Federal Reserve bank location of transmitted payment files;
- E. Date payment files are transmitted;
- F. Effective date of payment (transaction settlement date);

G. Total dollar amount of the EFT file transmitted.

A copy of each report shall be retained with the DO's monthly retained financial records.

★1107 GOVERNMENT PURCHASE CARD PAYMENTS

Upon receipt of approved invoices for purchase card transactions, authorized in accordance with the DoDFMR, Volume 10, Chapter 12, the DO of the designated paying office will ensure that payment is made in accordance with this volume and the Prompt Payment Act deadlines.

 International Organizations

1203 Conversion Regulations

Figure 12-1. Sample DD Form 2664 (Currency Exchange Record)

CHAPTER 12

FOREIGN DISBURSING OPERATIONS1201 MONETARY REGULATIONS

★ 120101. Use of U.S. Currency. With the exception of areas where U.S. diplomatic or financial relations make the use of U.S. dollars inadvisable, U.S. currency or Treasury checks shall be the only medium of exchange for: pay of military and civilian personnel, except for amounts acceptable in local currency by payees and as required to be paid in local currency by this section; allowances, per diem, and travel expenses, and purchases from appropriated and non-appropriated fund activities located in or visiting the foreign currency area.

120102. Reimbursable Expenses. Claims for reimbursement of personal funds expended on official business shall be paid in the foreign currency expended by the claimant, if available to the DO and acceptable to the claimant. If the claim is to be paid in U.S. dollars as authorized or required at the point of settlement, the claimant shall be required to state on the voucher the rate at which the expended foreign currency was acquired and the source from which acquired. The U.S. dollar equivalent shall be computed at the rate the claimant acquired the currency. If two or more purchases were involved, the U.S. dollar equivalent shall be determined on a "first-in-first-out" basis. For example: The claimant purchased 5,000 Malaysian Riggitt in May 1991 at the rate of 2.7875 to one U.S. dollar and 3,000 in June 1991 at 2.7795. Expenses of 6,000 Riggitt were incurred in July 1991. The U.S. dollar reimbursement is \$2,153.50 $[5,000 / 2.7875 = \$1,793.72 + 1,000 / 2.7795 = \$359.78]$. If the claimant had incurred expenses of only 4,000 Riggitt, reimbursement would be \$1,434.98 $[4,000 / 2.7875 = \$1,434.98]$.

120103. Currency Custody Accounts. Currency custody accounts are arrangements approved by the Treasury Department whereby safety stocks of U.S. currency on the books of overseas military central funding officers are physically held in the government's contractor-operated military banking facilities (MBFs). This 100 percent cash reserve serves as MBF vault cash, with daily settlement between the MBF operator and central funding officer. Absent ready access to the Federal Reserve System (FRS), this mechanism assures the availability of U.S. currency to support the dollar economy exported in support of U.S. Forces stationed overseas. The balance held in the custody account is reported on line 6.4 of both the DD Form 2657 (Daily Statement of Accountability) and the SF 1219 (Statement of Accountability) as prescribed in Chapter 19 of this volume.

120104. Use of Foreign Currency

A. General. In areas where U.S. currency is prohibited or where diplomatic or financial considerations make its use inadvisable, the senior commander shall consult with other U.S. military commanders and State Department representatives in the area to determine the local government's foreign currency control regulations. The commander then shall issue instructions to conform to State Department procedures and local government foreign currency

control regulations and, in addition, incorporate the following requirements to the extent necessary to comply with local conditions: foreign currency shall be used for all payments to U.S. personnel; foreign currency shall be used for all payments to vendors located in the area; foreign currency held by U.S. personnel shall not be repurchased except as outlined in section 1203 of this chapter; and U.S. dollar negotiable instruments shall not be cashed or issued without the written permission of the commander and then only in amounts required for cash purchases at U.S. Government authorized facilities (e.g., commissaries, snack bars, theater or post offices) or for immediate travel to an area where currency restrictions are not in effect.

★ B. Basic Pay, Special and Incentive Pays, and Allowances. Basic pay, special and incentive pays, and allowances (subsistence, and quarters) are expressed in U.S. dollars by statute and shall be paid in U.S. dollars or in military payment certificates (MPC), as appropriate, when such personnel are stationed in overseas areas. Salaries and differentials paid to U.S. citizen civilian personnel, similarly situated, paid in fulfillment of U.S. contractual or statutory obligations that are expressed in U.S. dollars shall be paid in U.S. dollars or MPC, as appropriate. Personnel shall be encouraged to use authorized exchange facilities for converting U.S. dollars to local foreign currencies needed to liquidate personal obligations. Such conversions shall be made with the understanding that local foreign currencies may be converted back to U.S. dollars only as authorized in section 1203 of this chapter. If foreign currency is being paid, the DO shall make payment on the basis of the MBF sell rate. If there is no in-country MBF, the DO shall make the foreign currency payment on the basis of the prevailing exchange rate.

★ C. Payments in Foreign Currency. If a foreign currency payment needs to be made and the DO has a limited depositary account (LDA) in that particular currency, the payment may readily be made by an LDA check. If the DO does not have an LDA in the particular foreign currency to be paid, but is located within the country to which the required currency is indigenous, the DO may acquire foreign currency cash from any of the sources in chapter 13 of this Volume and make a foreign currency cash payment. Otherwise, when a foreign currency payment needs to be made, the DO must send a properly certified voucher together with supporting documentation and a properly executed DD Form 577 to a DO who can make the payment in the foreign currency involved. In many cases, the DO (or cashier) who can make the foreign currency payment will be located at the U.S. Embassy or Legation. A DO requesting payment by a U.S. Embassy or Legation shall provide any additional information or documentation required by the U.S. Embassy or Legation to make the payment.

1202 FINANCIAL TRANSACTIONS WITH FOREIGN COUNTRIES AND INTERNATIONAL ORGANIZATIONS

120201. General Policies for Financial Transactions

A. Scope

1. This section implements policies of the Treasury Department on the use of U.S. Government funds in international programs on foreign exchange or interest costs

to the Treasury Department. These include transactions with foreign countries and international organizations involved with bilateral or multilateral programs, such as procurement, research, co-development, co-production, grants or other transactions that require the:

- a. outlay of U.S. dollars or foreign currencies,
- b. inflow of funds from foreign countries, or
- c. exchange of U.S. dollars and foreign currencies.

2. Except for arrangements entered into for the sole purpose of implementing U.S. international monetary policy, DoD Components shall observe the following policies to ensure that:

- a. U.S. dollars are retained in the Treasury Department until actually required for immediate disbursement, to minimize interest cost on the public debt;
- b. Interest on U.S. Government funds will not be used to subsidize program activities; and
- c. Arrangements with foreign countries and international organizations will accommodate the financial policies and procedures of each participating country or organization to the maximum extent feasible.

3. Any change in program costs resulting from the use of foreign currencies in international financial arrangements is the responsibility of the involved program agencies, U.S. or foreign.

B. General Policies

1. DoD Components shall not permit the withdrawal of dollars from the Treasury Department for placement with any program management organization, prior to the need for the dollars as determined by the actual immediate funding requirements of the recipient organization to carry out the project.

2. International programs that require U.S. funding shall be negotiated to provide for dollar outlays as close to the need for current program expenditure as possible.

3. The U.S. Government share of funding required to support a program shall be obtained by appropriation with no part of this funding derived from interest earned on U.S. contributions. DoD Components shall be responsible for assuring that any interest earned is promptly deposited to receipt account 1499, Miscellaneous Interest Collections, Not Otherwise Classified."

4. Whenever possible, international programs should consider the fiscal needs and funding policy considerations of each participating country or international organization, provided U.S. Government cash management policies are not compromised.

5. Requests from a foreign country or international organization for the temporary deposit and safekeeping of U.S. dollars in trust in an account of the Treasury Department will be decided on their own merit, based on the reason therefore, the specific financial arrangements proposed, and the relevant U.S. Government political and general financial considerations.

6. DoD Components shall not invest funds on behalf of a foreign country or international organization when U.S. Government receipt of such funds would serve as the basis for creating contract obligational authority for the DoD Component or other U.S. Government department or agency.

7. Application of these general policies in negotiation with foreign countries and international organizations shall not be compromised by DoD Component administrative practices. Existing practices should be altered or revised to achieve these principles of funding policy.

★ C. Specific Policies. See chapter 9, Volume 12 of this Regulation for financial policies and procedures related to international agreements.

★ 120202. Exchange of U.S. Dollars for Foreign Currencies. Any change in program costs resulting from the foreign currency denomination of international financial arrangements is the responsibility of the program agencies, U.S. or foreign, involved.

120203. Procedures

★ A. The Treasury Department shall be consulted at the earliest possible time on any potential or pending negotiations with foreign countries and international organizations that involve deviations from the matters reflected herein. Exceptions to these policies and guidelines outlined above will be made only on the basis of a Treasury Department determination that such exceptions would be advantageous to the United States.

★ B. Requests for such exceptions should be processed through the Director for Management Improvement, The Pentagon, Washington, DC 20301-1100.

★ 120204. Foreign Currency Payments for Contracts Funded from Military Construction Appropriations. The following criteria shall be used in determining the feasibility of foreign currency payments for contracts funded from military construction appropriations. U.S. dollars shall be used only when:

A. To the extent provided by a treaty, executive agreement, or laws of the country concerned, payments are required to be made in U.S. dollars.

B. Responsive offers require a partial payment in U.S. dollars.

C. The only responsive offers received require payment entirely in U.S. dollars.

D. The contract is for a compelling need and of such unusual urgency that serious injury to the U.S. Government would likely be incurred if payment in foreign currency were to be insisted upon.

E. Contract bids or offers in local currency are unreasonably overpriced in relation to the dollar cost or to the local currency price available to non-DoD users of the same or similar goods or services.

F. If it is determined that payment in foreign currency funded from military construction appropriations is not feasible, the official designated in paragraph 120204 shall execute the following contract certification for retention with each contract file.

CONTRACT CERTIFICATION

I hereby certify, as required by subparagraph 120203.C of DoD 7000.14-R, Volume 5 and under the authority delegated to me in accordance with paragraph 120204 of DoD 7000.14-R, Volume 5, that it was not feasible to make payment in the amount of \$ _____ from foreign currency owned by the United States Government under this military construction contract executed in the country of _____ for the reason stated below:

(Cite the criterion applicable in the instant case)

(Signature)

(Name and title of person
executing this Certification)

★ 120205. Use of Foreign Currencies for Travel and Transportation

A. Maximum use shall be made of U.S.-owned foreign currencies for transportation when certificated air carriers are available and willing to accept such currencies in payment for U.S. Government-financed commercial foreign air transportation of persons or property. Use of air carriers for U.S. Government-financed commercial foreign air transportation

and the determination of their availability shall be in accordance with the provisions of DoD Directive 4500.9 (reference (ad)).

B. Consistent with the provisions of GAO Guidance (reference (ae)) and Comptroller General Decision B-184136 of August 17, 1975 (reference (af)), certificated air carriers shall be used for official air travel and transportation when available.

C. In issuing and exchanging government transportation requests (GTRs), government bills of lading (GBL), transportation warrants, or other procurement documents, the form must clearly state "PAYMENT IN (foreign currency)." Otherwise, the carrier may demand payment in U.S. dollars.

D. The "BILL TO" portion of the GTR, GBL, transportation warrant, or other procurement document must contain the following:

1. Name of the requesting agency.
2. Address to be billed.
3. Instruction on payment in foreign currency.

★ E. Delegation. Under the provisions of 10 U.S.C. 113 reference (b)), the authority and responsibility for compliance with and making determinations of non-feasibility are delegated to the Secretaries of the Military Departments, the Under Secretary of Defense for Acquisition and Technology, the Under Secretary of Defense (Comptroller), Directors of the Defense Agencies, and Director, Washington Headquarters Services. These designees may make further delegations of this authority.

1203 CONVERSION REGULATIONS

120301. General. Where the use of foreign currency is necessary, the currency shall be obtained by one or more of the following methods in the preferential order in which listed. See Chapter 13 of this volume for detailed instructions regarding procurement of foreign currency.

A. By purchase from the Government of the United States (i.e., contract Military Banking Facilities (MBF), Department of the Treasury, other U.S. DOs, or other accountable disbursing officials).

B. By purchase from commercial sources.

C. By repurchase from individuals (subject to the restrictions in subparagraph 120304.E, below).

120302. DO Responsibilities. DOs using foreign currency shall ensure compliance with the following requirements.

- A. Foreign currency is obtained and used for official purposes only.
- B. Foreign currency is not purchased or held in excess of immediate disbursing needs.
- C. Foreign currency purchases with U.S. dollars are made for "spot" delivery (delivery shall be within 2 business days).
- D. Foreign currency is in the physical custody of the DO or the limited depository bank has posted a credit to the LDA before any foreign currency disbursement is made.
- E. Foreign currency is not purchased by forward contracts directly from foreign governments, private firms or individuals or at a negotiated rate without prior authorization from the appropriate DFAS Center.
- F. Speculation in foreign currency is prohibited.
- G. Where there is an MBF in-country, foreign currency purchases for official use (at the MBF sell rate) and for accommodation exchanges (at the MBF accommodation rate) shall be given preference, whenever possible.
- H. Foreign currency held at personal risk by the DO in the safe or vault and in LDAs (including foreign currency held by all authorized deputies, agents, and cashiers within the disbursing office and at remote locations) is limited to a maximum of 7 business days requirement unless authorization has been received from the servicing DFAS Center granting an increase.
- I. When purchased from sources other than the U.S. Government, foreign currency is purchased at the best rate available in compliance with the laws of the country where it is being used.
- J. Foreign currency collection records are maintained showing the source of the currency; indicating miscellaneous receipt accounts or other Treasury Department accounts to be credited; and any restrictions on the use of the currency.
- K. Foreign currency reports are prepared as prescribed in Chapter 16 of this volume.

120303. Disbursing Agents of the Office of the Secretary of Defense (OSD)

A. **Purpose and Appointment.** Disbursing agents of the Office of the Secretary of Defense (OSD) are commissioned officers, warrant officers, non-commissioned officers, or civilian employees who are appointed by the USD(C), or designee, the Director of Budget and Finance, Washington Headquarters Service (WHS), to act as agents for an accountable DO. Such appointments shall be coordinated with the Director of Budget and Finance, WHS. Their purpose is to acquire cash and make such payments as are specified in the appointment. These disbursing agents may be appointed for an indefinite period of time or for a specific mission of limited duration. Such disbursing agents shall obtain all necessary funds from or through the DO currently supporting DoD/WHS and shall be accountable to that officer.

B. **Conversion Authorization.** Disbursing agents of OSD who acquire foreign currency in the course of their official duties are authorized to exchange such foreign currency for U.S. dollars at the nearest DoD disbursing office or other authorized U.S. disbursing office prior to departing from the foreign country, or prior to returning to the United States. DoD DOs in foreign countries shall convert foreign currency to U.S. dollars for officers or civilians appointed as disbursing agents of OSD. Such conversions shall be reported on the Foreign Currency Report as an acquisition from "OSD disbursing agent (name of agent)." The letter appointing the disbursing agent shall be presented to the DO when the agent requests conversion of currency.

120304. **Accommodation Exchange Services**

A. **General.** Accommodation exchange services are: the exchange of Treasury checks or U.S. dollar instruments for U.S. dollars (i.e., check cashing); the selling of foreign currencies in exchange for U.S. dollars or dollar instruments for the convenience of authorized personnel; and, where permitted, the repurchase of foreign currencies with U.S. dollars or dollar instruments.

B. **Authorization**

1. DOs are authorized to use official funds to:

a. Pay out foreign currency for checks, drafts, bills of exchange, and other instruments payable in U.S. dollars.

b. Cash for the same currency in which drawn, foreign currency checks drawn by accountable officers of the United States on official non-symbol checking accounts when the currency is needed by the officer for official purposes. No additional approvals are required.

c. Provide U.S. dollars in exchange for U.S. Treasury checks drawn by DOs of the State Department or other accountable officers of the United States when the U.S. dollars are needed for official purposes. No additional approvals are required.

2. Except as authorized above for providing U.S. dollars or foreign currency to DOs of the State Department or other accountable officers of the United States for official purposes, commanders shall specifically approve and implement accommodation exchange services only after determining that:

a. contract MBFs, other on-base financial institutions, commissaries, exchanges, and U.S. postal facilities cannot adequately fulfill the needs of DoD personnel;

b. the DO or agent has an immediate need for the foreign currency repurchased; or

c. authorized personnel have been ordered by competent authority to safehaven posts because of emergency evacuation.

3. All negotiable instruments presented to purchase foreign currency shall be presented by the payee in person or by a dependent holding a valid power of attorney from the payee. Refer to Chapter 4 of this volume for detailed requirements for providing check cashing services.

C. Authorized Personnel. The instruments cited above may be exchanged by DOs for the accommodation of those personnel described at paragraph 040104 of this volume.

D. Sales of Foreign Currency to Individuals. Accommodation exchanges of foreign currency normally will be made by MBFs at those installations served under the DoD MBF contract. In countries served by contract MBFs, DOs providing accommodation exchange services shall acquire needed foreign currencies from the MBF and make those exchanges at the MBF accommodation rate. DoD personnel shall not be provided accommodation exchange service by State or Treasury Department DOs in areas where such services are provided by DoD DOs. This shall not preclude DoD personnel assigned or attached to U.S. embassy duty from using available embassy cashier services. DOs, agents, and cashiers making foreign currency accommodation exchanges shall maintain DD Form 2664 (Currency Exchange Record) on a daily basis to ensure that the authorities and limitations contained herein are efficiently implemented. An example of DD Form 2664 is shown at figure 12-1.

E. Repurchase of Foreign Currency from Individuals. Foreign currency shall not be repurchased by DOs from individuals in those countries served by MBFs under DoD contract. In countries not served by contract MBFs, DOs may repurchase foreign currency or instruments payable in foreign currency in exchange for U.S. dollars or dollar instruments from individuals prior to their departure on home leave or after termination of their foreign assignment. In providing this service, DOs shall ensure compliance with the following subparagraphs.

1. If the amount of foreign currency presented does not exceed the sum of the individual's salary and allowances for two biweekly pay periods, it may be repurchased without requiring documentation of any kind from the departing individual.

2. If the amount of foreign currency presented exceeds the amount authorized in subparagraph 120304.E.1 above, the individual presenting such currency shall submit a written application to the commander for approval of the repurchase. The application shall contain a statement describing the source of the currency and, a statement affirming that none of the currency was acquired in violation of local regulations or exchange control laws of the country concerned.

3. The repurchase of the foreign currency with U.S. dollars is commensurate with the DO's immediate foreign currency disbursing requirements as prescribed in Chapter 13 of this volume.

4. The foreign currency is repurchased at the prevailing market rate.

5. DD Form 2664 is maintained daily to reflect the amount and source of funds.

6. The authority to make accommodation exchanges granted herein may be suspended or curtailed by the disbursing officer for such time and to such extent necessary to carry out his or her other responsibilities.

★ F. Safehaven Posts. Foreign currency accommodation exchange services for dependents of DoD personnel at safehaven areas (to which ordered by competent authority in the event of emergency evacuation) shall be consistent with the amount of exchanges authorized for dependents of U.S. personnel employed by other U.S. Government agencies. Accommodation exchange transactions for all dependents of an individual named in subparagraph 120304.C, above, shall not exceed \$2,000 during the first month following evacuation, and shall not exceed \$400 to \$600 in any subsequent month. Daily records of accommodation exchanges for dependents at safehaven areas shall be maintained on DD Form 2664.

G. Accommodation Exchange Afloat. Disbursing officers of the Department of the Navy additionally are authorized to repurchase foreign currency for U.S. dollars for Navy personnel afloat provided:

1. The disbursing officer has need for the foreign currency or can dispose of the foreign currency by exchange for dollars or by official expenditures within 30 days.

2. The individual requesting the exchange of foreign currency is not allowed, upon returning afloat, to convert an amount of foreign currency greater than the amount

purchased by him from the Navy disbursing officer before going ashore, as evidenced by the disbursing officer's records.

CHAPTER 13

PROCUREMENT/DISPOSITION OF FOREIGN FUNDS1301 AUTHORITY FOR PROCUREMENT

130101. General. When authorized in writing by the commander or higher authority, foreign funds may be obtained for official purposes. Official purposes include the purchase of foreign currency for disbursing requirements, the purchase of drafts payable in foreign currency for paying creditors, and exchanging official funds held in foreign currency or negotiable instruments for U.S. dollars or negotiable instruments. Foreign funds obtained may be in the form of currency or credits maintained in limited depository checking accounts. The written authority to obtain foreign funds shall be retained in the files of the DO.

130102. Limitation on Amount. DOs shall not acquire or hold foreign funds in excess of their immediate disbursing requirements. The availability of foreign funds shall determine what amounts of funds may be held. If the foreign funds are readily available, the combined total of foreign currency on hand and the balance in all limited depository checking accounts shall not exceed 2 or 3 business days' requirements. If the foreign funds are not readily available, the combined total of foreign currency on hand and the balance in all limited depository checking accounts shall not exceed 7 business days' requirements. A waiver from these maximum on hand limits must be requested from the Treasury Department via the supporting DFAS Center.

130103. Foreign Coin. DOs generally shall limit foreign funds to paper currency. Coins present problems of weight, storage space, transportation, and disposition and shall be acquired only under special circumstances to fill a specific need or when received as change in connection with an official cash payment in foreign funds.

1302 PROCUREMENT OF FOREIGN FUNDS130201. Transfer of Funds on Relief of DO

A. Cash. Transfer of cash funds in foreign currency shall be effected in the same manner as U.S. dollars.

B. Limited Depository Checking Account. Transfer of limited depository checking account balances shall be accomplished in accordance with Chapter 14 of this volume.

130202. Certificate or Statement. With all procurements of foreign currency from U.S. Government or commercial sources, a certificate or statement shall be furnished showing the amount of foreign currency delivered, the rate of exchange, the amount of U.S. dollars paid,

the date, and the source/seller. The certificate or statement shall be included as part of the DO's monthly financial reports.

130203. DoD Contract Military Banking Facility (MBF). Whenever possible, DOs shall purchase foreign currency (including funds for limited depository checking accounts) through an MBF by Treasury check issued in exchange for the foreign currency. The DO shall draw the exchange-for-cash check payable to himself or herself and endorse it to the order of the MBF furnishing the foreign currency.

130204. U.S. Government Sources. When an MBF is not available, DOs shall obtain needed foreign currency (including funds for limited depository checking accounts) in accordance with this paragraph. Whenever possible, foreign currency shall be obtained by purchase from one of the following: the U.S. Treasury; other DoD DOs; U.S. DOs or cashiers at the American Embassy or Legation; or, the Federal Reserve Bank of New York (FRBNY). Normally, the DO will draw an exchange-for-cash check payable to himself or herself and endorse it to the order of the officer furnishing the foreign currency. However, when foreign currency is purchased from a U.S. DO or cashier at an American Embassy or Legation, the check may be issued in favor of the American Embassy or Legation if so requested by the selling official. In 1992, the FRBNY began offering foreign currencies to any DoD DO. The procedure for ordering foreign currency from the FRBNY is very similar to that for ordering U.S. currency. The DO places an order with the FRBNY for the foreign currency needed and provides an exchange-for-cash check drawn in favor of the FRBNY with the order.

130205. Commercial Sources. When neither an MBF nor other government sources are available, foreign currency (including funds for limited depository checking accounts) may be purchased from commercial sources under the procedures established by State Department regulations or the currency control laws of the country where the currency will be used. If there are no State Department procedures established, foreign currency shall be procured at the best rate available (i.e., fixed legal rate or non-fixed legal rate) in accordance with the laws of the country where the currency will be used. Generally, at least three bids will be obtained in order to determine the "best rate." See paragraph 130208, below. Purchases of foreign currency from commercial sources shall be by U.S. Treasury check, whenever possible, or, if necessary, by U.S. currency. Treasury checks drawn to obtain foreign currency from commercial sources shall be drawn in favor of the DO and endorsed to the order of the banking institution or commercial enterprise furnishing the funds.

130206. Repurchase From Individuals and Collections From Foreign Vendors. Subject to the provisions outlined in Chapter 12 of this volume, foreign currency may be repurchased from individuals. Foreign currencies also may be received as refunds from foreign vendors and in payment for sale of excess foreign property as provided in the Defense Utilization and Disposal Manual (DoD 4160.21-M) (reference (bj)). Foreign currency sales receipts from post offices, exchanges, commissaries, and other non-appropriated fund activities are not collections by the disbursing office. Foreign currency from these sources shall be acquired by purchase

only to the extent necessary to acquire foreign exchange for the limited depositary checking account.

130207. Fixed Legal Rate of Exchange. In a country where the rate of exchange has been established by agreement between the United States and the foreign country, the purchase of foreign currency from commercial sources shall be accomplished without the formality of obtaining bids.

130208. Non-fixed Legal Rate of Exchange. When foreign currency is obtained from commercial sources in a country where the rate of exchange is not established by agreement between the United States and the foreign country, DD Form 2668 (Request for Bid (Purchase/Sale)) shall be used to obtain written bids (in duplicate) from not less than three legally authorized sources, if available. When practical, sources shall include those outside the country whose currency is being purchased. The bid providing the most beneficial exchange rate (to the U.S. Government) shall be certified by another commissioned officer as being the most beneficial of the bids obtained and shall be accepted by the DO. A copy of the certified and accepted bid shall be included as a supporting document with the DO's financial reports. The original certified and accepted bid shall be retained by the DO to substantiate the place of purchase in the event that some of the currency is eventually sold through commercial channels. See figure 13-1.

130209. Mutilated or Unfit Currency. DOs and authorized agents shall take every possible precaution to prevent acceptance of mutilated or unfit foreign currency as a collection, payment, or an accommodation transaction. In the event that a DO or authorized agent is holding mutilated or unfit foreign currency, every effort shall be made to replace it through local banks or the host country's central bank. If the host country will not replace the mutilated or unfit currency, the procedures outlined in section 1303, below, shall be followed.

130210. Valuation of Foreign Precious Metal Coins. Any foreign gold, silver, or other precious metal coins purchased for purposes other than routine settlement of amounts owed, shall be treated as property held in inventory rather than currency.

1303 DISPOSITION OF FOREIGN CURRENCY AND OTHER NEGOTIABLE INSTRUMENTS

130301. Payments and Sales to Authorized Personnel. Foreign currency may be used for payments to personnel as provided in Chapter 12 of this volume and for payments to foreign vendors in accordance with Volume 10 this Regulation. In addition, DOs are authorized to dispose of foreign currency by sale (accommodation exchange) to authorized personnel for U.S. dollars as provided in Chapter 12 of this volume.

★ 130302. Disposition of Excess Foreign Funds. An attempt should be made to transfer those foreign currencies in excess of immediate disbursing requirements to other DOs and accountable officers in a particular locality who may have need for those currencies. If the

collection of foreign currency causes a non-interest bearing limited depositary checking account to exceed a 30-day supply, and all attempts to sell the currency to other DOs or accountable officers have been exhausted, an interest bearing limited depositary account shall be established, if possible, as provided in Chapter 14 of this volume. In such cases, the DO immediately should place all funds in excess of estimated draw-downs against the non-interest bearing account for the ensuing 14-day period in a demand or short-term interest bearing account, if such an account is available. However, balances shall not be maintained routinely in order to receive interest.

130303. Sale to Another DoD DO

A. Checks, Drafts, and Money Orders. Checks, drafts, and money orders which are payable in foreign currency shall be sorted by the geographical location of the institutions on which they were drawn and shall be forwarded by registered mail or courier to a DoD DO located in the country of the monetary unit involved. The negotiable instruments shall be shipped as prescribed in Chapter 5 of this volume and shall be accompanied by a properly completed DD Form 165 and a letter of transmittal, both of which shall be addressed to "Disbursing Officer (activity of addressee)." The letter of transmittal shall request a U.S. Treasury exchange-for-cash check. The DD Form 165 shall indicate the country, type, amount, exchange rate, and U.S. dollar value of the instruments. The instruments shall be endorsed: "Pay to the order of disbursing officer (activity of addressee). (Signature of sender)."

If there is no DoD DO in the country involved, the instruments shall be deposited as prescribed in paragraph 130306, below.

B. Foreign Currency (Cash). Foreign currencies (other than local currency) and currencies that are not required for official purposes shall be forwarded to a DoD DO located in the same area who may require the currency or to a DO located in a country where the currency is legal tender. The foreign currency shall be exchanged for U.S. currency or a U.S. Treasury exchange-for-cash check. When delivery of the foreign currency is made by registered mail or courier, the shipment shall be made as prescribed in Chapter 5 of this volume and shall be accompanied by a properly completed DD Form 165 and a letter of transmittal requesting a U.S. Treasury exchange-for-cash check. The DD Form 165 shall indicate the country, type, amount, exchange rate, and U.S. dollar value of the foreign currency. Except under unusual circumstances, and subject to concurrence by the intended recipient prior to shipment, foreign coins shall not be forwarded for exchange.

C. Rate of Exchange. The rate of exchange used for the transactions described above shall be the U.S. Treasury prevailing rate on the date of transmittal (for the seller) and the U.S. Treasury prevailing rate on the date of receipt (for the buyer). Since the U.S. Treasury prevailing rate is the holding rate for the receiving office there shall be no gain or loss in the receiving officer's accounts. Any gain or loss due to exchange rate fluctuations shall be taken up by the selling office when the exchange-for-cash check is received.

130304. Sale to an MBF. The sale of foreign currency to an MBF having use for such funds is authorized whenever the currency cannot be sold to another DoD DO. The rate of

exchange used by the selling DO shall be the MBF buy rate on the date the currency is sent to the MBF. Any gain or loss incurred shall be taken up in the accounts of the selling DO upon receipt of the U.S. dollars from the MBF.

130305. Sale Through Commercial Channels. If foreign currency (cash) cannot be sold in accordance with the preceding paragraphs, sale through commercial channels is authorized. When the rate of exchange has been established by agreement between the United States and the foreign country, sale or other disposition of foreign currency for U.S. currency or U.S. dollar checks shall be at the established rate of exchange. When such a sale is made, the bank or other source to which the foreign currency is sold must provide a statement showing the amount of U.S. dollars provided, the rate of exchange, the amount of foreign currency received, the date, and the name and address of the bank or other source. This statement must be signed by a representative of the bank or other source and shall be included with the DO's financial reports. When the rate of exchange is not established by agreement between the United States and the foreign country, a DD Form 2668 shall be used to request at least three bids from reputable banking institutions or dealers in foreign exchange, if available. The sale of foreign currency shall be made to the bidder submitting the bid most beneficial to the U.S. Government. The accepted bid shall be certified by a commissioned officer other than the DO as the most beneficial of the bids obtained and shall be accepted by the DO. The certified and accepted bid shall be submitted with the DO's financial reports in support of gains or losses in foreign currency transactions. See figure 13-2.

130306. Deposits to the Credit of the U.S. Treasury

A. Instruments Drawn on Foreign Banks Payable in U.S. Dollars Through a Bank in the United States. Instruments drawn on foreign banks or branches of U.S. banks in U.S. dollars which are payable through a bank in the U.S. shall be deposited as prescribed in Chapter 5 of this volume for other U.S. dollar instruments. These instruments will bear an American Bankers Association (ABA) routing and transit number, and may be MICR encoded with the routing and transit number at the bottom of the left side of the instrument.

★ B. Instruments Drawn on Foreign Banks Payable in U.S. Dollars Through Foreign Banks. When disposition cannot be made through a DoD DO or an MBF, instruments that are drawn in U.S. dollars on foreign banks and foreign branches of U.S. banks, which are payable only at the foreign bank or branch, shall be endorsed as prescribed in Chapter 5 of this volume and transmitted for deposit to Citibank NA Foreign Check Clearing, 2 Penns Way, First Floor, New Castle, DE 19720 (Telephone: (302) 324-6792). A single SF 215 shall accompany all U.S. dollar foreign instruments forwarded to the Citibank on a single day. The SF 215 shall be completed as prescribed in Chapter 5 of this volume with the exception that Block 2 (Date Presented or Mailed to Bank) shall be left blank. Enter the date mailed in Block 6 (Agency Use). The record of instruments deposited required by Chapter 5 of this volume also is required for these checks. The amount of the deposit will be credited in the Treasury's General Account (TGA) upon receipt by Citibank, and the confirmed copies of the SF 215 will be returned to the depositing disbursing officer. The entire amount of the SF 215 is credited in the TGA upon

receipt even though the proceeds of these types of checks may not be collected for several weeks. Therefore, disbursing officers should be aware that they may receive and SF 5515 (Debit Voucher), if there are uncollectible checks or collection charges (also referred to as lifting fees) on these checks.

C. Instruments Drawn on Foreign Banks Payable in Foreign Currencies.

When disposition cannot be made through a DoD DO or an MBF, instruments that are drawn on foreign banks and foreign branches of U.S. banks, which are payable only at the foreign bank or branch in foreign currency, shall be endorsed as prescribed in Chapter 5 of this volume and transmitted for deposit to Citibank (same address as shown in the preceding paragraph). However, a separate SF 215 shall accompany each foreign currency instrument forwarded to the Citibank. The SF 215 shall be completed as prescribed in Chapter 5 of this volume, except that Block 2 (Date Presented or Mailed to Bank) and Block 4 (U.S. dollar amount) shall be left blank. Enter the date mailed in Block 6 (Agency Use). To permit reconstruction in the event an instrument becomes lost, destroyed, mutilated or unfit, a description of each instrument shall be maintained by the DO. The front of the SF 215 or the back, if space is lacking on the front, shall be inscribed with: the name of the bank on which the instrument is drawn; the medium of exchange; the foreign currency amount; and the date of the instrument. If adequate records are available to provide identification through an audit trail, or if checks are photocopied or microfilmed, this additional record maintenance is not necessary. Upon collection of the instrument, Citibank will enter the date and U.S. dollar value on the SF 215 and return the confirmed copy to the DO.

D. Uncollected Checks and Collection Charges. The minimum U.S. dollar amount of each check that will be accepted for deposit by Citibank is \$5 (U.S.) for Canadian bank checks and \$15 (U.S.) for other foreign bank checks. All collection charges (lifting fees) incurred in connection with foreign checks (such as uncollectible check charges, exchange fees, and so forth), assessed after dollar credit has been given in the TGA, will be charged back to the depositor via an SF 5515 prepared by Citibank. These charges may be assessed some considerable period of time after the deposit is confirmed. Exchange fees and other collection charges (as distinguished from gains or losses as a result of differences between the rates of exchange used by the DO and Citibank) are collectible from the person or vendor who presented the instrument to the DO.

E. Deposit of Foreign Currency (Cash)

1. When disposition of foreign currency (cash) cannot be accomplished by any of the methods described above, the DO should contact the Bank of America's foreign currency trading desk at 1-800-387-1012. When answering, the foreign currency trader will ask for the 5-digit client number, 37539, as well as the 4-digit Agency Location Code (ALC), i.e., the DSSN. The client number is unique to the Department of the Treasury. The DoD DO will be identified as an extension of the 5-digit client number using the ALC (DSSN). After accessing the client number, the trader will create a sublist of branches/agencies using the ALC (DSSN) and ask the caller for information to update the ALC profile (address, direct phone number, contact name).

2. The foreign currency trader immediately will provide a foreign currency conversion rate and the U.S. dollar equivalent (USE). The Bank of America is able to provide the USE by contracting at that time to sell those foreign currencies for dollars. Therefore, if a DoD DO notices a difference in the amount or type of currency specified over the phone, or a delay in shipment, he/she immediately must contact the Bank of America and inform the trader of the correction/difference.

3. A separate SF 215, for each type of currency, prepared by the DO, will accompany all foreign currency transactions forwarded by the DO. The SF 215 will indicate the DO mailing date, the ALC, and, in Block 4, the amount of the net U.S. dollar proceeds. In the Agency Use block of the SF 215, indicate the name of the foreign country, type and amount of foreign currency, and the 5-digit client number. Bank of America, upon sale of the currency, will give dollar credit through Ca\$h-Link, and return the confirmed copy of the SF 215 to the DO.

4. If the DO makes a deposit ticket error, the Bank of America will adjust the error by preparing an SF 5515, Debit Voucher, for a decrease or an additional SF 215 for an increase in the amount. The Bank of America will provide an explanation of the adjustment on the SF 5515 or SF 215, including the original SF 215. Copies of the SF 5515 or SF 215 will be sent to the DO.

5. For foreign currency found to be counterfeit, out of circulation, or outdated (having lesser value), the Bank of America will prepare an SF 5515 and note thereon the date of receipt, the currency note, and the serial number. A facsimile copy of the counterfeit will be sent on request.

6. Shipping procedures. DOs must comply with the requirements for shipment of public funds contained in section 0505 of this volume whenever shipping foreign currencies. In addition, DOs must comply with the following provisions:

a. For transactions under \$100 (USE), the U.S. Postal Service should be used. A sturdy brown envelope should be reinforced with standard shipping tape and addressed to the P.O. Box listed below. Ship transactions under \$100 via certified mail.

b. For transactions between \$100 to \$5,000 (USE), the envelopes should be packaged in the same manner as described above and addressed to the P.O. Box listed below, but shipped via registered mail. This type of shipment is covered by insurance provided by the Bank of America.

c. Address the above referenced currency shipments to:

Bank of America
FCS-LAOC No. 4658

P.O. Box 54529
Los Angeles, CA 90054-0529

Do not mark or otherwise outwardly identify the contents of these shipments.

d. For transactions over \$5,000 (USE), the currency should be packaged and placed within a Brinks self-sealing shipping bag. Instructions for sealing the bags are on each bag. Should a bag be needed, the Bank of America will instruct Brinks to arrive for pick-up with a bag or forward bags via Federal Express. Where service is not available by Brinks, an alternate method may be arranged. Package the currency tightly, enclose in a Brinks shipping bag, and address to:

Bank of America
Foreign Currency Services
525 South Flower Street, B-Level
Los Angeles, CA 90071

7. Trading Hours. The Bank of America trading center is open 8:00 a.m. to 8:00 p.m. (Eastern Standard or Daylight Time (as appropriate)), Monday through Friday. The trading center is closed only when both Canadian and U.S. Holidays coincide; for example, New Year's and Christmas. Should Saturday access be required, prior arrangements can be made with Bank of America.

130307. Accounting for Deposits

A. Foreign Negotiable Instruments. Pending receipt of the confirmed copy of the SF 215 for the negotiable instruments, as described in paragraph 130306.C, above, the deposit shall be recorded on line 6.7 of the DD Form 2657 as Cash in Transit at the U.S. dollar value of the funds when the deposit was mailed. If the confirmed copy of the SF 215 is not received prior to the end of the month in which mailed, the item shall also be reported on line 6.7 of the SF 1219 as Cash in Transit. The depository will enter the net U.S. dollar proceeds in Block 4 of the SF 215 and distribute the copies as for any regular deposit. Upon receipt of the confirmed copy, the DO shall enter the confirmed amount on line 4.2A of the DD Form 2657 as a Deposit Presented or Mailed to Bank and on line 6.7 as a decrease to Cash in Transit. Any difference in the amount of the confirmed SF 215 and the amount at which carried by the DO on line 6.7 (as distinguished from exchange fees and collection charges) shall be accounted for as either a gain or a loss by exchange transaction as prescribed in section 1304, below. Note that deposits of foreign negotiable instruments in accordance with this section are not reported as "Deposits Presented or Mailed to Bank" until the confirmed copy of the SF 215 is received. This requirement is because the U.S. dollar value to be reported as deposited is not known to the DO until the confirmed copy is received.

B. Foreign Currency (Cash). Since the U.S. dollar equivalent of the foreign currency deposit made as prescribed in paragraph 130305.E, above was provided by the Bank of

America's foreign currency trading desk and entered in Block 4 of the SF 215, account for the deposit as prescribed in Chapter 5, subparagraph 050301.C, of this volume.

130308. Dishonored Foreign Checks, Drafts, and Money Orders. Dishonored foreign instruments received by DoD DOs shall be subject to regular debt collection procedures as prescribed in Chapter 4 of this volume. When dishonored instruments received in providing accommodation exchange services prove to be uncollectible, the DO shall request removal of the dishonored check item deficiency from the supporting DFAS Center as prescribed in Chapter 4 of this volume.

★ 130309. Mutilated or Unfit Foreign Currency. Mutilated or unfit foreign currency shall be handled by a DO in the area in which the currency is legal tender. DOs in foreign areas shall contact local banks or fiscal authorities and arrange for the exchange of mutilated or unfit currency for fit currency. Unfit foreign currency held by a DO outside the area in which the currency is legal tender shall be forwarded to a DoD DO in the country where the currency is legal tender. The currency shall be shipped under a properly completed DD Form 165 and a letter of transmittal requesting a U.S. Treasury exchange-for-cash check. Any mutilated or unfit foreign currency which the DO cannot exchange for fit currency or a U.S. Treasury check shall be deposited with the Bank of America per instructions in paragraph 130306.E. Mutilated or unfit foreign currency shall be shipped to the Bank of America at the address in subparagraphs 130306.E.6.c or 130306.E.6.d.

130310. Counterfeit or Altered Foreign Currency. Counterfeit or altered foreign currency shall be disposed of in accordance with any applicable agreement which may exist between the United States and the foreign country. If no agreement exists, the currency shall be forwarded to the appropriate investigative agency or to the nearest military security agency. A receipt for the currency shall be obtained. The counterfeit currency shall be accounted for in the DO's records in the same manner prescribed in Chapter 5 of this volume for counterfeit U.S. currency. When the DO is considered at fault in acquiring counterfeit currency, the DO shall be held accountable for the value of the currency. Requests for relief may be submitted under the same guidelines that would be used for counterfeit U.S. currency.

★1304 FOREIGN CURRENCY EXCHANGE RATES

★ 130401. U.S. Treasury Prevailing Rate of Exchange

★ A. General

1. The prevailing rate of exchange (see Definitions) is the most favorable rate that is legally available to the U.S. Government for the acquisition of foreign currencies for its official disbursements and accommodation exchange transactions. If the currency of any one country is obtained from more than one of the following sources, separate accountability for exchange rate adjustments must be maintained. The following sources of obtaining foreign currency are presented in the desired order of acquisition:

- a. DoD Contract Military Banking Facility (MBF), paragraph 130203 applies;
- b. U.S. Government sources, paragraph 130204 applies; or
- c. Commercial sources, paragraph 130205 applies.

2. Unless otherwise authorized by the Treasury Department, all foreign currency (including the limited depository checking account) shall be carried in the DO's account at the Treasury Department prevailing rate. Disbursements for official expenditures or accommodation exchange transactions shall be computed to avoid gains or losses, due to fluctuations in rates of exchange, as much as possible. In countries where the rate of exchange is not established by agreement between the U. S. Government and the foreign country or where a DoD Contract Military Banking Facility (MBF) is not available, foreign currency transactions will be conducted at the Treasury Department prevailing rate using the average purchase rate of the currency on hand as determined by the average purchase rate method outlined in paragraph 130402, below.

★ B. Gain or Loss by Revaluation. Except when using the average purchase rate method outlined in paragraph 130402, any change in the Treasury Department prevailing rate will result in a gain or loss by revaluation since revaluation is a change in the U.S. dollar value of the foreign currency. Whenever possible, the revaluation of foreign currency on hand (including limited depository checking accounts) shall be accomplished at the beginning of the business day in which a rate change occurs. The new U.S. dollar value shall be determined by dividing the total foreign currency on hand (including limited depository checking accounts) by the new exchange rate. By comparing the U.S. dollar value at the old rate to the U.S. dollar value at the new rate, a determination can be made whether a gain or loss by revaluation has occurred. Because all foreign currency held by the DO is carried in the disbursing account at the U.S. dollar value, the U.S. dollar value must be adjusted by the amount of the gain or loss. This adjustment is accomplished by recording the gain or loss by revaluation as a collection or disbursement transaction in the DO's account.

★ C. Accounting for Gains and Losses by Revaluation. Except when using the average purchase rate method outlined in paragraph 130402, gains shall be credited using DD Form 1131 and losses shall be charged using SF 1034 citing the appropriation Gains and Deficiencies Exchange Transactions, **-6763. Show the computation of the revaluation gain or loss on the DD Form 1131 or SF 1034, as appropriate. For balance of payments purposes, credits and charges to appropriation **-6763 are coded as U.S. dollar transactions. Use appropriation **-6763 only for gains and losses due to foreign currency revaluations and as prescribed in Chapter 4 of this volume. This appropriation shall not be used for operational expenses in connection with the acquisition or disposition of foreign currency or any other purpose not specifically authorized by law. Appropriation **-6763 is not related to and has no relationship with the Foreign Currency Fluctuations, Defense (FCFD) or the Foreign Currency Fluctuations, Construction, Defense

(FCFCD) accounts that are used to account for the difference between the budgeted foreign currency rate and the exchange rate at which funds are obligated. The FCFD and the FCFCD portion of a foreign currency disbursement are treated separately on the disbursement voucher by the preparer as a charge to the appropriate foreign currency centrally managed allotment account set up for that purpose.

★ D. Gains or Losses on Security Deposits due to Foreign Currency Fluctuation

★ 1. Procedures. Military service members stationed in overseas areas are authorized to be paid advanced overseas housing allowance for security deposits to acquire leased housing. As authorized by the Joint Federal Travel Regulations, chapter 9, the supporting disbursing officer pays the necessary amount in the appropriate local currency and charges the appropriate military personnel appropriation for the U. S.-dollar equivalent. Service members must not be paid this allowance in U. S. dollars which they must then convert to local currency.

★ 2. Accounting. At lease termination, service members must return the total amount of deposit in local currency and are to be given a receipt. The U. S.-dollar equivalent is credited back to the appropriation that was charged when the deposit was advanced. The current rate of exchange will be compared with the rate in effect on the date the advance was made to secure the lease. Any loss/gain due to currency fluctuation is charged/credited to the current military personnel appropriation.

★ 130402. U.S. Treasury Prevailing Rate of Exchange - Average Purchase Rate Method. In countries where the rate of exchange is not established by agreement between the U.S. Government and the foreign country or a DoD Contract Military Banking Facility (MBF) is not available, the DO will disburse from his or her account using the average purchase rate method. When the amount of foreign currency on hand (including depository checking accounts) is increased by purchase from a commercial source at a rate different from the DO's current holding rate, a new average purchase rate will be determined. No gain or loss will result.

★ A. The average purchase rate is determined by adding the U.S. dollar equivalent value of the foreign currency on hand prior to the new acquisitions to the U.S. dollar equivalent value of the additional foreign currency received and dividing the total into the new total of foreign currency units on hand. Round average rates to five decimal places. Due to this rounding, the ratio of foreign currency units to dollars may vary as the supply of currency is depleted. However, do not adjust the average rate until new foreign currency units are acquired. If possible, determine the average value of foreign currency on hand (including depository checking accounts) at the beginning of the business day. A certificate of change in the average purchase rate similar to the example provided in figure 13-3 will be prepared and signed by the DO or deputy. Submit the certificate with the SF 1219. If it is necessary to recompute the average purchase of foreign currency on hand during a business day, the certificate of revaluation will include a citation of the voucher number of the last disbursement or collection voucher executed under the old rate of exchange. If none have been executed during the current business day, indicate none.

★ B. Adjustments Due to Rounding. Due to the rounding on individual transactions (disbursements/collections), a difference in the U. S. dollar value of foreign currency on hand may occur resulting in a minor gain or loss. (The balance of foreign currency divided by the current rate of exchange (carried to five decimal places) equals the exact U. S. dollar value of foreign currency on hand.) To compensate for any minor gains/losses, the disbursing officer must, as part of the daily balancing process, adjust the U. S. dollar value of foreign currency on hand.

For example: The following reflects transactions occurring on January 3, 19XX:

<u>FOREIGN UNITS</u>	<u>U. S. DOLLAR VALUE</u>	<u>RATE OF EXCHANGE</u>
107,275,503 (Balance)	\$ 854,512.60	125.53999
<u>751,883,562</u> (Purchased)	<u>\$6,000,000.00</u>	
859,159,065 (Balance)	\$6,854,512.60	125.34211*
<u>- 9,396,641</u> (Disbursed)	<u>- 74,967.95</u>	
849,762,424	\$6,779,544.65	

Actual U. S. Dollar Value

849,762,424 (# of foreign units) divided by rate of exchange 125.34211 = \$6,779,544.59.

This results in a minor loss of \$.06 (\$6,779,544.65 less 6,779,544.59) due to rounding of individual vouchers.

*Note: When a new rate of exchange is computed due to the purchase of additional foreign currency, the number of foreign units divided by the rate of exchange will not always accurately reflect the U. S. dollar value.

1. Accounting for Gains and Losses Due to Rounding. All gains/losses due to rounding shall be credited or charged, as applicable, (using DD Form 1131 or SF 1034) to the appropriation Gains and Deficiencies on Exchange Transactions, **_6763. The Certificate of Adjustment prescribed below shall be attached to the voucher to support the transaction.

2. Certificate of Adjustment. A Certificate of Adjustment Due to Rounding, similar to the example provided in figure 13-4, will be prepared and signed by the disbursing officer when a minor gain/loss results.

1305 CONTRIBUTED CURRENCIES

130501. Policy. The policy for utilization of contributed currencies and the types of expenses which are authorized to be paid with the contributed currencies are prescribed in DoD Instruction 2110.31 (reference (ag)).

130502. Procurement. Designated DoD DOs shall purchase contributed currency from Department of State DOs with U.S. Treasury exchange-for-cash checks or U.S. currency. The amount of contributed currency on hand shall be limited to current cash requirements as prescribed in Chapter 3 of this volume.

130503. Utilization. Contributed currency shall be utilized to the maximum extent possible in lieu of U.S. currency or other purchased foreign currency for expenditures authorized to be paid in contributed currency.

130504. Accounting. Contributed currencies shall be recorded and reported in the DO's account in the same manner as other foreign currencies. The regularly prescribed foreign currency records and reports shall be maintained and submitted in the usual manner. In addition, appropriate internal controls shall be established as necessary to identify acquisitions and dispositions of contributed currencies and to provide a record of contributed currency transactions. Additional local records shall be maintained and reports made concerning utilization of contributed currency as may be prescribed by commanders responsible for administration of the Security Assistance Program.

REQUEST FOR BID (Purchase/Sale)

CERTIFICATE OF CHANGE IN AVERAGE PURCHASE RATE

	<u>Yen</u>	<u>U.S.Dollars</u>
Total amount of Japanese Yen on hand at close of business October 3, 19XX	220,000 at 98/\$1.00	\$2,244.90
Japanese Yen received this date through sale of Treasury check No. 196,240 for \$10,000	<u>200,000</u> at 102/\$1.00	<u>\$1,960.78</u>
Totals	420,000	\$4,205.68

420,000 Yen divided by \$4,205.68 equals 100/\$1.00, averaged new rate for on hand Japanese Yen, based on its prior purchase exchange rate and the new exchange purchase rate for the Yen purchased on October 4, 19XX.

No collection or disbursement vouchers processed this date prior to revaluation of Japanese Yen.

CHAPTER 14

LIMITED DEPOSITARY CHECKING ACCOUNTS1401 INTRODUCTION

140101. Authority. DOs outside the United States are authorized to maintain official limited depositary checking accounts (LDAs) in foreign currency with banks that have been designated by the Treasury Department as "Depositories of Public Moneys of the United States." LDAs in U.S. dollars shall not be established unless specific authority is first obtained from the Director for Financial Commerce, OUSD(C), through the supporting DFAS Center.

★ 140102. Opening LDAs. All DOs requiring an LDA shall formally request approval and designation of the financial institution (if other than a contract MBF) as an authorized depository from the Treasury Department through the servicing DFAS Center. The Treasury Department's policy in selecting the financial institutions that will maintain U.S. Government operating accounts per 31 U.S.C. 3303 (reference (e)) is predicated on the most beneficial banking arrangement available to the U.S. Government to transact essential business. After contract MBFs, preference will be given to American financial institutions unless a local bank's arrangement is more advantageous to the U.S. Government. When anticipating the establishment of a new LDA (in other than a contract MBF), the DO shall solicit all American-owned and leading local financial institutions in the area to determine which would offer the most beneficial arrangement. Unsolicited proposals from financial institutions to operate an existing LDA may be received at any time and the LDA shall be deemed open to all interested financial institutions if it is determined that a soliciting financial institution: (a) offers a more beneficial banking arrangement than currently received; or, (b) reflects a higher level of American ownership than the present limited depository. For each account, the DO periodically should determine if it may be cost effective to solicit competitive proposals from all American-owned and leading financial institutions in the area to secure the most beneficial banking agreement. The solicitation process of the banks shall be competitive, with all banks submitting written information on identical questionnaires or requests for (banking) proposals. In determining the most beneficial banking arrangement, the DO shall consider the following three areas of service in descending order of importance: standard operating services minimally required; customary local banking practices; and other special services that may be deemed necessary in a particular country or circumstance. At a minimum, the required services shall be:

- A. The capability to honor payments to payees in outlying areas.
- B. The processing of checks and deposits.
- C. The submission of a daily or a monthly bank statement as needed.
- D. The acceptance of the DO's funding procedures.

In addition, any customary banking practices (payment of interest on the account, waiver of miscellaneous charges, etc.) peculiar to a particular country shall be considered for purposes of carrying out the provisions of 31 U.S.C. 3303 (reference (e)). Consideration also shall be given to any special services that a bank is willing to provide in addition to the minimum required and customary local banking services (e.g., telex cost or armored car service) if services offered above are equivalent in separate proposals. The checking account balances (or the forfeiture of potential interest earnings on the account) shall not be used to subsidize banking services that otherwise would be funded through the appropriation process. Daily balances in the LDA shall be as near zero as possible. Otherwise, the level of the balance to be maintained in the account shall be determined solely by disbursing requirements. The DO should formally convey the results of the competitive process and its recommendation for selection to the Treasury Department as a part of the request for approval and designation of the depository. The letter request for approval and designation shall be addressed to the International Funds Branch, Financial Management Service, Department of the Treasury, 3700 East-West Highway, Prince Georges Metro Center-II, Room 5A19, Hyattsville, MD 20782 (Telephone: (202) 874-8943, fax number (202) 874-8023), through the supporting DFAS Center and should state the name and location of the financial institution recommended to be designated (regardless of possible previous designations).

140103. Interest on Deposits. In certain cases, Limited Depositories (LDs) will pay interest on checking accounts. Whenever possible, the DO should obtain interest on the LDA. However, excessive balances shall not be maintained in order to receive interest. If the collection of foreign currency causes a non-interest bearing LDA to exceed a 30-day supply, and all attempts to sell the currencies to other DOs have been exhausted, an interest bearing account shall be established, if possible. In such cases, the DO immediately should place all funds in excess of estimated draw-downs against the non-interest bearing account for the ensuing 14-day period in a demand or short-term interest bearing account, if available. The deposit shall be placed with a bank that has been designated as a Depository of Public Moneys by the Treasury Department. The DO shall place the excess funds in an interest bearing account with the bank that maintains the checking account, unless a more beneficial banking arrangement can be made promptly with another Treasury-authorized LD. The DO shall canvass the market to obtain the highest interest rates legally available commensurate with disbursing requirements. The DO is responsible for monitoring the interest bearing accounts to ensure that interest is being paid on a timely basis and per agreements reached between the DO and the banks. Upon notification that interest has been credited to the account, the DO shall prepare a DD Form 1131 crediting **1435, General Proprietary Interest, Not Otherwise Classified, for the U.S. dollar equivalent of the interest. The transaction shall be recorded as a collection and an increase of cash on deposit in the LDA.

1402 ESTABLISHMENT OF LIMITED DEPOSITORY CHECKING ACCOUNTS

140201. Establishment Procedure. LDAs shall be established in the name of the activity to which the DO is assigned. Authority to sign checks drawn on the LDA shall be limited to the DO and such other deputies or agents that the DO may appoint. Normally, only one LDA is authorized for one DO. However, a separate LDA may be established for each type of foreign currency used by the DO in official transactions.

140202. Letter of Authorization. The commander shall certify by letter the name and rank of the DO assigned to the activity and state that the DO is authorized to maintain accounts with official funds of the United States in the name of the activity. The letter shall certify that the account is to be subject to checks issued by the DO, his or her successors in office, and such other deputies as he or she may appoint. The letter shall contain a specimen of the DO's official signature and a certification that the signature is that of the DO. The letter shall also request the bank to acknowledge acceptance by endorsement of the letter in triplicate. The bank should retain the original letter and return 2 copies to the activity.

140203. Blank Limited Depositary Checks

A. Procurement. LDA checks are not available through the Treasury check contract. LDA checks should be ordered from the bank where the LDA is maintained.

B. Print Order Requirements. LDA checks should be requested in a continuous-form format for mechanized systems. LDA checks shall be overprinted to provide: the serial number of the check; name of the activity; any limited payability notices as may be applicable in the foreign nation; and information necessary for security, accounting for check issues, and other requirements as specified by the supporting DFAS Center.

C. Cost. The procurement cost of blank LDA checks shall be charged to the disbursing activity O&M fund.

D. Security. Blank LDA checks shall be controlled and safeguarded under the same guidelines prescribed for Treasury checks in Chapter 7 of this volume. In the event blank LDA checks are lost or stolen, the DO immediately shall notify the LD of the serial numbers of the checks involved. A stoppage of payment shall be placed against the checks and a copy of the stoppage of payment shall be submitted with the next original LDA reports.

E. Relief of DO. Unused LDA checks shall be transferred to and used by the relieving officer with no change in serial numbers.

F. Limited Depositary Account No Longer Required. When an LDA is no longer required or when a disbursing office is deactivated, all unused blank LDA checks shall be voided and destroyed using the guidelines prescribed in Chapter 8 of this volume.

1403 MAINTAINING A LIMITED DEPOSITARY CHECKING ACCOUNT

140301. Preparation of Limited Depositary Checks

A. General. LDA checks should be prepared by typewriter or by automated check writing equipment, if available.

B. Record of Check Issues. DOs shall maintain a record of every LDA check issued. The record shall contain at least the payee, the voucher number, the amount (in the currency of the check), the check serial number, the date of the check, and the activity name under which the account is established. Other information as to the purpose for which the check was issued and local identification codes are optional and subject to the discretion of the issuing DO. The record may be on paper or in a media designed for data processing use (paper tape, diskette, or magnetic tape). A separate record shall be kept for each LDA checking account. Records of check issues shall be included with retained disbursing records.

140302. Disbursement Vouchers. When a payment is made by check drawn on an LDA, the notation "LDA Check No. _____," shall be entered on the disbursement voucher. Although a receipt is not generally required for a payment made by check, certain LDs outside the United States are prohibited by local law from returning paid checks to the drawer. In these cases, the voucher on which such an LDA check payment appears shall evidence receipt of payment in one of the ways described in the following paragraphs.

A. Signature on Original Voucher. The original voucher shall be submitted as a part of the financial reports for the month of payment.

B. Periodic Statements From Depositary. Periodic statements from the LD listing the paid checks by number and amount, certified by an officer of the bank and by the DO shall be satisfactory evidence of payment. The certificate of the bank should be to the effect: "I certify that the above is a true and correct list of all checks paid by this bank and charged to the account shown in the heading during the period covered by this statement and that the originals of such checks are on file in this bank and are required to be held for ___ years." The certificate of the DO shall be to the effect that the bank statement has been reconciled with the disbursing records and found to be in agreement therewith.

★ 140303. Delivery of Checks. Delivery of LDA checks shall be as prescribed in Chapter 8 of this volume. However, prior to mailing any LDA checks outside the country in which the LDA is located, the disbursing officer shall verify that such action is not prohibited by the Status of Forces Agreements or the banking laws of the countries involved.

140304. Irregularity After Delivery of Checks. When an irregularity is discovered after a check has been delivered and the check is still outstanding, immediate action shall be taken to stop payment of the check. A complete report of the facts shall accompany the request for stoppage. If the irregularity is discovered after the check has been paid, the depositary shall be notified of the irregularity.

140305. Review of Limited Depositary Checking Accounts

A. Commander's Review. Commanders shall require a review of LDAs maintained by DOs to ensure compliance with the requirements set forth in this volume. This review should be accomplished by the quarterly cash verification team required by Chapter 3 of this volume. Reviews shall be performed quarterly, upon transfer of accountability to a successor DO, upon deactivation of the LDA, or upon a change in the designated settlement office. Quarterly reviews shall be unannounced. Reviews shall also be accomplished prior to the departure of the DO from the command.

B. DO's Review. DOs shall review the LDA on a continuing basis to ensure that: account balances are maintained at the minimum amount necessary to meet immediate disbursement needs (checks issued and in process) and are commensurate with the activity in the LDA, balances in excess of immediate needs are promptly withdrawn and deposited with the Treasury Department, and terms negotiated with the depositary are favorable to the government, including interest on the account at the highest possible rate.

1404 VOIDED AND SPOILED LIMITED DEPOSITARY CHECKS

140401. General. Original LDA checks that are not to be issued shall be treated as voided or spoiled checks. All LDA checks shall be accounted for by the DO who has been authorized to establish the LDA. Checks shall be voided or spoiled because of: errors in the writing of the check (wrong name, amount, etc.); withdrawal of the voucher by the applicable functional area; or, because the check is physically damaged during preparation. These checks shall be conspicuously marked so they may not be cashed, either in error or through fraud. Separate listings of voided and spoiled checks shall be prepared each month and attached to the SF 1149 (Statement of Designated Depositary Account).

140402. Voided Checks. The functional area authorizing the payment of a voucher shall determine when a check is to be voided. The determination shall be based on the payee's non-entitlement to the payment, or an error in the way the check is drawn. Voided checks are not reported as checks issued in the check report of the DO. They shall be rendered non-negotiable by stamping, marking or writing the words, "VOID - NOT NEGOTIABLE, NO CHECK ISSUED UNDER THIS NUMBER" on the face of the check in large prominent letters. The marking on the check shall be applied immediately after the determination is made to void the payment. No unmarked voided checks shall be stored in the safe or vault of the DO or any deputies or agents. At the end of each month a listing of voided checks shall be prepared and forwarded with the monthly SF 1149. The listing shall be in check number sequence of the checks, titled "Voided Checks", and show the accounting month; the name of the LD; and, the checking account number. The original of all voided checks shall be submitted with the listing.

★ 140403. Spoiled Checks. The DO issuing the check shall determine when a check is to be reported as spoiled. The determination shall be based on the physical appearance of the check (e.g., mutilated, torn, not whole, smudged or unreadable) or upon the discovery of an error

in the preparation of the check (i.e., voucher correct and the check data does not match the voucher). A separate listing (in check number sequence) of spoiled checks shall be prepared at the end of each month. The listing shall be titled "Spoiled Checks" and show the accounting month, the name of the LD, and, the checking account number. The listing and the original spoiled checks shall be attached to, and forwarded with, the monthly SF 1149. Spoiled checks shall be replaced by another serially numbered check.

★ A. Replacement by Another Serially Numbered Check. When it is necessary to issue another serially numbered check to replace a spoiled check, the next available numbered check shall be used. Except for the check serial number and the check issue date, the information on the check shall be identical to what appeared on the original check. The replacement check shall be dated on the date of issue. The original check shall be rendered non-negotiable by writing, marking or stamping the face of the check "SPOILED - NOT NEGOTIABLE, REPLACEMENT ISSUED UNDER CHECK NO. _____ DATED _____". The words "Issued to Replace Check No. _____" shall be inscribed on every replacement check in the lower left-hand corner of the face of the check. This same information shall also be shown on the detailed record of checks issued.

1405 TRANSFERRING THE PROCEEDS OF LIMITED DEPOSITARY CHECKS

140501. General. After an LDA check has been issued, events may occur that require transferring the proceeds of the check to the Treasury Department or to the original appropriation. The most frequent occurrence of transferring the proceeds of LDA checks is when outstanding check amounts are transferred to the Treasury Department as uncurrent. An uncurrent LDA check is one that has not been negotiated through the LD one full fiscal year after the fiscal year in which it was issued. The transfer of LDA check proceeds may also be caused by undeliverable checks and by checks due deceased or incompetent payees.

140502. Uncurrent Check Transfers. Proceeds of uncurrent checks shall be transferred to the Treasury Department in October of each fiscal year. The DO who issued the original check, the successor to that DO, or a settlement office designated by the supporting DFAS Center shall make the transfer. The procedures for the transfer are explained below. Note: If the laws of the nation in which the LDA is located provide that the negotiable period of a check is less than one full fiscal year after the date of issue, the DO shall comply with those laws in carrying out these procedures.

A. Open Limited Depositary Accounts

1. Preparation of Check Listing. Prepare a separate check listing in an original and 4 copies for each LDA with a heading showing the DO's name and location and the name and location of the LD. Each listing shall show the uncurrent LDA checks in ascending numerical order and provide for each check the: issue date, check number, name of the payee, amount of the check in foreign currency, and U.S. dollar equivalent of the check at the time it was issued (as shown on the payment voucher). The check listing shall also show the total

amount of foreign currency units and the total U.S. dollar equivalent of all checks on the listing. The total U.S. dollar equivalent at the time the checks were issued shall be the amount transferred to the Treasury Department account, 20X6045, Proceeds and Payment of Certain Unpaid Checks.

2. Stop Payment Notice to LD. The DO immediately shall give a copy of the uncurrent check listing to the LD and request the LD to place stop payments on all the checks on the listing. The LD shall be instructed to advise all payees presenting checks shown on the listing to submit the checks to the disbursing office for transmittal to, and settlement by the General Accounting Office, Transportation and Claims Division, Washington, DC 20548.

3. Method of Transfer. The DO shall prepare an OF 1017-G (Journal Voucher) which shall serve as the basis to purchase the amount of foreign currency units represented by the outstanding checks. The DO then shall complete the purchase by issuing a Treasury check payable to the U.S. Treasury for the U.S. dollar equivalent as shown on the check listing. A complete explanation of the transaction shall be written on the OF 1017-G giving the date, the check serial number, and the DSSN of the activity issuing the Treasury check. The OF 1017-G shall support the increase in the LDA checkbook balance, and the transaction shall be reported on line 6 of the SF 1149. A copy of the OF 1017-G shall be attached to the uncurrent check listing and forwarded with the Treasury check to Treasury Department as provided in subparagraph 140502.A.5, below.

4. Accounting for the Transfer. To maintain the DO's accountability, several actions shall be accomplished in the daily business at the close of the business day on which the transfer occurs. The Treasury check shall be reported in the daily business as "Checks Issued on U.S. Treasury". "Cash on Deposit in Designated Depository" shall be increased in the same U.S. dollar amount as the Treasury check. The LDA checkbook balance shall be increased by the total amount of foreign currency units as shown on the check listing. The current U.S. dollar equivalent of the LDA checkbook balance (including the foreign currency units added above) shall be computed using the current rate of exchange. The computed total U.S. dollar equivalent of the LDA checkbook balance shall then be compared to the total U.S. dollar equivalent shown as "Cash on Deposit in Designated Depository". Any difference in total U.S. dollar equivalents shall be vouchered as a gain or loss by exchange transaction on a DD Form 1131 or SF 1034 (as appropriate) against *-6763 and recorded in the day's business as either a collection, increasing "Cash on Deposit in a Designated Depository", or a disbursement, decreasing "Cash on Deposit in Designated Depository".

5. Distribution of Documents. Distribute the uncurrent check listing, OF 1017-G, and the DD Form 1131 or SF 1034 as follows:

a. The original and one copy of uncurrent check listing, a copy of the OF 1017-G, and the Treasury check shall be forwarded to: Department of the Treasury, Financial Management Service, Comptroller, Liberty Center, Washington , DC 20227.

b. One copy of the uncurrent check listing shall be given to the LD.

c. One copy of the listing, one copy of the OF 1017-G and one copy of the DD Form 1131 or SF 1034 shall be attached to the SF 1149.

d. One copy of the listing, one copy of the OF 1017-G and one copy of the DD Form 1131 or SF 1034 shall be filed in the DO's retained LDA records.

e. The original and appropriate number of copies of the OF 1017-G and DD Form 1131 or SF 1034 shall be included with other vouchers supporting the SF 1219.

B. Closed Limited Depositary Accounts. When outstanding (unpaid) checks become uncurrent in a closed LDA, and it is necessary to transfer the U.S. dollar equivalent to Treasury Department account 20X6045, the DO having jurisdiction over the closed account shall arrange with the LD for the necessary transfer of funds from the closed LDA to the DO's current LDA. After the LD completes the transfer to the current account, the DO shall follow the procedures prescribed in subparagraph 140502.A, above. If the closed account belonged to a predecessor DO, or is the settlement account for a closed disbursing station, prepare one additional copy of the uncurrent check listing for filing with the retained records of the closed station's disbursing records. On this copy of the listing, reference shall be made to the disbursing office accomplishing the transfer and the date the transfer was accomplished.

140503. Transferring the Proceeds of Undeliverable Checks

A. General. The procedures prescribed in this paragraph relate to undeliverable LDA checks, the proceeds of which are still due the payee or the payee's estate. LDA checks which are returned as undeliverable and are not due the payee (or payee's estate) shall be canceled as prescribed in section 1406 of this chapter.

B. Time Limit for Holding Undeliverable Checks. Undeliverable LDA checks shall be held only until it is determined that the DO cannot effect delivery with the information available. In no case shall undeliverable LDA checks be held longer than 60 days from the date of issue.

C. Record of Undeliverable Checks. The DO shall establish a record of undelivered LDA checks using DD Form 2658 (Returned and Undeliverable Check/Bond Record) which shall include complete identification of the check, the disbursement voucher number, the date the check was returned, disposition of the check, the disbursing official authorizing disposition, and the date of disposition. Disposition of undelivered checks may be authorized by the DO, the principal deputy, or a third individual authorized in writing by the DO to make such disposition.

D. Safekeeping Undeliverable Checks. While held in the disbursing office, undeliverable LDA checks shall be protected the same as cash. Undeliverable LDA checks shall be filed in an order best suited for ease of retrieval and ready identification.

E. Disposition of the Proceeds of Undeliverable Checks Drawn on Open Accounts. The proceeds of undeliverable LDA checks (current as to date of issue) drawn on open LDA shall be credited to the appropriation or fund charged for the original disbursement at the rate of exchange in effect on the date of issue as shown by the payment voucher. A payable shall be established to allow for future settlement. Undeliverable LDA checks shall be scheduled on an SF 1098 showing the check number, month and year of issue, name of payee, amount (U.S. dollar equivalent on date of issue), DSSN, and the appropriation or fund to be credited. Each SF 1098 shall be accounted for as a cash collection. To maintain the DO's accountability, "Cash on Deposit in Designated Depository" shall be increased in the same U.S. dollar amount as the SF 1098. The LDA checkbook balance shall be increased by the total amount of foreign currency units as shown on the check. The current U.S. dollar equivalent of the LDA checkbook balance (including the foreign currency units added above) shall be computed using the current exchange rate. The total U.S. dollar equivalent of the LDA checkbook balance shall then be compared to the total U.S. dollar equivalent shown as "Cash on Deposit in Designated Depository". Any difference in total U.S. dollar equivalents shall be vouchered as a gain or loss by exchange transaction on a DD Form 1131 or SF 1034 (as appropriate) against **-6763 and recorded in the day's business as either a collection, increasing "Cash on Deposit in a Designated Depository", or a disbursement, decreasing "Cash on Deposit in Designated Depository". The record of outstanding checks and undeliverable checks shall be updated to reflect the disposition. At the time of disposition, the undelivered checks shall be rendered non-negotiable by writing, typing, or stamping on the face of the check the words "NOT NEGOTIABLE, PROCEEDS CREDITED IN GOVERNMENT ACCOUNTS, D.O. SYMBOL (DSSN)" to prevent negotiation by unauthorized persons. The amount of the defaced checks shall be included on line 3 of the SF 1149. The canceled checks and one copy of the SF 1098 shall be forwarded with the SF 1149 in the same manner as voided and spoiled checks at the end of each month. Sufficient additional copies of the SF 1098 shall be reproduced to provide the functional area authorizing the original disbursement a copy so they may set up a payable to handle future claims for the proceeds of canceled undeliverable checks.

F. Disposition of the Proceeds of Undeliverable Checks Drawn on Closed Accounts. If the LDA on which the undeliverable checks were drawn has been closed, the successor DO, or DO responsible for settlement of the account, shall notify the LD that the checks are being canceled and request that the value of the checks be transferred to an open account (if the DO maintains an LDA) or that the depository transmit the funds to the DO by check payable to the DO, by title. When the proceeds have been transferred to the open account, the DO shall proceed as prescribed in subparagraph 140503.E, above, for undeliverable checks drawn on an open account. If the LD provides the proceeds by check, the DO shall collect the check on a DD Form 1131 to the appropriation or fund charged when the undeliverable check was issued. No SF 1098 is prepared in this situation. The DD Form 1131 shall be prepared at

the rate of exchange in effect on the date the check was issued (as shown by the payment voucher). The DD Form 1131 shall be recorded in the DO's accounts as a cash collection. Any difference in the U.S. dollar value at the current rate of exchange and the rate of exchange at which the check is collected shall be accounted for as a gain or loss by exchange transaction. At the time of disposition, the undelivered checks shall be rendered non-negotiable by writing, typing, or stamping on the face of the check the words "NOT NEGOTIABLE, PROCEEDS CREDITED IN GOVERNMENT ACCOUNTS, D.O. SYMBOL (DSSN)" to prevent negotiation by unauthorized persons. The record of outstanding checks and undeliverable checks in the former DO's accounts shall be updated to reflect disposition of the checks. A copy of the DD Form 1131 and the defaced checks shall be forwarded with the SF 1149 to support the changes in the closed LDA account at the end of the month. A copy of the DD Form 1131 shall be forwarded to the applicable functional area to enable them to establish the payable in the event of future claims for the proceeds of the canceled undeliverable checks.

G. Undeliverable Checks Uncurrent as to Date of Issue. Any uncurrent undeliverable checks that come into the possession of the disbursing office, the proceeds of which have been transferred to Treasury Department account 20X6045 and for which no current claim has been presented, shall be forwarded directly to the General Accounting Office, Transportation and Claims Division, Washington, DC 20548. Uncurrent undeliverable checks that come into the possession of the disbursing office, the proceeds of which have not yet been transferred to the Treasury Department, shall be processed as prescribed in paragraph 140502, above. Under no circumstance shall an uncurrent undelivered check be scheduled on an SF 1098 or DD Form 1131 as a current undeliverable check.

140504. Limited Depositary Checks Due Deceased or Incompetent Payees

A. Checks Which Are Current as to Date of Issue. Unnegotiated LDA checks which are still current as to date of issue, returned to the disbursing office in connection with a claim for the proceeds which are still due a deceased or incompetent payee, shall be processed as prescribed in subparagraphs 140503.E and 140503.F, above for undelivered checks.

B. Checks Which Are Uncurrent as to Date of Issue. All unnegotiated LDA checks, which are uncurrent as to date of issue, and returned to the disbursing office in connection with a claim for the proceeds that still are due a deceased or incompetent payee, shall be handled as prescribed in this subparagraph. If the proceeds of these outstanding undeliverable checks previously were not transferred to Treasury Department account 20X6045, this action shall be accomplished as provided in paragraph 140502 above prior to forwarding the check and the claim to the General Accounting Office. If a previous transfer of the proceeds to Treasury Department account 20X6045 has taken place, the check shall be forwarded with the claim to the GAO for settlement.

140505. Claims for the Proceeds of Undeliverable Checks

A. Claims for Settlement by the DO. In processing claims for the proceeds of undeliverable checks that have been credited to the appropriation or fund originally charged, the payments shall be supported by a regular disbursement voucher using an SF 1034. Each voucher shall cite a reference to the original undeliverable check, showing the check serial number, amount and DSSN.

B. Claims for Settlement by GAO. Claims for the proceeds of undeliverable checks shall be forwarded for settlement by the General Accounting Office, Transportation and Claims Division, Washington, DC 20548 when there are doubtful questions of law or fact, or when the proceeds of the check have been transferred to Treasury Department account 20X6045 as prescribed in this section.

1406 CANCELING LIMITED DEPOSITARY CHECKS

140601. General. LDA checks shall be canceled when the proceeds of the check are not due a payee or the payee's estate but are for credit to an appropriation or fund account. The procedure for cancellation of these checks depends on whether: the account on which the check was written is an open account or a closed account, the check is "current" or "uncurrent", and the check is available or unavailable to the DO who maintains the LDA.

140602. Checks Not Due a Payee or Payee's Estate. The DO functional area submitting the certified payment voucher for issue of the check normally is the only office with authority to cancel checks not due a payee or the payee's estate. Except as provided in this paragraph, the SF 1098 shall be used to list and report all checks not due the payee or payee's estate which are being canceled. In all cases where practicable, the SF 1098 shall be prepared by the functional area authorizing the original payment. If the DO's disbursing division prepares the SF 1098, the functional area shall sign and date the form in the lower right-hand corner, in the spaces titled "Forwarded" and "By". The disbursing division shall mark the front of the check with the word "CANCELED" and the date of cancellation in prominent letters to prevent improper negotiation of the check.

A. Checks Which Are Current as to Issue Date. The DO shall cancel LDA checks not due a payee as quickly as possible. The U.S. dollar equivalent of the foreign currency amount of the check at the rate of exchange in effect on the date the check was issued (as shown on the payment voucher) shall be the amount credited to the original appropriation or fund charged for the payment.

1. Open Accounts. If the LDA is open (established and being used by the current DO), the SF 1098 shall be processed in the accounts to effect the credit to the fund or appropriation originally charged for the disbursement, to increase the LDA checkbook balance, and to remove the canceled check from the record of outstanding checks. Each SF 1098 shall be accounted for as a cash collection. To maintain the DO's accountability, "Cash on Deposit in Designated Depositary" shall be increased in the same U.S. dollar amount as the SF 1098. The LDA checkbook balance shall be increased by the total amount of foreign currency units as

shown on the check. The current U.S. dollar equivalent of the LDA checkbook balance (including the foreign currency units added above) shall be computed using the current rate of exchange. The total U.S. dollar equivalent of the LDA checkbook balance then shall be compared to the total U.S. dollar equivalent shown as "Cash on Deposit in Designated Depositary". Any difference in total U.S. dollar equivalents shall be vouchered as a gain or loss by exchange transaction on a DD Form 1131 or SF 1034 (as appropriate) against ** -6763 and recorded in the day's business as either a collection, increasing "Cash on Deposit in a Designated Depositary", or a disbursement, decreasing "Cash on Deposit in Designated Depositary". The face of the canceled check shall be marked with the word "Canceled" and the date of cancellation. The canceled check and a copy of the SF 1098 shall be forwarded with the original SF 1149 at the end of the month.

2. Closed Accounts. If the LDA is closed or the account was maintained by a predecessor DO and closed upon change of DOs, it will be necessary to transfer funds between the closed and current (open) LDAs before processing the cancellation action. If the transfer can be accomplished by drawing a check against the closed account for deposit to the open account, this procedure should be followed. Otherwise, the procedures outlined below shall be followed in processing the necessary transfer.

a. Check to be Canceled Drawn on DO's Current Limited Depositary. If the DO cannot draw a check against the closed LDA and both the closed and open accounts (DO's current account) are with the same LD, advise the LD by letter that the check is in the possession of the DO and is being canceled. Request the bank to transfer the funds involved from the closed account to the open account. When the LD advises that the requested transfer has been made, proceed with the preparation of the SF 1098, as described in subparagraph 140602.A.1, above.

b. Check to be Canceled Drawn on Different Limited Depositary. If the closed LDA and the DO's current open LDA are in different LDs, request in writing that the LD on which the check was drawn charge the account for the check being officially canceled and transmit the funds to the DO, by title. Upon receipt, the funds shall be deposited in the current open LDA and treated as a cash collection using the DD Form 1131 for credit to the fund or appropriation originally charged for the check being canceled. Do not process an SF 1098 for this transaction. The U.S. dollar equivalent of the foreign currency amount of the check and the rate of exchange, effective on the date the check was issued as shown on the payment voucher, shall be shown on the DD Form 1131. State prominently on the DD Form 1131 that the transaction involves the proceeds of a canceled check. Any difference in the U.S. dollar value at the current rate of exchange and the rate of exchange at which the funds provided by the LD are collected on the DD Form 1131 shall be accounted for as a gain or loss by exchange transaction.

B. Unavailable Checks. LDA checks, the proceeds of which are not due the payee or the payee's estate, and not held by the disbursing office, shall be canceled even though

the check cannot be forwarded with the SF 1149 as a canceled check. The following procedures shall be used.

1. The applicable DO functional area shall prepare an SF 1098 and give an explanation on the schedule of the circumstances that make the check unavailable. The SF 1098 shall be approved by the functional area authorizing the issue of the original check and shall also be signed by the DO under the explanation of the unavailability of the check.

2. The DO shall request the LD on which the check was drawn to place a stop payment on the check and provide a written acknowledgement when the action has been accomplished.

3. When the LD's acknowledgement is received, the DO shall process the SF 1098 and credit the fund or appropriation originally charged, adjust the checkbook balance, and reduce the record of outstanding checks as prescribed in subparagraph 140602.A.1, above. A copy of the LD's acknowledgement and a copy of the SF 1098 shall be forwarded with the SF 1149 at the end of the month.

4. The original SF 1098 and the bank's acknowledgement shall be filed with the DO's monthly financial reports and the DO shall keep copies for the retained records file.

C. Checks Which Are Uncurrent as to Date of Issue. DOs cannot cancel uncurrent LDA checks. Only the GAO can cancel uncurrent LDA checks. The proceeds of uncurrent checks not due a payee or payee's estate shall be processed through Treasury Department account 20X6045. Uncurrent LDA checks (whether or not due the payee or payee's estate and whether or not available to the DO) will have been processed through Treasury Department account 20X6045 as prescribed in paragraph 140502, above in October of the fiscal year which is one full fiscal year after the fiscal year in which the check was issued. If the proceeds of the uncurrent check have not been transferred to 20X6045, the transfer shall be accomplished before asking the GAO to cancel an uncurrent check which is not due the payee or payee's estate.

1. The DO shall schedule the check on an SF 1098 prepared in original and six copies crediting the fund or appropriation originally charged for the payment. The amount to be credited shall be the U.S. dollar equivalent of the foreign currency at the rate of exchange in effect when the check was issued (as shown on the payment voucher. Modify the heading of the SF 1098 to read "Schedule of Limited Depositary Checks Canceled by GAO". A full explanation of the reason for cancellation of the check shall appear on the SF 1098. Do not process this SF 1098 in the accounts as a collection.

2. Forward the original and five copies of the SF 1098 and the check, if available, through the supporting DFAS Center to: Department of the Treasury, Financial Management Service, Finance Division, Office of the Comptroller, Liberty Center, Room 257,

Washington, DC 20227 with a covering letter or memorandum requesting cancellation of the check. A copy of the outstanding check listing and OF 1017-G prepared when the check was transferred to Treasury Department account 20X6045 should be attached to document the request. Retain one copy of the SF 1098 in a pending receivable file.

3. After cancellation of the check is approved, the GAO will authorize issuance of a Treasury check for the value of the canceled LDA check. Process the check and the SF 1080 upon receipt from GAO as a collection. Support the transaction with the retained copy of the SF 1098.

1407 REPLACEMENT OF MISSING, MUTILATED, AND FORGED LIMITED DEPOSITARY CHECKS

140701. General. Upon receipt of a claim for a check which is reported as not received, or as lost, stolen, destroyed, mutilated, forged or defaced, the DO shall determine from the LD or from retained records the status of the check. Checks which are outstanding and unpaid, reported before the end of the fiscal year following the fiscal year in which they were issued, and do not involve a doubtful question of law or fact shall be replaced by a substitute check. Checks which have been paid on a forged endorsement, reported before the end of the fiscal year following the fiscal year in which they were issued, and to which the payee is entitled, shall be replaced by a settlement check. Claims for replacement of checks submitted more than a full fiscal year after the fiscal year in which they were issued, or involving a doubtful question of law or fact, or on behalf of deceased or incompetent payees without a court appointed legal representative, or where the claimant's entitlement is in question shall be referred to the GAO.

140702. Substitute Check Procedures. The following procedures apply to checks drawn on LDs in foreign countries.

A. Action by the Original Payee of the Check or Other Claimant. The payee or other claimant shall notify the DO, in writing, over his or her own handwritten signature, when a check has been lost, stolen, mutilated, or destroyed, and request payment on the check be stopped.

1. The notification shall provide all available information on the check. When furnished by the DO, the payee or other claimant shall complete a FMS Form 2244 (Undertaking of Indemnity - Substitute Checks) and return it to the DO before the end of the full fiscal year following the fiscal year in which the check was issued.

2. Claimants other than the original payee shall present a statement in support of their ownership of the check in addition to the FMS Form 2244. Representatives of deceased payees or owners who clearly are entitled to the proceeds of original checks as part of the estate, also shall complete and submit an SF 1055 (Claim Against the United States for Amounts Due a Deceased Creditor), or a statement of administration, if the claimant is serving under court appointment, to accompany the FMS Form 2244.

3. Claimants acting as guardians of incompetent payees or owners who are shown by the evidence to be entitled to the proceeds of the original check shall submit a short form court certificate showing their appointment and qualifications as guardians in addition to the FMS Form 2244.

4. If the payee or other claimant is a bank or other financial institution and the check was drawn for \$15,000 or less; or, a corporation or business of recognized financial standing and the check was drawn for less than \$5,000; or, a financially responsible individual and the check was drawn for less than \$150 or is for a recurring payment, in any amount greater than \$150, the DO may, at his or her discretion, accept an undertaking of indemnity in the form of a written statement or letter. The substance of the statement or letter shall be:

"In consideration of the issuance of a substitute check in lieu of (check number of original check, date, amount, and payee) and the payment of the substitute check, the undersigned undertakes and agrees to save harmless and indemnify the United States of America, its officers and agents, of and from any and all liability, loss, expense, claim, and demand whatsoever, arising in any manner by reason of or on account of said original check(s) or the stoppage of payment thereof, or the issue of payment of the substitute check(s), to replace the same."

The statement shall be witnessed by a person with authority to so act and, if necessary, may be executed in a foreign language translation of the foregoing letter of indemnity. If the claim exceeds the amounts stated above and the DO still desires to use the letter form of the undertaking of indemnity, approval shall first be obtained from the Deputy Director for Finance, DFAS Headquarters, through the supporting DFAS Center.

B. Action by the DO. The DO shall first determine that the check reported as lost, stolen, destroyed, mutilated, or defaced is still outstanding. If it is, the LD shall be requested, in writing, to enter a stop payment against the check and to acknowledge, in writing, receipt of the request. Upon receipt of the acknowledgement, the DO shall forward a modified FMS Form 2244 to the claimant for completion and return to the disbursing office. The modifications by the DO required on the FMS Form 2244 are:

1. Enter the description of the check.
2. Enter the name of the bank on which the check was drawn
3. Insert a statement near the added bank name that reads, "This change made prior to execution of bond with full knowledge and consent of all parties concerned." This statement shall be signed by the claimant and by the surety/sureties.

Once the FMS Form 2244 is completed by the claimant and returned, the DO shall approve the claim for payment if it is determined the original check still is outstanding, the substitute check can be issued before the end of the full fiscal year following the fiscal year of issue, there is no doubtful question of law or fact concerning the payment, the written claim (FMS Form 2244 or written statement or letter) includes an undertaking of indemnity, and any necessary supporting documents have been received in proper form. The approval shall be noted on the reverse of FMS Form 2244, or letter undertaking indemnity, in the words "Claim approved by (Name, title, and disbursing station), Date (month, day, and year)". If the original check was drawn on a closed LDA, it will be necessary to transfer funds to an open LDA before a substitute check can be issued. Use the procedures described in subparagraph 140602.A.2, above to accomplish the transfer of funds. The DO then shall issue a substitute check with the current date and payable in the same currency as the original check. The substitute check shall contain information on its face in the lower left-hand corner identifying the original check as follows: "Issued in lieu of check number ____ dated (Mo, Day, Yr) drawn by (DO who issued original check) on (Name of LD).". The number of the substitute check, the date of issue, and the name of the LD on which drawn shall be recorded on the back of the FMS Form 2244 (or letter undertaking indemnity) by the DO when the substitute check is issued. At the end of the month, the DO shall include a copy of all substitute checks issued during that month with the SF 1149. If copies cannot be provided, a listing of substitute checks issued shall be submitted with the SF 1149. The listing shall show only the substitute check number and the number and date of the original check it replaces. Substitute checks do not increase the DO's accountability and are not reflected in the SF 1219. The FMS Form 2244 and all supporting documents shall be filed with the retained records of the DO.

C. Sureties. A surety assumes the status of a debtor under the original agreement and is primarily liable with the claimant for every default. Acceptable sureties in connection with FMS Form 2244 are either a corporate surety authorized by the Secretary of the Treasury, or two responsible individual sureties. In foreign countries, it is the claimant's responsibility to secure a certification as to the financial sufficiency of the individual sureties. The certification shall be executed by one of the persons listed on the face of the FMS Form 2244 under "Certificate as to Sureties" and in the manner prescribed by the instructions appearing on the FMS Form 2244. If the amount of the original check was equivalent to \$200 or less in United States currency, only one financially responsible surety is required. Sureties shall not be required if:

1. The DO determines that the non-receipt, loss, theft, destruction or mutilation of the check was not the fault of the owner or holder and occurred while the check was in the custody or control of an agent of the United States performing services in connection with an official function of the United States.

2. The DO is satisfied that a substantial portion of the check is presented and is in fact the subject of the claim and that those missing portions are not sufficient to form a valid claim against the United States.

3. The claimant or holder is an officer or employee of the United States, a municipal corporation, or a political subdivision of the United States, a state, the District of Columbia, or a United States Territory or Possession.

4. The claimant is a corporation whose entire capital is owned by the United States, a foreign government or agency thereof, a foreign central bank, or a Federal Reserve Bank.

140703. Settlement Check Procedures. The procedures for claims on paid checks are applicable to all LDAs.

A. Action by the Payee of the Check. The payee immediately shall notify the DO, over his or her own handwritten signature, when a check has been paid on a forged endorsement. The notification shall provide all available information on the identification of the forged check. The payee shall complete the FMS Form 1133 (Claim Against the United States for the Proceeds of a Government Check) and return it to the DO issuing the original check within 90 days of the date appearing on the FMS Form 1133.

B. Action by the DO. Upon receipt of a written request for the proceeds of a check paid on a forged endorsement, the DO shall:

1. Request the LD to commence reclamation. The request to the LD shall be in writing. The LD shall be requested to acknowledge the request in writing and, if canceled checks are not returned to the account holder with the bank statement, to provide the forged check or a clear legible copy thereof to the DO.

2. Give the payee a copy of the forged check, a modified FMS Form 1133 with instructions on completion and return of the form within 90 days. Modifications that the DO shall make to the FMS Form 1133 are: substitute the address of the DO as the return address at the top of the form and in the second from the last paragraph in place of the Treasury Department address in those positions; insert the complete name and address of the claimant in the address area; insert the payee's name and complete address as shown on the forged check, the check number, the date of issue, and the amount of the check in the boxed space; delete the phrase "by the United States Secret Service" in the second line of the last paragraph; and substitute the title of the DO processing the claim for "Director, Division of Check Claims" appearing at the bottom of the form.

3. If the completed FMS Form 1133 is not returned within 90 days the DO shall consider the case closed. If the FMS Form 1133 is completed and returned by the payee within 90 days, the DO shall forward the form and a copy of the forged check to his or her Component's investigative service for examination by a handwriting expert.

4. The investigative service shall be requested to certify an opinion as to the authenticity of the endorsement. The opinion of the handwriting expert shall be the basis

for deciding whether or not a settlement check can be approved for the claimant. Approval for a settlement check shall be granted if the opinion of the handwriting expert states the endorsement was forged and not executed by the payee, the settlement check can be issued before the end of the full fiscal year following the fiscal year in which the forged check was issued, there is no doubtful question of fact or law concerning the payment, and the payee's claim, in writing, the FMS Form 1133, the certified opinion of the handwriting expert, and any other necessary supporting documents have been received in proper form.

5. When it has been determined that a settlement check is due the payee it shall be issued without waiting for reclamation to be accomplished by the LD. The approval shall be noted on the front of the FMS Form 1133 in the words "Settlement approved by (name, title, and disbursing station), Date (month, day, and year).". The DO then shall issue a settlement check with the current date and payable in the same currency as the original check. The settlement check shall contain information on its face in the lower left-hand corner identifying the original check as follows: "Issued in settlement of check number ____ dated (Mo, Day, Yr) drawn by (DO who issued original check) on (Name of Limited Depository).". Settlement checks shall be reported as checks issued and accounted for in the regular manner when preparing the SF 1149.

6. Where the local currency disbursed for the forged check was purchased through an MBF, by an open market transaction, or by issuance of a Treasury check, the issuance of the settlement check shall be reported as a Receivable - Check Overdraft on line 7.2 of the DD Form 2657, Daily Statement of Accountability and the SF 1219. The receivable shall be established and cleared as a check issue overdraft discrepancy as prescribed in section 1408, below. Where the funds originally used to pay the forged check were obtained from U.S. owned foreign currencies, the DO shall charge the disbursement of the settlement check to the same foreign currency account.

C. Reclamation. In all cases where settlement checks have been issued, the DO responsible for the LDA shall be satisfied that reclamation action is timely, and every effort is made to recover the proceeds of forged LDA checks. The DO shall, at least twice within the 30 days immediately following the receipt of the LD's acknowledgement of the notification of a forgery, make a formal written request for completion of reclamation by the LD. If the LD advises that reclamation cannot be made because the LD can prove a point of local law that relieves it from responsibility, the DO shall request relief of liability for the illegal, incorrect, or improper payment as prescribed in Chapter 6 of this volume. If relief of liability is granted, the DO shall clear the check issue overdraft as prescribed in section 1408, below. Recoveries made through reclamation shall be credited to the appropriation to which the disbursement of the settlement check was charged. If the charge is still carried as a check issue overdraft, line 7.2 of both the DD Form 2657 and the SF 1219 shall be cleared. If line 7.2 has already been cleared by relief of liability, the account Miscellaneous Receipts, **3210, shall be credited.

140704. Recovery of Original Check. In the event that the original LDA check is recovered before issuance of a substitute check, suspend the substitute check action and request

the LD to remove the stop payment against the original check. The payee then may negotiate the original check. If the substitute check has been released, the original check shall be rendered non-negotiable by writing or stamping across the face of the check "Not Negotiable - Substitute Check Issued Under No. ____." Such a check shall be submitted with the next SF 1149.

140705. Referral to the General Accounting Office

A. Entitlement or Legal Representation. All cases involving questions as to the payee or owner's entitlement to a substitute or settlement check, and cases where no legal representative has been appointed by the court for deceased/incompetent payees or owners, shall be forwarded for advice to the General Accounting Office, Claims Group, General Government Division, Washington, DC 20548.

B. Questions of Law or Fact. All cases involving a doubtful question of law or fact shall be forwarded to the GAO for settlement action.

C. Checks Outstanding More Than One Full Fiscal Year. All cases involving checks that have been outstanding more than one full fiscal year after the fiscal year in which they were issued shall be forwarded to the GAO for settlement action. Documentation for these cases shall include a properly executed FMS Form 2244 or other undertaking of indemnity for the proceeds of a lost, stolen, destroyed, mutilated, or defaced LDA check; the check in question, if available, or any identifiable portions thereof; and, any other supporting documentation.

140706. Files. Approved claims and supporting documentation, or copies of the same where the originals have been transferred to the supporting DFAS Center or OPLOC, shall be retained by the DO as part of the retained records.

1408 ADJUSTMENT OF CHECK ISSUE DISCREPANCIES

140801. General. This section sets forth the actions necessary to effect adjustments of LDA differences chargeable to DOs. These adjustments shall be made and recorded in the accounts of the DO immediately upon discovery. The procedures described herein do not apply to voided or spoiled LDA checks or to canceled LDA checks which were discussed in sections 1404 and 1406 of this chapter. LDA check issue discrepancies are disclosed in internal audit reports, by the GAO's audit, or by control measures initiated by the DO. These differences occur when the LD pays a check in an amount different from the disbursement voucher and the record of checks issued; the disbursing office draws a check to the wrong payee; the disbursing office issues a check in an amount different than the amount shown on the disbursement voucher; the disbursing office voids, spoils, or cancels a valid check in error while at the same time issuing the check that was the subject of the action to void, spoil, or cancel; or the payee advises of a possible overpayment or under-payment.

140802. Recording Limited Depository Check Issue Overdrafts and Underdrafts. As soon as the DO is aware of a check issue difference (regardless of the U.S. dollar value) an

OF 1017-G shall be prepared in original and three copies to record the overdraft or underdraft. A complete explanation of the difference shall be shown on the form, including a description of the check (check number, date, amount, payee, account number, and LD name) and identification of the related disbursement voucher. The original OF 1017-G shall be attached to the DO's SF 1219, a copy shall be attached to the SF 1149, and the two remaining copies shall be placed in a file and used as the DO's official subsidiary record of the uncleared difference comprising the DO's accounts receivable and/or accounts payable.

140803. Adjustments During The Current Accounting Period. Documentation for adjustment of check issue discrepancies applying to the current accounting period, which are disclosed and adjusted in the current accounting period, shall not be furnished with the SF 1149. These documents are required for internal processing and shall be maintained with the other retained financial records. Differences disclosed during the current accounting period which cannot be adjusted until a subsequent accounting period shall be documented as prescribed in paragraphs 140804, 140805, and 140806, below.

140804. Adjustments of Check Issue Overdrafts of More Than \$1. When it is determined that an LDA check has been issued for more than the amount shown on the disbursement voucher and the amount reported in the LDA reports, prepare an OF 1017-G as described in paragraph 140802, above and enter the amount as a decrease to the LDA on line 6.1 and an increase to accounts receivable on line 7.2A of the DD Form 2657. If the overdraft is an actual overpayment to the payee, the DO shall commence collection action. When recovery is made on the overpayment, the DO shall deposit the funds in the LDA and enter the amount as an increase on line 6.1 and a decrease on line 7.2A of the DD Form 2657. Prepare an OF 1017-G to document this transaction. Do not prepare a collection voucher. If the overdraft is due to not having charged the appropriation for the total amount of the check, prepare a one-sided SF 1081 to charge the overdraft to the appropriation cited on the original disbursement voucher. Include a complete explanation of the adjustment on the SF 1081 and process the voucher as a disbursement on line 4.1A and a decrease to accounts receivable on line 7.2 of the DD Form 2657.

140805. Adjustments of Check Issue Underdrafts of More Than \$1. When it is determined that a check has been issued for less than the amount shown on the disbursement voucher and the amount shown on the depositary reports prepare an OF 1017-G as described in paragraph 140802, above and enter the amount of the underdraft as an increase to line 4.1E and an increase to line 6.1 of the DD Form 2657. Prepare a one-sided SF 1081 crediting deposit fund account, Accounts Payable - Check Issue Underdrafts, **X6999. If the underdraft is due to charging the appropriation cited on the disbursement voucher more than the amount of the check, prepare an SF 1081 charging deposit fund account **X6999 and crediting the appropriation charged on the original voucher. If the underdraft is due to issuing the check for less than the amount on the original voucher, prepare an SF 1049 charging deposit fund **X6999 and issue a check to the original payee for the amount of the underdraft. Record the check and the SF 1049 as a new transaction in the LDA and on the DD Form 2657.

140806. Clearing Overdrafts and Underdrafts of \$1 or Less. When it is determined that an overdraft or underdraft of \$1 or less exists, prepare an OF 1017-G as described above for overdrafts and underdrafts over \$1. However, LDA check issue differences equal to \$1.00 or less in U.S. currency, even though they shall be recorded in the DO's accounts, will not be liquidated by collection from overpaid payees, payment to underpaid payees, or adjustments to appropriation or fund accounts which were over- or under- charged in the original processing of the voucher and issuance of the check. Instead, the procedures in the following paragraphs shall be used.

A. Clearance of Overdrafts Equal to One U.S. Dollar or Less. At the close of each fiscal year the DO shall prepare a one-sided SF 1081 for the cumulative total of all outstanding check issue overdrafts with a U.S. dollar value of one dollar or less. The SF 1081 shall charge the O&M appropriation of the disbursing activity and credit accounts receivable. Show a complete description of the transaction including a listing of the OFs 1017-G being cleared.

B. Clearance of Underdrafts Equal to One U.S. Dollar or Less. At the close of each fiscal year the DO shall liquidate all outstanding underdrafts for check issue differences with a U.S. dollar value of one dollar or less by processing an SF 1081 to transfer the cumulative total of these accounts payable from deposit fund **X6999 to miscellaneous receipt account, Forfeiture of Unclaimed Money and Property, **1060. If a payee requests payment of the underpaid amount at any time after the DO has processed the OF 1017-G for the underdraft but before the end of the fiscal year, the DO shall validate the claim and, if necessary, issue a check charging the original appropriation for the disbursement. Claims received after the outstanding underdraft has been cleared as prescribed in this paragraph shall be referred to the supporting DFAS Center.

140807. Clearing the Subsidiary Account Files. When the adjustment action has been completed, collection made, or additional check issued, mark the two file copies of the OF 1017-G with the appropriate legend: See Deposit Ticket No. _____, dated _____; See Check No. _____, dated _____; or, See Adjustment Voucher No. _____, dated _____. Submit one of the annotated copies with the SF 1149 at the close of the accounting period. File the remaining copy with the DO's retained records for the LDA.

1409 DOCUMENTATION OF LIMITED DEPOSITARY ACCOUNT TRANSACTIONS

140901. General. DOs are responsible for maintaining the controls and safeguards necessary to assure the drawing of LDA checks in strict conformity with disbursement vouchers as certified. LDAs are a part of the DO's accountability for public funds and are not recorded in agency accounting records until disbursements and collections are properly vouchered. For this reason, records maintained by the DO shall be complete, accurate, and auditable to insure the integrity of the LDAs.

140902. SF 1149 (Statement of Designated Depository Account). Within 30 days following the close of each calendar month, an SF 1149 shall be prepared and submitted by the DO holding an open LDA and by accountable individuals charged with the settlement of closed accounts. The SF 1149 shall be prepared by the account holder closing an LDA on the last business day and submitted within 5 days after the LDA is closed. When an LDA is closed, the final SF 1149 shall be marked "FINAL" at the top of the form. The SF 1149 shall be prepared in an original and two copies if the LDA holder is the DO, and in an original and three copies if the account holder is an agent of the DO. The SF 1149 shall be supported by:

- A. An LD bank statement for the period or a certified list of paid checks;
- B. A record of checks issued;
- C. A schedule of spoiled and voided checks and the checks themselves;
- D. A copy of every SF 1098 issued during the reporting period canceling available checks and the checks themselves;
- E. A copy of every SF 1098 issued during the reporting period canceling unavailable checks with the LD's letter acknowledging cancellation of the unavailable checks;
- F. A copy of each OF 1017-G issued during the accounting period to transfer uncurrent checks or report/clear check issue discrepancies;
- G. Original checks returned or recovered after a substitute check has been issued; any mutilated or defaced checks received from claimants;
- H. A schedule of deposits made to the LDA during the accounting period, showing date and amount of each deposit;
- I. A list of outstanding checks showing check number, date, and amount; and
- J. A copy of the SF 1219.

140903. Preparation of SF 1149. Information necessary for the preparation of the SF 1149 is shown in the following paragraphs. See figure 14-1 for an example of a completed SF 1149.

- A. Heading
 - 1. Name (Disbursing official or cashier). Enter the name of the account holder.

2. Name (Funds advanced by). If the DO is the account holder, leave BLANK, otherwise enter the name of the DO who advanced the funds used to establish the LDA.

3. Station or Office. Enter the name and address of the activity to which the account holder is assigned.

4. Name of Depository. Enter the name of the financial institution maintaining the LDA. A separate SF 1149 is required for each financial institution.

5. Location of Depository. Enter the address of the financial institution maintaining the LDA.

6. Account Number. Enter the account number shown on the statements received from the LD. A separate SF 1149 is required for each LDA.

7. Accounting Period. Enter the from/to days of the calendar month being reported by the SF 1149.

8. The Monetary Unit of This Account Is. Enter the complete name of the monetary unit on deposit with the LD (i.e., French Francs, not merely FRANCS which may be Belgian, Nigerian, or Swiss to cite a few of the nations using that currency name).

B. Summary of Transactions. Enter the amounts in the applicable foreign currency on lines 1 through 12, as explained below, and on the reverse of the form.

1. Line 1 - Checkbook Balance at Close of Previous Period. Enter the amount shown on line 18 of the preceding month's SF 1149. The figure shall agree with the amount on line 6.1 of the preceding SF 1219 unless the DO has more than one LDA.

2. Line 2 - Deposits to Official Credit

a. Transfers. Enter amounts of wire transfers or similar transactions into the account.

b. Others. Enter the total of all deposits made by the DO or account holder during the month. Attach a listing showing the date and amount of each deposit.

3. Line 3 - Checks Canceled This Period. Enter the total of all checks canceled by SF 1098 (both available and unavailable checks shall be included). Attach a copy of each SF 1098, the checks that have been canceled, and copies of the bank's acknowledgement on unavailable check cancellations. Note: Disregard instructions for Line 3 on the reverse of the SF 1149 requiring submission of SF 1184.

4. Line 4 - Undeliverable Checks Credited This Period. LEAVE BLANK. No entry necessary. These amounts are included in Line 3. Note: Disregard instructions for Line 4 on the reverse of the SF 1149 requiring submission of SF 1185 schedules.

5. Line 5 - Adjustments. Enter the total adjustment increases during the month (i.e. check issue underdrafts or interest credited to the account) and attach a copy of the OFs 1017-G, a detailed explanation of each adjustment, or the depository's credit memos for the increases.

6. Line 6 - Uncurrent Checks. Enter the amount of uncurrent LDA checks which were transferred to Treasury Department account 20X6045 during the month. Attach a copy of the uncurrent check listing and a copy of the OF 1017-G to the SF 1149.

7. Line 7 - Total To Be Accounted For. Add lines 1 through 6 and enter the total on this line.

8. Line 8 - Total Checks Drawn This Period. Enter the total of all LDA checks issued during the period. Voided checks are reported as zero dollar amount checks. Spoiled checks are reported as zero dollar amount checks when replaced by another serially numbered check. Replacement of spoiled checks by control checks does not change the check issue records because the check serial number of the original check is assigned to the control check. Attach carbon copies of the checks issued or, if the carbon copies are not available, attach a detailed listing of all checks issued showing location of the disbursing office, check number, check date, and check amount. Substitute checks are reported, but the amount of the check is omitted. If a listing is furnished instead of carbon copies of the checks, identify the substitute check as such on the listing, omit the amount and insert the number and date of the original check on the same line as the serial number of the substitute. The carbon copies of the checks or the detailed listing may be amended by a signed, handwritten, correction from the account holder for voided checks discovered before the submission of the SF 1149.

9. Line 9 - Uncollectible Checks Returned by the Depository. Enter the total of all dishonored checks returned by the LD. Attach a schedule showing the check number, date, payee, and amount of each dishonored check and the date and amount of the deposit slips under which they were deposited.

10. Line 10 - Adjustments. Enter the total adjustment decreases during the month (i.e. check issue overdrafts or fees for returned checks) and attach a copy of the OFs 1017-G, a detailed explanation of each adjustment, or copies of the LD's debit memoranda supporting the decrease.

11. Line 11 - Total. Add lines 8 through 10 and enter the total on this line.

12. Line 12 - Checkbook Balance Close of Period. Subtract line 11 from line 7 and enter the result on this line.

C. Reconciliation. Prove the checkbook balance by completing lines 13 through 19 as explained below and on the reverse of the SF 1149.

1. Line 13 - Balance Per Bank Statement. Enter the balance from the LD bank statement and attach a copy of the statement to the SF 1149.

2. Line 14 - Add: Deposits in Transit. Enter the total of deposits included in the amount on line 2 that were not shown on the bank statement. Attach a listing of the date and amount of each deposit not shown on the bank statement.

3. Line 15 - Total. Add lines 13 and 14 and enter the total on this line.

4. Line 16 - Deduct: Outstanding Checks. Enter the total of any checks not shown as paid on the current and all preceding bank statements. Verify that checks shown on this line have been reported on line 8 of previous SFs 1149. Attach a listing showing the check number, date, and amount of each outstanding check.

5. Line 17 - Deduct: Deposits Not Credited By (Disbursing Officer or Cashier). Enter the amount of deposits listed on the bank statement and not reflected in the checkbook balance (Line 12). The only acceptable reason for an entry on this line is an LD bank error crediting the wrong account. A detailed list showing the amount and date of each deposit shall support an entry on this line.

6. Line 18 - Balance Per Checkbook. Subtract the sum of lines 16 and 17 from the amount entered on line 15 and enter the result here. The amount entered on this line shall equal the amount entered on line 12 or the LDA has not been properly reconciled. Recheck all entries on lines 1 through 18 to determine source of the error.

7. Line 19 - U.S. Dollar Equivalent. The amount shown on this line shall be the U.S. dollar equivalent of the monetary units shown on line 12 and as reported on the SF 1219. Convert the amount shown on line 12 to its U.S. dollar equivalent using the rate of exchange from line 20. When the account has been properly reconciled, the values of line 12 and line 18 are the same and the U.S. dollar equivalent shall be the same for the adjusted bank balance and the adjusted checkbook balance.

8. Line 20 - Rate of Exchange. Use the official rate of exchange expressed as the units of foreign currency equal to one U.S. dollar carried to at least two decimal points (100th of one foreign currency unit). This rate shall be the same rate used to determine the U.S. dollar value shown on the Line 6.1 of the SF 1219 for the month.

D. Checks Used This Period. Enter the check serial numbers in the blank spaces provided. The beginning check serial number should be one number greater than the ending check serial number from the preceding month's SF 1149. Check serial numbers should run in ascending order from one report to the next.

E. Date and Signature

1. Date. Enter the date the SF 1149 is prepared.

2. Signature of Disbursing Officer or Cashier. The account holder shall sign in the space provided. If the account holder is not the DO, the statement shall be countersigned by the DO above the signature of the account holder before the SF 1149 is forwarded to the servicing DFAS Center.

140904. SF 1098 (Schedule of Canceled or Undelivered Checks). LDA checks being canceled because the payee is not entitled to the proceeds of the check or because the check cannot be delivered to the payee shall be vouchered on an SF 1098. Procedures for processing undeliverable checks are in paragraph 140503, above, and procedures for processing canceled checks are in section 1406, above. In cases where an SF 1098 is required, a single form may be used if the checks being scheduled are all drawn on the same LDA and are all being canceled, or are all undeliverable. Multiple SFs 1098 are required if the checks were drawn on more than one LDA or if the checks being scheduled are a mix of canceled and undelivered checks. Do not include checks to be canceled on the same SF 1098 with checks which are undeliverable. LDA checks charged to different appropriations or funds and drawn on the same LDA do not need to be scheduled on separate SFs 1098. Prepare the SF 1098 as prescribed in the following paragraphs. See figure 14-2 for an example of a completed SF 1098.

A. Heading

1. Insert the phrase "Limited Depositary Account" at the top of the form.

2. Enter an "X" in the "Canceled" block for canceled checks.

3. Enter an "X" in the "Undelivered" block for undelivered checks. Only one block shall be marked. Both blocks are never marked on the same form.

B. Department or Establishment. Enter the appropriate Component title. For example: U.S. Army; U.S. Air Force; U.S. Navy; Defense Logistics Agency; or Defense Finance and Accounting Service.

C. Schedule Number. Enter the collection voucher number.

D. Bureau or Office. Enter the name and address of the disbursing activity.

E. Sheet Number. Enter the page number and total number of pages comprising the SF 1098 (1 of 2; 2 of 2; 1 of 4; etc.). If there is only one page leave blank.

F. Location. Enter the name of the limited depositary bank and the account number.

G. D.O. Symbol Number. Enter the DSSN of the account holder or the DSSN of the account holder's DO in the case of an agent account holder.

H. Accounting Period. Leave blank.

I. Agency Location Code. Leave blank.

J. Body. Record all information for each check listed on the SF 1098.

1. Date of Issue, Check Number, Payee. Enter the information shown on the check or on the bank confirmation for unavailable checks.

2. Voucher Number Applicable. Enter the disbursement voucher number supporting the original check issue.

3. Amount. Enter the U.S. dollar equivalent of the check at the rate of exchange in effect on the date the check was issued (as shown on the payment voucher).

4. Symbol of Appropriation or Fund to be Credited. Enter the accounting data to which the proceeds will be credited.

5. Total. Enter total of all checks listed on the SF 1098. If the SF 1098 consists of more than one page, ensure the total reflects the entire submission.

K. Signature Element

1. Date of Deposit Ticket. Leave blank.

2. Forwarded. Leave blank.

3. By (Name). Enter the name of the account holder.

4. Disbursing or Accountable Officer. Enter the name of the DO.

5. Date. Enter the date the SF 1098 data was entered in the DO's records. Do not use the date the SF 1098 was signed unless the signature date and the date entered in the DO's accounts are the same.

6. Title. Leave blank if the account holder is the DO, otherwise enter the title of the agent holding the account.

140905. OF 1017-G. Journal vouchers are prepared to document the DO's accountability when disbursement or collection vouchers from the functional areas are not appropriate. The transfer of the proceeds of uncurrent checks and adjustments of check issue discrepancies are transactions that shall be documented by the DO with an OF 1017-G. Prepare the form as indicated in the following paragraphs.

A. Heading. Type the month and year the transaction is recorded into the DO's accountability in the upper left hand corner of the form. Type the DSSN and name of the DO in the upper left hand corner of the form immediately below the month and year.

1. J.V. No. Enter the sequential journal voucher number assigned for this transaction.

2. Date. Enter the date the OF 1017-G is prepared.

B. Body of the Form

1. Reference. Enter the voucher number, date, and other identification for the disbursement of the uncurrent check or the check overdraft or underdraft.

2. Explanation. Provide a narrative explaining the purpose for the form and a description of the check containing the DSSN of the issuing activity. check serial number, check date, and payee. Also, supply the identification of any vouchers or other documents associated with the transaction.

3. Debit. Enter the amount to be charged (in U.S. dollar equivalent) and under it, enclosed in parentheses, show the appropriation classification data to be used to enter the disbursement in the financial records.

4. Credit. Enter the amount to be credited (in U.S. dollar equivalent) and under it enter the appropriation classification data to be used to enter the collection in the financial records.

5. Total. Enter the total debit and/or credit amount for all items listed in the body of the form.

C. Signature Element

1. Prepared By (Signature) and (Title). The account holder shall sign and enter his or her typewritten title.

2. Approved By (Signature) and Title). The DO shall sign and enter his or her typewritten title.

1410 TRANSFERRING AND CLOSING THE LIMITED DEPOSITARY ACCOUNT

141001. General. When the person authorized to maintain an LDA is transferred from the activity or reassigned to duties where an LDA is not required, the account shall be reconciled and closed. When an LDA is no longer required, the account holder shall reconcile the account, leave a balance in the account sufficient to cover all current outstanding checks, and turn the account over to a settlement office designated by the supporting DFAS Center. If it is necessary to continue an LDA and the account holder is an agent of the DO, the account shall be reconciled and the unexpended balance shall be transferred to the DO. If it is necessary to continue the LDA and the account holder is the DO, the account shall be reconciled and the unexpended balance transferred to the successor DO.

141002. Reconciliation of an LDA. Prior to attempting to reconcile the LDA, the account holder shall contact the LD and request an up-to-date statement of the account and, if available, all the paid LDA checks since the last bank statement. The account shall be reconciled by preparation of an SF 1149 as explained in paragraph 140902, above.

141003. Transfer of the LDA. When it is necessary to transfer the LDA to the DO or to a successor DO due to operational requirements or economic considerations, the actions in the following subparagraphs shall be taken.

A. By the Account Holder

1. Obtain an up-to-date bank statement from the LD.
2. Reconcile the LDA.
3. Prepare a list of the outstanding LDA checks and provide it to the individual charged with continuing the account.
4. Give the LD with the name, official title, and address of the individual charged with continuing the account and arrange for future bank statements and paid checks to be delivered to that individual.
5. Turn over all undelivered LDA checks to the individual charged with continuing the account.
6. Issue a check payable to the transferee for the unexpended reconciled balance of the account.

7. Report the check transaction on line 10 of the final SF 1149.
8. Forward the SF 1149 and a list of the outstanding checks to the supporting DFAS Center or OPLOC.
9. Enter the amount of the unexpended balance and give a complete description of the check issued to the individual continuing the account as an Other Cash Item on line 7.9 of the SF 1219.
10. Return any unused checks belonging to the LD to that institution for disposition. If the unused checks were purchased by the disbursing activity, deliver them to the individual continuing the account.

B. By the Person Continuing the Account

1. Verify the LDA is in balance before relieving the account holder and ensure that a balance sufficient to satisfy all outstanding checks remains in the LDA.
2. Notify the LD of the new check signing and account holder identities.
3. Deposit the check received from the previous account holder for the unexpended balance and show the check amount on line 2 of the SF 1149 in the first monthly report of the individual continuing the account.
4. Make all required reports and process all transactions as prescribed in the procedures for the maintenance of LDAs in this chapter.

141004. Closing the LDA. When an LDA is no longer required the procedures to close the account are explained in the following subparagraphs.

A. By the Account Holder

1. Notify the servicing DFAS Center and request designation of a settlement office for liquidation of the account.
2. Request an up-to-date statement of the account from the LD.
3. Prepare a list of outstanding checks showing the name of the LD, check number, date, payee name and SSN, payee address, voucher number under which the check was disbursed, amount in units of foreign currency, amount of the check in equivalent U.S. dollars at the time of issue, DSSN and name of the DO under whose authority the account was established.

4. Prepare a letter for the commander's signature, in triplicate, advising the LD that the account will be closed with the withdrawal of the unexpended balance and that an amount sufficient to cover all outstanding checks will remain in the account. Give the LD the name, official title, and address of the settlement officer and request that future statements and paid checks, if available, be forwarded until the account balance is depleted. Request the LD to acknowledge acceptance by signature and to retain the original and return two signed copies to the activity. One of the signed copies shall be retained by the account holder.

5. Prepare an LDA check, payable to the DO (by title) under whose authority the account was established, for the unexpended balance of the account. The DO shall cash the check and take it up in the SF 1219 by reducing line 6.1 and increasing line 6.2 by the amount of the check.

6. Reconcile the account and prepare a final SF 1149 as of the last day of business showing a zero checkbook balance on lines 12 and 18. The ending balance in the account shall be the total amount of the checks shown on the list of outstanding checks and on line 16.

7. Forward to the designated settlement office all undelivered checks; a copy of the final SF 1149; a copy of the up-to-date bank statement furnished by the LD; a signed copy of the letter advising the LD of closure of the account; a copy of the check issued for the unexpended balance of the account; and the list of outstanding checks.

8. Unused LDA checks belonging to the LD shall be returned to that institution for disposition. Unused LDA checks purchased by the disbursing activity shall be stored and disposed of in the same manner as Treasury checks. No certificate of destruction or notification to DFAS or to the Treasury Department is required when LDA checks are destroyed.

B. By the Designated Settlement Office

1. Verify the LDA is in balance before accepting accountability from the DO.

2. Use the documentation provided by the account holder to validate transactions in the LDA.

3. Render the monthly SF 1149 as prescribed in paragraph 140902, above using the documentation provided by the account holder and the statements furnished by the LD after the account is closed.

4. Transfer the proceeds of uncurrent checks to the Treasury Department as prescribed in paragraph 140502, above.

5. Issue replacement checks as prescribed in paragraph 140703, above.

6. When necessary, dispose of undeliverable checks as prescribed in paragraph 140503, above.

LINE INSTRUCTIONS

1. Report the balance in checking account carried forward from previous statement.
2. Enter the totals of all deposits, segregating transfers, made to the checking account during the month and submit a list showing date and amount of each deposit.
3. Show the total of all checks canceled during the report period, to be supported by corresponding Schedules of Canceled Checks, Standard Form 1098, and Unavailable Check Cancellation, Standard Form 1184.
4. Show on this line the total of credits to the checking account for undeliverable checks which have been credited to appropriation or fund accounts as supported by Standard Form 1185 schedules.
5. Report the total of all adjustments increasing the accountability during the report period. A detailed explanation should support each adjustment.
6. Add the total of checks that became uncurrent at the close of the fiscal year. A complete detailed listing of each uncurrent check should support the y on this line.
7. Show the total of lines 1 through 6, reflecting total accountability for the report period.
8. The grand total of all checks drawn for the period will be shown here. A complete detailed list or check carbon copies should be submitted.
9. The total of uncollectible checks returned by the depository during the report period will be shown here with supporting schedules showing the date and amount of the original certificate of deposit or deposit slip.
10. Enter the total of all no-check adjustments processed during the period which reduces the accountability, and submit a supporting detailed explanation of each adjustment.
11. Show the total of lines 8 through 10. This amount represents the total decrease in the checking account accountability for the report period.
12. The figure shown here will be the difference between the totals on lines 7 and 11.
13. Show on this line the balance of funds in the checking account as shown on the bank statement. Support with bank statement.
14. Show the total of all deposits in transit to the checking account, the amounts of which have been included in line 2. A detailed list showing the amount and date of each deposit must support this line amount.
15. Show here a total of lines 13 and 14.
16. Report here the total of outstanding checks in the account. Support this figure with a detailed listing of each check.
17. Report here the total of outstanding checks in the account. Support this figure with a detailed listing of each check.
18. The amount on this line should be the same as the total shown on line 12. If not, explain in detail.
19. The amount shown on this line will be the U.S. dollar equivalent of the monetary units shown on line 12 and as reported on the Statement of Accountability.
20. Show here the rate of exchange used in the conversion shown on line 19.

TABLE OF CONTENTS

CHAPTER 15 FOREIGN CURRENCY ACQUIRED WITHOUT PURCHASE

- 1501 Scope and Applicability
- 1502 Foreign Exchange Standards
- 1503 Administration of Foreign Exchange
- 1504 Captured Foreign Currency

CHAPTER 15

FOREIGN CURRENCY ACQUIRED WITHOUT PURCHASE1501 SCOPE AND APPLICABILITY

150101. General. This chapter identifies policies relating to the acquisition and handling of foreign currencies obtained by DOs without purchase for dollars and not carried in their dollar accountability. These currencies are acquired under the provisions of foreign assistance or foreign agricultural development programs. They are lodged in special accounts reserved for foreign transactions not involving foreign currency purchased with U.S. dollars and are called "FT" accounts. The requirements of this chapter are derived from Part 2, chapter 3200 and Part 4, chapter 9000 of the Department of the Treasury Financial Manual for Guidance of Departments and Agencies (reference (m)).

150102. Legal Authority. FT accounts are established by the Treasury Department to provide local foreign currency for program expenditures in-country and delay draw downs on the Treasury's General Account. These funds are most often received for the sale of surplus U.S. agricultural commodities under the Agriculture Trade Development Act of 1954, Public Law 83-480 (P.L. 83-480), as codified in 7 U.S.C. 1704 (reference (bo)). Funds may be made available from this source to satisfy DoD requirements for foreign currency in countries having Currency Use Payments (CUP) agreements under P.L. 83-480.

150103. Collections. For the purposes of this chapter, collections are defined as all acquisition of foreign exchange, including refunds or returns of payments, made in foreign currency not purchased with U.S. dollars.

★ 150104. Availability. When FT funds become available, the United States Disbursing Officer (USDO) controlling those funds will determine the DoD foreign currency requirements by contacting the American Embassy in-country. DOs shall keep the American Embassy in-country advised of their foreign currency requirements at least once each calendar year. When the DOs are advised of the availability of FT funds, they shall address a written request for foreign currency to the Deputy Director for Finance, DFAS Headquarters, through the supporting DFAS Center. The request shall identify the DO to receive the funds, the activity to which the DO is attached, and the amount in foreign currency units of funds requested. DFAS Headquarters will forward a written request to the USDO for transfer of funds. The transfer and receipt of foreign currency obtained in this manner must be recorded in the financial records of the USDO and the DO in the same calendar month.

150105. Records. FT funds shall be recorded in a separate subsidiary record and reported separately from foreign currency purchased with U.S. currency. FT funds shall not be co-mingled with foreign currency purchased with U.S. currency or refunds and returns of U.S. funded foreign currency payments. FT funds shall not be included with U.S. currency and

foreign funds purchased with U.S. currency reported on the SF 1219. FT funds subsidiary records shall be maintained in units of the foreign currency involved. Subsidiary records shall be maintained in such a way as to readily disclose the balance of foreign currency available for the DO's use.

1502 FOREIGN EXCHANGE STANDARDS

150201. Uniform Reporting. The requirements in this section are established to achieve comparability and consistency among DoD Components in the reports they submit on foreign exchange transactions. These procedures are not intended to place prohibitive limitations on the content of individual DFAS Center reports. Modifications of prescribed reporting formats are permitted as long as they are restricted to special columns, explanatory notes, or other devices that do not destroy the integrity of the basic data and the nature, extent and purpose of the modifications are fully disclosed. Material modification must be cleared, in advance, through DFAS Headquarters before being incorporated in any report.

150202. Consistency Between Reports. Foreign currency reports shall be consistent with regularly published Treasury Department foreign currency reports as to foreign currency units used by other nations and as to their U.S. dollar equivalent.

150203. Monthly Statement of DOs. Transactions and balances of foreign currency held outside dollar accountability (i.e., not shown on the SF 1219 by DOs) shall be submitted monthly on the DD Form 1363 (Statement of Transactions and Accountability (FT Accounts)). A separate DD Form 1363 must be submitted for each FT account. Amounts shall be stated in foreign currency units. Transactions shall be classified to provide for separate identification of receipts, disbursements, sales for dollars, transfers, conversion to third country currency, and other types of activity, if needed.

150204. Semiannual Statement of Balances. The Treasury Department will extract the information in this report from its central accounts. The report shall show the foreign currency balances held by DOs, in units of the foreign currency and their U.S. dollar equivalent. Foreign currencies held under U.S. dollar accountability shall not be included in this report. The Treasury Department will furnish two copies of the initial statement to DFAS Headquarters at the end of each semiannual period during which DOs have held foreign currency balances outside their U.S. dollar accountability. DFAS Headquarters will review the statement for agreement with its records and reconcile any discrepancies with the cognizant DO within seven working days of receipt from the Treasury Department. One copy of the accepted or adjusted statement, which will be the final statement, will be returned to the Treasury Department under a cover letter stating that the statement: has been reviewed and adjusted if necessary; is in agreement with the records and reports of DFAS; and is a complete statement of the foreign currency balances held by DOs. DFAS Headquarters review and return of the statement should be accomplished within ten days of receipt from the Treasury Department. The Treasury Department will prepare the statement as of March 31 and September 30 each fiscal year.

1503 ADMINISTRATION OF FOREIGN EXCHANGE

150301. Collections. (See definition at paragraph 150103, above). Foreign exchange received by DOs shall be deposited no later than the next regular business day to the credit of the Treasury Department in FT receipt accounts designated by the collecting agency or activity. DOs shall maintain records showing collections by source, Treasury Department receipt accounts to be credited with the dollar proceeds of the collection, and any restrictions on the use of the foreign exchange collected.

150302. Depositories. Foreign exchange held for the account of the Treasury Department shall be deposited only in depositories designated by the Treasury Department. Foreign exchange shall be deposited in an interest bearing account whenever practicable. Foreign exchange held for the account of the Treasury Department, or any other agency of the U.S. Government, shall be deposited in a separate account and not co-mingled with funds held by DOs for their own official limited depositary account.

150303. Documentation of Foreign Exchange Transactions. Forms normally used for U.S. currency disbursements and collections shall be used for foreign exchange transactions. However, FT funds received by transfer from a USDO and interest earned on FT fund deposits must be reported on separate vouchers and not co-mingled with other collection transactions. The summary record of FT transactions is the DD Form 1363 prepared monthly and submitted to the servicing DFAS Center in the original and two copies along with the original and one copy of each voucher for FT transactions. Copies of the DD Form 1363 and related vouchers shall be retained for the DOs records. DFAS Centers shall forward a copy of the DD Form 1363 as soon as possible after the close of the reporting month, but no later than the 20th calendar day of the next month, to: Department of the Treasury, Financial Management Service, Budget Reports Branch, Financial Reporting Division, Liberty Center, Attn: GAO Building, Room 1731, Washington, DC 20227. Telephone (202) 566-6841.

150304. Withdrawals From Treasury Department Accounts. DOs reporting foreign exchange on DD Form 1363 shall make no withdrawals from the accounts in which those funds are held without authorization from the Treasury Department. The Treasury Department will authorize withdrawals only for sale for U.S. dollars or transfer to agencies for authorized purposes, without reimbursement to the Treasury Department, as provided by law. DOs requiring foreign exchange for authorized purposes shall submit their request to the Treasury Department through the supporting DFAS Center and DFAS Headquarters. Requests shall identify the DO requiring the foreign exchange by name and location and specify the number of foreign currency units needed.

150305. Exchange Rates. The Treasury Department reporting rate shall be used to establish the U.S. dollar value of FT foreign currency. These rates are published on the first day of each quarter by the Treasury Department. The rates published at the beginning of a quarter shall be used to value the FT currency at the close of the preceding quarter and for all FT transactions and balances in the current quarter, except for the closing balance of the current

quarter. For example, the rate published on April 1 would be applicable to the balance as of March 31, to the transactions for April, May, and June, to the balances of April 30 and May 31. The rate published for July 1 would apply to the balance of June 30. Amendments to the published quarterly rate will be made during a quarter if the rate changes by 10 percent or more, or a new currency unit is established. The published rate will usually be rounded to four significant digits.

150306. Transaction Valuations

A. Refunds and Reverse Transaction Items. For reporting purposes these items are valued at the Treasury Department reporting rate on the date they occur, not at the rate used for the original transaction. Adjustments shall be made to financial records to reflect exchange rate fluctuations.

B. Sale of FT Currency for U.S. Dollars. The sales transactions of FT currency are recorded at the Treasury Department reporting rate in effect on the date of the sale. The value of the FT currency sold and the U.S. dollar proceeds of the sale shall always be equal and no gain or loss by exchange occurs.

C. Sale of FT Currency for Another Foreign Currency. The Treasury Department reporting rate shall be applied to the FT currency disposed of and the equivalent U.S. dollar value shall be assigned to the foreign currency acquired. This creates a "wash" transaction. However, if the Treasury Department reporting rate for the currency acquired is different from the U.S. dollar value assigned as a result of the sale, an accounting adjustment must be made to record the difference.

★ 150307. Conversion of Currencies. DOs shall report the amount of currency available for conversion to another foreign currency or to U.S. dollars held in FT accounts each time the available FT balance reaches the equivalent of \$10,000 in U.S. dollars. FT balances available for conversion are limited to loan repayments under 7 U.S.C. 1704 (reference (bo)) where the parties have entered into an agreement stipulating 2 percent convertibility. These reports shall be submitted in original and one copy to the address in paragraph 150303, above.

1504 CAPTURED FOREIGN CURRENCY

The guidance contained in this section is consistent with Treasury Department procedures concerning the handling of captured foreign currency, both when there is a current market for the funds and when there is not. USDOs are the primary accountable officers responsible for accounting and reporting foreign currency not acquired by purchase with dollars. Captured foreign currencies are treated as FT funds. Captured foreign currency, both when there is a current market for the funds and when there is not, shall be delivered promptly into the custody of the USDO servicing the particular country involved. Whether there is, or is not, a current market for the funds, is a separate issue that should be dealt with after the funds have been safeguarded and accounted for by the USDO. Should any DoD DO initiate the collection of captured foreign currency, the

currency shall be safeguarded and delivered to the USDO serving that particular country as soon as possible. The DO shall not collect the funds into U.S. dollar accountability or into the DO's FT accounts, if any.

CHAPTER 16

FOREIGN CURRENCY RECORDS AND REPORTS1601 SUBSIDIARY RECORDS

160101. General. All transactions involving foreign currency are treated as cash transactions and basically follow the same principles and guidelines established for controlling U.S. currency. All DOs, agents, and cashiers who engage in foreign currency transactions (collections, disbursements, and accommodation exchanges) shall maintain a record of such transactions on DD Form 2663 (Foreign Currency Control Record). The DD Form 2663 shows current balances of foreign currency on hand (all foreign currency held by cashiers, in the vault, or by other agents of the DO) and in LDAs and the detailed transactions that increase or decrease these balances. Foreign exchange (FT) account foreign currency transactions (see Chapter 15 of this volume) are not included on DD Form 2663.

160102. Requirement for Separate DD Forms 2663. Separate DD Forms 2663 shall be maintained for each type of foreign currency used (for example, Italian lira, French francs, or Japanese yen). Also, a separate DD Form 2663 shall be maintained for accommodation exchange foreign currency if it is carried at a different exchange rate than that used for disbursements. At the DO's discretion, separate DD Forms 2663 may be maintained for foreign currency on hand and foreign currency in LDAs.

160103. Preparation of DD Form 2663. The DD Form 2663 is designed for notebook-style usage. Both sections (sides) of the form must be completed to make a complete record of each line entry. An example of DD Form 2663 is shown as figure 16-1. Complete the form as follows:

- A. Item 1: Date. Enter the applicable transaction date.
- B. Item 2: Transaction Reference. Enter data that will enable reference to transaction source documents (e.g., voucher number, revaluation and LDA check number).
- C. Item 3: Exchange Rate. Enter the foreign currency to U.S. dollar exchange rate applicable to the transaction.
- D. Item 4: Collections
 - 1. Subitem a: Miscellaneous Receipts. Enter the number of foreign currency units in the units column and the U.S. dollar equivalent of those units in the dollars column for any foreign currency collected into a Treasury Department miscellaneous receipt account.

2. Subitem b: Reimbursement/Refund. Enter the number of foreign currency units in the units column and the U.S. dollar equivalent of those units in the dollars column for any foreign currency reimbursement or refund transactions. At the DO's option, these columns may be used only for reimbursements with refunds being netted out in Item 8. Line through the word "refund" in the item heading if this option is exercised.

E. Item 5: Purchases

1. Subitem a: Government Sources. Enter the number of foreign currency units in the units column and the U.S. dollar equivalent of those units in the dollars column for any foreign currency purchases from government sources including other DOs, the Treasury Department, State Department, etc. Include foreign currency acquired from government sources that will be used for accommodation exchange purposes. However, do not include foreign currency acquired in accommodation exchange transactions.

2. Subitem b: Non-Government Sources. Enter the number of foreign currency units in the units column and the U.S. dollar equivalent of those units in the dollars column for any foreign currency purchases from non-government sources including military banking facilities and nonappropriated fund activities. Include foreign currency acquired from non-government sources for purposes of making accommodation exchanges and foreign currency acquired in accommodation exchanges.

3. Subitem c: Outlay for Accommodation Exchange. This subitem is for memorandum entry only since any foreign currency acquired in accommodation exchange transactions is included in subitem 5b, above. Enter the U.S. dollar equivalent of those units in subitem 5b associated with accommodation exchange purchases. These amounts are required for foreign currency reporting. This subitem may be left blank when a separate DD Form 2663 is maintained exclusively for accommodation exchange transactions.

F. Item 6: Country. Enter the name of the country whose currency is reported on the DD Form 2663 (e.g., France, Italy or Japan).

G. Item 7: Currency Unit Type. Enter the name of the foreign currency reported on the DD Form 2663 (e.g., Franc, Lira or Yen).

H. Item 8: Disbursements. Enter the number of foreign currency units in the units column and the U.S. dollar equivalent of those units in the dollars column for any foreign currency disbursements. If foreign currency refunds are included in subitem 4b, disbursements entered in this item should be gross disbursements. If only reimbursements are entered in subitem 4b, disbursements entered in this item should be net of refunds.

I. Item 9: Deposits/Sales/Transfers. Enter the number of units of foreign currency in the units column and the U.S. dollar equivalent of those units in the dollars column represented by accommodation exchange sales, deposits to a general depositary, or transfers to

other DOs or agents outside the DO's accountability. Do not show deposits to an LDA in this item.

J. Item 10: Gain or Loss. Enter gains or losses resulting from revaluation of foreign currency on hand and in an LDA. Include any gains or losses recognized on the basis of individual disbursement or accommodation exchange transactions. Also enter the amount of any physical losses of foreign currency. (Overages of foreign currency should be processed as a reimbursement to **F3875 or eventually as a receipt account collection. See Chapter 6 of this volume.)

K. Item 11: Sub Balance

1. Subitem a: On Hand. Enter the cumulative number of units of foreign currency in the units column and the U.S. dollar equivalent of those units in the dollars column representing the balance of foreign currency on hand (not including currency on deposit in an LDA). Entries in this subitem should be balanced (offset) by entries in other items of the DD Form 2663. The only exception is when foreign currency being carried as cash on hand is deposited to an LDA or when an LDA check is written to obtain cash on hand. Such transactions are entered as a decrease (or increase, as appropriate) in the units and dollars columns of this subitem and as an increase (or decrease, as appropriate) in the units and dollars columns of subitem 11b. Appropriate reference to such a transaction must be entered in items 1 and 2.

2. Subitem b: LDA. Enter the cumulative number of units of foreign currency in the units column and the United States dollar equivalent of those units in the dollars column representing the balance on deposit in an LDA. Entries in this subitem should be balanced (offset) by entries in other items of the DD Form 2663 except for transactions involving transfers between cash on hand and cash in an LDA as explained in the preceding subparagraph.

L. Item 12: Combined Balance. Enter the total of the units columns of subitems 11a and b in the units column. Enter the total of the dollars columns of subitems 11a and b in the dollars column.

160104. Totalling the DD Form 2663. Compute and enter column totals of items 4 through 10 at the end of each month, at the end of each quarter, and at the end of each year.

1602 FOREIGN CURRENCY REPORTS

160201. Monthly DD Form 1363 (Statement of Transactions and Accountability (FT Accounts)). This monthly report is not submitted unless DOs hold funds outside their dollar accountability. Currently, no DOs in the DoD hold such funds. Instructions for its use and disposition shall be issued by the supporting DFAS Centers when necessary.

160202. Quarterly Reports of DOs

A. Cumulative Report of Foreign Currency Purchased With U.S. Dollars from Sources Outside the U.S. Government. This report shall be submitted at the end of each quarter and is cumulative for the fiscal year. The report shall include amounts acquired through accommodation exchange transactions as well as purchases from banks and other dealers in currency exchange. The report shall be in the form of a listing under the following headings: Country of Currency; Monetary Unit; Number of Units Purchased; Total Dollar Outlay; and Memorandum - Dollar Outlay for Accommodation Exchanges. Reports shall be submitted to the supporting DFAS Center within 15 calendar days after the close of each quarter.

B. Report of the Balance of Foreign Currency Held Under Dollar Accountability. This report shall be in the form of a listing under the following headings: Country of Currency; Monetary Unit; Number of Units; Dollar Equivalent; and Rate of Exchange. The report shall be submitted at the end of each quarter to the same activity as the cumulative report on outside purchases above and may be combined with that report.

C. Report of Foreign Exchange Received by DOs and Credited Immediately to Miscellaneous Receipt Accounts of the Treasury Department. These funds are received for such things as fees and services and are immediately purchased by DOs with appropriated funds for their operating needs. Repayments to appropriations and receipts to FT accounts are excluded. The report shall be in the form of a listing under the following headings: Country of Currency; Monetary Unit; Number of Units; Dollar Equivalent; and Rate of Exchange. This report shall be submitted at the end of each quarter to the same activity as the cumulative report of outside purchases and quarterly report of balances of foreign currency on hand and may be combined with those reports.

160203. Consolidated Quarterly Reports of DOs. The DFAS Centers shall consolidate the quarterly reports of DOs detailed above and forward them as directed by DFAS Headquarters in time to be delivered to the Treasury Department 45 calendar days after the close of each quarter. Simultaneously, a copy of the combined consolidated quarterly reports of DOs or a consolidated quarterly report of foreign currency on hand only shall be submitted to the Department of Commerce.

1603 SF 1219 (STATEMENT OF ACCOUNTABILITY)

160301. General. All foreign currency balances held under a DO's dollar accountability, including limited depositary checking account balances, shall be reported on the SF 1219. All entries in the amounts column shall be expressed in their U.S. dollar equivalent. Refer to Chapter 19 of this volume for complete details on preparation of the SF 1219.

160302. Specific Entries

A. Line 1.00 - Total Accountability Beginning of Period. The amount reported here shall be the total U.S. dollar accountability of all currencies, both U.S. and foreign, and include any balances from limited depositary checking accounts expressed as a U.S. dollar

equivalent. The monetary unit/units of foreign currency holdings shall be spelled out and enclosed by parentheses immediately after the caption "1.00" in the blank space between the caption and the amount column.

B. Lines 2.00 through 4.9 - Transactions. The amounts entered on these lines shall be reported at the U.S. dollar equivalent of all transactions in all currencies, both U.S. and foreign. However, note that Line 2.1 - Checks Issued on the U.S. Treasury, refers only to U.S. Treasury checks. Limited depositary checks shall not be reported on this line. Also, note that Line 4.2 - Deposits Presented or Mailed to Bank refers only to deposits made for credit to the Treasury Department General Account. Deposits made to a limited depositary checking account in the name of the activity or the DO shall not be reported on this line.

C. Line 5.00 - Total Accountability Close of Period. The amount reported here shall be the total U.S. dollar accountability of all currencies, both U.S. and foreign, and include any balances in limited depositary checking accounts expressed as a U.S. dollar equivalent. The monetary unit/units of foreign currency holdings shall be spelled out and enclosed by parentheses immediately after the caption "5.00" in the blank space between the caption and the amount column.

D. Line 6.1 - Cash on Deposit in Designated Depositary. The name of the limited depositary bank, the U.S. dollar equivalent of foreign currency, and the monetary unit of foreign currency held in limited depositary checking accounts shall be shown on this line in the blank space provided. If more than one limited depositary checking account is maintained, a separate schedule shall be attached to the SF 1219 showing the name of each bank, location, monetary unit of currency carried, and U.S. dollar value for each limited depositary checking account.

E. Lines 6.2 through 7.9 - Analysis of Accountability. The entries in the amount columns of lines 6.2 through 7.9 shall include the U.S. dollar equivalent of any foreign currency appropriate to the line caption. The monetary units of foreign currency and the U.S. dollar equivalent shall be shown enclosed in parentheses in the blank space between the line caption and the amount column.

F. Line 8.0 - Total of My Accountability. The entry in the amount column shall equal the sum of the entries in the amount columns for lines 6.1 through 7.9. The sum of the U.S. dollar values for each of the foreign currencies shown in parentheses on lines 6.1 through 7.9 shall be shown along with the respective monetary unit enclosed in parentheses in the blank space between the caption "8.0" and the amounts column. The totals in the blank space between the caption and the amount column shall equal the entry in the amount column. The entry in the amount column for line 8.0 shall equal the entry in the amount column for line 5.00 unless the DO is acting as settlement officer for former DOs at that station and entries are required on lines 9.2 through 10.0.

G. Lines 9.2 through 10.0 - Analysis of Predecessor's Accountability. Entries on lines 9.2 through 10.0 shall follow the same guidelines used for lines 6.1 through 8.0 if foreign currency holdings are included in the U.S. dollar figure in the amount column.

H. Line 11.0 - Total Disbursing Office Accountability. The entry in the amount column shall equal the sum of the entries in the amount column for lines 8.0 and 10.0 and shall also equal the entry in the amount column for line 5.00. Any foreign currency monetary units and their U.S. dollar equivalents shall be shown in the blank space between the caption "11.0" and the amount column.

1703	Claims
1704	Counterfeit Certificates
1705	Destruction of Military Payment Certificates

CHAPTER 17

MILITARY PAYMENT CERTIFICATES1701 INTRODUCTION

170101. Conditions for Use. Military payment certificates (MPC) are available for use in overseas areas when their use is requested by the host country and such use is deemed by the State Department to be in the best interest of the U.S. Government. In this case, and other specified below, MPC shall be used instead of U.S. currency for payment of pay and allowances to DoD military and civilian personnel and to conduct transactions on overseas facilities operated or controlled by U.S. Forces. MPC can be used only with the approval of the USD(C). MPC may be authorized for use in an overseas area when one or more of the following conditions exist.

A. U.S. forces are engaged in active military or occupation operations in a location where the use of U.S. dollars may result in sizable amounts falling into enemy hands.

B. A foreign government allied with the United States in an active military operation uses its sovereign right to prohibit the use of U.S. dollars, but will permit the use of MPC by U.S. Forces and agrees to police the prohibition of its citizens from holding such instruments.

C. U.S. Forces are present in a foreign country at the invitation of the host government whose foreign exchange regulations prohibit the use of U.S. dollars within its borders.

D. The introduction of sizable amounts of U.S. dollars into a foreign area having a weak unstable economy will cause devaluation of the local currency or black market activity in U.S. dollars.

E. The duration of active military or occupation operations is anticipated to last more than 180 days.

170102. Acquisition. The Director, DFAS, shall budget and fund for the design, printing, storage, transportation, and distribution of MPC; maintain at least two reserve MPC series in sufficient quantities and denominations to meet realistic contingency requirements as determined in coordination with respective unified commands; and, maintain contingency plans and procedures to implement the MPC system on short notice, if required.

170103. Responsibilities

A. USD(C). The USD(C), or designee, shall, in coordination with DoD Components, the cognizant combatant commander, and other U.S. Government agencies, authorize the implementation, conversion or withdrawal of MPC from overseas areas and take final action on requests for exceptions to this policy.

B. Heads of DoD Components. The Heads of DoD Components with overseas responsibilities shall: maintain standby procedures that implement both the guidance contained herein and, for the MPC system, those procedures established by the Director, DFAS; ensure the coordination of any theater-specific plans and standby procedures with the proper unified commander and other affected DoD Components; and, direct Component commands to submit requests for establishment of an MPC area through the cognizant combatant commander.

C. Commanders of Overseas Unified Commands. The commanders-in-chief of the combatant commands shall: forward to the USD(C) all requests received through military or diplomatic channels, together with the unified command recommendation for implementation, conversion, or withdrawal of MPC in a country or other geographic or geopolitical area within respective theaters; and, monitor and coordinate the application of the provisions contained in this chapter within respective command areas.

D. Bureau of Engraving and Printing. The Bureau of Engraving and Printing, Department of the Treasury, shall design, engrave, and print (or contract for printing) all MPC as authorized by 31 U.S.C. 5114 (reference (e)).

1702 PROCEDURES

170201. Establishment of MPC Area. When implemented as legal tender, MPC shall be the only medium of exchange used by DoD Components in MPC areas for pay and allowances of personnel and to conduct transactions in U.S. operated or U.S. controlled facilities. When an MPC series is declared to be legal tender, all notes of that series, regardless of whether placed in circulation or held in bulk storage by DOs, shall be treated and accounted for as cash held at personal risk. DOs, MBFs, Defense credit unions, military postal units, and non-appropriated fund activities operating in MPC areas shall not exchange or engage in MPC transactions with unauthorized personnel. MPC may be exchanged by authorized personnel in MPC areas for local currency at designated foreign exchange facilities. Authorized personnel in MPC areas shall not accept, transfer, or exchange MPC with individuals not authorized to possess them. Combatant commanders may establish limits on conversions, when necessary to minimize black market activity in MPC.

170202. MPC Administration. The U.S. dollar equivalent of the face value of each MPC series declared legal tender shall be established by the Director, DFAS as a cash collection to the unique deposit fund account "Reserve for Redemption of MPC, Army," 21A8815 (by limitation). Conversely, the dollar equivalent of the face value of each MPC series withdrawn from use or destroyed under approved destruction procedures shall be removed from the respective deposit fund account. These actions shall ensure that there is dollar backing and

accountability for all MPC in use as legal tender, thereby removing the possibility of MPC being considered as inconvertible and that MPC are not used to supplement appropriated funds. The Director, DFAS, or designee, shall inspect and test the effectiveness and integrity of the MPC system. Such inspections and tests are intended to prevent possible losses from fraud, counterfeiting, or mismanagement. In addition to the MPC series in circulation as legal tender, a reserve series shall be held in each area in sufficient quantity to replace the series in use should a conversion become necessary. The MPC reserve series shall be maintained and secured as accountable public property.

170203. MPC Conversion Program

A. Program Initiation. Upon establishment of an MPC area, the Director, DFAS, or designee, shall monitor and evaluate local black market, economic, and foreign exchange conditions to determine if the MPC series in circulation should be replaced with an MPC reserve series. An MPC conversion program shall be initiated: when a majority of the notes in circulation becomes unserviceable; when a significant degree of counterfeiting activity is detected; or, from time to time to test the integrity of the MPC system and discourage unauthorized MPC holders from participating in MPC transactions.

B. Program Administration. MPC conversion programs shall: be administered with a minimum of disruption to normal operations, afford all authorized holders of MPC the opportunity to convert legally acquired holdings without loss of funds, and provide adequate safeguards to prevent unauthorized holders of MPC from participating in the conversion program.

C. Authorized Personnel. Authorized personnel who have MPC that were acquired legitimately may exchange those certificates for U.S. currency and coin or dollar instruments (including Treasury checks) under the following conditions: upon departure for the United States, when traveling under competent orders to areas where MPC are not designated, or when traveling under competent orders to MPC areas where DOs, agents, or exchange facilities are not readily available to the traveler. The provisions of this paragraph shall not be construed as authorizing DOs or their agents in areas outside of MPC areas to convert MPC for authorized personnel returning from MPC areas. Such exchange must be made prior to departure from the MPC area.

D. Suspected Certificates. MPC suspected of being acquired illegitimately shall not be converted for any holder under circumstances where there are reasonable grounds to believe that the holder was not an authorized person at the time of acquisition or that the certificates were acquired by the holder, or by another with the holder's knowledge, from a person not authorized to possess or use them. Amounts of certificates exceeding those which the holder normally would acquire or hold under applicable circumstances per local regulations shall not be approved for conversion unless the holder shows by a preponderance of evidence that they legitimately were acquired.. Where there are reasonable grounds to believe the MPC were not acquired legitimately, they shall be impounded and kept pending an administrative determination

as to the source of acquisition. If it is determined that the individual concerned was not an authorized person at the time of acquisition, the certificates shall be confiscated and the dollar proceeds deposited to general fund (miscellaneous) receipt account "Fines, Penalties and Forfeitures Not Otherwise Classified," **R1099. If it is found that the individual concerned was an authorized person at the time of acquisition, or that the certificates belong to an authorized person, the certificates (or their dollar value) shall be returned to the owner. If it is determined that the certificates were acquired from an unauthorized person, the certificates shall be confiscated and the dollar proceeds deposited to receipt account **R1099. Collection vouchers effecting these credits shall cite claimants' names and sufficient information to permit ready identification of the credits in order to facilitate the processing of any subsequent claims for amounts deposited.

170204. MPC Withdrawal. Periodically, but not before 1 year has elapsed since the date that a particular MPC series has been withdrawn from circulation, the unredeemed balance in the deposit fund account for that series, less an estimated amount to cover possible claims, shall be transferred to the account "Miscellaneous Receipts of the U.S. Treasury." The amount to cover estimated claims shall be transferred to a deposit fund account established for paying valid claims against withdrawn MPC series. If a legitimate claim originates after funds have been transferred to "Miscellaneous Receipts of the U.S. Treasury," and the claim is approved for payment by the Director, DFAS, or designee, the claim shall be honored from the deposit fund account with proper notation made as to the applicable MPC series.

1703 CLAIMS

Claims for conversion of MPC, as well as claims arising out of the refusal of the command to convert MPC, shall be referred to the Director, DFAS, or designee, for adjudication and final determination. The time limit for filing claims for invalidated MPC (all MPC issued prior to 1974) expired on 30 September 1980. A time limit for filing of claims for any MPC issued after 1974 shall be established by the Director, DFAS.

1704 COUNTERFEIT CERTIFICATES

Most counterfeit certificates shall be detected readily by their general appearance. More specifically, the ink may be off-color, lines present in genuine certificates may be missing, or there may be a lack of uniformity in color and width of lines. Counterfeits often can be detected by the appearance and feel of the paper. Genuine paper has a distinctive feature in the form of red and blue colored paper disks. Any certificates believed to be counterfeit shall be handled in accordance with the procedures used for counterfeit U.S. currency. In addition, a message report shall be made to the nearest U.S. military investigative service and the Director, DFAS, giving a brief description of the difference between the genuine and the counterfeit certificates and the amount of counterfeit MPC recovered.

1705 DESTRUCTION OF MILITARY PAYMENT CERTIFICATES

170501. Destruction Schedules

A. Preparation. When MPC are returned from area DOs and from authorized area banks, a designated central DO shall prepare a destruction schedule in five copies for each series of certificates to be destroyed. See figure 18-1 for an example certificate of destruction. Separate destruction schedules shall be prepared for circulated and uncirculated MPC. Citation to authority for destruction shall be shown on the schedule.

B. Submission to Destruction Committee. The original and three copies of the schedule shall be submitted with the certificates to be destroyed to the destruction committee.

170502. Authority for Destruction

A. Authority. The Director, DFAS, or designee, shall issue all instructions pertaining to the destruction of MPC.

B. Valid Series of MPC. The commander of each overseas command is delegated the authority to destroy mutilated and/or decomposed MPC of the series currently valid.

C. Invalidated MPC. Invalidated MPC withdrawn from circulation and received by the command accountable officer shall be destroyed only after reconciliation with the accountable officer and specific authorization by the Director, DFAS, or designee.

D. Reserve Series. Under emergency conditions, reserve series of MPC held by the command accountable officer shall be destroyed in the manner described below.

170503. Destruction Committee

A. Appointment. The authority to appoint a destruction committee to accomplish the destruction of certificates within the command area is delegated by the Director, DFAS to the commander of each major overseas command.

B. Personnel. The committee shall be composed of not less than five officers under the jurisdiction of the commander. Personnel of the disbursing office shall not be appointed to serve on the committee.

C. Jurisdiction. The committee shall act under the jurisdiction of the Director, DFAS, or designee, in all activities pertaining to the destruction of MPC.

170504. Verification of Certificates. The total of MPC presented for destruction as indicated on the destruction schedule shall be verified by the destruction committee. Should discrepancies occur between the number of pieces and/or the amount verified and the number of pieces and/or the amount shown on the destruction schedule, a new schedule containing the

verified figures shall be submitted by the accountable officer. The original schedule must be destroyed.

170505. Methods of Destruction

A. Burning. The total amount of the MPC received for destruction shall be verified with the amount shown on the schedule. Immediately after verification, all certificates shall be destroyed by burning to ashes under the supervision of and in the presence of not less than three members of the committee. When all certificates have been completely destroyed, each member witnessing the destruction shall sign the certification on each copy of the destruction schedule.

B. Alternate Methods for Destruction. Three alternate methods for destroying certificates (shredding, maceration, and heating in the presence of caustic soda) are approved when facilities for burning are not adequate or available. Not less than two members of the committee shall be present during the entire operation or until it can be determined that the certificates are completely unrecognizable as currency when any of the alternate methods are used. Upon completion of the operation, destruction schedules shall be certified as stipulated above.

TABLE OF CONTENTS

CHAPTER 18 EMERGENCY DISPOSITION OF CURRENCY, COIN, AND

NEGOTIABLE INSTRUMENTS

1801 Policy

1802 Preparation for Emergency Destruction of Currency

Figure 18-1. Sample DD Form 2669 (Destruction Schedule)

CHAPTER 18

**EMERGENCY DISPOSITION OF CURRENCY, COIN, AND
NEGOTIABLE INSTRUMENTS**1801 POLICY

180101. Disposition. Under emergency conditions or in anticipation of enemy action, negotiable instruments, currency, and coin held at personal risk by DOs shall be evacuated if possible. If time and circumstances make it appear that capture of these funds is inevitable (in the opinion of the DO or the commander), the funds shall be destroyed in a manner that is absolute. The destruction shall be witnessed as prescribed in this chapter. In high threat areas, most bases have a Threatcon system to indicate the level of the threat. Upon initial notification of a threat that may require the destruction of currency and negotiable instruments, the DO should determine cash requirements, recall or purchase excess funds, and evacuate these funds to a designated safe haven.

A. Combustible Materials. Paper currency, checks, bonds, MPC, and other burnable documents shall be burned completely to ashes.

B. Solid Substances. Coin and other valuable non-burnable items shall be disposed of by scattering in deep bodies of water when possible. When no suitable bodies of water are present, these items shall be secretly buried in the ground.

C. Alternatives. Currency and other paper-type negotiable instruments may be shredded, pulped, or eaten by caustic substances when it is impossible to burn them completely. However, such alternative methods of destruction must completely destroy the original character and appearance of currency and other negotiable instruments so as to make them non-negotiable. Coins may be fused or mutilated in such a manner as to make them unrecognizable as U.S. or foreign coins. Bars, ingots, and other units of precious or valuable substances shall be fragmented and scattered so as to make their recovery impossible or at least uneconomical.

180102. Destruction Precedence. Because sufficient time may not be available to document and perform the destruction of funds held by the DO, funds shall be readied for destruction in the following priority: U.S. and foreign currency and negotiable instruments carried as cash in the DOs' accounts; blank Treasury checks, blank limited depository checks, blank U.S. savings bonds, and reserve series of MPC; currency, negotiable instruments, and valuables held for safekeeping; coins; and other valuables (e.g., signature dies and seals) in the custody of the DO. DOs in areas of elevated tension should anticipate the possibility of emergency destruction and maintain a means to rapidly inventory and destroy their funds.

180103. Sudden Destruction. When currency and coin are destroyed without previous warning, such as by explosion, fire, sinking of a vessel, or aircraft accident, the DO accountable for the funds shall prepare a written statement about the circumstances under which the funds were destroyed and forward it with a request for relief to the supporting DFAS Center. In the event the DO does not survive the disaster that destroyed the funds, the officer designated to settle the account shall act in the DO's behalf. The designated officer shall reconstruct the accountability of the DO and initiate the appropriate requests for relief.

1802 PREPARATION FOR EMERGENCY DESTRUCTION OF CURRENCY

180201. DOs and Their Agents

A. U.S. Currency and MPC. If time permits, the DO shall prepare DD Form 2669 (Destruction Schedule) in an original and 3 copies for all U.S. currency destroyed. See figure 18-1. A separate DD Form 2669 shall be prepared for MPC. The reason for destruction of the currency shall be annotated in the space provided. For full or partial packages of new currency, the beginning and ending serial numbers of each denomination of the currency shall be annotated in the spaces provided. The destruction shall be witnessed by three disinterested commissioned officers, at least one of whom should be senior in rank to the DO. The name, rank, and signature of the witnesses shall be entered in the spaces provided. Destruction shall not be delayed pending arrival of the DO's superior. If no officer senior to the DO is available, any disinterested commissioned officer may serve as the third witness to the destruction. The method of destruction shall be indicated in the space provided in the witnesses' certification.

B. U.S. Coins. If time permits, the DO shall prepare a DD Form 2669 as described above for all U.S. coins destroyed. The DD Form 2669 shall contain the same type of information required for U.S. currency except that it shall list the denominations and value of each denomination of coin destroyed and shall be witnessed by two disinterested commissioned officers, or by two disinterested non-commissioned officers, or by two reliable U.S. citizens, or any combination of such individuals. The preprinted denominations of paper currency shall be struck out and the denomination of the coins entered. The word "currency" shall be struck out and "U.S. Coins" entered immediately above in both the DO's and the witnesses' certification blocks.

C. Foreign Currency and Coin. If time permits, a DD Form 2669 shall be prepared and witnessed for destruction of foreign currency and coin. The appropriate areas of the DD Form 2669 shall be modified to identify the denomination of the foreign currency and coin. Separate DD Forms 2669 are required for foreign currency held for safekeeping and that held as public funds and for foreign coin held for safekeeping and that held as public funds when both types of funds are held by the DO. The destruction shall be witnessed as prescribed above for U.S. currency and coin.

★ D. Check Stock. If time permits, the DO shall prepare a list in an original and 3 copies of all U.S. Treasury and LDA check stock destroyed. The list shall indicate the range

(from and through) of check numbers destroyed for each series of checks maintained by the DO. The destruction shall be witnessed as prescribed in paragraph 180201.A, above.

E. Savings Bond Stock. If the DO has U.S. Savings Bond stock, it should be destroyed in the same manner as check stock. A list shall be prepared in an original and 3 copies indicating the range (from and through) of bond serial numbers for each denomination of bonds. The destruction shall be witnessed as prescribed in paragraph 180201.A, above.

F. Signature Plates. Signature plates shall be crushed, disposed of in deep water or, as a last resort, buried.

180202. Non-appropriated Fund (NAF) Custodians

A. U.S. Currency, Coin, and MPC. When ordered by competent authority, NAF activities shall turn in their U.S. currency, coin, and MPC to the nearest DO in exchange for a Treasury check in the appropriate amount. These funds then become public funds for which the DO is accountable. If destruction becomes necessary, these funds shall be included on the DD Form 2669, as required above.

B. Foreign Currency and Coin. When ordered by competent authority, NAF activities shall turn in their foreign currency and coin to the nearest DO in exchange for a receipt stated in units of the foreign currency. The receipt shall state plainly that the foreign currency is being accepted for safekeeping and that neither the DO nor the U.S. Government is accountable for loss or destruction as a result of the existing emergency. See Chapter 27 of this volume. However, if after accepting foreign currency and coin for safekeeping, the DO discovers a requirement for its use, the DO shall issue a Treasury check for the U.S. dollar equivalent of the foreign funds used. If destruction becomes necessary, the DO shall prepare DD Form 2669 if time permits.

180203. MBFs. The earliest possible notice shall be given to MBFs when the commander believes it is prudent for the MBFs to liquidate their coin and currency holdings. Bank managers in critical areas shall be authorized periodically to exchange currency that is in excess of day-to-day requirements for a Treasury check. This practice will reduce, to a manageable level, outstanding currency susceptible to loss.

A. U.S. Currency and Coin. When it becomes necessary to destroy U.S. currency and coin it shall be transported by the MBF to the nearest DO and exchanged for a Treasury check. As with U.S. currency and coin received from non-appropriated fund activities, this currency and coin becomes public funds for which the DO is accountable and shall be included on the DD Form 2669 prepared by the DO. When such delivery cannot be made, the bank manager should prepare a destruction schedule, similar to the DD Form 2669, then verify and burn the currency into unidentifiable ashes in the presence of at least one representative from the MBF and two commissioned officers of the Armed Forces. U.S. coins shall be disposed of by the MBF as prescribed in subparagraph 180101.B, above.

B. Foreign Currency and Coin. MBF managers may turn in to the nearest DO their holdings of foreign currency and coin for safekeeping in exchange for a receipt stated in units of the foreign currency. The receipt shall specify that neither the DO nor the U.S. Government assumes accountability for loss or destruction of the foreign currency and coin as a result of the existing emergency. See Chapter 27 of this volume. If the DO has need for the foreign currency for operational purposes, a Treasury check shall be issued for the U.S. dollar equivalent of the foreign funds used. If destruction becomes necessary, the DO shall prepare DD Form 2669 if time permits.

180204. Other DoD Sponsored Activities

A. U.S. Currency and Coin. Managers of these activities shall deliver U.S. currency and coin to the nearest DO in exchange for a Treasury check or for a receipt for the value of the currency. A Treasury check shall be issued at a later time in exchange for the receipt previously given. As with U.S. currency and coin received from non-appropriated fund activities, when a Treasury check is issued in exchange for the value of the funds, the funds become public funds for which the DO is accountable and shall be included on the DD Form 2669 prepared by the DO.

B. Foreign Currency and Coin. Managers of these activities shall deliver foreign currency and coin to the nearest DO to be held for safekeeping. The DO shall issue a receipt stated in units of the foreign currency. The receipt shall specify that neither the DO nor the U.S. Government shall be accountable for loss or destruction of the foreign currency arising out of the existing emergency. See Chapter 27 of this volume. DOs may use the foreign currency held for safekeeping to meet operational requirements by issuing a Treasury check for the U.S. dollar equivalent of the foreign currency used. If destruction becomes necessary, the DO shall prepare DD Form 2669 if time permits.

180205. Accounting for Destroyed Currency, Coin, and Negotiable Instruments. The DO shall account for destroyed currency, coin, and negotiable instruments which were held as public funds on line 7.7 of the DD Form 2657 and the SF 1219. A copy of each DD Form 2669 shall support the entries on the DD Form 2657 and SF 1219.

DESTRUCTION SCHEDULE							
SECTION I - SCHEDULE OF CURRENCY TO BE DESTROYED							
1. LOCATION NAS Troublespot, APO		2. DSSN 1234	3. REASON FOR DESTRUCTION Enemy attack				
4. INCLUSIVE SERIAL NUMBERS (New Notes Only)	\$1	\$5	\$10	\$20	\$50	\$100	TOTAL
	250	500	1000	300			2050
TOTAL	250	500	1000	300			2050
SECTION II - CERTIFICATIONS							
I hereby certify that the above described currency in the amount of <u>\$2,050.00</u> dollars has been counted, verified, and found correct, and delivered this day for destruction at <u>NAS Troublespot</u> .							
5. DISBURSING OFFICER NAME AND RANK OR GRADE James M. Jonas, CDR, SC, USN			6. SIGNATURE			7. DATE 11/13/XX	
We hereby certify that the currency specified and described in the foregoing schedule was received and verified by us and was totally destroyed in our presence by <u>burning</u> on this date.							
8. WITNESSES

Figure 19-5. Sample SF 1219 (Statement of Accountability)

CHAPTER 19

DISBURSING OFFICER ACCOUNTABILITY REPORTS1901 DO ACCOUNTABILITY

190101. Concept. All DOs are considered to be agents of the Treasury Department. Each DO is accountable to the Treasury Department for the cash items (including receivables) in his or her possession. The SF 1219 (Statement of Accountability) is the DO's official monthly recording and reporting of this accountability. The DO's daily accountability is maintained on DD Form 2657 (Daily Statement of Accountability). The DD Form 2657 is similar and subsidiary to the SF 1219. Disbursement and collection transactions are reported on both the DD Form 2657 and the SF 1219. On the SF 1219, collections are netted against disbursements.

190102. Balancing

★ A. General. Cash in the possession of all DOs shall be balanced daily using DD Form 2657 as the permanent written record. Documents representing cash for which the DO remains accountable, but which are not physically in the DO's custody (such as receipts for advances to agent officers), shall be kept in the DO's vault or safe and shall be accounted for daily on the DD Form 2657 and monthly on the SF 1219. When accounts are inspected, the DD Form 2657 shall be presented to the inspecting officer(s) for examination. Most DO cash transactions are performed by deputies, agents, and cashiers. The DD Form 2665 (Daily Agent Accountability Summary) is the prescribed daily accountability document to the DO for deputies, agents, and cashiers. Preparation of the DD Form 2665 includes an actual cash count of all cash and negotiable instruments performed by the deputy, agent, or cashier who has custody of the cash and negotiable instruments. All deputies, agents, and cashiers shall use the DD Form 1081 (Statement of Agent Officer's Account) as a summary of cash transactions and receipt for cash and vouchers on hand for submission at turn-in or settlement with the DD Form 2665 to the DO. Except as provided in subparagraphs 190102.B and 190102.C, below, the DO or primary deputy shall balance all deputies, agents, and cashiers daily, using the DD Form 2665. The DO may rely on the daily cash count performed by a deputy, agent, or cashier at a remote location, as verified by the signature of the deputy, agent, or cashier on the daily DD Form 2665.

B. Navy Vessels. DOs aboard Navy vessels shall balance their cash using the DD Form 2657 and shall balance their deputies, agents, and cashiers using DD Form 2665 no less frequently than: once each week; immediately before and after each payday; the last day of each month; and at any other time when the DO suspects that an irregularity has occurred. Whenever workload and staffing conditions permit, DOs aboard Navy vessels are encouraged to balance all deputies, agents, and cashiers daily as prescribed above.

★ C. Deputies, Agents, and Cashiers at Remote Locations. Deputies, agents and cashiers who are remotely located from the disbursing officer (e.g., DO in Colorado and

agent in Australia) are not required to submit the DD Form 2665 to the DO daily. However, to maintain a daily record of transactions, they must prepare a DD Form 2665 daily. The DD Form 2665 along with all supporting documentation (e.g., all collection and disbursement vouchers and deposit tickets) and the DD Form 1081 will be submitted to the DO whenever a turn-in is effected.

190103. Overview of DD Form 2657 (Daily Statement of Accountability). The DD Form 2657 is to one day what the SF 1219 is to one month. The DD Form 2657 summarizes the amounts the Treasury Department would look to recover from the DO if the DO ceased operations on that day. Amounts on the DD Form 2657 are at summary level only, including a summary of all disbursements and collections made during the business day by the DO and all deputies, agents, and cashiers. Detailed transactions are reported in the DO's subsidiary records. Section I of the DD Form 2657 computes the total DO accountability to the Treasury Department at the end of each business day. Accumulated DD Form 2657 accountability on the last day of the accounting period (Month-to-Date Column) is the accountability reported on the SF 1219. Section II (for the current DO) and section III (for all prior DOs of that DSSN) summarizes the elements making up total DO accountability. Sections II and III are totaled in section IV. Section I totals (except for line 1.0) start with a zero balance at the beginning of each new accounting period (month) and when there is a change of DOs prior to the end of an accounting period. The Month-to-Date totals are cumulative for the entire accounting period. Sections II, III, and IV Month-to-Date totals are cumulative from month-to-month. The total of section IV must agree with the total of section I or the DD Form 2657 is out of balance. The DO should not begin a DD Form 2657 for a new business day until the DD Form 2657 for the prior business day is in balance. The properly balanced DD Form 2657 ensures agreement between the DO's cash accountability to the Treasury Department and disbursement and collection transactions recorded in the accounting system. The daily DD Form 2657 shall be signed by the DO as an official attestation of accountability to the Treasury Department. See section 1902 of this chapter for detailed preparation instructions.

★ 190104. Overview of DD Form 2665 (Daily Agent Accountability Summary). Each deputy, agent, and cashier shall prepare a DD Form 2665 for each day during which they transact business. The DD Form 2665 summarizes transactions for each business day. In order for the DD Form 2665 to depict a continuous picture of the transactions affecting the accountability of a deputy, agent, or cashier, the first DD Form 2665 prepared after receipt of an advance from the DO (or other principal authorized to provide advances) shall show the advance, and the last DD Form 2665 prepared up to the time of turn-in (submission of financial reports to the DO or other principal) shall show the turn-in. In this manner, the DD Form 2665 is a stand-alone document that provides a complete picture of the deputy, agent, or cashier's accountability transactions from day to day. When possible, a turn-in should not be accomplished as of the middle of a business day. However, if a turn-in is made in the middle of the business day, a DD Form 2665 shall be prepared up to the time of the turn-in and properly include the turn-in, and another DD Form 2665 prepared for the portion of the business day following the turn-in. See section 1903 of this chapter for detailed preparation instructions.

★ 190105. Overview of DD Form 1081 (Statement of Agent Officer's Account). Deputies, agents, and cashiers shall prepare a DD Form 1081 as a summary of cash transactions and receipt for cash and vouchers on hand each time turn-in or settlement of the account occurs. The DD Form 1081 summarizes cash transactions for the period of duty covered by the turn-in. The DO or primary deputy shall: verify the DD Form 1081 when the deputy, agent, or cashier's account is settled, sign the original and copy of the form, retain the original and supporting documents to support the DD Form 2665, and return the signed copy to the deputy, agent or cashier. The verification at turn-in or settlement includes an actual cash count by the DO or primary deputy. The cashier shall retain the signed copy as a record of the opening cash balance for the next period of duty or for record purposes if the account is balanced to zero. See section 1904 of this chapter for detailed preparation instructions.

190106. Overview of DD Form 2659 (Voucher Control Log). The DD Form 2659 summarizes daily disbursement and collection transactions by voucher number; identifies the mode of payment (i.e., check, cash, travelers check, electronic funds transfer, or a no-pay adjustment) and the check/EFT trace number; assures that all voucher numbers are accounted for; assures that all payment and collection vouchers are entered in accountability records; functions as a double-check against the DD Form 2657 and DD Form 2665, which summarize disbursement and collection transactions; enables comparison of vouchers paid by check to total checks written by check writers; enables comparison of vouchers paid by cash or travelers checks to cashier-paid vouchers; associates returned and undeliverable checks with applicable vouchers; and functions as a transmittal for vouchers showing voucher numbers used, not used, or voided. The DO should require DD Form 2659 to be prepared daily by each functional area and/or branch disbursing office when these areas or offices are assigned a separate series of voucher numbers. An example of DD Form 2659 is provided in figure 11-1.

190107. Overview of SF 1219 (Statement of Accountability). The SF 1219 shows summary totals of all receipts and expenditures of public funds occurring during the accounting period and the status of the DO's account at the close of that period. Normally, the accounting period begins on the first day of each calendar month and ends on the last day of each calendar month. An accounting period never extends beyond the last day of a calendar month. Exceptions to the calendar month accounting period depend on situations such as when a DO is relieved from disbursing duty prior to the last day of a month, or a DO commences disbursing duty other than on the first day of a month. See section 1905 of this chapter for detailed preparation instructions.

1902 PREPARATION OF DD FORM 2657

190201. General. Every DO shall prepare a DD Form 2657 for each day business is transacted. Except as provided in Chapter 20 of this volume, the DD Form 2657 shall be prepared in an original only and shall be a permanent record (i.e., typed or printed in ink). The DD Form 2657 may be provided to other functional areas for reconciliation of cumulative disbursement and collection totals with the daily accounting records. The DD Form 2657 shall

be returned for filing. Figure 19-1 is provided as an example of a properly prepared DD Form 2657.

190202. Item 1: DSSN. Enter the DO's DSSN.

190203. Item 2: Date. Enter the business-day date for which the form is being prepared.

190204. Section I: Transactions Affecting Accountability

A. Line 1.0: Accountability - Beginning of Day. Enter the end-of-day accountability from line 5.0 of the DD Form 2657 for the previous business day in the Today column. Enter the Month-to-Date amount from line 5.00 of the SF 1219 for the previous month. The amount entered in the Month-to-Date column shall remain the same on each DD Form 2657 prepared during the month.

B. Line 2.1A: Checks Issued in Payment of Vouchers. In the Today column, enter the total value of Treasury checks issued during the business day in payment of vouchers, including regular and special payrolls and the value of any check-issue adjustments. Check-issue adjustments are always supported by FMS Form 5206 or OF 1017-G. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

C. Line 2.1B: Checks Issued - All Others. In the Today column, enter the total value of Treasury checks issued during the business day for purposes other than voucher payments, including check-issue adjustments affecting such checks. Examples are checks written to obtain operating cash, for purchase of foreign currency, or for providing funds to agents. Check-issue adjustments shall be properly supported by FMS Form 5206 or OF 1017-G. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

D. Line 2.3: Other Transactions. Enter any unexplained overages during the business day which will be vouchered on the next business day. Do not enter any overages occurring on the last day of the month on this line. Amounts entered on this line cannot be reported on line 2.3 of the SF 1219. Upon preparation of the voucher on the next business day, decrease the amount on this line and increase line 4.1E (4.1D if collected to a receipt account). In some instances such as collections from dining facilities, only one collection voucher number is assigned for the entire accounting period (month) and the formal collection voucher is prepared as of the last business day of the month. Daily receipts of this nature shall be recorded on this line and as U.S. Currency/Coinage on Hand (Line 6.2A). At the end of the accounting period when the formal collection voucher is processed, the accumulated collections are removed

from this line and included as Reimbursements on Line 4.1E. Also, use this line to record accumulated small exchange gains for which a net gain and loss voucher is prepared on the last day of the month (rather than daily).

E. Line 2.34: Discrepancies in DO's Account - Credit. This is a Treasury Department suspense account. Do not use this line.

F. Line 2.36: Payments by Other DOs. Do not use this line.

G. Line 2.37: Transfer from Other DOs. Use this line to record the final accountability of a deactivated DSSN that is being assumed by the DO. The same accountability figure must be reported on line 4.37 of the deactivated DSSN's DD Form 2657. Also use this line to record a transfer of funds from another DO. The same amount must be recorded on line 4.37 of the DD Form 2657 applicable to the transferring DO. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column. Both DOs making such a transfer shall record the transaction on their SF 1219 for the same accounting period.

★ H. Line 2.8: OPAC Payments and Collections. Designated DOs participating in Treasury Department's On-Line Payment and Collection System (OPAC) shall use this line as described herein. Refer to Chapters 10, 11, and 24 of this volume for detailed information regarding the use of OPAC. In the Today column, enter the net daily OPAC interagency payments and collections for certain supplies and services rendered, including any adjustments for the current business day. When collections exceed disbursements, the amount is recorded as a negative. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

★ 1. If an OPAC transaction is processed in the Treasury Department's system at the end of a prior month but vouchered for the agency's accountability in the current month, a second line 2.8 is required. Annotate month and year on each of the description lines to differentiate between accounting months. For example, an amount reported in the Treasury Department's OPAC system with a processed date of January 30th is not vouchered and reported in daily accountability until the February 2nd business date. The February DD Form 2657 and SF 1219 will have two 2.8 lines: one for the net total of OPAC transactions processed by the Treasury Department in February and one for the January amount.

★ 2. Additional 2.8 lines also are required if an erroneous amount is reported in a prior month. The Treasury Department notifies the agency on FMS Form 6652 (Statement of Differences - Disbursing Office Transactions). A separate line is then reported for the month in which the error occurred.

I. Line 2.9: Total Accountability Increases. Enter the total of lines 2.1A through 2.8 in both the Today and Month-to-Date columns. Prove Month-to-Date column by adding the total in the Today column to the Month-to-Date total from line 2.9 of the previous day's DD Form 2657. If preparing the DD Form 2657 on the first business day of the month, the amounts shall be the same.

J. Line 3.0: Gross Accountability. Enter the total of lines 1.0 and 2.9 in both the Today and Month-to-Date columns. Prove the amount in the Month-to-Date column by adding the amount in the Today column on line 2.9 to the Month-to-Date amount from line 3.0 of the previous day's DD Form 2657. If the DD Form 2657 is being prepared for the first business day of the month, the amounts shall be the same.

K. Line 4.1A: Gross Disbursements. Disbursements are payments from (or charged to) an appropriation or fund and shall be supported by formal disbursement vouchers. Collection of payments made in error which are processed as bracketed (negative) amounts on disbursement vouchers are negative disbursements. Enter total gross disbursements (including OPAC payments), before refunds and negative reimbursements, from the disbursement vouchers paid on the business day being reported. The amount entered includes negative disbursements occurring on disbursement vouchers, but does not include refunds occurring on collection vouchers (which are reported on line 4.1B) and negative reimbursements occurring on disbursement or collection vouchers (which are reported on line 4.1E). If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

L. Line 4.1B: Less Refunds. Refunds are a recoupment (collection) of payments made in error and are usually supported by formal collection vouchers. On rare occasions, a refund must be reversed. When this situation occurs, the transaction is processed on a collection voucher with the amount bracketed and is treated as a negative refund. Refunds also occur on disbursement vouchers and are considered to be negative disbursements. Negative disbursements are included on Line 4.1A as a reduction of gross disbursements. Enter the total of refunds from collection vouchers. Do not include refunds from disbursement vouchers (negative disbursements) on this line. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

M. Line 4.1C: Net Disbursements. The term net disbursements as associated with the DD Form 2657 is defined as gross disbursements less refunds. In both the Today and Month-to-Date columns, subtract line 4.1B from line 4.1A and enter the respective differences on line 4.1C. Prove the Month-to-Date total by adding the Today column amount to the Month-to-Date column amount from 4.1C of the previous day's DD Form 2657. If the DD Form 2657 is being prepared for the first day of the month, the amounts shall be the same.

N. Line 4.1D: Less Receipts. Receipts are collections credited to the Treasury Department miscellaneous receipt accounts and are supported by formal collection vouchers. In the Today column, enter the total of collections credited to the Treasury Department miscellaneous receipt accounts. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

O. Line 4.1E: Less Reimbursements. Reimbursements are amounts collected for property sold or services furnished and are credited to appropriations on formal collection vouchers. Over-collection of reimbursements must be returned to the remitter and may be vouchered as bracketed (negative) amounts on collection vouchers or positive amounts on disbursement vouchers. In either event, the transactions are treated as negative reimbursements and reduce the amount reported as reimbursements. In the Today column, enter the total of collections classified as appropriation reimbursements (including OPAC collections) less any negative reimbursements whether from collection or disbursement vouchers. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

P. Line 4.1F: Net Expenditures. In both the Today and Month-to-Date columns, subtract lines 4.1D and 4.1E from line 4.1C and enter the respective differences on line 4.1F. Prove the Month-to-Date total by adding the Today column total to the Month-to-Date column total from line 4.1F of the previous day's DD Form 2657. If the DD Form 2657 is being prepared for the first day of the month, the amounts will be the same. Report the Month-to-Date amount from the final DD Form 2657 for the accounting period on line 4.1 of the SF 1219. Note: NET EXPENDITURES as shown on the DD Form 2657 is the same as NET DISBURSEMENTS found on line 4.1 of the SF 1219.

Q. Line 4.2A: Deposits Presented or Mailed to Bank. In the Today column, enter the total of all deposits mailed or presented to a Federal Reserve Bank or general depository (for credit to the Treasury's Department General Account) during the business day. This is a total of all SFs 215 (including deposited canceled checks, mutilated or decomposed currencies, food stamps, and credit card collections). Do not include deposits to limited depository checking accounts on this line. The total entered shall be reduced by the value of any SFs 5515 processed during the day, except for those SFs 5515 for electronic fund transfer payments to the bank (which are recorded on line 4.2B). If a deposit is prepared, verified, SF 215 attached, dated, and removed from an agent's or cashier's possession but still is on hand by close of the business day, it shall be reported as an undeposited collection on line 6.3A. On the DD Form 2657 for the next business day (or the day when the deposit is actually presented or mailed to the bank), remove the amount from line 6.3A and include on line 4.2A. This will be a regular routine if DOs make deposits of collections received on the business day being reported during the next business day. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column

amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column.

R. Line 4.2B: EFT Debit Vouchers. Use this line to record the SFs 5515 used for EFT payroll or vendor payments. Enter this debit voucher amount in brackets to denote a reduction of total deposits.

S. Line 4.3: Other Transactions. Use this line to record small exchange losses resulting from accommodation exchanges or limited depository account transactions for which a net gain or loss voucher is prepared on the last day of the accounting period.

T. Line 4.34: Discrepancies in DO's Account - Debits. This is a Treasury Department suspense account. Do not use this line.

U. Line 4.36: Payments for Other DOs. Do not use this line.

V. Line 4.37: Transfer to Other DOs. Use this line when the DSSN is being deactivated and final accountability is being transferred to another DO. The gaining DO shall assume accountability for this balance by recording an increase on line 2.37. Also, use this line to record a transfer of funds to another DO. The same amount shall be recorded on line 2.37 of the DD Form 2657 applicable to the gaining DO. If the DD Form 2657 is being prepared for the first day of the month, extend the Today column amount to the Month-to-Date column; otherwise, add the Today column amount to the Month-to-Date column amount from the previous day's DD Form 2657 and enter the total in the Month-to-Date column. Both DOs making such a transfer shall record the transaction on their SF 1219 for the same accounting period.

W. Line 4.9: Total Accountability Decreases. In both the Today and Month-to-Date columns, enter the total of lines 4.1F through 4.37. Do not include amounts from lines 4.1A through 4.1E. Prove the Month-to-Date column total by adding the Today column total to the Month-to-Date total for line 4.9 of the previous day's DD Form 2657. If the DD Form 2657 is being prepared for the first day of the month, the amounts shall be the same.

X. Line 5.0: Accountability - End of Day. In both the Today and Month-to-Date columns, subtract line 4.9 from line 3.0 and enter the difference on this line. The amounts in both columns must agree (both columns reflect end-of-day accountability). This amount represents the DO's accountability to the Treasury Department at the close of that particular business day. The amount in the Today column is carried forward as the beginning accountability (line 1.0) on the DD Form 2657 for the next business day. As stated above, the Month-to-Date beginning accountability amount (line 1.0) remains the same from the first through the last day of the month.

190205. Section II: Distribution of Accountability - Incumbent DO

A. Line 6.1: Designated Depositary. Limited depositary accounts almost always are foreign currency checking accounts held in the DO's own name, much the same as an individual's personal checking account. Unless scheduling on the back or on an attachment, show the name and location of the LD and the foreign currency unit (for example, pesos) in the blank space under the Description column for line 6.1. All entries in the amount columns shall be in U.S. dollars. Amounts reported on this line almost always represent the U.S. dollar equivalent of a particular foreign currency LDA because the OUSD(C) and the Treasury Department rarely approve a U.S. dollar LDA. If, however, the amount on this line does include U.S. dollars and U.S. dollar equivalents of foreign currency, show the U.S. dollar equivalent of foreign currency as a memo entry in the Description column. If the line amount is totally made up of U.S. dollar equivalents of foreign currency, the memo entry in the Description column is not required. Complete line 6.1 as explained in the following subparagraphs.

1. Enter the U.S. dollar equivalent amount of all LDA deposits made during the business day in the Daily Increase column. Include any earned interest credited by the bank on that day. Offset interest earnings with an appropriate Treasury Department miscellaneous receipt account collection voucher reported on line 4.1D. Also include any gain resulting from a beginning-of-day revaluation of the foreign currency on deposit. Offset such gains with a collection voucher reported on line 4.1E.

2. Enter the U.S. dollar equivalent total of LDA checks issued during the business day in the Daily Decrease column. Include any service charges made by the bank on that day. Offset the service charges with a disbursement voucher charging the Operations and Maintenance funds available for support of the disbursing activity and reported on line 4.1A. Also include any loss resulting from a beginning-of-day revaluation of the foreign currency on deposit. Offset revaluation losses with a negative collection voucher reported on line 4.1E.

3. Compute and enter the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total from the previous day's DD Form 2657. Do this even if the previous day is the last day of the preceding month since the Month-to-Date column totals for this line (and all lines throughout section II) are cumulative from month-to-month. The Month-to-Date total shall agree with the DO's computed checkbook balance.

B. Line 6.2A: U.S. Currency/Coinage on Hand. Include only U.S. currency and coins on hand in the disbursing office safe or vault and with deputies, agents, and cashiers located in the main disbursing office. DOs on Navy vessels with an Automated Teller Machine (ATM) system shall include funds in the possession of ATM custodians on this line. Do not include currency and coins identified on lines 6.3 through 6.9 below (for example, currency and coins held by deputies, agents, and cashiers at other locations other than the main disbursing office, or cash held for payrolls).

1. If the amount of U.S. currency and coinage on hand at end of day exceeds the amount of cash on hand from the Month-to-Date column of the previous day's

DD Form 2657, enter the amount of the increase in the Daily Increase column. The Daily Decrease column will be left blank.

2. If the amount of U.S. currency and coinage on hand at end of day is less than the amount of cash on hand from the Month-to-Date column of the previous day's DD Form 2657, enter the amount of the decrease in the Daily Decrease column. The Daily Increase column will be left blank.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, or deducting the Daily Decrease column amount from, the Month-to-Date column total from the previous business day's DD Form 2657.

C. Line 6.2B: Foreign Currency and Coinage on Hand. Include only foreign currency and coins on hand in the disbursing office safe or vault and with deputies, agents, and cashiers located in the main disbursing office. Do not include foreign currency and coins identified on lines 6.3A through 6.9 below (for example, foreign currency and coins held by deputies, agents, and cashiers at locations other than the main disbursing office or cash held for payrolls). If more than one type of foreign currency is maintained, schedule each type of currency on the back of the DD Form 2657 (or on a separate attachment). Add "See Attached" in the Description column. Unless scheduling on the back or in an attachment, show the foreign currency unit (for example, pesos) in the blank space in the Description column. Enter the U.S. dollar equivalent of the particular foreign currency in all three columns. Complete line 6.2B as explained in the following subparagraphs.

1. If the amount of foreign currency and coinage on hand at end-of-day exceeds the amount of foreign cash on hand from the Month-to-Date column of the previous day's DD Form 2657, enter the U.S. dollar equivalent amount of the increase in the Daily Increase column. The Daily Decrease column will be left blank.

2. If the amount of foreign currency and coinage on hand at end-of-day is less than the amount of foreign cash on hand from the Month-to-Date column of the previous day's DD Form 2657, enter the U.S. dollar equivalent amount of the decrease in the Daily Decrease column. The Daily Increase column will be left blank.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, or deducting the Daily Decrease column amount from, the Month-to-Date total from the previous business day's DD Form 2657.

D. Line 6.3A: Undeposited Collections - General. Undeposited collections are created most often when an SF 215 is prepared, dated, verified to the items to be deposited, and removed from a deputy's, agent's or cashier's possession, but is still on hand (not yet mailed or presented to the bank) at the close of the business day. These deposits cannot be reported on line 4.2A. If a deposit is not presented or mailed to the bank by the close of the business day, it shall be reported on line 6.3A. Amounts reported on this line are not considered a part of the

DO's cash authority. Do not delay preparation of the DD Form 2657 for the specific purpose of recording a prepared deposit on line 4.2A instead of line 6.3A.

1. Enter the amount of such a deposit in the Daily Increase column of line 6.3A.

2. In the Daily Decrease column, enter the amount of deposits presented or mailed to the bank that were recorded in the Daily Increase column of the DD Form 2657 for the previous business day.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total from the previous day's DD Form 2657. The amount entered in the Month-to-Date column should normally coincide with the amount shown in the Daily Increase column.

E. Line 6.3B: Other Undeposited Instruments on Hand. Normally, there would be no reason for undeposited negotiable instruments to be carried over beyond the current or next business day. However, exceptions can occur. For example, a check received by the DO may not have been signed (or may contain other errors) and the person presenting (or mailing) the check is unavailable to correct the document in the same business day the collection is recorded.

1. Enter the amount of negotiable instruments that cannot be deposited in the Daily Increase column.

2. When finally deposited, enter the amount of negotiable instruments deposited in the Daily Decrease column.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total from the previous business day's DD Form 2657. The computed Month-to-Date column total shall agree with the value of negotiable instruments carried over to the next business day.

F. Line 6.4: Custody or Contingency Cash. The amount reported on this line includes cash held under custody account agreements in overseas contract MBFs or cash held for approved contingency requirements (as approved by the Treasury Department).

1. If the amount of custody or contingency cash on hand at end of day exceeds the amount on hand from the Month-to-Date column total of the previous day's DD Form 2657, enter the amount of the increase in the Daily Increase column. The Daily Decrease column will be left blank.

2. If the amount on hand at end of day is less than the amount on hand from the Month-to-Date column total of the previous day's DD Form 2657, enter the amount of the decrease in the Daily Decrease column. The Daily Increase column will be left blank.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, or deducting the Daily Decrease column amount from, the Month-to-Date column total from the previous business day's DD Form 2657.

G. Line 6.5: Funds with Agents. Enter the total amount of funds in the hands of deputies, disbursing agents, cashiers, paying agents, collection agents, imprest fund cashiers, and change fund custodians at locations other than the main disbursing office. Do not include amounts held by deputies, agents, and cashiers in the main disbursing office or amounts held by ATM custodians on Navy vessels. Amounts entered are taken from the latest DD Forms 1081 submitted by the deputies, agents, and cashiers. Show a detailed schedule on the back of the DD Form 2657 or on a separate attachment adding the words "See Attached" in the Description column on the face of the DD Form 2657. Include the particular foreign currency denomination (e.g., German Marks), the rate of exchange at which the currency is valued, the number of foreign currency units, and the U.S. dollar equivalent on the schedule. Note that if the DO's rate of exchange is different from the rate used on the DD Form 1081 prepared by the deputies, agents, or cashiers, the DO shall prepare a gain or loss DD Form 1131 to account for the difference.

1. If the amount shown on the latest DD Forms 1081 is greater than the amount shown in the Month-to-Date column of the DD Form 2657 for the previous day, enter the amount of the increase in the Daily Increase column.

2. If the amount shown on the latest DD Forms 1081 is less than the amount shown in the Month-to-Date column of the DD Form 2657 for the previous day, enter the amount of the decrease in the Daily Decrease column.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, or deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous day. The computed Month-to-Date column total shall agree with the combined total of all the individual DD Forms 1081.

H. Line 6.6: Advances to Contractors. Enter cash advanced to contractors under advance pool agreements. Compute the amounts to be entered in the Daily Increase, Daily Decrease, and Month-to-Date columns in the same manner as for line 6.5.

I. Line 6.7: Cash in Transit. Enter the amount of all cash in transit. Foreign currency funds in transit may or may not be involved.

1. In the Daily Increase column, enter: cash not yet received for which Treasury exchange-for-cash checks already have been drawn; mutilated or decomposed currency forwarded to the FRB or (in the case of foreign currencies) to designated DOs, for which reimbursement has not yet been received; cash transferred to other DOs for which a Treasury check has not yet been received; and, unconfirmed credit card collection deposits reported to Mellon Bank and supported by DD Forms 1131.

2. In the Daily Decrease column, enter: the total cash and Treasury checks received which were included in the amounts entered in the Daily Increase column of a previous DD Form 2657; and the amount of confirmed bank credit card deposits that were included in the Daily Increase column of a previous DD Form 2657 and which are now reported in the Daily Increase column of line 4.2A (Deposits Presented or Mailed to Bank). If a charge-back is received from the bank, the appropriate functional area shall be notified and a negative DD Form 1131 prepared for the amount of the charge-back.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous day. The computed amount entered in the current Month-to-Date column shall equal the total of all unsettled cash-in-transit transactions.

J. Line 6.8: Payroll Cash. Enter the value of cash held for payday requirements. Do not report funds held by ATM custodians on Navy vessels on this line. Compute the amounts to be entered in the Daily Increase, Daily Decrease, and Month-to-Date columns in the same manner as for line 6.2A.

K. Line 6.9: Other. Enter the amount of Treasury exchange-for-cash checks prepared in advance and prepositioned Treasury checks awaiting pickup by a deputy, agent, or cashier. Any other category of cash or cash items to be reported on this line must be approved by the servicing DFAS Center. Compute the amounts to be entered in the Daily Increase, Daily Decrease, and Month-to-Date columns in the same manner as for line 6.2A. Whenever possible, clear the items on this line before preparation of the SF 1219.

L. Line 7.1: Deferred Vouchers. A deferred voucher is any paid voucher that has not been recorded in the accounting system. The usual cause is a paid voucher that must be returned to the paying deputy, agent, or cashier for correction. In addition, vouchers paid by deputies, agents, or cashiers that have not yet been examined by the DO may be deferred until this review is complete.

1. Enter the amount of any paid vouchers that must be recorded as deferred during the business day in the Daily Increase column. These vouchers are not reported as gross disbursements on line 4.1A.

2. Enter the amount of any vouchers reported on line 4.1A that were deferred on a previous DD Form 2657 in the Daily Decrease column.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total reported on the DD Form 2657 for the previous business day. The computed amount entered in the current Month-to-Date column must agree with the total of deferred vouchers outstanding.

M. Line 7.2A: Accounts Receivable - Check Overdrafts

1. In the Daily Increase column, enter any new check issue overdraft increases supported by FMS Forms 5206 or OFs 1017-G.

2. In the Daily Decrease column, enter any collections or disbursements against an undercharged appropriation reducing the check-issue overdraft amount reported on a previous DD Form 2657.

3. Compute the amount to be entered in the Month-to-Date column by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous business day.

4. The DO or primary deputy shall review accounts receivable for check overdrafts at least once each month to assure all necessary actions are being taken to clear the amount of the check issue overdrafts.

N. Line 7.2B: Accounts Receivable - Other

1. Enter any accounts receivable increases not included on line 7.2A in the Daily Increase column.

2. Enter any accounts receivable reductions not included on line 7.2A in the Daily Decrease column.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total for the DD Form 2657 of the previous business day.

4. The DO or primary deputy shall review accounts receivable at least once each month to assure all necessary actions are being taken to clear the receivable.

O. Line 7.3: Loss of Funds

1. In the Daily Increase column, enter any physical losses of cash, food stamps, negotiable instruments, and uncollected dishonored check amounts that will be reported to the supporting DFAS Center.

2. Enter any recoveries of losses, or reimbursements by the supporting DFAS Center, in the Daily Decrease column.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 of the previous business day. This amount shall agree with the total of all outstanding loss cases.

P. Line 7.4: Dishonored Checks Receivable

1. In the Daily Increase column, enter the amount of any dishonored checks received during the business day via an SF 5515 that are to be retained in DO accountability (i.e., not returned to the activity who originally accepted them).

2. In the Daily Decrease column, enter the amount of any dishonored checks collected or for which relief has been granted that are currently carried in DO accountability.

3. Compute the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous business day. The computed amount must agree with total of all dishonored checks on hand at the close of the business day.

Q. Lines 7.5 through 7.7. On the final DD Form 2657 for the accounting period, use these lines to summarize U.S. dollar equivalents of foreign currency amounts reported in section II. Enter in the Description column by country and type of currency, the total foreign currency units and U.S. dollar equivalent. Lines 6.1 and 6.2B always involve foreign currency. Line 6.5 could involve foreign currency. Leave the Daily Increase, Daily Decrease, and Month-to-Date columns blank.

R. Line 8.0: Total Incumbent DO Accountability. Enter the totals of lines 6.1 through 7.4 in each of the respective columns. Prove the Month-to-Date total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous business day. The figures must be the same.

190206. Section III: Distribution of Accountability - Predecessor DOs

A. General. This section of the DD Form 2657 shall be used by DOs charged with responsibility to settle the accounts of predecessor DOs as prescribed in Chapter 22 of this volume.

B. Line 9.2A: Accounts Receivable - Check Overdrafts. Compute all three column amounts for check overdrafts applicable to previous DOs in the same manner as prescribed for line 7.2A above. The DO or primary deputy shall review accounts receivable for check overdrafts at least once each month to assure all necessary actions are being taken to clear the amount of the check issue overdrafts.

C. Line 9.2B: Accounts Receivable - Other. Compute other accounts receivable amounts applicable to previous DOs in the same manner as prescribed for line 7.2B, above. The DO or primary deputy shall review accounts receivable at least once each month to assure all necessary actions are being taken to clear the amount of the receivable.

D. Line 9.3: Loss of Funds. Compute loss of funds amounts incurred by previous DOs in the same manner as prescribed for line 7.3, above.

E. Line 9.4: Other. Compute the amounts for other accountable items for previous DOs in the same manner as prescribed for line 7.4, above.

F. Line 10.0: Total Predecessor DO's Accountability. Enter the total of lines 9.2A through 9.4 in each of the respective columns. Prove the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous business day. The figures must be the same.

190207. Section IV: Distribution of Accountability - Combined

A. Line 11.0: Total DSSN Accountability. Enter the total of lines 8.0 and 10.0 in each of the respective columns. Prove the Month-to-Date column total by adding the Daily Increase column amount to, and deducting the Daily Decrease column amount from, the Month-to-Date column total of the DD Form 2657 for the previous day. The amounts must be the same. The computed Month-to-Date column total must also agree with the Month-to-Date column total of line 5.0, or the DD Form 2657 is out-of-balance. Resolve any out-of-balance condition before preparing the DD Form 2657 for the next business day.

190208. Item 3: Disbursing Officer Name, Rank or Grade, Title. Type or print the name, rank or grade, and title of the DO.

190209. Item 4: Disbursing Officer or Deputy Signature. The DO or a designated deputy shall sign the DD Form 2657 as an attestation of the accurate representation of accountability to the Treasury Department.

190210. Item 5: Date. Enter the date the DD Form 2657 is signed.

190211. Section V: Distribution of Cash on Hand. This section of the DD Form 2657 shows the physical location of all U.S. and foreign cash on hand, including custody or contingency cash and payroll cash. It includes cash held by both on-site and off-site deputy DOs, agents, and cashiers (including mobility-line cashiers). This section does not include: funds in designated depositories (from line 6.1); undeposited collections (from line 6.3A); funds with contractors (from line 6.6); or cash in transit (from line 6.7).

1903 PREPARATION OF DD FORM 2665

★ 190301. General. Except as provided in paragraph 190102.B, above, all disbursing officer deputies, agents, and cashiers shall prepare a DD Form 2665 for each day business is transacted. The DD Form 2665 is prepared in an original only and shall be a permanent record (i.e., typed or printed in ink). Figure 19-2 is provided as an example of a properly prepared DD Form 2665.

190302. Item 1: Date. Enter the business date for which the DD Form 2665 is prepared.

190303. Section I - Summary of Daily Accountability Transactions. This section summarizes all transactions affecting cash accountability since the last turn-in to the principal. Record daily and cumulative balances to-date since the last turn-in unless otherwise indicated in these instructions. Note that cumulative totals in this section represent cumulative amounts since the last turn-in and are not cumulative for an accounting period unless turn-ins are only made as of the end of a calendar month.

A. Line 1: Accountability - Beginning. In subitem “c” (Today column), enter the ending accountability balance shown on line 15 of subitem “c” from the previous business day. In subitem “d” (Cumulative column), enter the ending accountability shown on line 15 of subitem “d” of the DD Form 2665 prepared immediately following the last turn-in to the principal. Note that the beginning accountability balance in subitem “d” does not change until preparation of the DD Form 2665 immediately following the next turn-in to the principal.

B. Line 2: Advances. In subitem “b”, enter the amount of advances received during the business day by cash, prepositioned checks, or other in the appropriate blocks. Do not enter memorandum accountability advances on this line. In subitem “c”, enter the total of the amounts entered in subitem “b”. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

C. Line 3: Vouchered Collections. In subitem “c”, enter the total of all vouchered collections made during the business day. Do not enter memorandum or

nonvouchered collections on this line. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

D. Line 4: Treasury Check Issues. In subitem “b”, enter the value of vouchered Treasury check issues in the Vouchered block, and the value of non-vouchered check issues in the Other block. In subitem “c”, enter the total of all Treasury checks issued from subitem “b”. The amount entered in subitem “c” must equal the sum of the amounts entered in subitem “b”. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”. Note that this line is for use only by agent officers authorized by the principal to issue Treasury checks.

E. Line 5: Transfers from Other Disbursing Officers. In subitem “c”, enter the total of cash or other cash accountability items received from another disbursing officer during the business day. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

F. Line 6: Exchange Gain Accumulations. In subitem “c”, enter the value of any minor gains from revaluation of foreign currency on hand, or rounding gains involved in exchange transactions, that are not vouchered immediately (that is, not included on line 3, above). In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”. Accumulated exchange gains must be vouchered before any turn-in to the principal.

G. Line 7: Other. In subitem “c”, enter the value of any other increases in accountability (such as a cash overage that will not be vouchered until the next business day). Explain what the increases are. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

H. Line 8: Total Increases. In both subitems “c” and “d”, enter the respective total of lines 2 through 7.

I. Line 9: Gross Accountability. In subitem “c”, enter the sum of subitem “c” amounts on line 1 and line 8. In subitem “d,” enter the sum of subitem “d” amounts on line 1 and line 8.

J. Line 10: Transfers to Other Disbursing Officers. In subitem “c”, enter the total of cash or other cash accountability items transferred to another DO during the business day. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

K. Line 11: Exchange Loss Accumulations. In subitem “c”, enter the value of any minor losses incurred during the business day as a result of revaluation of foreign currency on hand, or rounding losses involved in exchange transactions, that are not vouchered immediately. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”. Accumulated exchange losses must be vouchered before any turn-in to the principal.

L. Line 12: Other. In subitem “c”, enter the value of valid decreases in accountability during the business day not covered on lines 10 and 11 (such as a cash shortage that will not be vouchered until the next business day). Explain the decreases. In subitem “d”, enter the sum of the amount entered in subitem “c” and the amount in subitem “d” of this line from the previous business day. If this is the first DD Form 2665 prepared after a turn-in to the principal, the amount entered in subitem “d” must be the same as the amount entered in subitem “c”.

M. Line 13: Returns to Principal. Complete this line only on the first DD Form 2665 prepared following a turn-in. Enter the total value of accountability items turned in to the principal in both subitems “c” and “d”. In the blocks provided, break-out the value of paid vouchers, deposit tickets, and other items turned in.

N. Line 14: Total Decreases. In both subitems “c” and “d”, enter the respective total of amounts entered on lines 10 through 13.

O. Line 15: Accountability - Ending. In both subitems “c” and “d”, enter the difference derived by subtracting the amount on line 14 from the amount on line 9. The resulting amounts (ending accountability) in subitems “c” and “d” must be the same.

190304. Section II - Distribution of Agent Accountability. This section shows the make-up of all items for which the deputy, agent, or cashier is accountable to the principal. The items are entered on the appropriate line (lines 16 through 31) that describes the accountable item in subitem “c”, Accountability Before Transfers. When the DD Form 2665 is the first being prepared after an agent turn-in, enter the amount of the turn-in on the appropriate lines in subitem “d”, Returns to Principal. Otherwise, leave subitem “d” blank. If no agent turn-in is entered in subitem “d”, then subitem “e”, Accountability After Transfers also may be left blank. The

amount in subitem “c” is then considered to be the final accountability for the day. Note, however, that if an amount is entered in subitem “d” for any of the lines in this section, subitem “e” must be completed. Compute the amount to be entered on each line of subitem “e” by subtracting the amount in subitem “d” from the amount in subitem “c”. Add the amounts in each of the three subitems and enter the respective totals on line 32. To prove the computations and totals entered on line 32, subtract the total in subitem “d” from the total in subitem “c”. The result must equal the total entered on line 32 in subitem “e”. The following subparagraphs describe entries for subitem “c”; however, if an agent turn-in is recorded for the day, subitems “d” and “e” must also be completed as described in this paragraph.

A. Line 16: Limited Depositary. Enter the U.S. dollar value of the current LDA balance. In the spaces provided, enter the number of foreign currency units and the exchange rate at which the foreign currency units are valued.

B. Line 17: Cash on Hand (U.S.). Enter the amount of U.S. currency and coin on hand.

C. Line 18: Cash on Hand (Foreign). Enter the U.S. dollar value of foreign currency and coin on hand. In the spaces provided, enter the number of foreign currency units and the exchange rate at which the foreign units are valued for both accommodation exchange cash and operating cash.

D. Line 19: Prepositioned Treasury Checks. Enter the total value of prepositioned Treasury checks on hand. Note that these checks are inscribed Treasury checks issued as advances to the agent by the principal that have not been negotiated by the agent. Do not enter Treasury checks issued by the agent (if the agent has authority to issue Treasury checks) that have not been delivered to the payee.

E. Line 20: Negotiable Instruments (U.S.). Enter the value of all U.S. dollar undeposited negotiable instruments on hand in the agent office. Include all negotiable instruments (e.g., personal checks, Treasury checks, money orders and food stamps) accepted for debts owed the U.S. Government and in accommodation exchange transactions.

F. Line 21: Negotiable Instruments (Foreign). Enter the U.S. dollar value of undeposited negotiable foreign instruments on hand in the agent office. In the spaces provided, enter the number of foreign currency units represented by the negotiable instruments and the exchange rate at which the foreign instruments are valued.

G. Line 22: Military Payment Certificates. Enter the value of MPC on hand in the agent office.

H. Line 23: Paid Vouchers. Enter the value of paid disbursement vouchers on hand in the agent office. Do not include memorandum or journal vouchers on this line.

I. Line 24: Funds in Transit. Enter the value of funds in transit to or from another DO (not the agent's principal). Funds in transit increases include: cash not yet received for which Treasury checks have been issued; mutilated or decomposed currency forwarded to the FRB (or in the case of foreign currency, to the central DO) for which reimbursement has not yet been received; and cash transferred to other DOs for which a Treasury check has not yet been received. Funds in transit decreases are reported when the above expected cash or Treasury check is received. Note: Increases are entered as positive amounts; decreases are entered as negative amounts.

J. Line 25: Funds with Subagents. Generally, primary agent advancement of funds to any type of subagent (for example, a paying agent) does not change overall primary agent accountability. For example, an increase on this line representing a cash advance to a subagent would be offset by a decrease to lines 17 or 18, as appropriate. However, if the primary agent is authorized to issue Treasury checks, and the advance to the subagent is provided by a Treasury check issued by the agent, the advance is recorded in line 4 of section I as a Treasury check issue and is recorded as an increase on this line. When funds or paid vouchers are returned by the subagent, the return is recorded as a decrease to this line. The decrease is offset by an increase to the appropriate line in this section (for example, cash on hand or paid vouchers).

K. Line 26: Deposit Tickets. Unlike deposits by a DO, agent deposits to an FRB or TGA do not officially reduce the agent's accountability. The agent's accountability is reduced when the applicable confirmed deposit tickets are received by the principal. Enter the value of all SFs 215 on hand for deposits made to an FRB or TGA during the business day. Do not enter deposits to an LDA on this line.

L. Line 27: Dishonored Checks Receivable. Enter the value of dishonored checks received from the principal that are or were retained in the agent's accountability. Agents deposit checks for credit to the DSSN of the DO. Any dishonored checks will be returned to the DO by the depository on an SF 5515. The DO will reduce DD Form 2657 line 4.2A (Deposits Presented or Mailed to Bank) and increase line 6.5 for the agent to whom the dishonored check is returned. The agent will record the dishonored check as an increase to this line and either retain it until recoupment is made for a dishonored check accepted in an accommodation transaction or remove it from accountability by processing a reverse DD Form 1131 and returning it to the functional area or collection activity from which received. A decrease to this line is applicable when the amount of the dishonored check is recouped, when the receivable is cleared by a reverse DD Form 1131, or when an uncollectible receivable is processed for removal from accountability as provided in Chapter 6 of this volume.

M. Line 28: Check Overdrafts Receivable. Generally, if authorized to issue Treasury checks, agents will also be responsible for collection of the amount of any check issue overdrafts. The amount of a check issue overdraft will be received as an advance from the DO, with a copy of the FMS Form 5206, and will be recorded on this line. Enter the value of check overdrafts being carried by the agent. As a matter of expediency, the DO may choose to adjust FMS Forms 5206 attributable to agent Treasury check overdrafts without transfer of

accountability back to the agent. Such adjustments will be made directly to the DO's DD Form 2657.

N. Line 29: Loss of Funds. Enter the value of agent losses of funds. Generally, the agent shall follow loss of funds procedures in Chapter 6 of this volume, with reporting to the DO instead of the supporting DFAS Center. If a loss is not immediately recouped by the agent, the loss will be transferred to the DO for recording on the DD Form 2657. When a loss is transferred to the DO, the transfer will be recorded in subitem "d". Note that transfer of a loss as described herein does not relieve the agent of liability for the loss. The transfer is for recording purposes only.

O. Line 30: Deferred Vouchers. Enter the value of agent deferred vouchers on hand. An agent deferred voucher can occur when the agent makes a payment but cannot include the voucher in the next scheduled agent turn-in. Normally, this situation occurs because of an error noted on the voucher that can only be corrected through contact with the payee. The deferred voucher is established as an increase to this line and an offsetting decrease to line 23 (Paid Vouchers). When the deferred voucher is corrected, it may either be transferred back to line 23 pending turn-in to the principal, or it may be retained on this line until the next scheduled turn-in. Note that this line is not used to record vouchers returned to the agent for correction. Agents shall record vouchers returned for correction as a memorandum entry in section IV, line 41. DOs will record vouchers returned for correction as deferred vouchers on the DD Form 2657.

P. Line 31: Other. Enter the value of other agent accountability items not covered by lines 16 through 30. Describe the items in the space provided. in subitem "b".

Q. Line 32: Total Agent Accountability. Enter the total of the values entered on lines 16 through 31. This total must equal the total entered in section I, subitem "c", line 15. If a turn-in to the DO is recorded in section I, line 13, the turn-in must also be entered on the applicable lines in section II, subitem "d" and the amounts for each line in subitem "e" computed and entered. Enter the total of the values entered on lines 16 through 31 of subitems "d" and "e". The total entered in subitem "d" must equal the total entered in section I, subitem "c", line 13. The total entered in subitem "e" must equal the total entered in section I, subitem "c", line 15.

190305. Section III - Location of Cash/Negotiable Instruments. The location and value of agent accountable items (including both U.S. and foreign currency (and coin)) is recorded in this section.

A. Line 33: Agent. Enter the value of accountable items located in the agent's safe in the applicable subitems.

B. Line 34: Deputy Agent. Enter the value of accountable items located in the deputy agent's (or subagent's) safe in the applicable subitems.

C. Line 35: Cashier. Enter the value of accountable items located in the cashier's safe in the applicable subitems.

D. Line 36: Other. Enter other locations where accountable items are stored in the space provided in subitem "b". Enter the value of accountable items located at these other locations in the applicable subitems.

★ E. Line 37: Totals. Enter the totals of subitems "c" through "g". Also, ensure the totals reconcile to section II, lines 17 through 22 and 25.

190306. Item 2 - Name of Agent. The agent shall type or print his or her name in the space provided.

190307. Item 3 - Address of Agent. The agent shall type or print his or her duty location in the space provided.

190308. Item 4 - Signature of Agent. The agent shall sign the DD Form 2665 as attestation of the accurate representation of his or her accountability.

190309. Section IV - Memorandum Agent Accountability. This section includes memorandum-type information not officially a part of agent accountability data. Agent completion of section IV is at the DO's option. If the DO has no preferences, completion of section IV is at the agent's option.

A. Line 38: Deposit Tickets on Hand. Enter each SF 215 number and amount on hand since the last turn-in to the principal.

B. Line 39: Paid Vouchers on Hand. Paid agent vouchers do not decrease agent accountability until they are turned in to the principal. This subsection tracks the voucher numbers of paid agent vouchers on hand at the close of the business day. Also enter disbursement voucher numbers not used, duplicated, and voided, in the spaces provided.

C. Line 40: Collection Vouchers on Hand. This subsection tracks the voucher numbers of agent collection vouchers on hand at the close of the business day. Note that, unlike disbursement vouchers, collection vouchers are not an official part of agent accountability. Rather, the instruments collected (cash, checks, etc.) constitute a part of the agent's accountability. Nonetheless, the agent is responsible for preparing collection vouchers to document all collections received and is also responsible to ensure that the original and required copies of the collection vouchers are turned in to the principal for eventual forwarding to the servicing DFAS Center with the DO's financial reports. Also, enter collection voucher numbers not used, duplicated, and voided, in the space provided.

D. Line 41: Vouchers Returned for Correction. Vouchers returned by the DO for correction do not officially increase the agent's accountability. However, such vouchers

eventually must be returned to the DO for recording in the accounting system. Record the applicable disbursement and collection voucher numbers of vouchers not yet corrected and returned to the DO.

★ E. Line 42: Treasury Check Stock on Hand. If the agent is authorized to issue Treasury checks, complete this section for each series of blank checks on hand. Enter the inclusive check numbers of all blank Treasury check stock on hand at the end of the business day.

F. Line 43: Agent Remarks. Enter any necessary remarks at the agent's discretion or at the direction of the principal.

1904 PREPARATION OF DD FORM 1081

190401. General. The DD Form 1081 shall be prepared as a summary of cash transactions and receipt for cash and vouchers on hand between DOs and their agent officers (deputies, agents, cashiers, paying agents, and collection agents). The DD Form 1081 shall also be initiated by the DO when funds are advanced to an agent officer. The agent officer shall initiate the DD Form 1081 when funds and/or cash vouchers are turned in to the DO. Cash transactions that increase the accountability of the agent officer shall be shown in the Increase column. Cash transactions that decrease the accountability of the agent officer shall be shown in the Decrease column.

190402. Preparation of DD Form 1081 by DO. The DO shall prepare a DD Form 1081 in an original and 2 copies to account for an advance of funds to an agent officer. The identification of the DO and that of the agent officer shall be entered in the blocks provided for this purpose. Figure 19-3 is provided as an example of a properly prepared DD Form 1081 for advancing funds to an agent officer.

A. Line 1. In the Beginning Balance column, enter the balance in the agent officer's account before the current advance of funds. This amount should be the same as the amount shown on line 17 of the last DD Form 2665 submitted by the agent and line 12 of the last DD Form 1081 submitted by the agent.

B. Lines 2 through 4. In the Increase column, enter on the appropriate line the amount of currency included in the current advance.

C. Lines 5 and 6. Leave blank. These lines are not used on an advance of funds.

D. Line 7A, 7B, and 7C. In the Increase column, enter the amount of Treasury checks and/or any other negotiable instruments included in the advance. If space permits, enter the check number(s) on the corresponding line. If more space is required, list the check numbers on the reverse of the form.

E. Line 8. Leave blank. This line is not used on an advance of funds.

F. Line 9. In the Increase column, enter the dollar value of incorrect vouchers returned to the agent officer. The return of incorrect vouchers to an agent officer shall be considered as funds advanced.

G. Lines 10 and 11. In the Transactions column, enter an appropriate identification of items other than those described above that are included in the advance of funds. Enter the amount of such items in the Increase column.

H. Line 12. In the Beginning Balance column, enter the grand total of the amount entered on line 1 plus the total of the amounts entered in the Increase column on lines 2 through 11. This grand total represents the balance in the agent officer's account as a result of the advance.

I. Statements

1. Disbursing Officer. The DO shall place an "X" in the box provided opposite the "On Advance" statement to indicate that the form is to account for an advance of funds to the agent officer and shall complete the Date and Signature blocks to authenticate the statement opposite the box checked. The signed original and duplicate of the form, together with the funds, shall be delivered to the agent officer. The triplicate copy shall be retained by the DO pending return of the signed original by the agent officer.

2. Agent Officer. The agent officer shall verify that the items received are in agreement with the amounts stated on DD Form 1081. The agent officer shall then place an "X" in the box provided opposite the agent officer's "On Advance" statement and shall complete the Date and Signature blocks to authenticate the statement shown opposite the box checked. The original DD Form 1081 shall be returned to the DO as a receipt for the funds. The duplicate copy shall be retained by the agent officer.

190403. Preparation of DD Form 1081 by Agent Officer. The agent officer shall prepare a DD Form 1081 in an original and 2 copies to account for a return of funds and/or cash vouchers to the DO. The identification of the DO and that of the agent officer shall be entered in the blocks provided for this purpose. Figure 19-4 is provided as an example of a properly prepared DD Form 1081 to return funds and/or cash vouchers to the DO.

A. Line 1. In the Beginning Balance column, enter the balance in the agent officer's account before the current return of funds and/or cash vouchers. This amount should be the same as the amount shown on line 17 of the last DD Form 2665 submitted by the agent and line 12 of the last DD Form 1081 submitted by the agent.

B. Lines 2 through 4. In the Decrease column, enter on the appropriate line the amount of currency included in the return.

C. Line 5. In the Increase column, enter the amount of collections made by the agent officer in the form of cash or negotiable instruments.

D. Line 6. In the Decrease column, enter the amount of deposits (SF 215) made by the agent officer to the credit of the Treasury Department over the DSSN of the DO.

E. Line 7A, 7B, and 7C. In the Decrease column, enter the amount of Treasury checks and/or any other negotiable instruments being returned to the DO. (Items previously advanced by the DO, but not used).

F. Line 8. In the Decrease column, enter the amount of vouchers paid in cash by the agent officer and included in the return.

G. Line 9. Leave blank. This line is not used by agent officers on return of funds and/or cash vouchers to the DO.

H. Lines 10 and 11. In the Transactions column, enter an appropriate identification of items other than those described above that are included in the return. Enter the amount of such items in the Decrease column.

I. Line 12. In the Beginning Balance column, enter the total of the amount entered on line 1 plus the total of the amounts entered in the Increase column on lines 2 through 11. In the Ending Balance column, enter the grand total of the amount entered in the Increase column of this line minus the total of the amounts entered in the Decrease column on lines 2 through 11. This grand total represents the balance in the agent officer's account as a result of the return.

J. Statements

1. Agent Officer. The agent officer shall place an "X" in the box provided opposite the agent officer's "On Return" statement to indicate that the form is prepared to account for the return of funds and/or cash vouchers to the DO and shall complete the Date and Signature blocks to authenticate the statement shown opposite the box checked. The signed original and duplicate of the DD Form 1081, with the funds and/or cash vouchers, shall be delivered to the DO. The triplicate copy shall be retained by the agent officer pending return of the signed duplicate by the DO.

2. Disbursing Officer. The DO shall verify that the amounts reported on the DD Form 1081 are in agreement with the items received and shall then place an "X" in the box provided opposite the "On Return" statement. The DO shall complete the Date and Signature blocks to authenticate the statement opposite the box checked. The signed duplicate of

the form shall be returned to the agent officer as a receipt for the items turned in. The original of the form shall be retained by the DO.

1905 PREPARATION OF SF 1219

190501. General. Every DO shall submit an SF 1219 each month for each DSSN assigned whether or not any transactions occur or any accountable balance is involved. A final SF 1219 shall be prepared and submitted by the DO being relieved irrespective of the fact that the last day of the accounting period may be other than the last day of the month. The final SF 1219 shall be plainly marked "FINAL" in the blank space directly above the name line. Erasures, strikeovers, or marks of any description other than legitimate entries are not permitted on the SF 1219. Use cumulative month-to-date totals from the final DD Form 2657 for the accounting period (or month) to complete the similarly-numbered lines of the SF 1219. Certain alpha-suffixed cumulative line totals on the DD Form 2657 must be combined for entering on the SF 1219.

190502. Heading

A. Name of Disbursing Officer. Enter the full name and rank or grade of the DO.

B. Location of Disbursing Officer. Enter the unit identification code, name, and location of the disbursing activity.

C. Name of Agency. Enter "Army", "Navy", "Air Force", "Marine Corps", as applicable. Defense Agencies shall enter the appropriate name based on the Military Service from which the DSSN was obtained.

D. Agency Location Code. Enter the four-digit DSSN under which the DO is operating. A separate SF 1219 shall be prepared for each DSSN.

E. Period of Account. Enter the first and last days of the reporting period. Normally, the reporting period begins on the first day of each calendar month and ends on the last day. A reporting period never extends beyond the last day of a calendar month. Exceptions to the calendar month as the reporting period will depend on situations such as when a DO is relieved from disbursing duties prior to the last day of the month, or when a DO commences disbursing duties on a day other than the first day of the month.

190503. Section I - General Statement of Account

A. Part A - Transactions During Period Affecting Accountability

1. Line 1.00: Total Accountability Beginning of Period. Enter the Month-to-Date column total from line 1.00 of the final DD Form 2657 for the reporting period.

This amount must be the same amount reported as the Accountability Close of Period (line 5.00) of the SF 1219 for the previous reporting period. In the case of relieving DOs, the amount shown must be the same as the amount shown on line 11.0 of the relieved DO's final SF 1219. Note: Relieving DOs assigned to tactical units and Naval vessels shall follow the instructions in Chapter 2 of this volume for this line. DOs reporting foreign currency shall enter the amount of foreign currency (including limited depositary checking accounts) held at the beginning of the reporting period in the blank space opposite the caption for line 1.00.

2. Line 2.1: Checks Issued on U.S. Treasury. Enter the combined Month-to-Date column totals of lines 2.1A and 2.1B of the final DD Form 2657 for the reporting period. This amount must agree with the amount in column (5), Part A, Section II, on the reverse of the SF 1219 and with the net total of checks issued as reported on the SF 1179. The total of checks issued (including adjustments) entered refers only to checks drawn on the U.S. Treasury and shall not include limited depositary account checks. Limited depositary account checks shall be treated as cash transactions and shall be reflected on line 6.1.

3. Line 2.34: Discrepancies in D.O. Accounts - Credits. Do not use.

4. Line 2.36: Payments By Another D.O. Do not use.

5. Line 2.37: Transfers From Other DOs. Use this line to record the final accountability of a deactivated DSSN that is being assumed by the DO. The same accountability figure must be shown on line 4.37 of the deactivated DSSN's SF 1219. Also use this line to record a transfer of funds from another DO. The transferring DO shall have a corresponding entry on line 4.37 of his or her SF 1219. The amount entered shall be the same amount as shown in the Month-to-Date column on line 2.37 of the final DD Form 2657 for the reporting period.

★ 6. Line 2.39. Designated DOs participating in Treasury Department's On-Line Payment and Collection System (OPAC) shall use this line as described in this subparagraph. Refer to Chapters 10, 11, and 24 of this volume for detailed information regarding the use of OPAC. The paper version of the SF 1219 has not yet been revised by the Treasury Department to include Line 2.8 - OPAC Payments and Collections. However, the Treasury Department has revised the requirements for disbursing offices that electronically prepare and submit the SF 1219. The electronic format includes Line 2.8 specifically for OPAC Payments and Collections. If the SF 1219 is prepared manually, strike out the caption 2.39 and insert 2.8 - OPAC Payments and Collections. Enter the net monthly OPAC interagency payments and collections, including any adjustments for the current month. The amount entered shall be the same as shown in the Month-to-Date column of line 2.8 of the final DD Form 2657 for the reporting period. The Treasury Department's Financial Management Service (FMS), will compare customer and billing agencies' SF 1219 OPAC transactions with the OPAC data. If there is a difference in the comparison, a TFS Form 6652 (Statement of Differences - Disbursing Office Transactions) will be generated. The differences must be investigated and necessary corrections reported on the next month's SF 1219 as a separate line 2.8. Annotate month and year on each of

the description lines to differentiate between the accounting months. Separate lines also are required if an OPAC transaction is processed in the Treasury Department's system at the end of a prior month but vouchered for agency's accountability in the current month.

7. Line 2.9: Total Increases in Accountability. Enter the sum of lines 2.1 through 2.39. The amount must agree with the Month-to-Date column total on line 2.9 of the final DD Form 2657 for the reporting period.

8. Line 3.0: Subtotal. Enter the sum of lines 1.00 and 2.9. The amount must agree with the Month-to-Date column total on line 3.0 of the final DD Form 2657 for the reporting period.

9. Line 4.1: Net Disbursements. Enter the Month-to-Date column total from line 4.1F of the final DD Form 2657 for the reporting period.

10. Line 4.2: Deposits Presented or Mailed to Bank. Enter the combined Month-to-Date column totals from lines 4.2A and 4.2B of the final DD Form 2657 for the reporting period. The amount entered shall agree with the amount in column (5), Part B, Section II on the reverse of the SF 1219.

11. Line 4.34: Discrepancies in D.O. Accounts - Debits. Do not use.

12. Line 4.36: Payments for Another D.O. Do not use.

13. Line 4.37: Transfers to Other DOs. Use this line when the DSSN is being deactivated and final accountability is being transferred to another DO. The gaining DO shall assume accountability for this balance by recording an increase on line 2.37 of his or her SF 1219 for the same reporting period. Also use this line to record a transfer of funds to another DO. The receiving DO shall have a corresponding entry on line 2.37 of his or her SF 1219 for the same reporting period. The amount entered must be the same as shown in the Month-to-Date column on line 4.37 of the final DD Form 2657 for the reporting period.

14. Line 4.39. Do not use.

15. Line 4.9: Total Decreases in Accountability. Enter the sum of lines 4.1 through 4.39. The amount must agree with the Month-to-Date column total on line 4.9 of the final DD Form 2657 for the reporting period.

16. Line 5.00: Total Accountability Close of Period. Subtract the amount on line 4.9 from the amount on line 3.0 and enter the result. This amount must agree with the Month-to-Date column total on line 5.0 of the final DD Form 2657 for the reporting period.

B. Part B - Analysis of Incumbent Officer's Accountability

1. Line 6.1: Cash on Deposit in Designated Depository. Enter the Month-to-Date column total from line 6.1 of the final DD Form 2657 for the reporting period. If there is only one LDA, show the name and location on the Name and Location of Depository line of the description column. If more than one LDA is maintained, attach a schedule to each copy of the SF 1219 showing the name, location, foreign currency unit, and U.S. dollar equivalent for each LDA and show the total of all LDAs on line 6.1. Enter "See Attached" on the Name and Location of Depository line. Amounts on this line shall always be reported in U.S. dollars and agree with the DO's computed limited depository checkbook balance.

2. Line 6.2: Cash on Hand. Enter the combined Month-to-Date column totals of lines 6.2A and 6.2B of the final DD Form 2657 for the reporting period. Show a parenthetical U.S. dollar equivalent of foreign currencies on hand (from line 6.2B of the DD Form 2657) after the description. DOs on Navy vessels with an Automated Teller Machine (ATM) system shall include funds in the possession of ATM custodians on this line. Do not include currency and coins held by deputies, agents, and cashiers at locations other than the main disbursing office or cash held for payrolls on this line. Cash held by deputies, agents, and cashiers at locations other than the main disbursing office shall be reported on line 6.5. Cash held for payrolls shall be reported on line 6.8.

3. Line 6.3: Cash - Undeposited Collections. Enter the combined Month-to-Date column totals of lines 6.3A and 6.3B of the final DD Form 2657 for the reporting period. Include all undeposited cash and cash items (e.g. checks and money orders) on hand at the close of the reporting period that are for deposit to the TGA. Do not include deposits already mailed or presented for credit to the TGA.

4. Line 6.4. Enter the caption "Custody or Contingency Cash" in the description column. The amount entered on this line includes cash held under custody account agreements in overseas contract MBFs or, when separately approved by the Treasury Department, cash held as cash reserves for contingency requirements. Enter the Month-to-Date column total from line 6.4 of the final DD Form 2657 for the reporting period.

5. Line 6.5: Cash in Custody of Government Cashiers. Amounts entered on this line include coin and currency in the hands of deputies, agents, cashiers, imprest fund cashiers, collection agents, paying agents, and change fund custodians at locations other than the main disbursing office. Do not include amounts held by deputies, agents, and cashiers in the main disbursing office or amounts held by ATM custodians on Navy vessels. Enter the Month-to-Date column total from line 6.5 of the final DD Form 2657 for the reporting period. Also, enter in parentheses (in the space between the caption and the amount column) the dollar equivalent of foreign currencies included in the amount reported.

6. Line 6.6. Enter the caption "Advances to Contractors" in the description column. Enter the Month-to-Date column total from line 6.6 of the final DD Form 2657 for the reporting period.

7. Line 6.7. Enter the caption "Cash in Transit" in the description column. Enter the Month-to-Date column total from line 6.7 of the final DD Form 2657 for the reporting period.

8. Line 6.8. Enter the caption "Payroll Cash" in the description column. Do not report amounts held by ATM custodians on Navy vessels on this line. Enter the Month-to-Date column total from line 6.8 of the final DD Form 2657 for the reporting period.

9. Line 6.9. Enter the caption "Other Cash Items" in the description column. Enter the Month-to-Date column total from line 6.9 of the final DD Form 2657 for the reporting period.

10. Line 7.1: Deferred Charges - Vouchered Items. Enter the Month-to-Date column total from line 7.1 of the final DD Form 2657 for the reporting period.

11. Line 7.2: Receivables - Check Overdrafts. Enter the combined Month-to-Date column totals from lines 7.2A and 7.2B of the final DD Form 2657 for the reporting period.

12. Line 7.3: Losses of Funds. Enter the Month-to-Date column total from line 7.3 of the final DD Form 2657 for the reporting period.

13. Line 7.4: Receivables - Dishonored Checks. Enter the Month-to-Date column total from line 7.4 of the final DD Form 2657 for the reporting period.

14. Lines 7.5 Through 7.9. Do not use.

15. Line 8.0: Total of My Accountability. Enter the total of lines 6.1 through 7.4. This amount must agree with the Month-to-Date column total from line 8.0 of the final DD Form 2657 for the reporting period.

C. Part C - Analysis of Predecessor Officers' Accountability

1. Line 9.2: Receivables - Check Overdrafts. This line shall be used by DOs charged with responsibility to settle the accounts of predecessor DOs as prescribed in Chapter 22 of this volume. Enter the combined Month-to-Date column totals from lines 9.2A and 9.2B of the final DD Form 2657 for the reporting period.

2. Line 9.3: Losses of Funds. This line shall be used by DOs charged with responsibility to settle the accounts of predecessor DOs as prescribed in Chapter 22 of this volume. Enter the Month-to-Date column total from line 9.3 of the final DD Form 2657 for the reporting period.

3. Line 9.4: Other Accountability. This line shall be used by DOs charged with responsibility to settle the accounts of predecessor DOs as prescribed in Chapter 22 of this volume. Enter Month-to-Date column total from line 9.4 of the final DD Form 2657 for the reporting period.

4. Line 10.0: Total Predecessor Officers' Accountability. This line shall be used by DOs charged with responsibility to settle the accounts of predecessor DOs as prescribed in Chapter 22 of this volume. Enter the total of lines 9.2 through 9.4. This total shall agree with the Month-to-Date column total from line 10.0 of the final DD Form 2657 for the reporting period.

5. Line 11.0: Total Disbursing Office Accountability. Enter the total of lines 8.0 and 10.0. This total must be equal to the amount entered in Part A on line 5.0, and must also equal the Month-to-Date column total from line 11 of the final DD Form 2657 for the reporting period.

190504. Certification. Type the name and telephone number (both commercial (including area code) and DSN) of the person to be contacted should any questions arise regarding the SF 1219. The DO or, during periods of authorized absence of the DO, the authorized deputy DO, shall sign the certification in the space provided. The signature of the DO or deputy shall be in the same form as used for signing Treasury checks. The date of submission shall be typed in the space provided. In the case of a DO being relieved from disbursing duty, the relieving DO shall certify the receipt of accountability at the bottom of the SF 1219 as prescribed in Chapter 2 of this volume. Figure 19-5 is provided as an example of a properly prepared SF 1219.

190505. Air Force Merged Accountability and Fund Reporting System (MAFR) Balancing. Air Force DOs are required to add the following lines in the bottom margin of the SF 1219 to facilitate balancing of the MAFR system.

A. Line 4.11 - Gross Disbursements. Enter the cumulative amount from line 4.1A of the last DD Form 2657 prepared for the accounting period (month). If line 4.1A is not used, enter the amount from line 4.1C of the DD Form 2657.

B. Line 4.12 - Refunds. Enter the cumulative amount from line 4.1B of the last DD Form 2657 prepared for the accounting period (month). If line 4.1B is not used, enter zero.

C. Line 4.13 - Receipts. Enter the cumulative amount from line 4.1D of the last DD Form 2657 prepared for the accounting period (month).

D. Line 4.14 - Reimbursements. Enter the cumulative amount from line 4.1E of the last DD Form 2657 prepared for the accounting period (month).

E. Line 4.15 - Total Collections. Enter the total of the amounts included in lines 4.12, 4.13, and 4.14 above.

190506. Section II - Summary by Symbol of Check and Deposit Transactions with U.S. Treasury

A. Part A - Checks Issued and Adjustments for Prior Periods. The detailed information required to be reported in this part is indicated by the columnar headings. The information shall be shown for the DSSN under which there were checks issued or check issue adjustment transactions in the current reporting period. The amounts reported in the respective columns must agree with amounts reported on the SF 1179 for the same reporting period.

1. Column (1) - Check Symbol. Enter the DSSN covered by the SF 1219.

2. Column (2) - Amount of Checks Issued this Period. Enter the total amount of all Treasury checks issued during the current reporting period. Check issue adjustments accomplished using OFs 1017-G applicable to checks issued during the current reporting period (after such checks have been reported as check issues to the Treasury Department) shall be included in the total shown in this column. If overdrafts or underdrafts are discovered before level 8 check issue reporting for those same checks is made, the level 8 report is changed (i.e., without a check issue adjustment). In the case of an overdraft, an accountability-balancing increase to line 7.2A of the DD Form 2657 would be made. In the case of an underdraft, another check would be issued and recorded in the normal manner, and both check numbers cited on the disbursement voucher. The amount entered in this column must agree with the amount reported on line 1 of the summary portion of the SF 1179. Do not enter limited depositary account check issues in this column.

3. Column (3) - Adjustments for Prior Months' Issues by FMS Form 5206. Enter the issue month and year and the amount of each adjustment applicable to checks issued in prior periods and documented by FMS Forms 5206. Entries in this column can include check issue adjustments for checks issued and reported under level 8 check issue reporting in the same reporting period (month). The total of this column must equal the amount shown on line 2(a) in the summary portion of the SF 1179.

4. Column (4) - Adjustments for Prior Months' Issues by Other than FMS Form 5206. Enter the issue month and year and the amount of each adjustment applicable to checks issued in prior periods initiated locally by the DO on OFs 1071-G to correct a difference for which a FMS Form 5206 has not been received. Entries in this column can include check issue adjustments for checks issued and reported under level 8 check issue reporting in the same reporting period (month). The total of this column must equal the amount shown on line 2(b) in the summary portion of the SF 1179.

5. Column (5) - Total Checks Issued. Enter the amount of column (2), plus or minus the amounts entered in columns (3) and (4). The total reported in column (5) must be the amount reported in on line 2.1 of Section I, Part A on the face of the SF 1219. This amount must also be the same amount reported on line 3 in the summary portion of the SF 1179.

B. Part B - Summary of Deposits Presented or Mailed to Bank. In this part, an analysis shall be shown by DSSN of the deposits (SF 215) and debit vouchers (SF 5515) that have been taken up in the accounts of the DO during the current reporting period. The information required to be reported is indicated by the columnar headings.

1. Column (1) - Deposit Symbol. Enter the DSSN under which deposits were made.

2. Column (2) - Deposits Presented or Mailed to Bank This Month. Enter the total of all SFs 215 presented or mailed to the FRB or general depository during the current reporting period (month) regardless of whether the deposits have been confirmed by the depository. Include any SFs 5515 that are accounted for by the depository (block 2 of the SF 5515) during the same period for which the SF 1219 is being prepared. An SF 5515 reduces total deposits. Note that if deposits presented or mailed to a depository during the first few days of the month are physically dated in the previous month, they shall be excluded from this column and included in columns (3) and (4).

3. Columns (3) and (4) - Deposits Presented or Mailed to Bank in Prior Months but Recorded in Accounts this Month. Enter in column (3) the month and year of presentation or mailing of all SFs 215 and SFs 5515 taken into the accounts during the current month with a presentation or mailing date (block 2 of the forms) in any prior month. Enter in column (4) the total amount of the deposits less the debit vouchers. If more than 1 prior month is involved in the total of such deposits reported, each month and year shall be shown in column (3) and separate totals for each month shown in column (4).

4. Column (5) - Total Deposits Presented or Mailed to Bank. Enter the total of columns (2) and (4). This amount must agree with the amount shown on line 4.2 in Section I, Part A on the face of the SF 1219.

190507. Erroneous Statements of Accountability. DOs shall not submit corrected or amended SFs 1219 under any circumstances. If adjustment action is necessary, the adjustment shall be made on the succeeding month's SF 1219. In instances when a final SF 1219 has been submitted because of deactivation of a disbursing office and subsequent adjustments are found to be necessary, a supplemental SF 1219 shall be submitted showing such adjustments. The adjustment entries shall be explained in detail by supporting documentation attached to SF 1219.

★1906 CASH FORECASTING REQUIREMENTS

In order for the Treasury Department's FMS to manage the Government's daily cash position, DoD disbursing officers are required to provide notice to FMS regarding large deposits, large disbursements by check or EFT, payments of military pay and military retired pay EFT, and payments to vendors by EFT in advance of the transaction settlement date. Reporting of cash forecasting information is critical for the maintenance of accurate, up-to-date cash flow projections, and for the daily management of the Treasury Department's operating cash balances. Likewise, reporting of cash forecasting information for EFT payments of military pay and military retired pay and EFT payments to vendors is essential to the effective and efficient management of the Treasury Department's operating cash balances. Reporting procedures prescribed in Chapters 5, 7, 11, and 24 of this volume will standardize the information being provided by the DFAS Centers and other DoD Component installations.

 Disbursements and Collections

CHAPTER 20

ASSEMBLY AND TRANSMITTAL OF FINANCIAL REPORTS2001 GENERAL

★ 200101. Purpose. Every DO shall submit financial reports. The reports make up the formal accounting to the United States for all public funds received and spent. They are the basis for the official audit and settlement of accounts by the General Accounting Office. Also, the DO's financial reports provide the data from which DoD maintains its administrative accounting controls. All documents comprising the financial accounts should be shipped through the U.S. Postal Service (USPS) mail system (use of registered or certified mail is not required). However, Directors of servicing DFAS Centers (or DFAS Operating Location (OPLOC)) may direct/authorize specific DOs to use alternate private express or air express carriers to ensure that financial accounts arrive at the Center (or OPLOC) within the required timeframe when the USPS is unable to ensure timely delivery. Regardless of the method of shipment, the financial accounts shall be shipped under a covering DD Form 2666 (Transmittal of Statements and Vouchers). The vouchers section of the DD Form 2666 is designed to accommodate a disbursing office using a single series of voucher numbers for all transactions as well as a disbursing office using a separate series of voucher numbers for each type of transaction. An example of DD Form 2666 is shown as figure 20-1.

200102. Accounting Period. DO financial reports shall be submitted on a calendar month basis (i.e., the first day through the last day of a month) except for months during which accountability begins or ends on other than the first or last day of the month. For a new disbursing office, the accounting period shall begin on the 1st day official business is transacted. When one DO relieves another, the accounting period for the relieved officer shall end on the date of relief and the accounting period for the relieving officer shall normally begin on the date of relief. However, if the relieving officer effects no disbursing transactions on the date of relief, (other than receipt of funds from the officer relieved), the beginning of the accounting period may be shown as the day following the date of relief. For the above exceptions, the first day of the accounting period shall coincide with the date of commencement of disbursing duty notification forwarded as required by Chapter 2 of this volume. For any month during which accountability ends because of deactivation of a disbursing office, the financial reports shall be submitted from the 1st day of the month through the date of deactivation. An accounting period shall never extend beyond the end of a calendar month. Whenever possible, relief or deactivation should be effected on the last day of a month to prevent the necessity for submission of an additional set of financial reports for that month.

200103. Distribution of Transportation Vouchers

A. Government Travel System (GTS). Transportation services purchased with contractor-issued charge cards are not subject to the GSA post-payment audit requirements

of 41 C.F.R. 101-47.807. Passenger ticketing information is furnished directly by the GTS contractor to GSA. Original GTS contractor payment vouchers and supporting documents are submitted to the servicing DFAS Center (or OPLOC) as prescribed in the following sections.

B. Non-GTS Payments for Transportation Services. Payments to contract carrier Scheduled Airlines Ticket Office (SATO) or Commercial Travel Offices (CTO) are subject to the requirements of 41 C.F.R. 101-41.807. Submit one copy of the voucher marked "Original to GSA" in the original voucher package to the servicing DFAS Center (or OPLOC). Also, attach a copy to the DD Form 2666 and include with the voucher package.

C. Original Vouchers for Transportation Furnished by Foreign Carriers within Overseas Areas. Send original transportation vouchers supported by international English-language bills to GSA. Submit one copy of each voucher forwarded to GSA in the original voucher submission to the servicing DFAS Center (or OPLOC). Mark each copy "Original to GSA." Original transportation vouchers other than those supported by international English-language bills are retained for on-site audit by authority of GSA. Submit one copy, of each voucher retained, in the original voucher submission to the servicing DFAS Center (or OPLOC). Mark each copy "Original Retained for Audit."

200104. Use and Distribution of Financial Reports by the DFAS Centers. The applicable DFAS Center (or OPLOC) shall make an administrative examination of the financial reports. Upon completion of the examination, the DFAS Center (or OPLOC) shall distribute and retain the documents as required. Original financial reports (Statement of Accountability (SF 1219) disbursement vouchers, collection vouchers, etc.) must be maintained for the statutory six-year period. These original records will be used as needed for audit and reconciliation purposes. The original records may be retained at the DFAS Center (or OPLOC) or forwarded to the nearest Federal Records Center for retention as appropriate based on storage availability at the DFAS Center (or OPLOC). After the six-year retention period, the original records will be destroyed.

2002 SUBMISSION TO DFAS-INDIANAPOLIS CENTER

200201. General. All DOs assigned to activities using DSSNs obtained from the Army shall submit their financial reports to DFAS-Indianapolis Center as prescribed in this section.

200202. Daily

A. Integrated Disbursing and Accounting Offices. The DO's disbursing division shall route the original and appropriate number of copies of all collection and disbursement vouchers, together with the DD Form 2657, to the accounting division (accounting and reconciliation branch) for subsequent processing. To avoid the preparation of several additional copies, it is advisable to prepare separate vouchers for each fiscal station when charges and

credits to allotments maintained by other fiscal stations are involved. DOs shall take extra precaution to ensure that all copies prepared for distribution are completely legible.

B. Non-integrated Disbursing and Accounting Offices. The original collection and disbursement vouchers shall be forwarded with the DD Form 2657 to the appropriate accounting office as soon as possible after the close of the business day. The duplicate copy shall be kept by the disbursing office. To avoid the preparation of several additional copies, it is advisable to prepare separate vouchers for each fiscal station when charges and credits to allotments maintained by other fiscal stations are involved. DOs shall take extra precaution to ensure that all copies prepared for distribution are completely legible.

★ 200203. Monthly. The following documents shall be submitted to support the SF 1219: a copy of the SF 1179 for the reporting period; a copy of each FMS Form 5206 reported in Section II, Part A of the SF 1219; the original of each OF 1017-G reported in Section II, Part A of the SF 1219; the memorandum copy of all SFs 215 presented or mailed to the depository during the reporting period and included in the amount reported on line 4.2 in Section I, Part A and in Section II, Part B of the SF 1219; the confirmed copy of all SFs 5515 included in the amount reported on line 4.2 in Section I, Part A and in Section II, Part B of the SF 1219; the original of all collection, disbursement, or adjustment vouchers, including SFs 1098, 1080, and 1081; the original SF 1149 for those DOs who draw checks on LDAs; and, the original and one copy of the schedule of foreign currency holdings, MPC, and U.S. dollars. Note: If the confirmed copy of an SF 215 is received from the depository in the same month in which presented, the confirmed copy shall be used to support the SF 1219. The data on the SF 1219 shall be transmitted to the DFAS-Indianapolis Center not later than three calendar days after the close of the accounting period. The SF 1219 and all supporting documents for an accounting period shall be forwarded to the DFAS-Indianapolis Center within 10 calendar days after the end of the month, or within 10 calendar days after the date a DO is relieved from disbursing duty. It also is mandatory that the SF 1219 and supporting documents be forwarded on the date shown opposite the signature of the submitting DO on the face of the SF 1219. Dates shown in post office cancellation stamps or carriers' receipts for private express or air express shipments shall be considered prima facie evidence of compliance or non-compliance with the shipping requirements. A DO who is delinquent in submitting accounts shall send a letter with the delayed accounts stating the specific reasons for the delay.

★ 200204. Shipment of Accounts. Documents comprising the accounts of disbursing officers shall be shipped under a covering DD Form 2666 (Transmittal of Statements and Vouchers). Shipments should be made through the U. S. Postal Service mail service unless otherwise directed/authorized in accordance with paragraph 200101, above. The use of registered or certified mail for the shipment of financial reports/records is not required. All shipments shall bear outside markings attesting to the number of packages in the shipment. Documents shall be packed in such a manner as to assure arrival in good condition and the size of each package should be limited to that convenient for handling. The outside of each package shall show the first and last voucher number contained therein. Each series of vouchers is to be bundled separately in sequential order, each bundle including all vouchers for the accounting period.

Documents submitted as a part of the financial accounts which are not specifically included in the Forms or Vouchers section of the transmittal shall be listed in the spaces provided in the Forms section. In the Vouchers section, the specific types of vouchers (e.g., Reserve Component payrolls, contract and other commercial payments, civilian payrolls and travel advances) shall be listed under the Type of Transaction column and will be keyed to the voucher number series assigned.

200205. Delayed Submission of Voucher Supporting Documents. In instances when voucher attachments are to be forwarded to the DFAS-Indianapolis Center for association with original vouchers previously submitted, a rubber stamp (or typed legend) shall be affixed to each attachment in the upper right corner of the document and any pertinent data properly shown. The following information shall be shown in the legend: "Attach to Voucher No._____, Account of_____, Month of_____, DSSN_____."

2003 SUBMISSION TO DFAS-DENVER CENTER

★ 200301. General. All DOs assigned to activities using DSSNs obtained from the Air Force or the Denver Center shall submit their financial reports to DFAS Denver Center as prescribed in this section. However, DSSNs assigned to a multiservice operating location will submit vouchers as directed by the host DFAS Center.

200302. Daily. Original collection and disbursement vouchers are used to prepare DD Form 2657. Sort the vouchers by appropriation or fund within the following categories for preparing DD Form 2657: receipts (collections and decrease adjustments to general, special, and trust fund receipt accounts); reimbursements (collections and repayments of appropriation reimbursements, and collections of deposit fund accounts, including adjustments which increase or decrease collections); and, net disbursements (disbursements and appropriation refunds). After verification, send the duplicate DD Form 2657 to accounts control. Resort the original vouchers into numerical sequence by functional area. All collection vouchers shall precede disbursement vouchers. Do not intermingle disbursement and collection vouchers. Place the original vouchers in sequence in vaults or safes if space permits. While the vouchers are stored they may be removed to make corrections or add supporting documents. Do not change the accounting classification or amount on any original for-others vouchers if the accountable station copy has been mailed. If a correction is made on a voucher, correct or adjust all voucher copies and all records affected. To ensure this is done, reverify all posting for the date of the voucher. The reverification may be confined to the appropriations involved, however, recheck all transactions for those appropriations in all fund and cash records. Since a lost original voucher could result in a DO loss of funds, access to these vouchers shall be controlled. The DO is responsible for adopting receipt-type controls that will assure no vouchers are lost and that all vouchers are returned in time for shipment to the DFAS-Denver Center or other designated locations. Vouchers shall be prepared in the number of copies needed for distribution prescribed for the type of transaction. At a minimum, prepare two copies of each voucher. A duplicate copy of each voucher shall be returned to the applicable functional area to record and support entries in the appropriate accounting records. The functional area will retain disbursement/collection

voucher copies for the current and one prior fiscal year. Additional copies are furnished to other functional areas when the type of voucher transaction involves those areas.

200303. Monthly

★ A. SF 1219, Statement of Accountability. Each DO shall prepare an SF 1219 in an original and two copies for each accounting period. The SF 1219 is submitted as an integral part of the Air Force RCS:HAF-ACF(M)7113 Report. The original and duplicate are forwarded to accounts control for transmission to DFAS-Denver Center. The original SF 1219 and supporting schedules and papers are forwarded to DFAS-Denver Center on the date shown opposite the signature of the DO in the certificate on the face of the SF 1219. Do not hold for shipment on a later date unless the SF 1219 in question is a final report. Reports for DOs relieved before the end of month are submitted at the end of the month with the reports of the successor. Failure to comply with submission requirements causes the DO to be declared delinquent in the submission of accounts. The above submission requirements govern without exception and apply whether the end of the accounting period falls on the last day of the month or before and pertain to all DOs. In addition to the certification date of the SF 1219, the DFAS-Denver Center considers dates shown in post office cancellation stamps and in carrier's receipts for railway express and air express shipments, as prima facie evidence of compliance or non-compliance with the forwarding requirements. Each DO delinquent in rendering accounts shall send a letter with the belated account stating specifically the reasons for the delay in submission.

★ B. Vouchers Nonconsolidated Defense Accounting Offices (DAOs), Financial Services Offices (FSOs), and National Guard activities shall remove all original vouchers from storage at the end of each month for submission to the DFAS Denver Center. The operating locations shall keep their original vouchers for one year, and at the end of year, remove the vouchers from storage for submission to the Denver Federal Records Center. Before packaging, all activities shall inventory the vouchers to ensure: (1) no vouchers are missing; (2) unused and duplicate voucher numbers are accounted for; (3) agent vouchers are cross-referenced; and (4) vouchers are in numerical sequence by functional area. When the documents are shipped, all collection vouchers shall precede disbursement vouchers. Foreign Military Sales (FMS) vouchers must be segregated from the rest of the vouchers.

★ C. Shipment of Documents. The original vouchers shall be shipped by U.S. Postal Services mail, unless otherwise directed/authorized in accordance with paragraph 200101, above. The use of registered or certified mail for the shipment of financial reports/records is not required. All documents comprising financial accounts shall be shipped under a covering DD Form 2666. Documents which are not specifically included in the forms or vouchers section of the transmittal shall be listed in the spaces provided in the forms section. In the vouchers section, list the specific type of vouchers (e.g., military pay, civilian pay, vendor pay, travel pay, etc.) by functional area in the type of transaction column. The vouchers sent to the Denver Center should be sent by the sixth workday following the month being reported. The vouchers sent to the Denver Federal Records Center should be sent within the month after the one year the vouchers have been kept at the Operating Location.

D. Delayed Submission of Supporting Documents. This section applies to nonconsolidated DAOs, FSOs, and National Guard Activities only. Mail to the Denver Center any documents (certificates, advice of collections, purchase orders, etc.) which support vouchers or SFs 1219 previously shipped to DFAS Denver. Place a rubber stamp imprint and date forwarded to DFAS Denver on the face of each document and on the face of the retained copy. Prepare a separate cover sheet for each showing the following information: "Attach to voucher no: (voucher number); Month:_____; DSSN ____; Date forwarded to DFAS Denver:_____." Note: if a document is to support the SF 1219 instead of a voucher, modify voucher number to read "SF 1219."

2004 SUBMISSION TO DFAS-KANSAS CITY CENTER

200401. General. All DOs assigned to activities using DSSNs obtained from the Marine Corps shall submit their financial reports to DFAS-Kansas City Center as prescribed in this section.

200402. Daily. At the end of each business day, the DD Form 2657 is prepared using the collection and disbursement vouchers processed that day. After completion and balancing of DD Form 2657, the financial information is electronically transmitted to DFAS-Kansas City Center. The original vouchers and documents are stored in the vault or safe until the end of the month.

200403. Monthly. The DFAS-Kansas City Center shall receive all financial reports by the close of business on the second working day of each month. Consolidated financial reports for the Marine Corps shall be forwarded to the DFAS-Kansas City Center for incorporation into the Department of the Navy reports. In an effort to accelerate transmission of data to the DFAS-Kansas City Center, the Marine Corps Data Network (MCDN) shall be used for transmitting financial data by bulk transfer. Closeouts shall be conducted on the last business day of the month. This requires close coordination between disbursing, data processing officers, and commanders to ensure the timely transmission of DO financial reports within established timeframes. The distribution of original documents and required copies comprising the financial reports is shown in table 20-1. In addition, deployed DOs shall submit a message report on the first workday following the end of the reporting period to summarize the disbursement and collection transactions for the month. If operation MINIMIZE on message traffic is in effect, the report shall take precedence over MINIMIZE and shall be transmitted as required.

A. Relief of DO. When a change in DOs is effected on other than the last day of a month, the message report shall be submitted as prescribed in the following subparagraphs.

1. The relieved DO shall render the message report no later than the first workday following the date of relief. The report shall include all transactions for which the relieved DO is accountable from the first day of the reporting period through the date of relief.

The report shall also contain a statement identifying the relieving DO and that the relieving DO will submit a further report at the end of the reporting period.

2. The relieving DO shall render the message report on the first workday following the end of the reporting period. The report shall include only the transactions from the date disbursing duty commenced through the end of the reporting period. The report shall contain a statement identifying the DO relieved and that the relieved DO reported partial month transactions that are not included in the instant report.

B. Preparation of Message Report

1. Disbursements and Collections. The message report is entitled "DISBURSEMENTS AND COLLECTIONS" and is the basis for reporting to the Treasury Department the net of disbursements by appropriation and subhead (if any). Transactions shall be reported by category code, appropriation and subhead (if any), and if appropriate, by program element/budget project and/or reimbursement source code, and amount (do not round off). Category codes for this purpose are shown below. The net total of category codes 1 through 4 must equal the total net disbursements reported for line 4.1 of the message and the amount reported on line 4.1 of Section I, Part A, of the hard copy SF 1219.

Code	Category
1	travel vouchers
2	civilian rolls
3	military rolls
4	all other vouchers

C. Report Format. At least three spaces shall separate each column (or sub-column) in the body of the message. The report shall be submitted in a format similar to that shown by figure 20-2.

D. Assembly of Advance Reports. Copies of collection and disbursement vouchers and military payrolls required to be submitted with the advance financial reports shall be filed in separate folders (annotated to indicate contents) by groups, as follows: Army and Air Force disbursement vouchers and military payrolls; Navy appropriations, transaction type codes for stores or plant property; collection vouchers; and, all other types of vouchers.

E. Assembly of Original Documents. DOs shall submit original vouchers and payrolls in numerical sequence by groups as follows: collection vouchers; travel vouchers; civilian payrolls; military payrolls; and, all other vouchers.

F. Packaging. Place copies of documents and vouchers in separate folders from the originals when packaging the original and advance returns. The SF 1219 and supporting schedules and reports shall be attached securely and placed in separate folders from

the vouchers, payrolls, and pay receipts. Individual cash receipts shall not be fastened to payrolls but shall be placed in envelopes which shall be annotated to reflect the contents with appropriate identifying information. Each folder shall be briefed to show a descriptive notation as to the type of vouchers, the name and rate/rank of the DO, DSSN, and the accounting period.

★ G. Mailing. Mail advance reports by the second workday of the month following the end of the accounting period. Mail the original reports as soon as possible, but no later than the fifth workday of the month following the accounting period. All documents comprising the financial accounts shall be shipped under a covering DD Form 2666. They should be shipped through the U.S. Postal Service mail system unless otherwise directed/authorized in accordance with paragraph 200101, above. The use of registered or certified mail for the shipment of financial reports/records is not required. Documents submitted as a part of the financial accounts which are not specifically included in the Forms or Vouchers section of the transmittal (e.g., schedule of deposit activity, foreign currency report, civilian payroll certification sheets, payrolls, etc.) shall be listed in the spaces provided in the Forms section. In the Vouchers section, list the inclusive disbursement and collection vouchers numbers.

200404. Transmittal of Subsequent Information and Outstanding Vouchers. Vouchers or explanation in voucher form required to complete an account, which were not available when original reports were forwarded, shall be forwarded as soon as possible. Each voucher or explanation shall be forwarded with a cover sheet containing a brief description of the document or explanation. The voucher number; date; DO's name; DSSN; and, accounting period to which it pertains shall be identified on each document or explanation forwarded.

2005 SUBMISSION TO DFAS-CLEVELAND CENTER THROUGH A DESIGNATED DFAS OPERATING LOCATION

★ 200501. General. DOs assigned to activities using DSSNs obtained from the Navy shall submit their financial reports directly to DFAS-Cleveland Center or through a designated operating location (OPLOC) as prescribed in the following paragraphs.

★ 200502. Submission of Vouchers on a Daily Basis. Non-tactical DOs in the continental United States and in Hawaii shall submit financial reports daily to the Central Reporting Office, DFAS-Cleveland Center, through the Defense Financial Reporting and Reconciliation System (DFFRS).

200503. Reports Rendered Daily. The DD Form 2657 shall be prepared in duplicate as prescribed in Chapter 19 of this volume as a summary of all daily transactions and a report of balances at the end of each business day. The original shall be certified by the DO. The DD Form 2657 and original vouchers with supporting documents (public vouchers, military and civilian payrolls, collection vouchers, etc.) shall be delivered to the OPLOC by hand or placed in the mail not later than the first working day following the date on which the transactions occurred. The DD Form 2657 and supporting documents shall not be accumulated for several

days for forwarding at one time. However, it is not necessary to prepare DD Form 2657 for days on which there are no transactions. On the first DD Form 2657 prepared following the day(s) on which no transactions occurred, the notation "No business on (dates)" shall be indicated at the top of the form. On the last business day of an accounting period, a complete DD Form 2657 shall be prepared and submitted. The last DD Form 2657 for the month shall be marked "FINAL DD Form 2657 FOR MONTH OF (insert month)." Table 20-2 is provided to show the daily distribution and transmittal of documents to the OPLOC. Each daily DD Form 2657 and all supporting documents shall be shipped under a covering DD Form 2666. Documents submitted as a part of the daily financial reports which are not specifically included in the Forms or Vouchers section of the transmittal (e.g., the DD Form 2657, payroll numbers, payroll certification sheets, etc.) shall be listed in the spaces provided in the Forms section. In the Vouchers section, list the inclusive disbursement and collection vouchers numbers.

200504. Reports Rendered Monthly. All DOs shall forward monthly financial reports on the first workday following the close of the accounting period. Reports which have been completed on the first workday after the close of the accounting period shall not be considered late or delinquent if a delay is caused by the lack or inadequacy of postal or shipping facilities. If the reports are not completed on the first workday after the close of the period, a written explanation of the delay shall be furnished with the reports.

A. By DOs Required to Submit Daily Reports. All reports and supporting documents required to be rendered monthly as indicated in table 20-2 shall be delivered by hand or placed in the mail not later than the first working day following the close of the accounting period. If the end of the month reports are mailed, they shall be mailed so as to be postmarked not later than the first working day of the succeeding month rather than merely placed in station mail channels by that date. If the DO encounters any delay in transmitting month-end reports, the DO shall telephone the OPLOCs to advise of the delay. Arrangements should then be made to ensure inclusion of the DO's transactions in the OPLOC's reports. All documents comprising the month-end reports shall be shipped under a covering DD Form 2666. Documents which are not specifically included in the Forms or Vouchers section of the transmittal (e.g., the DD Form 2657 for the last business day of the month, payroll numbers, schedule of deposit activity, foreign currency report, civilian payroll certification sheets, etc.) will be listed in the spaces provided in the Forms section. In the Vouchers section, list the disbursement and collection voucher numbers.

1. SF 1219, Statement of Accountability. Except as provided herein, the DO shall prepare and certify the SF 1219 in the manner prescribed in Chapter 19 of this volume. The SF 1219 shall be prepared in triplicate. The words "For inclusion in the consolidated account of (insert name of OPLOC and OPLOC DSSN)" shall be inserted in the upper right corner. The original and one copy shall be forwarded to the OPLOC and one copy shall be retained by the DO.

2. Check Issue Reports. The check issue reports of DOs shall be submitted as prescribed in Chapter 9 of this volume based on the type of submission capabilities

available to the DO (level 8 magnetic tape directly to the Treasury Department; diskette to the OPLOC for conversion to tape; or, paper to the OPLOC for conversion to tape).

3. Navy Working Capital Fund Summary Schedules. DOs at industrial-commercial activities shall prepare a summary schedule of disbursements and a summary schedule of collections for the Navy Working Capital Fund account of the activity. The summary schedules shall be prepared on letterhead. In preparing the summary schedules, only the beginning and ending Navy Working Capital Fund voucher or collection document numbers and total amount shall be shown. Listing of individual vouchers and names of payees and remitters is not required. The summary schedule of collections shall include all collection documents covering credits to the Navy Working Capital Fund account of the activity including SFs 1096 and 1098. A recapitulation shall be made on the summary schedule of collections to show amounts received by voucher deductions, canceled checks, and other collections. The original and one copy of each consolidated schedule shall be forwarded to the OPLOC with the SF 1219 and disbursement and collection vouchers.

B. By DOs Assigned to Naval Vessels and Tactical Units

1. General. All DOs assigned to Naval vessels and tactical units shall submit financial reports on a monthly basis to the DFAS OPLOCs at Norfolk, VA or San Diego, CA (based on home port of the vessel or unit). The distribution and packaging of required documents comprising the monthly financial reports of DOs (except those DOs required to submit financial reports on a daily basis) are shown in table 20-3. All documents comprising the financial accounts shall be shipped under a covering DD Form 2666. Documents submitted which are not specifically included in the Forms or Vouchers section of the transmittal (e.g., schedule of deposit activity, foreign currency report, civilian payroll certification sheets, and payroll numbers) will be listed in the spaces provided in the Forms section. In the Vouchers section, list the disbursement and collection voucher numbers.

2. Assembly

a. General. Separate and package the documents as prescribed in the distribution directions shown in table 20-3. In preparing the reports for forwarding, documents shall be grouped, unfolded and flat, and arranged in packages as indicated below. Each package shall be numbered serially and appropriately labeled as to contents. Packaging material may be any of the following or their equivalent, dependent on the number of documents to be included in each package: heavy envelopes; folders (envelopes or wallet type); or cardboard backings with the package tied together with cord or tape.

b. Original Documents (Package No. 1). This package shall contain the original and 1 copy of the SF 1219 and supporting documents (pay receipts shall be packaged separately). The SF 1219 and supporting documents shall be grouped in the following sequence: SF 1219; SFs 215 and 5515; collection vouchers; Navy payrolls and money lists; Marine Corps payrolls and money lists; disbursement vouchers; SF 1179; foreign currency

certificates (see Chapter 13 of this volume); civilian payroll certification sheets; and, civilian labor roll summary. All collection and disbursement vouchers shall be grouped by each type with separate adding machine tapes. Within each group, the vouchers shall be arranged in numerical sequence by voucher number. Tapes for collections and disbursements shall be prepared and the totals shall be verified with the SF 1219 to ensure the completeness of the package. The tapes shall be marked and attached to the original SF 1219.

c. Copies (Package No. 2). A separate package shall be used for copies of documents as shown in table 20-3.

d. Civilian Pay Receipt Packages. Pay receipts shall be arranged in order of their appearance on the civilian payroll, and shall be packed in a separate package appropriately identified for each civilian payroll.

3. Packing. The DO financial reports shall be packed in a manner consistent with their bulk and the conditions under which shipment is made. When practicable, the reports shall be forwarded in one parcel or box. Heavy cardboard boxes provide ample protection and shall be used except when the additional protection of wooden boxes may be required on shipments from overseas or if rough handling of the boxes in transit may be expected. If reports are forwarded in several boxes, each shall be assigned a number and marked to indicate the number of boxes shipped and the number of the box, such as "No. 1 of 3." Each parcel or box shall be marked in the upper left corner with the name of the DO, DSSN, station, and department concerned. Under this information shall be shown "Financial reports for (insert month and year)."

4. Shipment. When not in excess of weight and size limitations imposed by the U.S. Postal Service, reports may be forwarded by mail. DOs submitting reports to an OPLOC shall forward reports by this method unless it has been proven unreliable or unduly slow in the past. In the upper left corner, under the return address, all mailing covers shall bear the printed statement "Official Business." To avoid customs inspection delays, reports from overseas and deployed DOs shall have the following information prominently displayed on the outer wrapper of the reports: "Government Financial Reports Due in (insert city, state) by (insert date). Please Expedite." The use of registered or certified mail for the transmittal of financial reports is not required. When the U.S. Postal Service cannot be employed, due to size or weight limitations imposed, other transportation media may be employed as prescribed in the Naval Supply Systems Command Manual.

5. Submission of Financial Reports to the Navy Supply Corps School. Annually, DOs assigned to Naval vessels shall submit a copy of the SF 1219 and SF 1179 prepared to cover the accounting period ending 30 September to the Navy Supply Corps School (424), Athens, GA 30601.

200505. Transmittal of Subsequent Information and Outstanding Vouchers. Vouchers or explanation in voucher form required to complete an account, which were not

available when original reports were forwarded, shall be forwarded as soon as possible. Each voucher or explanation shall be forwarded with a cover sheet containing a brief description of the document or explanation. The voucher number, date, DO's name, DSSN, and accounting period to which it pertains shall be identified on each document or explanation forwarded.

200506. Special Accountability Reports

A. General. All DOs assigned to Naval vessels, tactical units, and, overseas non-tactical disbursing offices who submit financial reports to the DFAS-Cleveland Center through OPLOCs Norfolk or San Diego shall submit a message report SF 1219 and schedule of disbursements and collections as prescribed herein. Negative reports are required. The message report shall be submitted on the first workday following the end of the reporting period. If operation MINIMIZE on message traffic is in effect, the report shall take precedence over MINIMIZE and shall be transmitted as required.

B. Relief of DO. When a change in DOs is effected on other than the last day of a month, the message report shall be submitted as prescribed in the following subparagraphs.

1. The relieved DO shall render the message report no later than the first workday following the date of relief. The report shall include all transactions for which the relieved DO is accountable from the first day of the reporting period through the date of relief. The report shall also contain a statement identifying the relieving DO and that the relieving DO will submit a further report at the end of the reporting period.

2. The relieving DO shall render the message report on the first workday following the end of the reporting period. The report shall include only the accountability assumed from the relieved DO and the transactions from the date disbursing duty commenced through the end of the reporting period. The report shall contain a statement identifying the DO relieved and that the relieved DO reported partial month transactions that are not included in the instant report.

C. DO Temporarily Ceases to Transact Business. Under certain circumstances such as overhaul or emergency repairs, DOs assigned to Naval vessels may be required to discontinue temporarily the processing of disbursement and collection transactions. Generally, the DO shall make arrangements for a nearby non-tactical DO to process these transactions (including payrolls) during the overhaul or repair period. This action does not close the DSSN and the DO shall continue to prepare and submit all required reports including the message report. When a DO temporarily ceases to transact business, but does not close the disbursing account, the message report shall be submitted as prescribed in the following subparagraphs.

1. Immediately upon transfer of disbursement and collection transaction responsibility to a non-tactical DO, the transferring DO shall submit the disbursements and collections portion of the message to report all disbursement and collection

transactions performed from the first day of the reporting period through the date of transfer. The report shall identify the period for which the report is made. The report shall also identify the DSSN of the disbursing office to which the work is transferred and include an estimate as to when processing of disbursement and collection transactions is anticipated to resume.

2. On the first workday following the end of the reporting period during which the responsibility for disbursement and collection transactions is transferred, the DO shall prepare the Statement of Accountability portion of the report in the usual manner. The disbursements and collections portion of the report shall be negative and shall contain a statement referencing the message report submitted in compliance with the preceding subparagraph.

3. For each succeeding month until disbursing operations are resumed, the DO shall continue to submit the message report. The Statement of Accountability portion shall report the DO's accountability to the Treasury Department and the disbursement and collection portion shall be negative.

4. Immediately upon resuming disbursing operations, the DO shall notify the appropriate OPLOC by message of the date operations are resumed and the DSSN of the disbursing office from which the responsibility was retrieved (if different from the initial DSSN to which transferred).

5. Non-tactical DOs who receive or transfer disbursement and collection transaction responsibility as described in the preceding subparagraphs shall immediately notify the appropriate OPLOC by message of the date and DSSN of the disbursing office from or to which the responsibility is received or transferred.

D. Preparation of Message Report SF 1219

1. Statement of Accountability. The portion of the message entitled "STATEMENT OF ACCOUNTABILITY" reports the DO's accountability for the month. After DD Form 173/2 (Joint Message Form) is typed and again immediately after the message has been transmitted, the DO shall review and balance the report to ensure there are no errors and that it agrees with the hard copy SF 1219. Normally the message report is used by the OPLOC as the basis for subsequent reporting to the Treasury Department, therefore once a properly balanced message report has been transmitted, no subsequent changes to the message report are permissible unless specifically authorized by the appropriate OPLOC. The original SF 1219 submitted for the reporting period shall agree with the message report transmitted. If any change (another deposit, disbursement, or collection voucher, etc.) is discovered after a balanced message report has been transmitted, DOs shall not include those changes in the original SF 1219, but shall report them in the next month's financial report. Any lines with zero dollar values shall be omitted. Do not round off any figures.

a. Transactions During Period Affecting Accountability.

Normally, only lines 1.00, 2.1, 4.1, 4.2, and 5.00 (including ending foreign currency balances, if any) from Section I, Part A of the hard copy SF 1219 will be reported. However, lines 2.37 and 4.37 of the hard copy SF 1219 shall be included in the report in all cases where DOs at non-tactical overseas disbursing offices are authorized to use lines 2.37 and 4.37 on the original SF 1219.

b. Analysis of Incumbent Officer's Accountability.

From Section I, Part B of the hard copy SF 1219, report each line number used (including foreign currencies held, if any).

c. Analysis of Predecessor Officer's Accountability.

From the hard copy SF 1219, Section I, Part C, DOs at non-tactical overseas disbursing offices shall report each line number used. DOs assigned to tactical units and Naval vessels shall report only line 11.0 from this section of the SF 1219.

d. Checks Issued and Adjustments for Prior Periods.

From the hard copy SF 1219, Section II, Part A, report detailed data by column number. Adjustment month and year of issue shall be shown as YYMMDD (e.g., issue of May 1993 shall be shown as 930500). Minus amounts of adjustments shall be shown in parentheses (e.g., minus adjustment of \$2.00 shall be shown as (2.00)). The total reported for Column (5) shall equal the amount reported for line 2.1 of the message and the amount reported on line 2.1 of Section I, Part A of the hard copy SF 1219.

e. Deposits Presented or Mailed to Bank.

The message portion of Section II, Part B shall be in columnar form with headings for: deposit ticket or debit voucher (DT/DV); document number (NUMBER); date presented or mailed to bank (DATE PRESENTED/MAILED TO BANK); and, amount (AMOUNT). SFs 215 and SFs 5515 shall be listed without regard to prior month or current month. Each SF 215 shall be listed by identity (DT), document number (block 1 of SF 215), date presented or mailed (block 2 of SF 215), and amount (block 4 of SF 215). Each SF 5515 shall be listed by identity (DV), document number (block 1 of SF 5515), document date (block 2 of SF 5515), and amount (block 4 of SF 5515). Dates shall be shown as YYMMDD (e.g., a deposit presented on January 18, 1993, shall be shown as 930118). Debit amounts shall be shown in parentheses (e.g., a debit voucher for \$250.00 shall be shown as (250.00)). The total of all deposits presented or mailed, minus all debit vouchers shall equal the amount reported for line 4.2 of the message and the amount reported on line 4.2 of Section I, Part A, of the hard copy SF 1219.

2. Disbursements and Collections.

The message report portion entitled "DISBURSEMENTS AND COLLECTIONS" is the basis for reporting to the Treasury Department the net of disbursements by appropriation and subhead (if any). Transactions shall be reported by category code, appropriation and subhead (if any), and if appropriate, by program element/budget project and/or reimbursement source code, and amount. (Note: Do not round off). Category codes for this purpose are shown below. The total of category codes 1, 4, and 6

minus the total of codes 7 and 8 shall equal the total net disbursements reported for line 4.1 of the message and the amount reported on line 4.1 of Section I, Part A, of the hard copy SF 1219.

Code	Category
1	public vouchers
4	military payrolls
6	civilian payrolls (list UIC number on reference line of message report
7	collections not covered under code 8
8	collections from ship's stores deployed in foreign waters (applicable to Naval vessels that have visited or will visit at a foreign port during a tour).

E. Report Format. At least three spaces shall separate each column (or sub-column) in the body of the message. The report shall be submitted in the format shown by figure 20-2.

CHAPTER 21 DISBURSING OFFICE RECORDS

2101 Retained Records

CHAPTER 21

DISBURSING OFFICE RECORDS2101 RETAINED RECORDS

210101. General. Copies of vouchers, books, records, and any other associated papers shall be retained as government property, readily accessible to the DO transmitting financial reports, or to the designated settlement office for a period not less than one year. Unclassified retained records require no special security storage precautions. However, good management demands that the retained records be maintained in good condition and in an orderly fashion. Retained records shall be stored in regular open files or cabinets. Controls shall be in place to ensure that retained records removed from the files are identified as being out of file and that follow-up is required to ensure their return. Retained records shall be destroyed when one year old as provided in Title 8 of U. S. General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)).

A. Tactical Units and Naval Vessels. To facilitate shipment of retained records, DOs of tactical units and Naval vessels shall file retained records in groups as specified below.

1. All public vouchers other than payrolls with supporting documents.
2. All payroll vouchers with supporting documents.
3. All collection vouchers with supporting documents.
4. Checking account records, to include retained records of all checks drawn, SFs 1179, FMS Forms 5206 with related correspondence, and OFs 1017-G with related correspondence.
5. DD Forms 2657.
6. SFs 1149.
7. SFs 1219.
8. Listing of instruments deposited with the quintuplicate (agency)
copy of SFs 215.
9. SFs 1184.
10. SFs 5515.

11. Certificate of revaluation of foreign currency.
12. Quarterly reports on the status of suspense accounts.
13. Other miscellaneous retained disbursing documents.

210102. Disposition of Retained Records

A. Non-tactical Disbursing Offices. As prescribed in Chapter 2 of this volume, retained records (which are less than one year old) shall be transferred to the relieving DO as a part of the relief process. When the records are one year old, the relieving DO shall destroy the retained records as prescribed above. When a disbursing office is being deactivated, the retained records shall be packaged and mailed to the office designated to settle the accounts. When the records are one year old, the designated settlement office will destroy the retained records.

B. Tactical Units and Naval Vessels

1. Detachment With Relief. When a DO of a tactical unit or Naval vessel is relieved from disbursing duty by another DO, the relieving DO shall retain the relieved DO's retained disbursing records of the relieved officer for a period of 90 days from the date of relief. After the 90-day period, the retained records of the relieved officer shall be packaged and forwarded to the servicing DFAS Center (or OPLOC) for retention until the expiration of the one year retention period. If deployed, the retained records shall not be forwarded until the unit or vessel returns to homeport and the 90-day retention requirement is met.

2. Detachment Without Relief. When a DO of a tactical unit or Naval vessel is relieved from disbursing duty due to deactivation of the disbursing office (or when a vessel or unit is decommissioned), the retained disbursing records shall be packaged and forwarded to the servicing DFAS Center (or OPLOC). The DFAS Center (or OPLOC) will destroy the retained records when they are one year old.

CHAPTER 22

SETTLEMENT OF DISBURSING OFFICER ACCOUNTS★2201 OVERVIEW

220101. General. The responsibility for clearing outstanding items in the accounts of a DO who has been relieved from disbursing duty is normally assigned to a designated settlement office. The DO of the designated settlement office (referred to in this chapter as the settlement officer) shall take actions necessary as prescribed in this Volume to resolve discrepancies in a relieved DO's accountability. All correspondence and vouchers initiated by an officer, designated as a settlement officer, shall show the name and DSSN of the accountable officer as well as the date and number of the voucher or account, and shall be signed "By (name of settlement officer), settlement officer for (name and DSSN of accountable officer)."

Normally, the settlement officer is also responsible for other residual disbursing functions such as issuance of stop payment requests and required records research pursuant to claims against the government and clearing of all suspense accounts. In all instances, the relieved DO is responsible for resolving all deficiencies before relief, if possible. If a deficiency exists in the account of a relieved DO and it appears that no action was taken to remove it from the accountability and no relief request is pending, the settlement officer shall initiate collection action against the accountable DO.

A. Non-tactical Disbursing Stations. At non-tactical disbursing stations, settlement duties are normally the responsibility of the relieving DO. When a non-tactical disbursing station is deactivated the supporting DFAS Center will designate another non-tactical disbursing station within the center's cognizance to perform the settlement function if the disbursing operations of the deactivated station are assumed by another disbursing station within that Center's cognizance. When a non-tactical disbursing station under the cognizance of one DFAS Center is deactivated and the disbursing function is assumed by a disbursing station under the cognizance of a different DFAS Center, the settlement function is a shared responsibility of the gaining disbursing station and the losing DFAS Center. This shared responsibility is necessary in order to avoid creating transactions for and by others or cross disbursements. In this case, the losing DFAS Center shall request the gaining DFAS Center to designate the disbursing station assuming the disbursing functions with responsibility for residual disbursing functions such as issuance of stop payment requests, required records research and processing of transactions pursuant to clearing of suspense accounts, requests for recertified payments, and processing claims against the government. Close coordination between the gaining disbursing station and the former DFAS Center will be necessary. This coordination shall include the use of electronic mechanisms such as OPAC to transfer funds between the center and the disbursing station. For example, a request for stop payment of a treasury check issued by the deactivated disbursing station will result in a credit to the former DFAS Center in the **F3880 account. Upon receipt, the DFAS Center shall prepare a disbursement voucher charging the **F3880 account and transfer the credit to the gaining disbursing station (via OPAC). Upon receipt of the

OPAC transfer, the gaining disbursing station shall accept the transfer of funds as a collection with credit to the appropriation charged when the check was issued. As another example, when records research determines the proper appropriation to be credited with a collection that was originally placed in a suspense account, the disbursing station shall contact the servicing DFAS Center of the deactivated disbursing station and request the dollar amount be transferred via OPAC. The DFAS Center shall prepare a disbursement voucher charging the appropriate suspense account and transfer the funds to the requesting disbursing station via OPAC. Upon receipt of the OPAC transfer, the disbursing station shall prepare a collection voucher with credit to the proper appropriation for the dollar amount. The transactions described in the above examples are all transactions for self. Following the guidance in this paragraph will not create cross disbursements or transactions for others. Responsibility for transactions which directly affect the SF 1219 of the former disbursing officer(s) of the deactivated disbursing station, such as those described in paragraph 220402 of this chapter, remains with the DFAS Center under whose cognizance the disbursing station operated prior to deactivation.

B. Tactical Disbursing Stations. For naval vessels and tactical units, the servicing DFAS Center (or designated OPLOC) shall perform the duties of settlement officer for relieved DOs whether or not the disbursing function of the naval vessel or unit is deactivated.

2202 STORAGE OF RECORDS

Disbursing records on which settlement action is not completed may be transferred by the settlement officer to the Federal Records Center serving the settlement office for temporary storage. This action should only be taken when necessary or appropriate because of space or equipment limitations or is in accordance with regular plans for transfer of records.

2203 RESPONSIBILITY OF RELIEVED OFFICER

Despite the appointment of a settlement officer, the relieved DO is responsible for accounting for all funds expended while performing disbursing duties. Transfer of disbursing records under the authority of this chapter only relieves the DO of the paperwork incident to settlement of the account. Accountability for illegal, incorrect, or improper payments which cannot be adjusted despite the diligence of the settlement officer remains with the DO who made the payments. The relieved DO shall keep the settlement officer informed of his or her current mailing address at all times. The relieved officer shall also answer inquiries related to settlement of outstanding items and shall furnish any advice or suggestions which may be of assistance in the prompt and complete clearance thereof.

2204 SETTLEMENT OFFICER PROCEDURES

220401. Settlement Officer Is Incumbent DO. The procedures in this paragraph apply only to non-tactical DOs (within and outside the continental United States) performing settlement functions for previous DOs of the same disbursing activity and DSSN to which the DO performing the settlement functions is assigned. In addition to accounting for and taking

settlement action on deficiencies which occurred during the incumbency of a former DO that were unresolved on the date of relief, the settlement officer may be required to establish or increase deficiencies in the account of a former DO. Most of the transactions processed to establish, increase, reduce, or remove deficiencies in the account of the former DO will be similar to the routine transactions of a DO and will be reported on the daily DD Form 2657 and the monthly SF 1219. The transactions described in the following subparagraphs are the most common types of transactions that will be encountered. On some occasions, the servicing DFAS Center may direct accomplishment of specific transactions and will provide detailed instructions for those transactions. To have a complete history of the settlement process, a record of actions taken to clear deficiencies shall be maintained in separate settlement folders for each former DO. Copies of all documents and correspondence pertaining to settlement of the former DOs' accounts shall be filed in the folders. The settlement folders shall be made available for examination and shall be turned over to the next relieving DO as a part of the relief process.

A. Check Overdraft Receivables. Procedures for recording, reporting and clearing a check overdraft deficiency are prescribed in Chapter 7 of this volume. The procedures are the same for both current and former DOs except that in the case of a former DO, the current DO (settlement officer) shall report the item daily on line 9.2A of the DD Form 2657 and monthly on line 9.2 of the SF 1219 until resolved.

B. Losses of Funds. Losses of funds in the account of a former DO that were unresolved on the date of relief are recorded and reported until resolved on line 9.3 of the current DO's (settlement officer's) DD Form 2657 and SF 1219. Increases in the value of existing losses of funds are generally accomplished only upon the specific direction of the servicing DFAS Center. Decreases in the value of existing losses of funds are accomplished by collection (full or partial) of the losses from the accountable individual or by relief of liability for the losses.

C. Other Accountability. Other accountability items are unresolved deficiencies in the account of a former DO which cannot be classified as check issue overdrafts or losses of funds. These items are reported on line 9.4 of the DD Form 2657 and the SF 1219 until resolved. The value of other accountability may be increased by the settlement officer. For SFs 5515 received by the settlement officer after the date of relief of a DO (which are chargeable to the former DO), the settlement officer shall record and process the SF 5515. The value of the SF 5515 shall be reported on line 9.3 of the DD Form 2657 and SF 1219. For overpayments caused by the negotiation of both the original and recertified check which the settlement officer determines to be uncollectible, the procedures prescribed in Chapter 8 of this volume shall be followed. The settlement officer shall request removal of the deficiency on behalf of the former DO. Decreases to the value of other accountability items may be effected by: collection from the responsible individual, replacement of lost checks by the drawers of the lost checks, confirmation of a deposit previously presumed and treated as lost in transit, reversal of an SF 5515 by a general depository or the Treasury Department, correction of an erroneous collection voucher, or relief of liability. Specific instructions for removal of an accountability item by correction of an erroneous collection voucher or relief of liability shall be provided by the servicing DFAS Center.

D. Processing Negotiable Instruments. Negotiable instruments received by a settlement officer to offset a deficiency in the account of a former DO shall be entered on the DD Form 2657 as either an increase to Deposits Presented or Mailed to Bank (line 4.2A) or to Other Undeposited Instruments on Hand (line 6.3B), and as a decrease to the applicable receivable (e.g., 9.2A, 9.2B, 9.3, 9.4). The instrument received shall be documented on an OF 1017-G and deposited under the same guidelines as other negotiable instruments.

220402. Settlement Officer Is Not Incumbent DO. The procedures in this paragraph are applicable only to DOs designated to settle the accounts of DOs of tactical units or Naval vessels relieved from disbursing duty and the accounts of former DOs of deactivated disbursing stations. These settlement officers perform settlement functions for a DSSN other than the one to which assigned as DO. Any transaction which affects the accountability of a relieved DO, including the initial establishment of the settlement account, will require submission of monthly financial reports by the settlement officer for the relieved DO. The financial reports are submitted to the servicing DFAS Center (or OPLOC) in the same manner as other financial reports. To have a complete history of the settlement process, a record of actions taken to clear deficiencies shall be maintained in separate settlement folders for each former DO and DSSN for which settlement action is performed. Copies of all documents and correspondence related to the settlement of accounts shall be filed in the folders. The folders shall be made available for examination as necessary.

A. Initial Establishment of the Settlement Account. Upon receipt of the final SF 1219 of the relieved DO the Naval vessel, tactical unit, or the deactivated disbursing station, the settlement officer shall review the SF 1219 to determine if any deficiencies existed on the date of relief. In the case of a deactivated disbursing station where the DO is transferred without a relief, the settlement officer shall establish the settlement account by establishment and preparation of the necessary files to resolve the deficiencies. In the case of Naval vessels and tactical units, if there is a deficiency in the account of the relieved DO, the settlement officer shall establish the settlement account as of the month following the receipt of the relieved DO's final SF 1219. This action is accomplished by preparation of a supplemental SF 1219. Upon establishment of the settlement account for the relieved DO, the designated settlement officer shall recompute the actual accountability of the relieving DO on the date of relief by subtracting the amount established in the settlement account from the amount reported on line 11.0 of the relieved DO's final SF 1219. The settlement officer shall then notify the relieving DO of the Naval vessel or tactical unit by message that the settlement account is established and direct that DO to record the dollar value of the deficiency on line 4.37 of the next SF 1219 and remove the amount from lines 9.2, 9.3, and/or 9.4 (as appropriate). The relieving DO shall attach a copy of the message to each copy of the SF 1219 to support the transfer of accountability shown on line 4.37. Figure 22-1 is an example of a final SF 1219 from a Naval vessel indicating relief and transfer of accountability. Figure 22-2 is an example of the first SF 1219 of the incumbent DO. Figure 22-3 is an example of the supplemental SF 1219 prepared by the settlement officer to establish the settlement account of the relieved DO. Figure 22-4 is an example of the SF 1219 of the incumbent DO transferring the predecessor's deficiency to the settlement officer.

B. Recording Increases to a Settlement Account. After the date of relief, it may become necessary to record a deficiency into the account of a relieved DO. This type of transaction can be caused by an SF 5515, FMS Form 5206, notice of an out-of-balance payroll, or various other discrepancies discovered in subsequent audit of accounts. Figure 22-5 shows processing of an SF 5515 to increase a relieved DO's accountability due to a dishonored check.

C. Removal of Deficiencies. Removal of deficiencies from the accounts of former DOs can be accomplished by collection from the responsible individual, correction of erroneous documents, or relief of liability. If the deficiency is recovered by collection from the responsible individual, the settlement officer shall prepare an OF 1017-G to document the collection and deposit the funds on an SF 215. Block 3 of the SF 215 shall show the DSSN of the DO whose account is being settled. The deposit transaction shall be recorded on the supplemental SF 1219 prepared for the month in which the transaction is processed. If the deficiency is removed by correction of erroneous documents, the corrected documents shall be reported on the supplemental SF 1219 prepared for the month in which the transaction is processed. If a deficiency is removed by relief of liability, the servicing DFAS Center will direct the preparation of an SF 1049 and will provide a complete fund cite to be charged for the transaction. The voucher shall be reported on the supplemental SF 1219 for the month in which the transaction is processed. Figure 22-6 shows removal of a deficiency by collection from the accountable individual.

D. Preparation of Disbursement and Collection Vouchers. Normally, the preparation and processing of vouchers to settle the accounts of former DOs will not affect the disbursing account of the settlement officer. Collection and disbursement voucher numbers assigned to vouchers prepared to process settlement transactions shall not be taken from the voucher number logs of the DO at the settlement activity. The settlement officer shall maintain a separate series of locally assigned voucher numbers (for example, COOO1 for collections and DOOO1 for disbursements) for use in settlement transactions. In addition, the DD Form 2657 is not maintained by the settlement officer for the former DO.

E. Financial Reports. The settlement officer shall submit financial reports for a former DO every month until the former DO's accountability is cleared. Normally, the documents required to be submitted are: supplemental SF 1219; appropriate copies of SF 215 or SF 5515 if these forms are involved in the transaction; and any supporting disbursement or collection vouchers prepared. The general requirements in Chapter 20 of this volume for preparation and submission of financial reports apply. In addition to the normal distribution requirements, one additional copy of each document prepared shall be forwarded to the servicing DFAS Center. In all cases, each document shall clearly identify the name and DSSN of the former DO and the name and address of the settlement officer preparing the reports. Documents requiring signature shall be signed "By (name of settlement officer), settlement officer for (name and DSSN of accountable officer)."

2205 SETTLEMENT PROCEDURES FOR NAVAL VESSELS

220501. General. Even though the DO assigned to Naval vessels does not perform settlement functions, certain actions are required to be performed to assist the designated settlement officer. The incumbent DO shall take the actions prescribed in this section for each of the transactions described which are received after the date of relief and which affect the accountability of the relieved DO.

220502. SF 5515 (Debit Voucher). SFs 5515 issued by a general depositary or the Treasury Department for dishonored personal checks, forged Treasury checks, or dual negotiation of both the original and substitute Treasury checks, shall not be recorded in the current DO's accountability unless the accounts of the DO who is accountable for the deficiency are subject to the 90-day retention period described in Chapter 21 of this volume or the maker or endorser of the dishonored check is locally available for collection action. If neither of the foregoing conditions apply, the current DO shall forward the SF 5515 and copies of all related documents by cover letter to the cognizant OPLOC. If follow-up action previously initiated by the relieved officer results in recovery of funds, the relieving officer shall forward the funds in the form of an exchange-for-cash Treasury check to the cognizant OPLOC.

220503. Unconfirmed Deposits. For unconfirmed deposits that are later confirmed by follow-up action after the date of relief, forward the confirmed copy of the SF 215 by cover letter to the cognizant OPLOC for processing.

220504. FMS Form 5206, Advice of Check Issue Discrepancy. If an FMS Form 5206 is received during the 90-day retention period subsequent to relief, a copy of the applicable check issue record and disbursement voucher shall be reproduced from the relieved DO's retained records and attached to the form. The documents shall then be forwarded by cover letter to the cognizant OPLOC for processing. If an FMS Form 5206 is received after the former DO's records have been forwarded to the OPLOC as prescribed in Chapter 21 of this volume, the document shall be forwarded by cover letter to the cognizant OPLOC for processing.

220505. Daily Advice of Status (DAS). Upon receipt of a DAS from the Treasury Department indicating the original and recertified Treasury check issued by the previous DO were both negotiated and previous credit given by the Treasury Department for the canceled original check is being reversed, the current DO shall take the same actions as prescribed above for debit vouchers.

CHAPTER 23

UNITED STATES SAVINGS BONDS2301 OVERVIEW

This chapter prescribes procedures and forms to be used for the Voluntary Payroll Savings Plan when purchasing U.S. Savings Bonds, Series EE by payroll allotments. The plan provides a means by which civilian employees and military personnel of the U.S. Government may regularly save a part of their earnings through a voluntary system of payroll allotments under the terms and conditions described in this chapter. This chapter also covers procedures for undeliverable, lost, and canceled savings bonds. Purchase of U.S. Savings Bonds by military members through allotment deduction is covered in Volume 7 of this Regulation. Purchase of U.S. Savings Bonds by civilian employees under the payroll savings plan is covered in Volume 8 of this Regulation.. Due to Treasury Department requirements to automate the sales of savings bonds, cash sales of savings bonds within DoD are not authorized. The Bureau of Public Debt, Department of the Treasury, is responsible for administering the savings bond program. The Treasury Department's U.S. Savings Bond Division is responsible for promoting and selling savings bonds.

2302 BOND ISSUING AGENTS

230201. Eligibility for Designation as Bond Issuing Agent. A DO or disbursing agent whose duties require the issuance of U.S. Savings Bonds shall be designated as a bond issuing agent. Generally, any DO or disbursing agent located in the United States, the Republic of Panama, Puerto Rico, or the Virgin Islands who is responsible for payment of civilian payrolls shall be designated as a bond issuing agent. The bond issuing agent for overseas areas outside those listed above may be the central bond issuing agent assigned to the supporting DFAS Center, or when authorized, an overseas banking facility. The central bond issuing agent assigned to the supporting DFAS Center issues all bonds purchased by military members through allotment deduction. DOs and disbursing agents assigned to tactical units and Naval vessels are not eligible for designation as bond issuing agents.

230202. Request for Designation. An initial request for designation of a DO or disbursing agent as a bond issuing agent shall be forwarded through command channels to the supporting DFAS Center. Normally, the commander will originate the request for designation.

230203. Bond Issuing Agent Certification. The supporting DFAS Center shall certify each designated bond issuing agent, by name, to the FRB which will service the bond issuing agent. The supporting DFAS Center also shall provide certified specimen signatures of the bond issuing agent to the FRB concerned.

230204. Bonds Issued by Bond Issuing Agent

A. General. Bond issuing agents shall be governed by the regulations of the servicing FRB in all matters concerning the requisition, issuance, and accounting for savings bonds. FRBs are governed by Treasury Department regulations concerning savings bonds. However, accounting procedures, forms, and instructions are not uniform in all Federal Reserve districts, therefore, bond issuing agents shall have in their possession and follow the latest instructions of the servicing FRB.

B. Bond Issuing Agent - DFAS Center. The central bond issuing agent at the supporting DFAS Center shall issue U.S. Savings Bonds, Series EE, as indicated in the following subparagraphs.

1. Bonds purchased through payroll deduction by civilian employees within CONUS. Bonds purchased through payroll deduction may also be issued to civilian employees outside CONUS, except as provided in subparagraph 230204.C, below.

2. Bonds purchased by military members under the payroll allotment system.

C. Bond Issuing Agent - Banking Facilities. DoD contract banking facilities in overseas areas, when authorized, will issue U.S. Savings Bonds purchased through the payroll savings plan by civilian employees who are citizens of the United States. When authorized, the banking facilities may also issue savings bonds directly to military members or civilian employees when payment is presented in cash by the individual.

D. Bond Issuing Agent - Other DOs or Disbursing Agents. DOs or disbursing agents in the United States (other than the DOs at the supporting DFAS Centers), the Republic of Panama, Puerto Rico, and the Virgin Islands who have been designated as bond issuing agents shall issue U.S. Savings Bonds, Series EE for purchases by civilian personnel through payroll deductions.

2303 ACQUISITION, CONTROL, AND SUPPLIES230301. Blank Bond Stock

A. Bond Denominations. Series EE savings bonds are available only in denominations of \$100, \$200, \$500, and \$1,000 through the Voluntary Payroll Savings Plan. Issue purchase price, denomination maturity value, and bond prefix codes are shown in table 23-1.

B. Bond Assembly. Bond stock is available in various Series EE paper bond assembly types. The Type M assembly is used to report registration data on tape. Series EE bond stock is also available in double-up continuous stock. The continuous assembly type bonds

shall be separated either manually or by machines specially made for this purpose. The Type K assembly is designed for use in typewriters. When savings bonds are inscribed by typewriter, clear carbon copies shall be made.

C. Requisitioning Blank U.S. Savings Bonds - Series EE. Bond issuing agents will receive forms and instructions from their servicing FRB for ordering Series EE bond stock. The blank stock will be delivered by the FRB upon receipt of requisitions signed by either the bond issuing agent or by the deputy bond issuing agent. Only Series EE savings bonds may be issued under the payroll savings plan and bond issuing agents are not authorized to requisition bonds of any other series.

D. Bond Stock Levels. The FRBs permit bond issuing agents to maintain savings bond consignment ceilings equal to \$30,000 (face value) or a normal 60 - day requirement, whichever is higher. Such ceilings will be decided by the FRB semiannually based on the preceding 12-month sales history. FRBs will evaluate bond issuing agent requirements and establish individual ceilings commensurate with the issuing agents' legitimate needs. The FRBs will allow issuing agents the flexibility of determining a mix of denominations which will best meet the issuing agents' needs within the limits of their established consignment ceilings.

E. Custody and Storage. The bond issuing agent shall maintain DD Form 80 (Bond Control Record) to account for all bond stock. The DD Form 80 shall be maintained to show beginning balance of bonds on hand; bonds received, issued, and spoiled; and ending balance of bonds on hand. The DD Form 80 shall also show the quantity and serial numbers of bonds transferred to and returned by bond writers. A separate DD Form 80 shall be maintained for each denomination of bonds. Blank bond stock shall be safeguarded and stored in a vault or safe in the same manner as prescribed in Chapter 7 of this volume for blank Treasury checks. Bond stock may be stored in safes or vaults to which both the bond issuing agent and a minimum number of deputies have access. Depending upon the available storage facilities, the bond issuing agent or a deputy shall retain custody of all blank bonds in excess of current working stock. Bond stock placed in custody of assistants shall be covered by DD Form 80 to show the location of a block of bonds for administrative and inventory purposes. At least once each quarter, a physical inventory of the bond stock shall be made by the bond issuing agent to ensure the stock on hand agrees with the DD Form 80. The quarterly bond inventory may be assigned as a responsibility of the appointed cash verification team. An example of DD Form 80 is provided as figure 23-1.

F. Loss of Bond Stock. The bond issuing agent shall immediately report to the FRB any loss of blank savings bond stock and request instructions as to how credit can be obtained. The report to the FRB shall include a full description of the bonds, including denomination and serial number, and a statement of the circumstances under which the loss occurred. No request for relief of liability is necessary unless the bonds are fraudulently redeemed.

DENOMINATION OF U.S. SAVINGS BONDS, SERIES EE			
ISSUE PRICE	PURCHASE	DENOMINATION MATURITY VALUE	BOND PREFIX
50.00		100.00	C
100.00		200.00	R
250.00		500.00	D
500.00		1,000.00	M

Table 23-1. Denomination of Bonds230302. Validating Stamps

A. Requisition and Disposition. A validating stamp, authorized by the Treasury Department for use in validating U.S. Savings Bonds when mechanical equipment is not used for issuing bonds, shall be requisitioned from the servicing FRB. The FRB assigns a code number to the validating stamp. The number usually consists of the district number of the FRB followed by a dash and the identification number of the bond issuing agent. However, the bond issuing agent shall adopt the configuration of this number according to the servicing FRB's preference. The bond issuing agent may issue validating stamps to bond issuing subagents. To identify the individual subagents, the bond issuing agent shall request the FRB to supply a separate suffix for each subagent. When the validating stamps are no longer required, they shall be returned to the FRB by registered mail.

B. Safeguarding. Bond issuing agents or subagents shall keep validating stamps under protective custody in a vault or safe and shall be fully accountable for any improper use of such stamp. Upon change of bond issuing agents, the validating stamp shall be turned over to the successor bond issuing agent. The successor shall receipt for the validating stamp.

230303. Envelopes. Special envelopes have been approved for use in mailing U.S. Savings Bonds and shall be requisitioned through regular supply channels. The envelopes are available from and listed in the Federal Supply Schedules - FSC Group 75, Part V, Office Supplies (Envelopes), which is published every six months.

2304 REGISTRATION

230401. General. Savings bonds are issued only in registered form. The registration shall express the actual ownership of, and interest in, the bond. Savings bonds may be issued: in the names of natural persons in their own right in a single owner form (one person only), co-ownership form (two persons only), and beneficiary form (two persons only); or, in the name of a fiduciary or an organization, private or public (single owner form only). If registration is made in a name of other than individuals in their own right, the employer identification

number assigned by the Internal Revenue Service (IRS) shall be inscribed on the bond if there is no SSN. The use of courtesy titles on savings bonds is optional in all cases.

★ 230402. Registration Restrictions. Savings bonds may not be issued to civilian and military employees who are not citizens of the United States. Savings bonds may be issued as indicated in the following subparagraphs.

A. Residents of the United States, its territories and possessions, the Commonwealth of Puerto Rico, and Panama.

B. Citizens of the United States temporarily residing abroad.

★ C. Civilian employees of the United States or members of the Armed Forces, and dependents, who are citizens of the United States.

D. Other individuals as co-owners with, or beneficiaries of, any of the above. Registration is not authorized to include the name of any alien in areas where the Treasury Department restricts or regulates delivery of Treasury checks.

E. United States citizens who are permanent employees of exchanges, cafeterias, and similar organizations, and employees of contractors working on DoD contracts.

F. An organization, private or public, as provided in Treasury Department Circular 530 (reference (bk)).

230403. Forms of Registration. Subject to the above restrictions, savings bonds may be registered as indicated in the following subparagraphs.

A. In the name of any individual, whether adult or minor, in the individual's own right, in any of the following forms.

1. Single Owner. In the name of the person; for example, John A. Jones.

2. Co-Ownership (Two Persons). In the name of two (but not more than two) persons as co-owners; for example, John A. Jones or Mrs. Ella S. Jones. Note: Either co-owner may redeem bonds registered in this form without the consent or signature of the other.

3. Beneficiary (Two Persons). In the name of one person, payable on death (POD) to one (but not more than one) other person; for example, John A. Jones POD Mrs. Mary E. Jones.

B. In the names and titles of legal representatives of persons (guardians, custodians, conservators, etc.).

C. In the names and titles of trustees of personal trust estates set up by persons in their own right, for the benefit of themselves or other persons, and common trust comprised in whole or in part of such trust estates.

230404. Ownership Records. The Treasury Department maintains records of ownership of savings bonds. A name and address is no longer adequate identification of ownership by a person. Therefore, all savings bonds issued to persons shall be inscribed with the SSN of the registered owner or the first-named co-owner. Unless the owner specifically requests a reissue, it is not necessary to reissue a savings bond for the sole purpose of changing an incorrect SSN. However, when reissue is not requested, the correct SSN should be forwarded to the Accrual Bond Branch, Division of Accounts and Reconcilements, Bureau of the Public Debt, Box 1328, Parkersburg, WV 26106-1328.

2305 PURCHASE OF BONDS THROUGH PAYROLL WITHHOLDING

230501. Military Members. Military members desiring to participate in the payroll savings plan shall use the approved allotment procedures and forms as prescribed by the supporting DFAS Center. Deductions from the members' pay accounts for bond allotments are credited to deposit fund account **X6050. When the deductions accumulate the purchase price of the denomination of the bond purchased by the allotment, an automated equivalent of DD Form 1084 (Bond Issuance Schedule, United States Savings Bonds - Series EE) (see paragraph 230602, below) is produced and forwarded to the central bond issuing agent. The central bond issuing agent assigned to the servicing DFAS Center issues all bonds purchased by military members through bond allotments.

230502. Civilian Employees

A. Authorization for Bond Deductions. Civilian employees may participate in the Voluntary Payroll Savings Plan for purchase of Series EE savings bonds by preparing and submitting a Treasury Department approved form to authorize payroll deductions for the purchase of savings bonds. All entries on the form shall be typed or legibly printed in ink. The employee's name shall be entered as it appears on the payroll. The employee's SSN shall be entered in the designated space. The employing activity and location shall be entered in the designated space. The amount to be withheld each pay period and the denomination of the bond shall be indicated. The name, SSN, and address of the owner (not necessarily the purchaser) to be inscribed on the bond shall be shown. Allotments shall not be established if the SSN of the prescribed owner is not provided. The appropriate spaces of the form shall be marked to indicate whether a co-owner or beneficiary is elected, and the name and SSN (when available) of the co-owner or beneficiary to be inscribed on the bond shall be shown. The starting date of the pay period when the first withholding is to be made and any special handling instructions shall be indicated. The reverse of the form may be used to indicate the starting date, special handling instructions, or to denote when a bond is being canceled. The authorization form shall be signed in ink by the employee authorizing the payroll deduction.

B. Disposition of Authorization Forms. Employees shall deliver completed authorization forms to the payroll office that handles the employee's pay account. The authorization forms are used to enter allotment deductions into the bond accounting module of the automated payroll system.

C. Payroll Deductions. Payroll deductions shall be reported on the DD Form 592, Payroll for Personal Services - Payroll Certification and Summary as a credit (collection) to deposit fund account **X6050. When the deductions accumulate the purchase price of the denomination of the bond purchased by the employee, automated equivalents of DD Form 1084 (see paragraph 230602, below) are generated and forwarded to the DO responsible for payment of the civilian payroll. If the DO responsible for payment of the civilian payroll is not a designated bond issuing agent, the actions prescribed in subparagraph 230502.D, below, shall be taken.

D. Disbursing Officer Not Authorized Bond Issuing Agent. When DD Forms 1084 are received from the payroll certifying officer, the DO shall take the actions prescribed below.

1. Ensure the balance in the deposit fund account **X6050 is sufficient to pay for the bonds to be issued. If the balance is insufficient, the DO shall notify the payroll certifying officer in writing and return the DD Forms 1084 for reconciliation.

2. Prepare an SF 1049 to disburse the bond purchase collections previously credited to the deposit fund account **X6050 and issue a Treasury check payable to the Department of the Treasury Department. The dollar amount of the Treasury check shall coincide with the total purchase price of the bonds scheduled on the DD Forms 1084.

3. Prepare the DD Form 77 (Transmittal of Bond Issuance Schedules) in triplicate as prescribed in paragraph 230702, below, for transmittal to the designated bond issuing agent.

4. Forward the original and one copy of the DD Form 77, the Treasury check, a copy of the SF 1049, and the DD Forms 1084 to the designated bond issuing agent. The copy of the DD Form 77 will be receipted by the bond issuing agent and returned. If the acknowledgement is not received within a reasonable length of time, tracer action shall be initiated.

230503. Termination of Service. If a member or employee is terminated from service, the payroll allotment shall be canceled by the payroll office. If, at the time of termination, the balance in the member's or employee's allotment account is insufficient to purchase a bond, the bond issuing agent shall refund the balance in the member's or employee's account. The transaction shall be documented by preparation of an SF 1049 charging the deposit fund account **X6050 and issuance of a Treasury check payable to the member or employee.

2306 SCHEDULING BOND ISSUANCE

230601. Issuance of DD Form 1084. DD Form 1084 shall be issued by civilian payroll certifying officers for purchases by civilian employees under the Voluntary Payroll Savings Plan and by the DO at supporting DFAS Centers for issuance of bonds purchased by military members through bond allotments. Mechanized equivalents of DD Form 1084 may be generated by the applicable payroll systems.

230602. Preparation of DD Form 1084

A. General. Separate DD Forms 1084 shall be prepared for each bond denomination. The following subparagraphs provide detailed instructions for completion of DD Form 1084. The subparagraph titles coincide with the block titles of the form. An example of a completed DD Form 1084 is provided as figure 23-2.

B. Department. Enter the applicable DoD Component (e.g. Army, Navy, Air Force, or Marine Corps) of the military or civilian employees purchasing the bonds.

C. Organization. Enter the organization for which bonds are scheduled, or the civilian payroll unit submitting the schedule.

D. Station and Disbursing Station Symbol No. Enter the name, title, station, ZIP code, and DSSN of the disbursing office responsible for preparation of the schedule if different from the bond issuing agent.

E. Station and Disbursing Station Symbol No. (for use by issuing office only). Only the office issuing the bonds uses this space. The bond issuing agent shall enter the brief block stamp when the bonds are issued.

F. Schedule No. Assign a separate series of numbers for each denomination of bonds scheduled. The numbers consist of a prefix and a suffix separated by a dash. The prefix is shown for each bond denomination in table 23-1. The suffix shall begin with number 1 and number consecutively for each fiscal year.

G. Page of Pages. Enter the page number and number of pages used for each bond denomination.

H. Control No. If the same office schedules and issues the bonds, do not use this block. Otherwise, the control number shall be assigned by the bond issuing agent.

I. Voucher No. Leave blank. The bond issuing agent shall show the disbursement voucher number assigned to the SF 1049 prepared to make payment to the FRB.

J. Denomination. Enter the denomination of the bonds listed on this schedule. Prepare separate schedules for each denomination.

K. No. of Bonds. Enter the number of bonds listed on this schedule.

L. Unit Purchase Price. Enter the unit purchase price of the denomination of bonds on this schedule.

M. Effective Date of Bond. Enter the effective date of bonds listed on the schedule except when it includes average dated bonds, in which case the entry shall be "See below." The effective (issue) date shall be the first day of the month in which at least one-half of the purchase price is accumulated, regardless of the number of payroll deductions required to complete the full purchase price for issuance of the bond.

N. Method of Purchase. Enter payroll deduction.

O. Certification. The civilian payroll certifying officer or DO preparing the DD Form 1084 shall date and certify the schedule in the spaces provided.

P. Effective Date and Item No. Leave blank when all bonds listed have the same effective date and this is indicated in the Effective Date of Bond block and when the bonds are to be mailed to the owner. Use this block to enter the effective date for each bond when average dated bonds are included on the schedule and the effective date is not the same for all bonds listed.

Q. Name(s) and Address of Person(s) to Whom Issued. The full name of the owner shall always precede the name of the co-owner or beneficiary. Only one person may be designated as either co-owner or beneficiary. "Or" indicates co-owner. "POD" means "Pay on death" and indicates beneficiary. If bonds are to be mailed to a co-owner or beneficiary, the address shall be indicated and the applicable code from the bottom of the form entered in the Item No. column. Military grades shall not precede a co-owner or beneficiary's name. A married (military or civilian) woman's own given name shall be used. The SSN of the owner (the first-named individual on the bond) is mandatory and shall be shown. The SSN of the co-owner or beneficiary shall be shown if available.

R. Serial No. of Bonds Issued. Leave blank. The bond issuing agent shall complete this block when the bonds are issued.

2307 TRANSMITTAL OF BOND ISSUANCE SCHEDULES

230701. General. DOs and agents (not designated as bond issuing agents) who pay civilian payrolls shall prepare DD Form 77 in triplicate to transmit to an authorized bond issuing agent the DD Forms 1084 and the Treasury check(s) or debit vouchers issued in payment for the bonds.

230702. Preparation of DD Form 77

A. General. The following subparagraphs provide detailed instructions for completion of the DD Form 77. The subparagraph titles coincide with the block titles of the form. An example of a completed DD Form 77 is provided as figure 23-3.

B. Date. Enter the date the DD Form 77 is prepared.

C. Transmittal Letter No. Enter the DSSN and transmittal number. The transmittal number shall begin with number "1" each fiscal year and shall continue in numerical sequence for the entire fiscal year regardless of a change in DOs during the fiscal year.

D. To. Enter the complete mailing address of the bond issuing agent to whom the bond issuance schedules are being forwarded.

E. From. Enter the name and DSSN of the DO forwarding the bond issuance schedules.

F. Station or APO. Enter the station address of the DO forwarding the bond issuance schedules.

G. Body of Transmittal. Each DD Form 1084 included in the transmittal shall be identified in the body of the transmittal as shown below.

1. Schedule Number. Enter the schedule number from each DD Form 1084 included in the transmittal.

2. Organization or APO Number. Enter the organization from the Organization block of each DD Form 1084 included in the transmittal.

3. Date of Schedule. Enter the date from the Certification block of each DD Form 1084 included in the transmittal.

4. Denomination of Bonds. Enter the bond denomination from the Denomination block of each DD Form 1084.

5. Total Issue Price. Enter the total issue price for all bonds included on each DD Form 1084. For example, if a DD Form 1084 listed four \$100 bonds at a unit purchase price of \$50.00 each, the total issue price of the DD Form 1084 would be \$200.00.

H. Grand Total. Enter the grand total of all DD Forms 1084 included on the transmittal. The grand total of all DD Forms 1084 included on the transmittal shall coincide with

the dollar amount of the Treasury check or debit voucher issued in payment for the bonds scheduled for issuance.

I. Return Address. The DO preparing the transmittal shall include the complete station name and mailing address to which the bond issuing agent is to return a "receipt acknowledged" copy of the DD Form 77.

J. Signature. The DO preparing and forwarding the transmittal shall sign the original transmittal in the space provided.

K. Typed Name and Grade. The DO shall type his or her name, grade, and Component in the space provided.

2308 ISSUANCE OF SAVINGS BONDS

230801. Action by Bond Issuing Agents or Subagents. Upon receipt of DD Forms 77, the bond issuing agent shall ensure that all documents listed on the transmittal are attached and that the amount of the Treasury check is in agreement with the grand total shown on the transmittal and the total value of bonds scheduled on the DD Forms 1084. If there is a discrepancy between the check and DD Forms 77 or 1084, the bond issuing agent shall contact the DO who forwarded the transmittal. If necessary, the bond issuing agent shall return the entire transmittal and supporting documents for reconciliation. The bond issuing agent shall prepare DD Form 1131 crediting deposit fund account **X6050 and deposit the check under normal Treasury check deposit requirements.

230802. Bond Inscription

A. Dating of Bonds. Bonds shall be inscribed to show the issue month and year and the actual date of issuance by the bond issuing agent. The issue month is the month from which interest is computed. Series EE savings bonds of \$100 or higher denominations, whether under bi-weekly, monthly, or other pay systems, shall be issued under average dating rules. Bonds shall be dated as of the first day of the month in which the end of a pay period falls when at least one-half of the purchase price is accumulated, regardless of the number of consecutive payroll deductions required to complete the full purchase price. The bond shall be issued and delivered when the full purchase price is accumulated through payroll deductions. Average dating does not change prescribed accounting procedures but does cause special handling of the larger denomination bonds. Average dating assures no loss of interest on the personal savings of Federal payroll savers who accept fewer and larger bonds for greater convenience and greater economy in operating a personal savings bond program. When applicable, average dating should be used if an account is cleared to allow an earlier effective date for a change in denomination or amount of allotment and part or all of the balance is taken in lower denomination bonds.

B. Names. The full name of the owner and co-owner or beneficiary, if any, shall be inscribed on the bonds identically as shown on the instrument authorizing the purchases

except that if there are two given names, an initial may be substituted for one. If a woman is to be the registered owner or first named co-owner, her SSN will provide adequate identification and she need not furnish a courtesy title such as "Mrs." or "Ms." The use of courtesy titles is optional in all cases. A married woman shall use her own given name, not that of her husband: for example, Mrs. Ella A. Jones, not Mrs. John A. Jones.

C. Social Security Numbers. The SSN of the first named person (the registered owner or the first named co-owner) shall be inscribed on all Series EE bonds. A savings bond allotment authorization that does not include the required SSN shall be canceled.

D. Address. If delivery is to be accomplished by mail, the purchaser shall be required to designate the address to which the bond is to be mailed on the bond application form. The mailing address shall include the ZIP Code for every account for which a savings bond is mailed. Purchasers who have no permanent residence, however, may request that a mailing address other than the address of the owner and/or co-owner be inscribed on their bonds. The name and address of a person or bank other than that of the owner, co-owner, or beneficiary is allowed. The name of the registered owner shall start next to the word "To" and the name of a person or bank in the mailing address shall be separated from the registered owner by a blank line. The name in the mailing address shall be prefixed by the words "Mail to". One or two lines, as appropriate, will be skipped before the co-owner or beneficiary's name and SSN are inscribed.

E. Validation Stamp. All inscribed savings bonds shall bear a validating stamp in the space provided. When automated equipment is used to inscribe bonds, bond issuing agents are authorized to imprint the information of the validating stamp in the same print used to inscribe the bond. The month, day, and year of the last day of the pay period when the full or final payment for the bond was withheld from the employee's pay shall appear on the validating stamp in lieu of the actual date of issuance. The purpose of this date is to inform the employee of the pay period when the allotment accumulated the purchase price of the bond; not necessarily the actual issue date of the bond.

230803. Serial Numbers of Bonds. The serial numbers of bonds issued shall be entered in the appropriate spaces on the DD Forms 1084.

230804. Spoiled Bonds. When errors are made on bonds during the issue process, the bond issuing agent shall stamp or imprint the word "SPOILED" on the face of the bond and file in a jacket bearing the caption SPOILED BONDS. A listing, in three copies, shall be prepared by the bond issuing agent at the end of each month, or at other intervals as required by the FRB to show, by bond serial number, the bonds spoiled during the period. The original and one copy of the listing together with the spoiled bonds shall be forwarded to the servicing FRB per the FRB's requirements. If the error is discovered after delivery of the bond (reported by the owner), payroll officers or other designated officials shall, by letter, cite the errors and DD Forms 1084 on which the erroneous bonds were certified and forward it (with the erroneous bond) to the bond issuing agent for correction. If the bond issuance has not been reported to the FRB (bond

issuance data is still in the possession of the bond issuing agent), the bond issuing agent may issue a replacement bond subject to instructions from the servicing FRB. If the bond issuance has been reported to the FRB (bond issuance data has been submitted to the FRB), the correct issue data must be submitted with the spoiled bond to the FRB with a request that the bond be reissued.

230805. Erroneously Issued Bonds. The bond issuing agent (DO) is pecuniarily liable when a savings bond is erroneously issued to a person other than the purchaser. Upon discovery of the error, the bond issuing agent shall issue a savings bond to the authorized person, and shall attempt to recover the erroneously issued bond or obtain payment from the person to whom the bond was erroneously issued. If the bond issuing agent is unable to obtain either the bond or payment, a warning shall be placed against the savings bond. The help of the local U.S. Secret Service shall then be requested. If such efforts fail, a complete report shall be made to the DO's supporting DFAS Center.

2309 DELIVERY OF BONDS

230901. Personal Delivery. Bonds may be delivered in person where local bond issuance is authorized. Bonds shall continue to show the permanent address of the owner even though delivery is to be made in person. The commander shall specify, in writing, key officers or employees authorized to receive and deliver bonds. The commander may name persons from any organization on the activity, base, or station. One or more alternates should be designated to prevent delays in delivery. All individuals designated to deliver bonds (including alternates) shall furnish their official signature to the DO on the DD Form 577 (Signature Card). Individuals designated to deliver bonds shall sign for all bonds received on the DD Form 1084, or applicable machine listing. The DO may require designated delivery officials to obtain receipts from the bond owner. Receipts from bond owners are not required when delivery is made by the DO or a member of the DO's staff. Designated bond delivery officials shall return to the DO all bonds that cannot be delivered on the same day as received. Bond owners shall then be required to call in person at the disbursing office to obtain their bonds. The DO may authorize designated persons located some distance away to keep undelivered bonds for a short period of time if adequate safekeeping facilities are available and the bond owner is absent but is expected to return soon. If the bond owner is on extended leave, the bonds shall be returned to the DO for mailing.

230902. Delivery by Mail

A. Address. Every bond purchaser shall be requested and encouraged to designate a permanent address to which bonds may be mailed and which is not expected to change due to transfer of the purchaser. The permanent address of the owner and co-owner, if given, as well as the mailing address, shall be identical with those shown on the instrument authorizing purchase of the bond (authorization for payroll deduction). Active duty military personnel purchasing bonds by allotment may request the supporting DFAS Center to hold their bonds in safekeeping as provided in section 2310 of this chapter.

B. Mailing Instructions. Bond issuing agents shall mail savings bonds based on the instructions on DD Form 1084. Bonds shall not be sent by registered mail. The restrictions applicable to mailing of Treasury checks in Chapter 8 of this volume also apply to the mailing of bonds. Special window envelopes described in paragraph 230303, above, which bear the bond issuing agent's return address shall be used.

230903. Undelivered or Returned Bonds

A. General. Bond issuing agents shall maintain a record of all bonds returned as undeliverable using the DD Form 2658 (Returned and Undeliverable Check/Bond Record) prescribed in Chapter 8 of this volume for undeliverable Treasury checks. At a minimum, the record shall include: the denomination and serial number of the bond; date of the bond; name, address, and SSN of the owner; date of return; disposition; and date of disposition. If the bond is eventually delivered in person to the owner, the signature of the owner shall be obtained on the record.

B. Action to Effect Delivery. The bond issuing agent shall make every effort and utilize all possible sources of information to effect delivery. If delivery still cannot be made, the bond issuing agent shall determine the bond to be undeliverable and shall keep the bond for a period of three months, except as provided in subparagraph 230903.D, below.

C. Disposition After 3-Month Period. All bonds which have been held as undeliverable for a period of three months after receipt shall be forwarded, uncanceled, by first class mail to the Department of the Treasury, Bureau of Public Debt, ATTN: Division of Transactions and Rulings, 200 Third Street, Parkersburg, WV 26101. A letter, in duplicate, shall be mailed separately to the above address to provide advance notice that a shipment of undeliverable bonds is in transit. Upon receipt of the shipment, the duplicate copy of the letter will be signed and returned to the sender. A listing of the serial numbers of the bonds being shipped shall be prepared in duplicate. One copy of the listing shall be enclosed with the letter and the other copy kept by the sender.

D. Deceased, Missing, and Mentally Incompetent Personnel

1. Deceased or Missing Military Member. Any bond which has not been delivered at the time of receipt of notification of death or missing status shall be mailed by the bond issuing agent to the co-owner, beneficiary, or third party if such a designation is on the bond. To determine the rightful owner, refer to Treasury Department Circular 530, revised (reference (bk)).

2. Mentally Incompetent Military Member. Any bond which has not been delivered at the time of receipt of notification of mental incompetence shall be held by the bond issuing agent pending receipt of instructions from the legally appointed guardian or from the person designated to receive the member's active duty pay.

3. Deceased, Missing, or Mentally Incompetent Civilian Employee.
Refer to Volume 8 of this Regulation.

4. Deactivation of Disbursing Office. Forward all undeliverable bonds, regardless of the period held, under a letter of transmittal to the central bond issuing agent at the supporting DFAS Center. File all receipted copies of the transmittal letters with the retained accounts of the DO (bond issuing agent) for transmittal to the designated custodian of the retained accounts.

230904. Inquiries Regarding Non-receipt of Bonds. When the bond issuing agent receives notice of non-receipt of a savings bond, the bond issuing agent is required to verify and certify that the bond was properly issued and forwarded to the owner. Then the bond issuing agent shall send the member or employee a PD Form 3062 (Claim for Relief on Account of Inscribed United States Savings Bonds Lost, Stolen or Destroyed Prior to Receipt by Owner, Co-Owner or Beneficiary) for completion. The completed PD Form 3062 shall be returned to the bond issuing agent for validation. The bond issuing agent shall then forward the completed form to the Bureau of Public Debt, Box 1328, Parkersburg, WV 26106-1328. If the bond has not been redeemed, the Treasury Department will issue a replacement bond. If the original bond has been redeemed, a photocopy of the bond will be provided for verification of endorsement(s). The PD Form 3062 may be obtained from the servicing FRB. When savings bonds are hand-delivered, the bond issuing agent is required to obtain statements from all persons who handled the bonds and then follow the above procedures.

230905. Lost, Stolen, or Destroyed Bonds. If the owner notifies the bond issuing agent that a savings bond was lost, stolen, or destroyed after receipt, the bond issuing agent shall give the owner with a PD Form 1048 (Application for Relief on Account of Loss, Theft or Destruction of United States Savings and Retirement Securities) and have the owner write to the Claims Branch, Division of Transactions and Rulings, Bureau of Public Debt, Box 1328, Parkersburg, WV 26106-1328. The bond issuing agent shall give the owner with the serial numbers and registration of the lost bonds, if available, from retained records. If records are not available, the applicant will be informed that, if bond serial numbers cannot be provided to the Treasury Department with the claim, replacement can be facilitated if the issue months and the names and addresses appearing on the bonds can be provided. The PD Form 1048 may be obtained from the servicing FRB.

230906. Inquiries Regarding Changes to Issued Bonds. If the bond issuing agent receives a request from an owner to change a bond already issued (e.g., add beneficiary or co-owner, eliminate beneficiary or decedent, show change of name, and/or correct error in registration), the bond issuing agent should advise the owner to complete a PD Form 4000. This form along with the bonds requiring a change should be forwarded to the Bureau of Public Debt, Box 1328, Parkersburg, WV 26106-1328. The PD Form 4000 may be obtained from a financial institution or a FRB.

230907. Fraudulent Claims Presented by the Purchaser. The bond issuing agent is not pecuniarily liable for bonds issued, when replacement bonds are subsequently issued by the Treasury Department or the FRBs in settlement of a fraudulent non-receipt or loss claim presented by the purchaser. The bond issuing agent is responsible, however, for making the initial effort to recover the replacement bond or restitution in money equal to the redemption value of the bond redeemed. The bond issuing agent shall notify the Treasury Department if unsuccessful in accomplishing recovery or restitution.

2310 SAFEKEEPING OF BONDS BY DFAS CENTERS

231001. Military Personnel. Active duty military personnel purchasing bonds through the payroll deduction plan (allotment) may designate bonds issued in their names as owners to be held in safekeeping by the supporting DFAS Center. The following procedures pertain to bonds maintained for safekeeping.

A. Site. At the request of active duty members, U.S. savings bonds may be accepted for safekeeping by the supporting DFAS Center maintaining the member's Master Military Pay Account.

B. Storage Facilities. Vault storage which meets the same security requirements for storage of Treasury checks shall be provided for the bonds. Where available, bonds may be held electronically via the "Book-Entry" system on the supporting DFAS Center's files.

C. Records. Records shall be maintained for each member showing the bond number (except Book-Entry), issue date, and denomination. For Book-Entry bonds, complete inscription data will be maintained on the file so that bonds may be issued on demand. At least once each year, a random inventory of bonds held in safekeeping shall be conducted. Bonds to be inventoried shall be selected using accepted random sampling techniques. Annually, each member with bonds held in safekeeping shall be advised of the number of bonds held by denomination, or notified that the information is available on request.

D. Retention of Bonds. Bonds shall be held for safekeeping only as long as the member is on active duty. The bonds shall be withdrawn from safekeeping at the time of separation, discharge, or retirement from active duty. The supporting DFAS Center shall notify the member to request release of the bonds held in safekeeping. Bonds not withdrawn from safekeeping 120 days from the date of separation, discharge, or retirement shall be forwarded for disposition to the Bureau of Public Debt, Division of Transactions and Rulings, 200 Third Street, Parkersburg, WV 26101.

★ E. Return of Bonds. Savings bonds shall be released to a service member upon receipt of a written request from the member. For bonds sent to the Bureau of Public Debt (including those sent before July 1, 1968), the Bureau will release those bonds upon receipt of requests and completed custody receipts which are sent to the members.

F. Death of Service Member. In the event of a service member's death, the bonds shall be mailed to the co-owner, beneficiary, or executor designated upon proof of entitlement to ownership. If no co-owner, beneficiary, or executor was designated, or if unable to locate the designated co-owner, beneficiary, or executor, the bonds shall be forwarded for disposition to the Bureau of Public Debt, Division of Transactions and Rulings, 200 Third Street, Parkersburg, WV 26101.

231002. Civilian Employees. Civilian employees are not eligible for safekeeping of bonds. Effective March 31, 1955, the Treasury Department ordered the FRBs to discontinue safekeeping civilian employees' bonds. The FRBs continue to hold those bonds received for safekeeping before that date until the owner requests release. For information write to the Bureau of Public Debt, P.O. Box 1328, Parkersburg, WV 26106-1328.

2311 SETTLEMENT WITH THE FEDERAL RESERVE BANK

231101. Preparation of Voucher. Monthly, or at other intervals as required by the FRB, the bond issuing agent shall prepare an SF 1049 for the total amount of all bonds issued. The voucher, certified as prescribed below, shall be charged to the deposit fund account **X6050. The original of each DD Form 1084; magnetic tape; all savings bonds spoiled in the process of issue; and any other documentation required by the servicing FRB shall support the original SF 1049 on which payment for the bonds is made. Copies of DD Forms 1084 shall be filed with the retained copy of the voucher. A Treasury check payable to the FRB in the amount of the voucher, together with the required accounting report, shall be mailed to the FRB. The bond accounting report shall be verified with DD Form 80.

231102. Certificate Executed by the Bond Issuing Agent. The certification attached to SF 1049 shall be as follows: "I certify that for each bond listed on the DD Forms 1084, enumerated below, the amount of the bond has been withheld from pay settled on vouchers taken into my accounts in the month(s) of (month(s)) and credited to **X6050, Employees' Payroll Allotment Account, United States Savings Bonds. Such bonds were purchased as follows: (number of bonds on each DD Form 1084 and dollar amount)."

231103. Report of Voucher Payment Number. The bond issuing agent shall furnish the following information in writing to each civilian payroll certifying officer who certifies payrolls and DD Forms 1084.

- A. The voucher number of the SF 1049 prepared for payment of bonds issued.
- B. The month the voucher was processed in the accounts of the DO.
- C. A citation to each DD Form 1084 included in the payment.

D. A quarterly listing of all DD Forms 1084 for which bonds have not been issued.

231104. Relief or Detachment of Bond Issuing Agent. A final accounting for savings bonds shall be made to the FRB by the bond issuing agent relieved or terminated from duty. The new bond issuing agent shall request certification from the servicing FRB and transfer of accountability for bond stock on hand. When a bond issuing agent is relieved, the relieved agent shall prepare a report to show the balance in the deposit fund account **X6050 up to and including the date of relief. A signed copy of the report indicating the name of the relieving agent shall be forwarded to the servicing DFAS Center. The original report shall be turned over to the relieving agent for use in preparing the monthly report. Any adjustments of a previous difference shall be reported in detail in the following month's report.

2312 REDEEMING SAVINGS BONDS

231201. General. DOs must receive written authorization from the servicing DFAS Center and the Treasury Department to redeem any U.S. savings bonds. This authorization shall not be given except under the most unusual circumstances. Requests for bond redemption authority shall be in writing and contain complete justification. In overseas areas where DoD contract banking facilities are not available, DOs may request authorization through their chain of command to the servicing DFAS Center. If the request is justified, the servicing DFAS Center will forward the request to the Treasury Department. Disbursing offices that currently have authority to redeem savings bonds are authorized to continue this service.

231202. Cashing of Bonds

A. DOs who have been authorized to redeem savings bonds shall do so according to redemption tables and procedures in Treasury Department Circular 750 (reference (b)).

B. Redeemed bonds shall be returned on a separate SF 215 per instructions provided by the FRB.

C. Upon discovery that an amount was paid above that authorized by the applicable redemption table, report the cash shortage as an increase on line 7.2B of the DD Form 2657 and attempt to recover the overpayment from the payee. If collection is made, prepare an OF 1017-G to document the collection and record the transaction as a decrease to line 7.2B and an increase to cash. If collection action is unsuccessful, process the shortage as a physical loss of funds as prescribed in Chapter 6 of this volume.

D. DOs are required to issue an IRS Form 1099-INT (Statement for Recipients of Interest Income), to recipients of \$10 or more of interest paid on redemption of savings bonds. The IRS Form 1099-INT includes the amount of interest paid, name, address, and Tax Payer Identification Number (TIN) of the person to whom paid, and other information

required by the IRS. The TIN usually is the bond holder's SSN. Do not cash a bond for an individual who refuses to furnish this number. Since individuals redeeming bonds may move by yearend, DOs should furnish the IRS Form 1099-INT to the recipient at the time of the transaction.

2313 SEMIANNUAL SAVINGS BOND REPORT

The DoD Component Military Personnel Commands or Centers are responsible for transmitting to the Treasury Department a savings bond operations summary, twice yearly, on the level of participation in the savings bond program. Twice yearly, DFAS Centers that are responsible for military payrolls and all civilian payroll offices shall provide the bond issuing agents with bond participation statistics on or before the 25th day following the end of each semiannual calendar period (March 31 or September 30). The report shall include the following:

- A. The pay period ending date.
- B. The unit identification code (UIC) and title of the reporting payroll office.
- C. The UIC and title of each employing activity.
- D. A column with the total number of active, full time, permanent employees only.
- E. A column with the number of employees enrolled in the payroll savings plan.
- F. The total dollar amount allotted for the purchase of Savings Bonds during the entire six-month period.

The above data should be provided separately for each geographical location (i.e., assigned location of the installation, station, base, or post) of the member or employee. After the report is completed, the bond issuing agent will send the report and summary by May 5 for the six-month period ending March 31, and by November 5 for the six-month period ending September 30, to the DoD Component Military Personnel Commands or Centers. A copy of the report and summary will be retained by the bond issuing agent for three years.

★2404 Government Purchase Cards

★2405 Plastic Card Collections

★2406 Lockbox Collections

★2407 On-Line Payment and Collection (OPAC) System

CHAPTER 24

ELECTRONIC COMMERCE2401 OVERVIEW

Electronic commerce (EC) encompasses a wide range of financial functions that are performed using data communications techniques to transfer information between one or more parties. A subset, called electronic data interchange (EDI) employs a prescribed format for data transfers that is structured per the guidelines of the American National Standards Institute (ANSI), Accredited Standards Committee (ASC). All elements of EDI shall use the DoD-adopted ANSI Standard No. X12 (reference (ah)). All EC transactions shall be properly authenticated. Authentication measures shall conform to ANSI Standard No. X9.9 (reference (ai)) or equivalent authentication techniques. Reference (ai) establishes a universally-applicable method to authenticate financial messages, including funds transfer, letters of credit, security transfers, loan agreements, and foreign exchange contracts that are transmitted by electronic means. DoD Component applications of electronic commerce that anticipate a recurring use of the Treasury Department's Fedwire System (Chapter 4-2500 of reference (m)) shall be coordinated with the supporting DFAS Center before formalizing arrangements with the Treasury Department.

★2402 ELECTRONIC FUNDS TRANSFER

★ 240201. Overview. The Debt Collection Improvement Act of 1996 mandates that federal payments be made via EFT no later than January 1, 1999. Currently, payments are made by the government either by check or electronic funds transfer (EFT). EFT utilizes the FRB and its computer network is used to deposit funds into the checking or savings account of a person or company. The FRB processes all EFT actions through the automated clearing house (ACH) network. The FRB also processes all ancillary transactions related to the original EFT transaction through the ACH network. Disbursing offices whose activities include payment of civilian payrolls, travel, and/or vendor invoices must be EFT capable by January 1, 1999. All participating disbursing offices shall execute a Memorandum of Understanding (MOU) with the FRB which details the operating parameters and procedures for the conduct of Direct Deposit and Vendor Express operations. Payment or payroll files may be transmitted to the FRB by either a magnetic tape or electronic file transmission. The actual method will be spelled out in the MOU.

★ 240202. Mandatory EFT. The following provides implementing guidance to administer the Department of Defense (DoD) financial policy for mandatory EFT of all federal payments. It applies to the United States, Puerto Rico, overseas locations (as defined in this volume), and afloat units (ships). Implementation of this policy for employees in bargaining units is subject to notification of the appropriate exclusive representative and the completion of applicable bargaining obligations.

A. General. Public Law 104-134, the Debt Collection Improvement Act of 1996, (Act) (reference (aj)) includes a provision pertaining to the expanded use of EFT. Generally, it requires that:

1. Within 90 days of enactment i.e., beginning July 26, 1996, all recipients newly entitled to federal payments (including contractors) must receive such payments by EFT. This provision will be waived if the recipient certifies in writing that he/she does not have an account with a financial institution or authorized payment agent.

2. By January 1, 1999, all recipients entitled to federal payments shall be paid via EFT. In support of this requirement, the Secretary of the Treasury is required to issue regulations including guidelines on how “unbanked” recipients will be accorded EFT services.

3. The Act applies to all categories of DoD payments. However, there are several specialized exceptions for mission essential payments.

B. Effective Date. These guidelines are effective immediately. The implementation of these procedures will be phased in based on development and fielding of automated systems.

C. Responsibilities

1. The Director for Finance, Defense Finance and Accounting Service Headquarters, through the Director for Financial Commerce, Office of the Under Secretary of Defense (Comptroller), shall:

a. Develop the Act’s Implementation Plan and the DoD Financial Electronic Data Interchange (FEDI) Customer Awareness Plan and coordinate these plans with the Department of the Treasury.

b. Coordinate the implementation of procedures for active duty and Reserve Component members, and civilian employees in appropriate military and civilian regulations.

c. Publish implementing procedures for military members and civilian employees.

d. Coordinate the presentation of issues to the Department of the Treasury and ensure that the issues are addressed properly in this regulation.

e. Coordinate the development and presentation of a proposed exception to the Department’s mandatory EFT policy to the Department of the Treasury for approval.

f. Prepare appropriate reports for submission to the Department of the Treasury.

2. The Deputy Director for Finance also shall ensure that DFAS Centers develop and provide periodic reports to DFAS-HQ/Finance (DFAS-HQ/F) which reflect EFT participation and furnish, at the end of each fiscal year quarter, to employing organizations, a listing, by organization, of military members and DoD civilian employees, paid by the DFAS, who do not participate in (receive their pay) via EFT.

3. DoD Component Personnel Directors shall:

a. Ensure accession agreements require use of EFT for new military accessions including those entering Officer Training Schools, Reserve Officer Training Corps, the Service Academies, and the Armed Forces Health Professions Scholarship Program.

b. For bargaining unit employees, ensure notification to appropriate exclusive representative(s) and the completion of applicable bargaining obligations prior to implementation.

c. Ensure new civilian employees are informed during inprocessing of the requirement to participate in the EFT program.

d. Ensure vacancy announcements advise applicants that selectees will be required to participate in EFT for all payments as a condition of employment.

e. Promote EFT enrollment. Employing activities are responsible for ensuring that their employees participate in EFT. In order to ensure that employing activities have the necessary information, a report will be furnished after the end of each fiscal year quarter, listing employees by organization who do not participate in EFT. (Employing activities are expected to campaign actively so that such individuals understand the benefits of, and enroll in EFT).

f. Implement procedures in appropriate personnel/pay and travel systems and issuances for military members and civilian employees.

4. Commanders/Directors of DoD Activities shall:

a. Ensure that all new personnel hired on or after July 26, 1996, are made aware of, and comply with, the mandatory EFT provisions.

b. Contact all “grandfathered” non-EFT employees to request that they use EFT. Inform them that the “grandfathering” period will end as of December 31, 1998. For bargaining unit employees, this contact must be consistent with the provisions of the Federal Service Labor-Management Relations Statute.

- c. Monitor EFT participation.
- d. Ensure that written waivers for all eligible employees are on file. Inform the eligible employees that this waiver will lapse as of December 31, 1998.
- e. Ensure reimbursements are made to military members and civilian employees who incur charges in the unlikely event that the Department fails to accurately and timely deposit payments in their EFT accounts when the government notifies military members and civilian employees of such payments pursuant to 10 U.S.C., sections 1053 and 1594 (reference (b)), respectively.
- f. Provide information for reporting purposes to DFAS Centers when so requested.

D. Contractor Pay Applicability

1. General. All contractor payments resulting from solicitations dated on or after July 26, 1996, shall be made by EFT unless excepted. Payments under earlier contracts ("grandfathered" contracts) are not subject to the statute. For example, if a company has four "grandfathered" contracts and accepts a new contract subject to the Act, only that new contract is subject to mandatory EFT payment; the others are not brought in by association. The exercise of options or the issuance of contract modifications on or after July 26, 1996, does not make a "grandfathered" contract subject to the mandatory EFT payment requirement of the statute. See 48 CFR Ch 1, et al. (reference (ak)).

a. If a DO is using a non-DFAS disbursing system or module that is not EFT capable, the DO shall notify the DFAS-HQ/FCD point of contact, through the supporting DFAS Center. The notification must include the following: a compliance plan including the date when the system/module will be EFT capable, the annual number of payments, the number of contractors/personnel serviced, or a migration plan to an EFT compliant system, and the date on which the migration will occur and the old system will no longer be used. The DFAS-HQ/FCD point of contact will compile all non-EFT capable system data and will present such information to the Department of the Treasury for consideration of a limited waiver. See subparagraph 240202.C.3.A, above, for notice to contracting offices.

b. The DFAS-HQ/F point of contact will notify the disbursing officer when there is an exception from mandatory EFT from the Department of the Treasury. All exceptions for non-EFT capable systems are for a limited duration, until a system is made EFT capable or the system lapses but under no circumstances will the exemption extend beyond December 31, 1998.

2. Exceptions

a. Payments made under contracts awarded by contracting officers located outside the United States and Puerto Rico. (See FAR, subsection 32.1101, reference (o).)

b. Payments made under contracts denominated or paid in other than United States currency. (See FAR subsection 32.1101, reference (o).)

c. Payments under classified contracts where payment by EFT could either compromise the safeguarding of classified information, or national security, or where arrangements for appropriate EFT payments would be impractical due to security considerations. (See FAR subsection 32.1101, reference (o).)

d. Payments made under contracts executed by deployed contracting officers in the course of military operations including, but not limited to, contingency operations (as defined in 10 U.S.C. 101(a), (reference (b))) or contracts executed by any contracting officer in the conduct of emergency operations such as responses to natural disasters or national or civil emergencies, where payment by EFT is not known to be possible or would not support the objectives of the operation. (See FAR subsection 32.1101, reference (o).)

e. Payments made by a DoD accounting or disbursing system which does not have EFT capability, and which system has been reported to the DFAS-HQ/FC point of contact in accordance with subparagraph 240202.C.1, above. See 31 CFR, Part 208.3(c) (reference (p)).

f. Notwithstanding the exceptions provided for above, where feasible, EFT should be used as the preferred method for making payments to contractors in those instances described in subparagraphs 240202.C.2.a, 240202.C.2.b, and 240202.C.3.d, above.

3. Procedures for Contractor Payments

a. The FAR (reference (o)) prescribes contract clauses for EFT and the policy for use of those clauses. Under the FAR, DoD DOs are responsible for notifying contracting officers of the EFT clause to be included in contracts to be paid by that DO. If the disbursing office will make payment by EFT, no further action is required by the disbursing officer; under FAR policy, the contract will require the contractor to submit EFT information as a condition of payment. However, if the disbursing office cannot make payment by EFT, then the DO shall seek guidance from the supporting DFAS Center and, in the interim, inform the contracting officer that contracts to be paid by that disbursing office shall contain the clause at subsection 52.232-34, FAR, (reference (o)) "Optional Information for Electronic Funds Transfer Payment."

b. The FAR clause provides exceptions from mandatory EFT payment at the disbursing officer's sole discretion.

c. In some instances, the commercial banking industry currently does not have a capability to provide their customers with the contractual remittance information transmitted with EFT payments. During this transition period, disbursing offices are required to assist contractors by offering remittance information through alternative media; e.g., mail, e-mail or EDI.

d. If a payment cannot be made to a contractor due to the absence of valid EFT information for that contractor, notify the contractor and request a valid EFT address.

E. Applicability to DoD Personnel

1. General. All personnel presently enrolled in EFT for wages, salaries, reimbursements, cash advances, or travel are required to continue participation in this program. In addition, on and after July 26, 1996, any personnel who meet the following requirements must participate.

a. Military members

(1) Active duty military members, to include those entering or reentering the Services.

(2) Reserve and National Guard members entering or reentering a Reserve Component (i.e., upon processing into their respective component, upon mobilization or recall to active duty). Mobilized or recalled personnel also are required to continue participation after demobilization or deactivation.

(3) Service Academy and Reserve Officer Training Corps (ROTC) Cadets and Midshipmen.

(4) Armed Forces Health Professions Scholarship Program Personnel.

b. DoD Civilian employees. The following groups of employees will have two pay periods after entering duty in which to designate one or more financial institutions or other authorized payment agents in which to deposit their net pay and savings/discretionary allotments, or request a waiver. Thereafter, all moneys payable will be held in suspense until either proof of EFT participation or waiver is received by the employee's Customer Service Representative (CSR).

(1) New civilian employees.

(2) Civilian employees who transfer between agencies (for this purpose “agency” is defined as a Military Service, a Defense Agency or a DoD field activity).

(3) Civilian employees who resume employment after a break in service.

c. Benefit Recipients. All benefit recipients who, on or after July 26, 1996, apply for the benefit being received.

d. Travel Payments. All travel payments for federal employees who travel, on or after July 26, 1996, and are otherwise entitled to receive travel reimbursement payments.

2. Exceptions

a. Active duty military members or civilian employees serving or residing in an overseas area (1) not serviced by the Department’s Overseas Military Banking Program or a Federal Credit Union sponsored by the Department, and (2) where EFT otherwise is not available, are excepted from this policy until they relocate to an area where EFT is available. However, this exception shall not apply if their pay is received in the United States or Puerto Rico, or at another location where EFT services are available.

b. Student workers, summer hire, seasonal, and on-call employees until their status is defined by the Department of the Treasury.

c. Temporary and term employees who are employed for a period of less than 6 months until their status is defined by the Department of the Treasury.

3. Civilian Employees Covered by Labor Agreements. EFT is mandated by the Debt Collection Improvement Act of 1996 (Public Law 104-134) (reference (aj)). However, management officials should notify union representatives of this requirement and give them an opportunity to discuss its implementation.

F. Retirees and Annuitants Applicability

1. All federal retirees and annuitants, residing in the United States, who apply for retirement or annuitant benefits on or after July 26, 1996.

2. For federal retirees and annuitants residing outside the United States, EFT should be used as the preferred method of payment to the maximum extent feasible.

G. Travel

1. Military members. Military members who travel on official business on or after July 26, 1996, automatically are covered by mandatory EFT for all future travel payments. “Cash advances” are also to be made by EFT.

2. Civilian employees. Civilian employees who travel on official business on or after July 26, 1996, automatically are covered by mandatory EFT for all future travel payments. “Cash advances” are also to be made by EFT.

3. Invitational Travel Orders. Military members and civilian employees traveling under Invitational Travel Orders are subject to the use of EFT for travel advances and travel claim settlement. Individuals using Invitational Travel Orders should make arrangements with the servicing disbursing office to facilitate travel payments using EFT.

4. Miscellaneous. When individuals (military and civilian) travel under orders citing funds of a DoD organization other than the funds of the organization to which they are assigned, then the traveler should make arrangements with the servicing disbursing office to facilitate travel payments using EFT.

H. Certification

1. General. Contractors, military members and civilian employees who certify in writing that they do not have an account with a financial institution or an authorized payment agent shall be granted a waiver to mandatory EFT payment. This waiver expires no later than December 31, 1998. Certification for net pay will not be permitted if a member or employee has allotments to the member’s or employee’s own personal account(s) being remitted via EFT.

2. Waivers. Certification waivers should be received by the appropriate authority, described below, and forwarded to the paying office:

a. For contractors, the waiver request shall be sent by the contractor directly to the payment office.

b. For military active duty members, waiver requests shall be sent to the unit commander.

c. For reserve members, waiver requests shall be sent to the unit commander.

d. For National Guard members, waiver requests shall be sent to the wing/group commander or equivalent.

e. For National Guard technicians, waiver requests shall be sent to the State personnel management offices through command channels.

f. For civilian employees (including National Guard civilian employees), waiver requests shall be sent to the appropriate authority and then to the Customer Service Representative.

3. Certification Procedures. The contractor, military member, or civilian employee wishing a waiver shall certify in writing that they do not have an account at a financial institution or an authorized payment agent.

4. Model Certification. “I certify that I do not have an account with a financial institution or an authorized payment agent. Signature:_____ Date:_____”

I. Enrollment Documentation for Military Members and Civilian Employees

1. Travel payments for all military members and civilian employees automatically will be sent to their payroll EFT account unless they designate a separate account for travel pay.

2. Individuals designating a separate EFT account for travel should use the SF 1199A or equivalent enrollment form directed by their servicing finance office.

J. Reimbursement of Financial Institution Charges

1. General

a. The following is not applicable to contractor payments under FAR (reference (o)) and DFAR (reference (al)) supplement contracts, which are governed by the specific terms of the contracts' clauses.

b. Charges by financial institutions resulting from erroneous information provided by the individual or the financial institution to the servicing finance office are not the liability of the government and will not be reimbursed. Reimbursement is authorized and limited to overdraft charges and minimum balance or average balance charges levied by the financial institution as a result of an administrative or mechanical error on the part of the government that causes pay to be deposited late or in an incorrect manner or amount pursuant to 10 U.S.C., sections 1053 and 1594 (reference (b)).

2. Procedures. When charges result from government errors, supporting DFAS Centers will contact the financial institution to explain the error and request that charges levied against the account holder be reversed.

a. If the financial institution declines to reverse the charges, government reimbursement of the charges will be made pursuant to 10 U.S.C., sections 1053(b)

and 1594(b) (reference (b)). Such reimbursement will be charged to the agency's appropriation that is available for the pay and allowances of their military members or civilian employees.

b. Letters will be provided to dishonored check recipients explaining that the dishonored check was caused by government error, not an error on the part of the individual.

K. Reporting Requirements. DFAS Centers will develop and provide periodic reports to DFAS-HQ/FCD which reflect EFT participation when so requested.

L. DFAS Implementation Point of Contact

1. The DFAS point of contact will assist the DoD Components with implementation of the Act. This includes assisting in the preparation of proposed EFT payment exceptions.

2. The DFAS point of contact is:

Defense Finance and Accounting Service
(DFAS-HQ/FCD)
1931 Jefferson Davis Highway, Room 401
Arlington, VA 22240-5291
(703) 607-5037

★ 240203. Pre-notification. Prenotification is the transmission of a zero dollar value transaction through the FRB/ACH network to a financial institution. This type of transaction serves to verify a payee's account information and the financial institution's ability to post a payment to the account.

★ 240204. Advance Reporting of EFT Disbursements. Since the Treasury Department's Financial Management Service (FMS) is solely responsible for the management of the government's daily cash position, large disbursements by EFT affecting the cash position shall be made known to the FMS in advance of the time of actual disbursement. The DFAS Centers must report in advance all U.S. military pay and all U.S. military retired pay made by EFT for the required payroll reporting periods. Pay totals should be reported as far in advance of the pay date as possible; however, a minimum of two business days advance notice is required. All DFAS Centers and other DoD Component installations making EFT payments to vendors are required to report these transactions daily to the FMS. Specific reporting requirements for large EFT disbursements (\$50 million or more), disbursements of military pay and military retired pay by EFT, and EFT payments to vendors are prescribed in section 1106 of this volume.

★ 240205. Procedures. Disbursing offices utilizing EFT shall transfer funds to the FRB by an SF 5515. The SFs 5515 are prepared and dated to show the date payment is due, and delivered to the FRB with the magnetic tape or other medium. The DO must implement

mandatory internal controls for confirmation that the FRB received the EFT payment files successfully and in accordance with the payment schedule. The DO shall retain the memorandum copy of the SF 5515. If the payment file is transmitted electronically to the FRB, the DO shall use the FRB's summary of ACH activity report in lieu of the SF 5515. In either case, the FRB will issue a confirmation SF 5515 to the DO. For an EFT transaction, the SF 5515 is recorded as a negative deposit with the payroll, travel, or vendor payment recorded as a gross disbursement.

★ 240206. Returned Payments. Whenever a financial institution returns one or more EFT/ACH payments to the paying office, the DO shall prepare and process a collection voucher to account for the funds that have been returned. The funds shall be credited to the appropriation from which the funds were originally disbursed. The collection will be recorded on line 4.1B of the DD Form 2657 (Daily Statement of Accountability). The offsetting entry on the DD Form 2657 will be on line 4.2A to account for the SF 215 (Deposit Ticket), generated by the FRB in processing the returned payment. The DO shall notify the appropriate entitlement area of the returned payment by provision of a copy of the collection voucher and any rejection information received with the reject; e.g., the reject code. A detailed listing of payment rejection codes are available in the Green Book, published by the Treasury Department. The entitlement area shall research the cause of the return and provide corrective information to initiate an appropriate EFT/ACH payment within 5 business days. This payment method will be EFT/ACH and shall not default to check. The DO shall also maintain a tracking mechanism to ensure that the entitlement areas take prompt action to resolve the EFT/ACH reject problem and return the correct documentation for payment.

2403 VENDOR EXPRESS

★ 240301. Enrollment in Vendor Express. Vendor Express is an electronic funds transfer program for vendors to receive funds due them for goods or services rendered to the government. Payment shall be via EFT vice a Treasury check. The Federal Acquisition Regulation (FAR) section 52.232-28 indicates that vendors will be paid by either FEDLINE or ACH, rather than by check, at the option of the government. The vendor shall obtain the SF 3881 (ACH Vendor/Miscellaneous Payment Enrollment Form) from the DoD Component activity with which it does business. The completed SF 3881 shall then be forwarded to the paying office for processing.

240302. Payment Date. Under the Vendor Express program, the payment date is the date of an EFT payment (settlement date). Payments made via EFT shall be made so as to be received by the vendor's financial institution by the established payment due date. The processing time required to have an EFT transaction reach a financial institution should be part of the MOU with the FRB. On Saturdays, Sundays, and legal holidays, when government offices are closed and business is not expected to be conducted, payments falling due may be made on the following business day without incurring late payment interest penalties.

★2404 GOVERNMENT PURCHASE CARDS

The official government purchase card is issued under a General Services Administration (GSA) firm fixed price requirements contract.

★ 240401. Payment. The purchase card provider reports are the official invoices for credit card purchases. To determine the payment due date and date on which interest will begin to accrue, the invoice shall be paid in compliance with the guidance contained in Volume 10 of this Regulation. Payment is due 23-30 days after receipt of the invoice in the designated billing office.

★ 240402. Responsibilities of the Disbursing Office

A. The disbursing office will receive an annotated and certified copy of each invoice from the approving official or, in the Air Force, the base financial service officer. The summarized charges are included on the official invoice along with any applicable Notices of Invoice Adjustment (NIAs). Cardholders' Statements of Account (SOAs), signed by both the cardholder and the approving official, and supporting documentation will be maintained by cardholders or by their approving officials.

B. The disbursing office will ensure that only transactions which have been certified for payment by approving officials or FSOs are processed for payment. Valid disputed transactions, for which NIA forms have been received, will be deducted from the official invoice. The NIA form must accompany payment to the credit card contractor in order that the total official invoice amount is accounted for. In mathematical terms, the payment amount is the net of the current charges minus any current credits and disputed items plus any prior disputed items approved for payment. Vendor Express is the preferred method of payment for the government purchase card invoices.

★2405 PLASTIC CARD COLLECTIONS

★ 240501. Overview. The Treasury Department established a government-wide plastic card collection network allowing federal agencies to accept credit (VISA or MasterCard) and debit cards (ATM Cards) subject to the provision of 31 CFR 206, from the public (vendor, member, and employee) for the collection of moneys due from sales, services, fees, fines, and debt repayment. DoD Activities interested in accepting credit and debit cards should obtain applications supporting DFAS Centers which obtain forms from network banks or the Financial Management Service (FMS). A completed application will be sent to FMS via the supporting DFAS Center, to be analyzed against the objectives shown in I-TFM 5-4730 (reference (m)). Once the application is approved by the FMS, Agency Participation Agreements for either credit cards, debit cards, or both must be signed by the DoD Activity and the network bank. The agreement then must be forwarded to FMS for the final signature. An Agency Participation Agreement documents an agency's participation in the Master Agreement and outlines terms and

conditions for DoD activity acceptance of credit or debit cards. This agreement is a binding document between the activity, the network bank, and FMS, and must be signed by the FMS before the FMS can pay for agency credit or debit card services. The FMS will maintain the signed copy in its files. If the application is approved, the activity will work with the network bank to construct a customized implementation plan. The plan will include: DoD activity profile (type of collection, potential volume, collection method (mail, phone, etc.)); information on activity locations (addresses/contact points); type of services (credit card, debit card, or both); training; follow-up program for quality assurance; technical specifications on equipment; equipment to be purchased by the activity for the network bank; implementation timeline milestones; and special handling procedures.

★ 240502. Types of Credit and Debit Card Collections. Subject to the provisions of 31 CFR 206 (reference (p), DoD activities can accept debit and credit cards for various collection activities. DoD activities that have more than 100 monthly credit card transactions must perform electronic authorization. Voice and paper authorizations of credit card transactions should be used on an exception only basis as a backup to electronic authorizations. Every transaction must be authorized, and activities should work with the network bank to determine the most appropriate authorization technique. Voice and paper authorizations of credit card transactions should be used on an exception only basis as a backup to electronic authorizations. If an activity is not performing the authorization properly (by procedure), all costs above the agreed upon method will be assessed to the activity. Some examples of collection actions that credit and debit cards can be used for are: sales of miscellaneous items, medical services, freedom of information requests, inspection or grading services, commodity sales, fees and fines such as inspection fees, criminal, civil and court fees and fines, recreation user fees, duties, patent fees, registration fees and license fees and debt repayment for extending loss for housing, education, health care, agriculture and business, repaying duplicate benefits, travel advances repayments, and other administrative collections.

★ 240503. Compensations/Agency Expenses. When funds are deposited to the General Fund and not withdrawn for investment, FMS will pay the costs for processing each debit and credit card transaction, all per-transaction-call charges assessed by the network bank for authorization and settlement, chargeback assistance, deposit reporting through the CASH LINK system, training arranged with network banks in the "train the trainer" format, supplies from the network bank to include sales drafts, imprinter plates and promotional items and deposit reports. Costs paid by agencies will include: equipment (computer, modems, imprinter, electronic data capture/point of sale (EDC/POS) terminals with printers, personal identification number (PIN) pads and software), standard voice-grade telephone line installation and charges, dedicated lines, any international authorization/settlement charges above domestic charge rates paid by FMS, costs incurred by the failure to perform electronic authorizations (by procedures), extra services beyond those specifically defined and priced in the Master Agreement, including detailed training beyond "train-the-trainer" and customized reports.

★ 240504. Processing Transactions. The FMS strictly prohibits holding credit card deposits above the daily \$5,000 limit. DoD activities should not accumulate daily receipts of

more than \$5,000 after the network banks daily cutoff time if they are operating in a paper sales draft settlement mode. If the activity is operating in an electronic data capture (EDC) mode, it must settle on a daily basis, regardless of the amount accumulated that day. Activities will pay the assessed non-qualifying interchange fee if they fail to settle electronically every day. Each network bank informs the activity of its particular cutoff times for deposits. In an electronic environment, this means a settlement transaction should take place through an EDC/POS at various times during the day (or once at the close of business) in order to meet the cutoff time for deposits.

★ 240505. Reports and Reconciliation. Based on the report requirements established in the participation agreement with the network bank, weekly or monthly summary reports of the merchant's credit card activity will be mailed or electronically transmitted by the network bank to the participating DoD activity (merchant). The summary will detail dates of deposits, dollar amounts of deposits, number of transactions processed, adjustment charges, and chargebacks. This report shall be used to reconcile any differences which may occur between the report and entries into the accounting system. The report shall also be reconciled with the DD Forms 1131 submitted to the DO or deputy. Any adjustments or chargebacks shall be processed and documented in accordance with the credit card participation agreement.

★ 240506. Internal Controls. Internal control procedures shall be established by each participating DoD activity to ensure that credit card transaction documentation to support all DD Forms 1131 submitted to the DO is properly safeguarded. Documentation shall be available for use by the DO's quarterly cash verification board, the collection agent audit board, and for other audit purposes.

★2406 LOCKBOX COLLECTIONS

240601. Overview. A lockbox is a collection and processing service provided by a financial institution (typically a bank) that accelerates the flow of funds to the TGA at the FRB New York. This service includes collecting a lockbox agency's mail from a specified post office box, sorting, totaling, and recording the payments, processing the items, making the deposit, and forwarding lockbox remittance data either in hard copy or electronic format to the lockbox agency. The FMS has exclusive authority to contract for lockbox services with selected banks and the participating DoD activities. Activities are prohibited from entering into new contractual agreements, modifications of existing contracts, or renewal of existing contracts without the prior approval of FMS. Compensation to the selected banks for specified lockbox services is provided by the Treasury Department. There are three types of lockbox services available to participating activities: retail, wholesale, and electronic.

A. Retail Lockbox. A retail lockbox uses optical character recognition, machine-readable coupon-type payment documents for automated processing. This type of lockbox is best suited for low dollar, high annual item volume payments. High speed equipment captures specific information from the invoice and the check and stores it in electronic form on

tapes or disks. The accounting information can be captured and passed via computer-to-computer link from the lockbox bank to the participating activity.

B. Wholesale Lockbox. A wholesale lockbox involves the manual processing of traditional invoice documents and is best suited for high dollar, low annual item volume payments. Once received at the lockbox site, these payment documents are processed using key entry to capture accounting information. The accounting information can be transmitted via computer-to-computer link or in hard copy from the lockbox bank to the participating activity.

C. Electronic Lockbox. An electronic lockbox is either a wholesale or retail lockbox that processes transactions electronically. The remitter can provide payments through ACH, by wire transfer, or with paper check. Electronic lockboxes collect and deposit all three. The accounting information can be captured and transmitted via computer-to-computer link, magnetic tape, or in hard copy from the lockbox bank to the activity.

240602. Criteria for Participation. The use of the lockbox mechanism as a collection option requires: collections of \$1 million or more average monthly dollar volume; recurring and non-recurring, fixed and fluctuating transactions; and approval must be obtained from the servicing DFAS Center to implement a lockbox operation.

240603. Lockbox Implementation. Generally, a lockbox application is identified through cash management reviews and audits. DoD activities desiring to use lockbox services should contact the Cash Management Division, FMS through the supporting DFAS Center, and provide an updated cash flow review consisting of current collection practices and deposit information. The FMS and the DoD activity jointly will complete a cost-benefit analysis to determine: the total days of float in the activity's current collection system and the lockbox system; the costs (including float) associated with the activity's current collection system and the lockbox system; and the optimal sites within the lockbox network to process the activity's remittances. If the lockbox is considered to be cost beneficial, the FMS will select a network bank for the activity to implement lockbox services. Activities utilizing lockbox collection services (billing activity) shall enter into a MOU with FMS and the lockbox bank designated by FMS. The MOU will incorporate the terms and specifications for the lockbox services to be provided to each billing activity that will provide the necessary information pertinent to internal controls and the Treasury Department's financial regulations and reports. Recommendations will be made for an alternative collection mechanism when a lockbox application is not viable.

240604. Lockbox Collection Process

A. Lockbox Payments. The designated lockbox bank will assign a unique post office box number to the billing activity to facilitate receipt and processing of collections. The billing activity shall advise remitters to mail payments and associated remittance documentation directly to the assigned post office box number. The bank picks up the mail several times daily and processes the remittances according to the activity's instructions. On the

following business day, the bank transfers the funds by wire or ACH to FRB New York with credit to the DO's DSSN designated in the MOU. The bank will issue an SF 215 for the daily deposit. The confirmed copy of the SF 215 and an Advice of Deposit will be forwarded via First Class mail to the disbursing office. The DO shall prepare a DD Form 1131 crediting the lockbox deposit to **F3875, Budget Clearing Account (Suspense), pending receipt of an SF 1080 from the billing activity citing the appropriation(s) to be credited. The DD Form 1131 and SF 215 shall be reported on the DD Form 2657 as a Reimbursement (line 4.1E) and a Deposit (line 4.2A).

B. Lockbox Documentation. The bank will forward via overnight delivery the agency and/or memorandum copy of the SF 215, an Advice of Deposit, and all supporting remittance documentation received in the lockbox to the billing activity. Upon receipt of the deposit documentation, the billing activity shall reconcile the remittance documentation against the dollar amount indicated on the accompanying SF 215 and Advice of Deposit. Within five (5) work days of receipt of the documentation, the billing activity shall prepare an SF 1080 for the SF 215 and forward it to the DO designated on the SF 215. The SF 1080 shall furnish complete collection information and accounting data, as appropriate (receiving activity, date of receipt, remitter, purpose of remittance, the complete accounting citation(s) to which the collection is to be credited, the contract number(s), contract line item number(s), sub-line item number(s), and accounting classification reference number(s) for each remittance included in the SF 215 total). The disbursing office shall complete the "Office Charged" portion of the SF 1080 by charging **F3875, Budget Clearing Account (Suspense), assigning the voucher number, and processing the voucher as a disbursement and a collection. The SF 1080 shall be recorded on the DD Form 2657 as a Gross Disbursement (line 4.1A) and a Reimbursement (line 4.1E).

C. Lockbox Debits. The bank will issue an SF 5515 to the DO to process a decrease resulting from duplication of a deposit, dishonored checks, or adjustments to deposits erroneously credited. The bank will forward dishonored checks with the SF 5515 for processing.

★2407 ON-LINE PAYMENT AND COLLECTION (OPAC) SYSTEM

★ 240701. Applicability. This section describes the OPAC procedures for simultaneous on-line billing and collection of intergovernmental transactions between federal agencies. This includes the use of OPAC's two subset systems: the Federal Tax Deposit System (FEDTAX) and Retirement Insurance Transfer System (RITS). This section also identifies general requirements and technical specifications prescribed by the Treasury Department. The OPAC system will be used at DFAS Centers and Operating Locations (OPLOCs) for transactions with other federal agencies and to transfer funds between DFAS Centers and OPLOCs.

★ 240702. Background. The OPAC system, which is a component of the Government On-Line Accounting Link System (GOALS), establishes a standardized interagency billing, transfer and adjustment procedure via a telecommunications network. If initiated by the billing agency (i.e., a collection), the transaction provides essential invoice information and immediately charges the funds to the 8-digit customer agency location code (ALC). Within the Department, the 8-digit ALC is the 4-digit DSSN preceded by 4 zeros. Upon fulfilling the

customer agency's order or requisition for services purchased or supplies shipped, immediate payment is accomplished by the billing agency crediting its own ALC and charging the customer agency's ALC. A transaction initiated by the customer agency (i.e., disbursement) is used to credit funds of the billing ALC when a hardcopy invoice is received or to transfer payroll deduction type payments (e.g., Internal Revenue Service or Veterans Education Assistance Program). The OPAC system accomplishes the following: (1) eliminates receivables; (2) eliminates the paper flow between agencies; (3) eliminates the use of Treasury checks between agencies; (4) improves cash management; and (5) establishes the Treasury Department as the collection agency.

★ 240703. Originating the Intergovernmental Transactions

A. Initiating the Order. The customer agency must include its ALC on all requisitions or order forms forwarded to the billing agency. This code identifies the customer agency to be billed for services or supplies. The billing agency will provide the customer agency with appropriate instructions for transmitting this information. In addition, the customer agency is advised to include sufficient descriptive information on the requisition or order form which the billing agency will place in the description section of the bill. This will enable the customer agency to match the bill with the originating requisition when the bill is received on the customer's computer system. The primary match will be on the originating document number. OPAC was not designed to be dependent on appropriation data as a criteria to match an existing obligation since the Treasury Department transfers funds at ALC level.

B. Initiating the OPAC Transaction. The transactions can be input manually into the on-line system or created automatically by DFAS accounting or disbursing systems for off-line bulk data transfer or host-to-host transmissions. Specific instructions for logging onto the on-line OPAC system are provided in the OPAC Users Manual. The system is menu driven and user-friendly. The system automatically will issue an OPAC Document Reference Number that is the equivalent of a U.S. Treasury check number and ensure that no two transactions have the same number. Whether on-line or off-line bulk data transfer, the transaction originator must include a point of contact and telephone number to ensure the receiving agency can accurately determine the need for adjustment. A collection or disbursement voucher (e.g., DD Form 1131, SF 1080 or SF 1034) shall be prepared for each bill or payment entered in the system and processed through the DO in the same manner as other vouchers except that no check or cash payment is sent or received.

C. Transmitting/Receiving an OPAC Transaction. The Treasury Department system is updated overnight commencing approximately 6:00 p.m. Eastern time. The receiving agencies on the OPAC system can print out their activity at their site the day after the transactions are entered into the system. The Treasury Department also provides a monthly activity report, available for downloading during the first 5 workdays of the following month, to assist the ALC in ensuring all transactions are accounted for on the current month SF 1219. ALCs receive a microfiche of these transactions for historical records approximately 1 month after the month in which the transactions were processed.

★ 240704. Processing Cycle. Agencies have through the last day of each month to enter bills or transfers for that month; however, it is recommended that agencies hold off originating new transactions the last two workdays of the month to avoid month-end accounting problems. Refer to Chapter 19 of this volume for instructions on reporting prior month OPAC transactions that are processed in current month accountability. Only the receiving agencies have 90 days to enter adjustments.

★ 240705. Recording OPAC Transactions. The transaction is recorded on lines 2.8 and 4.1 (A or E, as applicable) of the DD Form 2657 and on the SF 1219. If a hardcopy SF 1219 is used, cross through line 2.39 and replace with 2.8. Refer to Chapter 19 of this volume for instruction on preparation of these forms. At the end of each month, both the customer agency and the billing agency must also report the applicable appropriation or fund symbol amount for all original transactions and adjustments on its DD Form 1329 (Statement of Transactions).

A. Monthly Reporting of Differences by the Treasury Department to Agencies. The Treasury Department will compare the customer and billing agencies' SF 1219 with the OPAC data. If there is a difference, an FMS Form 6652 (Statement of Differences, Disbursing Office Transaction) will be generated. This statement is prepared by the Treasury Department on a monthly basis and provided to each agency's departmental reporting office. Also accompanying the FMS Form 6652 will be a "Monthly Register of Transactions," which gives a detail of all transactions charged against a particular ALC. Agencies will investigate the differences and make the necessary corrections on their next SF 1219. All differences that have not been reconciled within six months from the date of the initial transaction shall be considered as losses or overages of funds as prescribed in Chapter 6 of this volume. Corrections reported in months subsequent to the month in which the error occurred are reported as separate 2.8 lines on the SF 1219. For example, an amount reported erroneously in January is corrected in the February accounting month. The February SF 1219 will have two 2.8 lines: one for the net total of transactions processed in February and one for the January corrected amount.

B. End of Fiscal Year Reporting by OPAC Customer Agencies. OPAC charges to the customer agency's ALC will be reported to the applicable appropriation or fund symbol for the fiscal year to which it relates. If, at the end of the fiscal year, a customer agency does not have sufficient time to determine the amount of an adjustment for its regular monthly reporting on the SF 1219, the agency should include the erroneous charge to its regular appropriation or fund symbol.

1. These erroneous charges do not constitute overobligations or overexpenditures with respect to 31 U.S.C. 1517, the Anti-Deficiency Act (reference (e)). Agencies should footnote FMS Form 2108 (Year-End Closing Statement) to indicate those cases that would appear to overexpend the symbol charged.

2. When the amount of the adjustment is determined, a refund receivable account should be established in its regular appropriation or fund symbol for year-end

reporting on the FMS Form 2108. Such receivables should be cleared in the subsequent fiscal year by adjusting the amount to the OPAC billing agency and crediting the appropriation or fund symbol charged on its regular monthly reporting on the SF 1219.

C. End of Fiscal Year Reporting by OPAC Billing Agencies. On the FMS Form 2108, the OPAC billing agency will establish and report an accounts payable for an amount equal to the amount of adjustments against the related appropriation or fund account of the OPAC billing agency.

★ 240706. Adjustments of Erroneous Charges. Both the billing and customer agencies should recognize that the system cannot tolerate uncontrolled charges or adjustments. The adjustment should not be used to adjust charges that originated under other billing systems. A charge should also not be considered erroneous simply because the customer agency receives the paid billing statement before supplies are received. Federal agencies are exempt from this requirement under 31 U.S.C. 1535 (reference (e)). If the receiving agency subsequently finds that the transaction was erroneous, the adjustments should be made at that time; however, the receiving agency is limited to three months, upon receipt of its OPAC statement, to process the adjustment.

A. First, the agency representative that created the original transaction should be contacted. If the transaction is erroneous, the receiving agency will access the OPAC on-line system and make the menu selection for OPAC adjustments. The OPAC system will guide the user with prompts. The user will enter all pertinent data as requested. The OPAC system contains edits to ensure that the original transaction is matched. Once the data is entered correctly, the system will issue an OPAC Adjustment Voucher Number unique to each transaction. Adjustments are considered a new transaction for reporting purposes and included in the net totals for month in which the adjustment is accepted in OPAC.

B. In cases where the originating agency later concludes that the adjustment (or a portion thereof) was improper, it must communicate this to the receiving agency, preferably by telephone. When agreement is reached, a second OPAC transaction will be prepared for the proper amount.

★ 240707. Basic Criteria to Access the OPAC System. In order for billing and customer agencies to use the OPAC system, the following are required:

A. A personal computer (PC) with modem (or modem access through a local area network (LAN)) and auxiliary 80-character minimum printer within the disbursing office for transmission and receipt of OPAC transactions. The PC should be "IBM compatible" and contain a 386 or higher level processor. The modem speed should be 9600 Baud or greater.

B. The Treasury Department must assign each ALC an ID and password that will enable access to the system. The Treasury Department also requires the ALCs of the corresponding agencies from which the transactions will originate or be received. The Treasury

Department encodes this information into a table to ensure transactions are not erroneously input for agencies without a prearranged agreement to accept such transactions.

★ 240708. Treasury Department GOALS Agreement for Reimbursable Services. The Treasury Department charges for DFAS use of GOALS have been consolidated for payment by the DFAS-Columbus Center. The agreement supersedes all previous agreements independently written by the DFAS Centers. The GOALS charges also now include operating costs for OPAC, FEDTAX, and RITS. The agreement covers all current DFAS GOALS and OPAC users and any new OPAC users established at the OPLOCs.

A. Each DFAS Center is responsible to budget for its portion of the bill to include the Center's disbursing office, the OPLOC disbursing offices under its control, and any departmental accounting office use of GOALS, if applicable to that Center. The budget is reported using the general fund 97X4930 with an information copy provided to the DFAS-Columbus Center for incorporation in the annual agreement with the Treasury Department.

B. The procedures for posting OPAC bills are as follows:

1. Monthly, all GOALS and/or OPAC users will print the GOALS Monthly Billing Statement and forward a copy to the servicing DFAS Center's Defense Business Management System (DBMS) liaison office. The report can be obtained by selecting item 6, GOALS Administrative Information, on the GOALS menu. The charges generally are available on GOALS by the 24th of the month following the month in which the costs were incurred.

2. The Center liaison office will record the obligation in DBMS and forward a copy of the report by fax to DFAS-CO/FQAS. Also, the liaison office should confirm with DFAS-CO/FQAS, as soon as possible, the proper Center account number that the DFAS-Columbus Center should charge when the bill is received from the Treasury Department.

3. The Treasury Department will charge one amount using the general fund 97X4930 for DFAS-Columbus Center ALC 00006551. In turn, the DFAS-Columbus Center will process a transaction by others (TBO) for each Center's designated account. The TBO charge will cover each Center's portion of the charges to include any costs incurred by an OPLOC under that Center's authority.

★ 240709. Restrictions. The Treasury Department reserves the right to (a) make any adjustments centrally in Treasury's Central Accounting System and (b) to remove any agency from OPAC in those instances when the agency fails to comply with the rules and regulations set forth by the Treasury Department.

TABLE OF CONTENTS

★ CHAPTER 25 QUESTIONABLE AND FRAUDULENT CLAIMS

★2501 Advance Decisions

2502 False, Fictitious, or Fraudulent Claims

★2503 Claims Against the Government

CHAPTER 25

★ QUESTIONABLE AND FRAUDULENT CLAIMS★2501 ADVANCE DECISIONS

250101. Claims. Any claim presented for certification or payment that the certifying officer or DO believes to be illegal or improper should not be certified or paid. This section identifies the authority available to the certifying officer or DO to refuse to make such certifications or payments and the procedures to follow when such refusal becomes necessary. Refusal to make certification or payment is an undesirable procedure when it is based solely upon lack of knowledge or the unwillingness to ascertain the proper course of action from the proper authority.

250102. Application for Decision

★ A. Authority. Under Title 31, United States Code, section 3529, (reference (e)), a certifying officer or a DO may request an advance decision on the propriety of any prospective payment. Appendix E provides the offices responsible for issuing the advance decisions. This statute does not provide for the rendering of decisions on questions of law pertaining to payments that have already been made or upon hypothetical cases.

★ B. Content. The statute requiring an advance decision be rendered contemplates a presentation to the Comptroller General or any other official authorized (see appendix E) to issue an advance decision under 31 U.S.C. 3529 (reference (e)) when the question is one of law, of all the material facts necessary for its determination. When the question is one of fact, it contemplates a presentation of all the material evidence obtainable by the officer making the request. The specific point upon which the decision is desired and the reason for requesting the decision shall be stated. The document in question, appropriately certified, shall be made an enclosure to the request. As a general rule, decisions are rendered only when the request is accompanied by a specific claim or voucher (legible copies are acceptable).

★ C. Forwarding of Requests. Requests for advance decisions regarding military members' pay, allowances, travel, transportation, retired pay and survivor benefits through the requesting certifying or disbursing officer's chain of command, the servicing DFAS Center, and DFAS General Counsel. DOs and certifying officers under the cognizance of the DFAS-Columbus Center shall submit their requests through their chain of command and the Columbus Center, regardless of the applicable DSSN assigned. Prior to forwarding a request to DFAS General Counsel, Center Directors shall ensure the case file includes the legal review mandated by DFAS Regulation 005 (reference (am)). Requests for advance decisions for other disbursements must be submitted through the chain of command to the appropriate office as outlined in appendix E.

★ 250103. DFAS Actions. Cases involving entitlement questions that clearly appear to have been authoritatively decided may be returned to requestors by the DFAS Centers or by DFAS General Counsel with advice that an advance decision is not necessary. An entitlement interpretation from anyone other than the sources identified in appendix E, however, does not remove pecuniary liability for illegal, incorrect, or improper payments. Therefore, DFAS Center and DFAS General Counsel responses shall indicate the advisory nature of their responses and shall advise requestors that resubmission may be made through the servicing DFAS Center. Certifying officers and DOs may rely on written decisions from the DFAS Centers, authorized by DFAS Regulation 005 reference (am), to settle cases of \$100 or less on the uses of appropriated funds. Decisions rendered under this procedure will be considered as conclusive in the settlement of accounts. A copy of the memorandum containing such a decision shall be attached to the voucher.

★ 250104. Decisions Rendered

★ A. Payment in Question. An advance decision is conclusive only as to the particular payment involved in the question presented. A statement made by the responsible office in an advance decision upon a statement of facts submitted, which is broader than the stated facts rendered necessary, is not binding in the settlement of the accounts.

★ B. Affecting Other Payments. An advance decision rendered in a particular case takes effect from its date, but the principles enunciated in decisions of the responsible office are applicable to all cases arising under the statutes, whether occurring before or after the date of the decision. A new construction of the law, contrary to former rulings, applies to disbursements and computations made subsequent to the date of such decision, or to the date of receipt of notice of such decision, provided reasonable diligence was exercised to obtain notice.

2502 FALSE, FICTITIOUS, OR FRAUDULENT CLAIMS

250201. Determination of Fraud. It is difficult to prescribe exact rules for determining the existence of fraud or misrepresentation, since the question of whether fraud exists depends on the facts in each case. Although it is the claimant's responsibility to complete a claim accurately in order to ensure proper payment, it may not be assumed automatically that the claim is fraudulent simply because it is not prepared according to the requirements of publications such as the Joint Federal Travel Regulations or the Joint Travel Regulations.

A. Many innocent mistakes are made in the completion of claims, and not every inaccuracy on a claim form should be equated with an intent to defraud the government. Where discrepancies are minor, small in total dollar amounts, or where they are infrequently made, a finding of fraud normally would not be warranted, lacking the most convincing evidence to the contrary. However, such errors should be discussed with the claimant and corrected.

B. Where discrepancies are glaring, involve great sums of money, or are frequently made, a finding of fraud more readily could be made, lacking a satisfactory

explanation from the claimant. The DO, in ensuring the propriety of all payments made, is primarily responsible for determining the existence of fraud. For example, in 57 Comp. Gen. 664 (reference (an)), the Comptroller General ruled that, in connection with a claim for travel expenses containing items based on fraud, only those items free of fraud may be paid. Examples of individual items claimed on a single travel claim include transportation for each leg of travel performed at the traveler's expense, lodging expenses, and each miscellaneous expense incurred. Per diem allowance is divided into three separately distinct categories (lodging, meals, and incidental expenses). For any day on which a claimant submits a fraudulent lodging receipt, the claimant forfeits the lodging portion of the per diem allowance for the day or days that the lodging receipt represents. If a meal or an item of incidental expense for a particular day is fraudulently claimed, the meal or incidental allowance portion of per diem for that day shall be denied. Payment of per diem allowances for other days that are not supported by a fraudulent lodging receipt, or for other expenses not tainted by fraud, may be made. This rule applies whether per diem is computed on an actual expense basis or under the lodging plus a fixed fee basis. The average cost of lodging, when applicable, shall be computed by assigning a value of zero to those days for which a fraudulent lodging receipt is submitted. The pro rata share of per diem for the day of return from travel shall be computed on the same basis. When making final settlement on a travel claim, for which partial payments have been made on the basis of fraud, the amount of earned entitlements for the entire period of travel shall be computed by disallowing any items based on fraud. If the total entitlements thus computed are less than the amounts previously paid, the difference shall be recouped from the claimant. Similar procedures shall be followed upon final settlement of travel claims on which advances have been paid. If, after disallowing all fraudulent items, the remaining entitlement is less than the amount of the advance, the excess advance shall be recouped.

★ 250202. Required Action When a Suspected Fraudulent Claim is Presented for Payment. When there is reason to suspect that a claim presented for payment contains fraudulent information, the DO shall request his or her commander to initiate an investigation into the suspected fraud. The requirement to request the commander to initiate an investigation applies regardless of the dollar value of the suspected fraud. Arrangements shall be made to provide the DO with a copy of the completed investigation. Unless otherwise directed by the investigating office, the DO shall retain the claim and all supporting documentation for possible use in any disciplinary action taken by the claimant's commander. An ultimate finding of fraud is not dependent upon legal or disciplinary action. Primary responsibility for that determination rests with the DO but only when concurred with by legal counsel.

A. If, in the opinion of the DO, the investigating office's report does not support a finding of fraud, payment shall be made for all amounts to which the claimant is entitled. No further action need be taken, but the DO should document the reasons for the determination. The DO may be called upon from time to time to furnish this documentation in order to provide an indication of whether the guidelines are being uniformly applied throughout the DoD.

B. If, in the opinion of the DO, the investigating office's report confirms that some items of the claim are fraudulent, payment of those items free of fraud may be made. Once payment has been made for that portion of the claim free of fraud, if the claimant then protests the determination of fraud and insists on payment of the entire claim, the claimant may submit a new claim for the items denied because of fraud. The DO shall process the reclaim for the items denied as prescribed in paragraph 250205, below.

250203. Required Action When It Is Discovered That a Fraudulent Claim Has Been Paid. If, after payment of a claim, the DO discovers or is provided information suggesting that a claim was paid based on fraudulent information or documents, the DO shall review the retained copy of the claim to determine whether the claim was tainted with fraud.

A. If the claim remains suspect, the DO shall request his or her commander to initiate an investigation. The requirement to request an investigation applies regardless of the dollar value of the suspected fraud and includes illegal, incorrect, or improper payments made as a result of issuing recertified payments where the payee negotiated both the original and the recertified check. Arrangements shall be made to provide the DO with a copy of the investigative report.

B. In accordance with the requirements of the GAO, a report by the DO shall be made to the servicing DFAS Center upon initial disclosure that an illegal, incorrect, or improper payment has been made on the basis of fraud. The report shall contain a basic statement of the irregularity, date, amount, and identification of the individual(s) involved. Upon completion of final action (recoupment, investigation, etc.), a second report shall be forwarded.

An ultimate finding of fraud is primarily the responsibility of the DO, who shall utilize the criteria in paragraph 250201, above, in making a decision. If, in the opinion of the DO, the report of investigation does not support a finding of fraud, repayment shall be made for all amounts recouped from the claimant, if otherwise entitled, and this information shall be included in the second report. If, in the opinion of the DO, the report of investigation confirms that some or all items of the claim are fraudulent, no repayment of those items recouped may be made and the second report shall contain a citation of the applicable contract number (or travel order number, etc.), voucher number, date of payment, appropriation charged, and a description of the supporting documentation; a description of how the fraud was committed; a description of procedural deficiencies in the disbursing office, if any, and the action taken to correct the deficiencies; and, information as to recoupment effected or contemplated from the recipient of the payment.

D. Except under unusual circumstances, reports shall not be classified or made in message form. No report is required if the fraud is detected prior to any payment being made. Should a claim in the form of a reclaim be received for any part or all of the amount recouped because of an illegal, incorrect, or improper payment of any voucher item obtained by fraud or misrepresentation, such reclaim shall not be settled by the DO, but shall be processed as

prescribed in paragraph 250205, below. In no case shall submission of the reclaim or recoupment of amounts paid be deferred pending final determination on the claim.

250204. Corrected Claims. When it is established, or it reasonably appears, that a claimant has submitted a fraudulent claim and, upon discovery of the fraud, the claimant submits a corrected claim for those items previously suspected of being fraudulent, this subsequent claim shall not be paid by the DO. However, if the claimant persists in having the claim processed, the claim shall be processed as prescribed in paragraph 250205, below.

★ 250205. Reclaims of Items Disallowed or Recouped Due to Fraud. The DO shall forward reclaims of items disallowed or recouped due to fraud to the appropriate responsible office as identified in Appendix E through the DO's chain of command. If the entire claim was denied, the original claim shall be submitted. The completed claim shall be accompanied by a covering letter or memorandum from the DO stating specific information as to why the claim is considered fraudulent, and the statement: "I have not made payment and will not make payment in the future unless authorized by competent authority"; the original and 2 copies of all supporting documents and the orders with all endorsements if travel is involved; a copy of the payment voucher on which payment was made for the items free of fraud, if applicable; a copy of the report of investigation; and a statement by the claimant supporting the claimant's belief that the claim is not fraudulent. A statement by the claimant's commander may be submitted at the option of the claimant. By endorsement to the DO's letter or memorandum, the DO's commander shall state an opinion on the case either in support of the DO or of the claimant.

250206. Accountability for Amounts Paid Due to Fraud. Most instances of fraud occur when a military member or civilian employee, whose identity clearly is established, submits a claim containing information known to be false. On some occasions, payments are made to individuals whose true identity cannot be determined. In some cases, a fictitious name is used by the individual committing the fraud. In other cases, the name of an actual military member or civilian employee may be used. In any of the above situations, an occurrence of this nature shall be reported and investigated as prescribed in Chapter 6 of this volume as an irregularity in the DO's account. The DO shall account for an irregularity caused by fraud, as appropriate, for the situations described in the following subparagraphs.

A. When the fraud is discovered prior to the submission of the monthly financial reports for the period during which the payment was made, the applicable voucher shall be reversed and withheld from the reports, and a loss of funds recorded in the DO's accountability (the DO still has the original payment document).

B. When the fraud is discovered after submission of the monthly financial reports which included the payment, the DO shall not adjust the accountability unless specifically directed to do so by the servicing DFAS Center.

★ 250207. Relief of Liability. Requests for relief of liability for illegal, incorrect, or improper payments caused by fraudulent claims shall be submitted as prescribed in Chapter 6 of this volume.

250208. Fraud Alert Reporting System

A. General. The Fraud Alert Reporting System is used only when an attempt to commit fraud has occurred or when a high vulnerability to fraud exists. Many of the incidents described in this paragraph are perpetrated by individuals who represent themselves as transient employees.

B. Action by DO. When it is determined that an employee is suspected of obtaining a fraudulent payment (pay, travel, or any other miscellaneous payment) by use of bogus documents and/or identification, DOs immediately shall notify the supporting DFAS Center by priority message. An information copy shall be forwarded to all the other DFAS Centers. A fraud alert report also is appropriate when a DO foresees a strong possibility of fraud being attempted by an unauthorized absentee who is knowledgeable in disbursing or pay and personnel matters. A fraud alert report shall describe the individual(s) involved in the fraud and details relating to the commission of the fraud with the expectation that this information will forewarn disbursing personnel and enable them to recognize fraudulent acts and, thereby, avoid losses. Reports of missing luggage, burglarized automobiles, and unauthorized absence of personnel in the lower pay grades usually have no value in preventing fraud. The following subparagraphs identify specifics that should be included in a fraud alert report.

1. Report fraudulent payments that have been made to anyone, especially transients, giving a description of the perpetrator, describing the type of documents used to establish fraudulent entitlement, explaining how the fraud was committed, and expressing an opinion on the likelihood of the perpetrator attempting future fraud. The description should include: name (plus known aliases); rank or rate; SSN; race; age; height; weight; color of eyes/hair; and, distinguishing characteristics and/or body marks.

2. Address the fraud alert report message only to the supporting DFAS Center with the other DFAS Centers as information addressees. Under no circumstances shall DOs address a fraud alert report to any activity other than the supporting DFAS Center.

3. Submit a fraud alert report for unauthorized absence of personnel only when the following three criteria are met.

a. The employee has possession of documents such as pay records, orders, vouchers, blank checks, etc., which could be used to obtain fraudulent payments.

b. The employee has knowledge of pay and personnel procedures necessary to commit a fraudulent act.

c. The employee has a motive to commit fraud (e.g., is facing disciplinary action, past history of substance abuse, presently encountering personal or financial problems, or past/suspected involvement in fraud or embezzlement).

C. Action by DFAS Center. Upon receipt and evaluation of the fraud alert report, the supporting DFAS Center shall issue a Fraud Alert Warning to all DOs. Fraud Alert Warnings should be retained by DOs for 1 year unless they are canceled by the issuing DFAS Center.

★2503 CLAIMS AGAINST THE GOVERNMENT

★ 250301. General. Title 31, United States Code, section 3702 (reference (e)), provides that any claim against the United States shall be forever barred unless such claim, bearing the signature and address of the claimant or an authorized agent or attorney is received by the responsible agency within 6 full years after the date such claim first accrued. This statute applies unless a claim is governed by a more specific statute which includes its own period of limitation for asserting claims against the Government.

★ 250302. Claims. The following offices have been designated as the responsible area to settle the following types of claims. Refer to appendix E for the proper address to submit claims.

A. The Defense Office of Hearings and Appeals (DOHA) has been designated as the office responsible for settling the following types of claims.

1. Military members' pay entitlements.
2. Military members' allowances.
3. Military members' travel.
4. Military members' transportation.
5. Survivor benefits.

6. Claims by transportation carriers involving amounts collected from them for damage or loss of property shipped at Government expense. Payments of claims to carriers for transportation services are further limited by 31 U.S.C. 3726 (reference (e)).

B. Claims of civilian DoD employees involving compensation or leave are handled by the Office of Personnel Management.

C. Claims involving travel, transportation or relocation expenses and allowances for civilians are the responsibility of the General Services Administration.

★ 250303. Claim Submission Procedures

A. General. All claims shall be submitted on an individual voucher basis through the use of the appropriate claim form. Each claim voucher shall identify the payee by name and either Social Security or Employer's Identification Number, as appropriate, and shall be supported by a claim over the signature and address of the claimant. When the entire amount due is recommended for setoff, the claim voucher may be submitted without a supporting claim. The claimant may state the claim directly on a dealer's bill or public voucher. Claim vouchers with supporting documents shall be submitted under a transmittal letter to the supporting DFAS Center. Vouchers covering claims chargeable to either lapsed or available appropriations shall be submitted in the original with sufficient copies for regular distribution. Claims for payments due deceased civilian employees shall be processed as prescribed in Volume 8 of this Regulation.

B. Voucher Preparation. The voucher shall contain: the name and current address of the claimant or assignee; the appropriation and other accounting data chargeable; a statement as to the purpose of the payment; a citation of the contract number, previous voucher payment(s), project order, and any other data required to process the voucher; an explanation of the difference when the recommended amount of payment is different from the amount claimed; and details regarding setoff as provided in subparagraph 250402.D, below.

C. Letter of Transmittal. The letter of transmittal shall include: a statement of facts surrounding the claim; the reason for forwarding the claim and an explanation of the doubtful aspects; a recommendation and the reason therefor or a statement that there is no specific recommendation and the reason no recommendation is made; and a statement that the DO has not paid and will not pay the claim until authorized to do so.

★ D. Setoff. In all cases involving setoff, an additional copy of the voucher shall be submitted. When it is recommended that an amount be allowed with a certain amount to be set off, the voucher shall show the amount recommended for setoff and the complete accounting data to be credited. A statement also shall be furnished showing the basis for the setoff in sufficient detail to permit adequate explanation to the claimant. If no recommendation can be made as to the amount to be set off, the amounts will be inserted on the voucher by the responsible settlement authority.

★ 250304. Review of Claims. The claims shall be reviewed by the supporting DFAS Center to determine that the claim is complete as prescribed in this section and that the claim is otherwise proper for submission to the responsible settlement authority. If submission of all or a major part of the claim to the responsible settlement authority is not required, the claim shall be returned to the submitting office with advice that all or a major portion of the claim be paid locally, a citation to the regulation(s) that authorizes or provides for such payment, and a statement, if applicable, that the doubtful portion of the claim should be resubmitted.

★ 250305. Payment of Claims After Approval by the Responsible Settlement Authority. Approved civilian or military pay claims shall be forwarded by the supporting DFAS Center to the appropriate office for payment. All other approved claims shall be paid by the supporting DFAS Center. Copies of vouchers covering approved claims paid against available appropriations shall be distributed in the same manner as other comparable vouchers. One copy of vouchers covering approved claims paid against successor appropriations shall be forwarded to the payee, one copy shall be forwarded to the office that administers the successor appropriation involved, and one copy shall be forwarded to the accountable activity.

CHAPTER 26

AUTOMATED TELLER MACHINE (ATM) SYSTEM★2601 BACKGROUND

Currently there are two ATM systems in operation within the DoD. The Department of the Navy operates the ATM at Sea system aboard Naval ships. Sections 2602 through 2611 of this chapter prescribe the mandatory policy and procedures for accomplishing pay delivery and safekeeping of personal funds in the ATM at Sea system. Detailed procedures for operation and maintenance of the ATM at Sea system are contained in the ATM Users Documentation and Student Training Manual provided with the ATM at Sea system. The DFAS Denver Center, through its San Antonio Operating Location, operates an ATM system to accomplish pay delivery for Department of the Air Force recruits. Section 2612 of this chapter prescribes the mandatory policy and procedures for operation of the DFAS Denver ATM system.

★2602 THE ATM AT SEA SYSTEM

★ 260201. General. The ATM at Sea system is an automated mechanism to provide safekeeping of personal funds under the principles prescribed in chapter 27 of this volume. The ATM at Sea system also serves a pay delivery system which accepts an electronic transfer of net pay and allowances due to each account holder. Account holders can withdraw their funds at ATMs located on the ship in the same manner as account holders withdraw funds from their personal bank accounts through a commercial ATM.

★ 260202. Prescribed Forms. This chapter prescribes the use of specific forms to maintain the accountability of the ATM at Sea system. The Automated Teller Machine (ATM) Ledger, DD Form 2670, shall be used in lieu of the Cash on Hand Ledger Control Sheet prescribed for the safekeeping of personal funds in chapter 27 of this volume. Note: The DD Form 2670 is being revised to better accommodate the ATM at Sea system. The August, 1993 edition of the form should be used until the new revised edition is available. In Block 1, Account Name; insert the name, rank and Social Security Number (SSN) of the ATM at Sea custodial officer and in Block 2, Account Number, insert the name and hull number of the ship. In addition, Block 2, Column c, CV Number, and Column d, PV number of the current DD Form 2670 should not be used in conjunction with the ATM at Sea system. The ATM at Sea system Master File Report, addressed later in this chapter, shall be used in lieu of the Individual Ledger Sheets prescribed for the safekeeping of personal funds in Chapter 27 of this volume. The individual member's payroll leave and earnings statement (LES), in conjunction with journal receipts and monthly statements of account provided by the ATM at Sea system shall be used as the depositor's receipt for safekeeping funds in lieu of the Record and Receipt of Deposits and Withdrawals of Safekeeping Funds, DD Form 2674, prescribed by Chapter 27 of this volume.

★ 2603 ATM AT SEA CUSTODIAL OFFICER RESPONSIBILITIES

★ 260301. Letters of Appointment. As prescribed in chapter 27 of this volume, the commander shall appoint the ATM at Sea custodial officer in writing. In addition, all personnel who are required in the performance of their official duties to gain access to the ATM at Sea system, the ATMs, or handle cash in connection with the ATMs, shall be appointed in writing as assistant custodians by the ATM custodial officer. Each letter of appointment shall list the specific duties which the appointed individual is authorized to perform. Authority to perform ATM tasks shall be limited to only the appointed duties. The appointment shall be endorsed with the appointee's acknowledgment of acceptance of the duties. Individuals eligible for appointment as the ATM custodial officer and assistant custodians include, but are not limited to, disbursing officers, deputies, agents, and cashiers. Personnel appointed as assistant custodians of ATMs are responsible for balancing and replenishing the cash in the assigned ATM(s).

★ 260302. Custody of Blank ATM Cards. The ATM custodial officer is responsible for maintaining proper custody of all blank ATM cards. The ATM cards shall be safeguarded as prescribed in Chapter 7 of this volume for blank Treasury checks. The ATM custodial officer may delegate the responsibility for custody of blank ATM cards to an assistant custodian. This delegation must be made in writing. The ATM custodial officer or designated assistant custodian shall maintain a bulk ATM card log which contains the ATM card number, name, date and signature of the person to whom working stock of blank ATM cards are issued. Unused working stock shall be returned to the ATM custodial officer or designated assistant custodian at the end of each day. All blank ATM cards shall be inventoried monthly and an entry made in the bulk ATM card log to document the inventory.

★ 260303. Issue of ATM Cards. The ATM custodial officer may delegate authority to issue individual ATM cards when new accounts are opened to an assistant custodian. This delegation of authority shall be made in writing. When blank cards are issued to this authorized assistant custodian, an entry shall be made in the bulk ATM card log as prescribed in the previous paragraph. The assistant custodian authorized to issue individual ATM cards shall maintain a separate card issue log containing the card number, name and SSN of card owner, issue date, signature of the recipient, date destroyed, and the name and signature of the issuer.

★ 260304. ATM at Sea Operating Instructions. The ATM custodial officer shall include ATM at Sea operating and security procedures in local written instructions. Included in the ATM at Sea operating procedures are payroll preparation, transfer, and balancing procedures; special payment procedures; ATM replenishment procedures; ATM balancing procedures; ATM card issue procedures; and, ATM card turn-in procedures. The ATM custodial officer shall also include the ATM at Sea security procedures in the ship's security instructions.

★ 260305. Transfer of ATM at Sea Safekeeping Accounts Upon Relief. In preparation for being relieved of ATM at Sea safekeeping custodial duties, the outgoing custodial officer shall balance the ATM system by performing a complete end-of-session process. The relieving custodial officer shall verify all end-of-session reports to ensure the ATM accounts are

in balance (including a physical count of all funds held as safekeeping) and receipt for the transfer by signature below the last entry on the DD Form 2670. The original receipted DD Form 2670 shall be returned to the outgoing custodial officer and a copy retained by the relieving custodial officer. The relieving custodial officer shall start a new DD Form 2670. In the description enter Brought Forward.

★2604 ATM AT SEA SECURITY

★ 260401. ATM Physical Security. The ATMs are considered to be safes. The security instructions regarding the use of safes in chapter 3 of this volume shall be followed except that ATM TL-15 safes are authorized to hold \$130,000 vice the \$50,000 normally authorized for TL-15 safes. The ATMs shall be installed in well lighted, heavily traveled spaces. The ATMs may be alarmed and video surveillance cameras installed to deter unauthorized entry at the commander's discretion. The ATMs do not have a self-contained alarm system, but have an alarm that may be connected to the ship's security alarm system, if available. Each ATM shall be assigned to the custody of the ATM custodial officer or an assistant custodian. The assigned custodian shall be responsible for balancing and replenishing the cash in the ATM. Only the assigned custodian shall know the combination to the ATM safe. Since ATMs require moving large amounts of cash about the ship, all security instructions in Chapter 3 of this volume regarding protection of currency in transit shall be followed. In addition, each assistant custodial officer should have a separate safe exclusively for the ATM safekeeping program. If separate safes are not feasible, the ATM custodial officer must maintain custody of all personal funds represented by the ATM at Sea system and provide operating cash to the assistant custodian(s) as necessary to supply the assigned ATM(s).

★ 260402. Passwords and Security Levels. The ATM custodial officer is responsible for assigning password security levels and all responsibilities associated with maintaining proper password security. The ATM custodial officer shall assign each individual involved with the ATM at Sea system in any manner, the appropriate password security level. The functions permitted by each of the password security levels for the ATM at Sea system are provided in table 26-1. The ATM custodial officer shall be assigned the master password security level which allows access to everything related to the operation of the ATM at Sea system with the exception of discovering the other users' passwords or account holders' personal identification number (PIN). After the ATM custodial officer assigns the appropriate password security level, each assistant custodian involved with the ATM at Sea system shall secretly choose a password via the ATM terminal. This password shall allow the assigned individual access to the ATM at Sea system to perform the functions authorized by the assigned security level. The ATM at Sea system will recognize the operator and record all transactions performed. Passwords shall be changed every six months, when custodial duties are changed, or when an operator believes a password has been compromised. Under no circumstances shall any system operator passwords be written anywhere, placed in a sealed envelope, or be known to any other person.

★2605 ATM AT SEA FUNDS ACCOUNTABILITY

★ 260501. General. Funds within the ATM at Sea system are the personal funds of the individual account holders and private organizations who have established ATM accounts. Aboard Naval ships, personnel eligible to establish accounts include permanently assigned members; military and civilian personnel of the DoD on temporary duty assignment to the ship (including U.S. Marine Corps personnel aboard the ship), and private organizations (e.g., private messes) who have established ATM accounts. When funds are deposited into the ATM accounts, the ATM custodial officer assumes safekeeping responsibility for these funds. The ATM custodial officer maintains custody of the funds for all account holders in accordance with this chapter. Safekeeping funds do not qualify as public funds, and therefore, are not recorded on the disbursing officer's accountability.

★ 260502. Loss of Funds Held in Safekeeping. Any shortage of funds that is discovered in the ATM at Sea system (including all ATM shortages which occur as a result of an ATM dispense error) shall be investigated using procedures similar to the investigative procedures prescribed in Chapter 6 of this volume for a physical loss of public funds. The ATM custodial officer shall retain copies of all documents that substantiate the loss of funds. The individual account holder is responsible for any loss incurred and may attempt to recover the loss by filing a claim for loss or damage of personal property as prescribed in the Manual of the Judge Advocate General. Claims for losses which were caused by negligence of the account holder (such as when an ATM card is stolen and the card owner wrote the PIN on the card) normally will not be approved. The ATM custodial officer and assistant custodians are not pecuniarily liable for losses of personal funds in the ATM at Sea system but are subject to appropriate disciplinary actions prescribed by the Uniform Code of Military Justice.

★ 260503. Overage of Funds Held in Safekeeping. Any overage of funds that is discovered in the ATM at Sea system (including all ATM overages which occur as a result of an ATM dispense error) shall be investigated using procedures similar to the investigative procedures prescribed in Chapter 6 of this volume for an overage of public funds. The ATM custodial officer shall retain copies of all documents that substantiate the overage of funds. If the owner(s) of the funds cannot be located, the ATM custodial officer shall prepare a Collection Voucher, DD Form 1131, with credit to Forfeiture of Unclaimed Money and Property, **1060, when the amount of the overage is less than \$5 or with credit to Payment of Unclaimed Moneys (T), 20X6133, when the amount of the overage is \$5 or more. The ATM custodial officer shall provide the completed DD Form 1131 and the cash to the disbursing officer for processing.

★2606 ATM AT SEA ACCOUNTS

★ 260601. Establishing ATM Accounts

★ A. Initial ATM Card Issue When ATM at Sea System Is Installed. Before the first ATM payday, the ATM custodial officer or authorized assistant custodian shall establish an ATM account and issue an ATM card and PIN to all members who will be using the ATMs. The ATM at Sea system will automatically assign a card number to each member who is in the payroll file transferred from the payroll system to the ATM system. The issuing custodian shall

ensure that each member personally receives and signs for his or her own ATM card. The issuing custodian shall also ensure that each member is positively identified and signs the ATM Card Report when receiving the ATM card.

★ B. New Accounts. There will be a need to establish accounts for newly reported personnel (including military members and civilian employees of the Department on temporary duty to the ship), personnel participating in DD/EFT desiring to participate in the ATM program under the split-pay option, or personnel who lose their ATM card or forget their PIN. The ATM custodial officer shall develop and include procedures for opening new accounts in the official ATM operating instructions. All cards issued shall be recorded in the individual ATM card issue log as described in paragraph 260303, above. As described earlier, the ATM custodial officer may delegate in writing the authority to establish new ATM accounts. The authorized card issuing custodian shall add the card issue information to the ATM at Sea system via the Establish Account function of the system.

★ 260602. Closed and Suspended Accounts

★ A. Closed Accounts. When account holders transfer from the ship (permanent change of station, discharge, separation, etc.) or depart for an extended period of temporary duty (temporary duty of sufficient duration that the member will be dropped from the ship's payroll and included on the payroll of the temporary duty station), the ATM account shall be closed. When possible, cards of transferring account holders shall be recovered and destroyed prior to the transfer of the account holder. An entry shall be made in the ATM card issue log to reflect the account holder's transfer and destruction of the card. Also, an entry shall be made in the ATM Card Report to indicate the date of transfer and that the card has been destroyed. The ATM custodian also shall ensure that each member is positively identified and signs the ATM Card Report when turning in the ATM Card. If an account holder is transferred before closing the ATM account, the ATM custodial officer shall administratively close the account and deliver the account holder's account balance to the DO in exchange for a U.S. Treasury check. The check shall be drawn payable to the account holder. The object for which drawn shall be "Exchange-for-Cash, ATM Account of (name, rank or rate). The check shall be forwarded with a letter of transmittal to the commander of the activity to which the account holder was transferred for delivery to the account holder and request acknowledgement of receipt of the check and return of the ATM card. The transaction shall be recorded on DD Forms 2670 and 2671. In the event such a Treasury check is returned as undeliverable and the payee cannot be located, the DO shall process the check as a collection using DD Form 1131. If the amount of the check is less than \$5, the DD Form 1131 shall be processed with credit to Forfeitures of Unclaimed Money and Property, **1060. If the check is \$5 or more, the DD Form 1131 shall be processed with credit to Payment of Unclaimed Moneys (t), 20X6133. The DD Form 1131 shall include all information available as to the identity and last known address of the payee. Any claim subsequently received for the funds shall be forwarded, with a copy of the DD Form 1131, to DFAS Cleveland Center for processing.

★ B. Suspended Accounts. The ATM accounts of deceased or unauthorized absentees shall be suspended immediately (placed on hold). Deposits and withdrawals are not authorized while the account is in a suspended status. The appropriate reason for suspending the account shall also be annotated. For deceased members, the ATM account shall remain in suspended status until the member's personal effects are prepared for shipment to designated survivors, at which time the ATM custodial officer will administratively close the account and deliver the funds to the DO. The DO shall issue a U.S. Treasury check payable to the payee designated by the officer (or inventory board) appointed by the commander to take custody of the deceased member's personal effects. The object for which drawn shall be "Exchange-for-Cash, ATM Account of (name, rank or rate)". The check shall be delivered to the designated officer or inventory board for appropriate disposition. For unauthorized absentees, the account shall remain in suspended status until the member has been officially reported as returned from unauthorized absence on the daily muster report. If an unauthorized absentee is declared a deserter, the ATM custodial officer shall close the account and all funds in the account shall be delivered to the DO. The DO shall prepare a U.S. Treasury check payable to the payee designated by the officer (or inventory board) appointed by the commander to take custody of the deserter's personal effects. The object for which drawn shall be "Exchange-for-Cash, ATM Account of (name, rank or rate)." The check shall be delivered to the designated officer or inventory board for appropriate disposition. The custodial officer shall obtain a receipt from the designated officer or inventory board and record the transaction on DD Forms 2670 and 2671.

★2607 ATM AT SEA SYSTEM TRANSACTIONS

★ 260701. Deposits to the ATM at Sea System Accounts

★ A. Payroll Transfer Verification. Payroll processing must begin at least five working days prior to the scheduled payday. This is to ensure that any problems encountered can be identified and corrected before payday. From the payroll system, print an ATM participation report which lists all members whose pay will be downloaded to the ATM at Sea system. The ATM participation report shall be verified to ensure that the pay for DD/EFT participants, discharged and transferred account holders, and unauthorized absentees will not be downloaded to the ATM at Sea system. After the verification has been accomplished, the payroll processing can be completed. To substantiate the semimonthly regular payroll, the DO shall prepare a payroll voucher and a Treasury check made payable to the ATM custodial officer for the total amount of the payroll. The payroll voucher and Treasury check shall be recorded on the DD Form 2657 in the normal manner as a check issue on line 2.1A and a gross disbursement on line 4.1A. Depending on the payroll system used by the ship, the Treasury check is either prepared automatically by the payroll system terminals in the disbursing office or by the automated data processing division.

★ B. Payroll Deposits. Payrolls should be transferred to the ATM at Sea system at least three working days before the schedule payday. This ensures problems encountered in the transfer process can be identified and corrected before payday. When the payroll transfer has been completed, the ATM at Sea System's Payroll Audit Report shall be printed and verified to

ensure the correct total for the payroll has been transferred. If there is any correction to be made, a payroll adjustment transaction shall be accomplished as prescribed in paragraph 260703, below.

The Treasury check and a copy of the payroll shall be delivered to the ATM custodial officer. The payroll transfer shall be recorded on the Automated Teller Machine (ATM) Ledger, DD Form 2670, as a deposit. See figure 26-1. A copy of the payroll shall be filed with the safekeeping records for audit purposes.

★ C. Terminal 99 Deposit Transactions for ATMs at Sea. The ATM at Sea system does not permit account holders to make deposits to their accounts at the ATMs. Generally, the best method for individual deposit transactions is to permit account holders to conduct deposit activities during normal check cashing hours. The ATM custodial officer or assistant custodian appointed to perform these deposit transactions should be assigned password security level 2 access in order to complete the entire transaction without assistance. The ATM custodial officer or assistant custodian authorized to perform Terminal 99 transactions shall maintain ATM Cash Transaction Ledger, DD Form 2671, as shown in figure 26-2. To perform a Terminal 99 deposit, the appointed individual accepts money from the account holder, enters the deposit on Terminal 99, records the entry on DD Form 2671, and gives the depositor a journal receipt. All Terminal 99 deposits shall appear on the end-of-session reports. After every end-of-session report, the total Terminal 99 deposits shall be recorded on the DD Form 2670.

★ 260702. Withdrawals from the ATM at Sea System Accounts

★ A. General. Normally, withdrawals from the individual ATM at Sea system accounts shall be accomplished through the ATMs by the account holders using their ATM card and PIN. When Point-of-Sale (POS) terminals are added in the ship's stores and post offices, the ATM system will generate a POS report. Compare the report totals to the journal receipts. If the totals agree, the ships store or postal collection agent will present these journal receipts to the safekeeping custodial officer who in turn will provide cash from safekeeping funds equal to the journal receipts. The custodial officer shall report the transaction on the DD Form 2670 as a POS ships store or post office withdrawal. The POS activity shall prepare the appropriate collection voucher and provide the collection voucher and cash to the disbursing officer for processing. Retain ATM journal receipts for a period of three months.

★ B. Terminal 99 Withdrawal Transactions for the ATM at Sea System. Terminal 99 withdrawals shall be used only when the account holder cannot use the ATM to make the withdrawal. Situations which require withdrawals through Terminal 99 include mechanical difficulties with the ATM; an account holder closing an ATM account (such as when transfer, separation, or discharge is imminent); and a withdrawal when an account balance is less than \$5. The ATM custodial officer or assistant custodian appointed to perform Terminal 99 withdrawal transactions should be assigned password security level 2 access in order to complete the entire transaction without assistance. The designated custodian shall maintain DD Form 2671 (figure 26-2) as prescribed in subparagraph 260701.C, above. To perform a Terminal 99 withdrawal, the designated custodian enters the withdrawal on Terminal 99, obtains the account holder's signature on DD Form 2671, and dispenses the cash and a journal receipt of the

transaction to the account holder. At the option of the ATM custodial officer, Terminal 99 withdrawals may be authorized when an account holder's balance is less than \$5, but the account holder is not closing the account, transferring, separating, or being discharged. The ATM custodial officer shall establish the policy of whether account holder's will be permitted to withdraw remaining funds, of less than \$5, after they have withdrawn the maximum permissible from the ATMs. If the ATM custodial officer authorizes this function, specific hours of operation shall be established when the designated assistant custodian will be available to provide the service. Note: This local policy shall not apply to account holder's who are closing their accounts due to transfer, separation, or discharge. All Terminal 99 withdrawals shall appear on the end-of-session reports. After every end-of-session report, the total Terminal 99 withdrawals shall be recorded on the DD Form 2670.

★ 260703. ATM at Sea Account Adjustments. The ATM at Sea system allows account balances and pending payroll amounts to be adjusted. While deposits and withdrawals require the presence of the account holder (the evidence of which is the entry of the PIN in the ATM or personal visit of the account holder to the designated Terminal 99 custodian for a Terminal 99 transaction), adjustments do not require the account holder to be present. Therefore, the adjustment function shall be limited to the highest system access of password security. Adjustments shall be used judiciously and shall never be used when a deposit (Terminal 99) or withdrawal (ATM or Terminal 99) transaction will serve the same purpose. When the ATM custodial officer must remove money from an account without the account holder's presence, a negative adjustment shall be used. Situations which require a negative adjustment transaction are explained in the following subparagraphs.

★ A. Payroll Transfer Error. In cases where it is discovered during the payroll transfer verification that an ATM at Sea account was credited with more money than the payee was due, the ATM custodial officer shall process a negative adjustment to correct the error. In this type of situation, where the account holder is not to receive the money, a Collection Voucher, DD Form 1131, shall be prepared to document the negative adjustment and credit the funds back to the military pay appropriation. The DD Form 1131 and the cash shall be provided to the DO who shall ensure a corresponding adjustment to the master military pay account (MMPA) is processed to correct the member's pay account. The DD Form 1131 shall include an explanation of the purpose of the adjustment (e.g., negative adjustment to correct payroll transfer error). The ATM custodial officer shall record the transaction on the DD Form 2670 as a withdrawal. The DO shall include the DD Form 1131 on the DD Form 2657 as a refund on line 4.1B and an increase to U.S. currency on hand on line 6.2A.

★ B. Refunds to Account Holders. Under certain circumstances, such as when an account holder is on temporary duty and is reassigned to a new duty station without return to the ship, it will be necessary for the ATM custodial officer to process a negative adjustment to close the ATM at Sea account and forward the account balance to the account holder. The ATM custodial officer shall process the negative adjustment and provide the cash balance of the account to the DO in exchange for a Treasury check. The DO shall issue a Treasury check payable to the account holder for the amount of the adjustment. See paragraph 260602, above.

The ATM custodial officer shall record the transaction on the DD Form 2670 as a withdrawal. The DO shall record the exchange-for-cash check transaction on the DD Form 2657 as a check issue on line 2.1A and an increase to U.S. currency on hand on line 6.2A.

★2608 BALANCING THE ATM AT SEA SYSTEM

★ 260801. General Requirements. Complete balancing and reconciliation of the ATM at Sea system shall be accomplished not less frequently than: once each week; the last day of each month; and at any time when the ATM custodial officer suspects that an irregularity or system malfunction has occurred. Balancing is accomplished by generating specific ATM at Sea system reports (referred to as end-of-session reports); counting the cash on hand; replenishing the ATM cash canisters; collecting the ATM Journal Tapes and Receipt Printer Tapes; and comparing the actual cash on hand account balance to the system generated reports and DD Form 2670. The ATM Journal Tapes and Receipt Printer Tapes shall be retained for a period of 3 months after which they may be destroyed if no longer needed to resolve an ATM out-of-balance condition or to document an ATM pay discrepancy. During the report generation process, the ATM at Sea system is shut down. The ATM custodial officer must pay close attention to this process and accomplish the ATM balancing expeditiously in order to avoid the perception that the system is out of order, which results in an inconvenience to the account holders as well as a loss of faith in the system's ability to secure and deliver their cash on an around-the-clock basis. With proper planning, balancing the ATM system and generating the reports will become a routine function and should not interfere with the account holders' cash withdrawal habits.

★ 260802. End-of-Session Reports for the ATM at Sea System. End-of-Session is the process used to balance the ATM at Sea system and backup all data files and records. The backup tapes created during the end-of-session shall be kept in a secure place and be available to reconstruct the ATM accounts in the event fire or other catastrophe causes the loss of the current system data base. The end-of-session process can generate five reports to facilitate system balancing. Four of the reports (Grand Total Terminal Balance Report, Dispense Error Transaction Report, Deposit Audit Report, and Excessive Activity Report) are mandatory and shall be generated during every end-of-session process. The fifth report (Terminal Balance Report) shall be generated as needed to resolve out-of-balance conditions. When an ATM custodial officer is relieved of custodial duties, the outgoing ATM custodial officer shall run a complete end-of-session and balance the ATM accounts. The relieving ATM custodial officer shall verify and sign the DD Form 2670 prepared by the relieved custodial officer. The relieving custodial officer shall prepare a new DD Form 2670. In the description block, enter the amount brought forward from the relieved custodial officer.

★ A. Grand Total Terminal Balance Report. The Grand Total Terminal Balance Report provides all terminal summary totals required for ATM at Sea system balancing. The report shows by terminal the total deposits, custodial officer deposits and withdrawals (Terminal 99), ATM withdrawals, and ATM adjustments. It also shows the grand total of all transactions since the previous end-of-session. The report provides an ATM system summary by indicating the beginning balance, the ending balance, and the monetary difference between the beginning

and ending balance. This monetary difference must be equal to the grand total of all transactions since the previous end-of-session or the system is out-of-balance. The Grand Total Terminal Balance Report also provides the monetary balance of the account file (the total of the individual accounts). The account file balance and the ending balance must be the same. Note that these two balances must also equal the ATM ledger balance shown on the DD Form 2670. Error messages and out-of-balance alerts are also printed on the report when the system detects an out of balance condition. Unresolved differences in the ending balance and the account file balance shall be identified as losses or overages of funds as prescribed in section 2605, above. The Grand Total Terminal Balance Report shall be retained in the ATM Records file for a period of 1 year, then destroyed if no longer needed. For assistance in resolving an out-of-balance condition contact the ATM at Sea Fleet Support Group.

★ B. Dispense Error Transaction Report. The Dispense Error Transaction Report is used to track possible dispense errors. When the report indicates possible dispense errors, the ATM custodial officer shall print the Terminal Balance Report for the indicated terminal(s) and compare the ATM Journal Tapes to the Terminal Balance Report to resolve the error. The report shall be retained by the ATM custodial officer as necessary to document dispense errors and support requirements for ATM maintenance and/or repairs.

★ C. Deposit Audit Report. The Deposit Audit Report lists all deposits made using Terminal 99 since the previous end-of-session. The report shall be retained for cash verification purposes.

★ D. Excessive Activity Report. The Excessive Activity Report lists the transactions made by a particular account holder if that account holder has accomplished five or more transactions since the previous end-of-session. The report could indicate equipment malfunction based on a pattern of irregularity or could indicate that account holders are experiencing difficulty in performing some functions. The report shall be retained by the ATM custodial officer as required to document unusual, irregular, or potentially fraudulent transactions made by an account holder.

★ E. Terminal Balance Report. The Terminal Balance Report lists all transactions performed on each ATM. The report can be generated for all terminals or for a selected terminal or terminals. The Terminal Balance Report shall be generated as necessary to locate and resolve out-of-balance conditions with the ATM Cash Balance Sheet, DD Form 2672, and to locate and correct possible dispense error transactions as indicated on the Dispense Error Transaction Report. After balancing the Terminal Balance Report with the DD Forms 2672 and resolving dispense errors, the report shall be attached to the Grand Total Terminal Balance Report for retention. The DD Form 2672 is being revised to better accommodate the ATM at Sea system. The August, 1993 edition of the form should be used until the new revised edition is available.

★ 260803. Balancing Assistant ATM Custodians. Each assistant custodian assigned responsibility for keeping one or more ATMs supplied with cash shall maintain a separate ATM

Cash Balance Sheet, DD Form 2672, for each assigned ATM. The ATM custodial officer is responsible for providing each assistant custodial officer with ATM operating cash for the assigned ATM(s). Cash funds for the assigned ATM(s) shall not be advanced from public funds. Funds represented by the ATM at Sea system are the personal funds of the account holders and are held in safekeeping for their convenience. The ATM custodial officer should advance funds from safekeeping to the assistant custodians in the exact amount that can be loaded into the ATM canisters. The ATM custodial officer shall use the Statement of Agent Officer's Account, DD Form 1081, to document the advance and provide appropriate custody and audit trails. The DD Form 1081 shall be annotated in block 10 or 11 as Advance to ATM Safekeeping Custodian. The DD Form 1081 shall not be reported as a part of the disbursing officer's accountability for public funds. All individuals appointed as assistant ATM custodians (including those appointed to perform ATM Terminal 99 functions for the ATM at Sea System) shall be balanced as a part of the ATM balancing process. While the end-of-session for the ATM at Sea system report generation process is running, each individual appointed as a custodian of an ATM shall: retrieve the cash canisters from the ATM; count the cash in the canisters and prepare DD Form 2672 (see figure 26-3); replenish the cash in the canisters, if necessary; and, return the cash canisters to the ATM. The ATM custodial officer shall compare the DD Forms 2672 with the Grand Total Terminal Balance Report to ensure that the cash dispensed (as indicated by the report) is in agreement with the actual cash dispensed (as verified by actual count of the remaining cash in the canisters and subtracting this amount from the beginning cash balance loaded in the canisters during the previous end-of-session). If the cash balances are not in agreement, the Terminal Balance Report shall be generated for the individual terminal or terminals involved to locate and correct the error. A copy of the DD Forms 2672 shall be attached to the Grand Total Terminal Balance Report. To document the daily ATM at Sea Terminal 99 transactions which affect cash balances, the DD Form 2671 (figure 26-2) shall be used. A copy of the DD Form 2671 shall be attached to the Terminal 99 transactions report.

★ 2609 ATM AT SEA SYSTEM REQUIRED MANAGEMENT AND CONTROL REPORTS

★ 260901. Master File Report. The Master File Report lists each account holder, current balance, and other information on ATM transactions. The report shows this information as of the time it is extracted and can be used to reconstruct accounts if necessary. The report can be extracted in several formats (e.g., by account number, account name, or card number) and also can be tailored to print specific accounts (e.g., active, on hold (suspended), closed, pending payroll, or dormant). While the Master File Report can be extracted periodically, the entire report (listing all accounts) shall be run every day. Once a new report is obtained, the previous report may be discarded. At least once each month, the ATM custodial officer shall extract a list of all closed and dormant accounts for audit. Closed accounts shall not be deleted from the system for 30 days. After 30 days, if no funds are in these closed accounts, they shall be deleted from the system. If funds are still in these accounts after 30 days, adjustment action shall be taken to close the account and forward the balance of the account to the account owner using an exchange-for-cash Treasury check as prescribed in paragraph 260602, above.

★ 260902. Daily Activity Report. The Daily Activity Report shows all daily menu selections that each appointed custodian has performed on Terminal 99 since the last end-of-session. The report specifies the date, time, operator's initials, and menu item number for each function performed on the terminal. The ATM custodial officer shall generate this report daily and shall review the report to ensure that only specifically authorized functions are being performed by the custodians. The report shall be retained one week or until the ATM custodial officer is satisfied that the appointed custodians are performing only their authorized functions.

★ 260903. Customer File Maintenance Report. The Customer File Maintenance Report lists all deposits, withdrawals, and account adjustments recorded on an account holder's account from the terminal. The report includes the: account holder's name and account number; initials of the custodian who performed the transaction; type of transaction; amount of funds involved in the transaction, if any; and, transaction date, time, and sequence number. The ATM custodial officer shall generate and review this report daily in conjunction with the Daily Activity Report. The Customer File Maintenance Report shall be retained for one year.

★ 260904. Account Statements for the ATM at Sea System. The ATM system can produce account statements for each account holder. These statements show all ATM transactions since the previous statement. These account statements shall be printed and provided to ATM account holders upon request. Computer memory in the ATM system is limited. Moving old statement data records to backup tape frees additional space for system processing use. The ATM custodial officer shall backup the statement data files to tape every six months. The backup tapes shall be stored for a period of two years; then the oldest tape may be destroyed.

★2610 MANUAL MAINTENANCE OF ATM AT SEA SYSTEM ACCOUNTS

If for some reason it becomes necessary to maintain the ATM accounts manually, such as a possible ATM central processing unit (CPU) failure, the Master File Report and the latest audit tapes shall be used to ascertain the current account balances. The first step is to compare the journal tapes with the previous Master File Report to determine what transactions have occurred since the last Master File Report was run. Next, manually adjust the account balances of the individual accounts involved. Finally, record on the DD Form 2670 and Record of ATM System Manual Withdrawals, DD Form 2673, all transactions that have occurred since the previous end-of-session for the ATM at Sea system. Should prolonged system failure be anticipated requiring accounts to be maintained manually, no further deposits shall be allowed while the system is down. When an account holder desires to make a withdrawal, the account holder must withdraw the entire balance of the account. The account holder's signature shall be obtained acknowledging receipt of the funds using DD Form 2673 (figure 26-4). When the ATM system is returned to operational status, adjust the balances to reflect the withdrawals made while in the manual mode. Immediately print a Master File Report and verify all manual adjustments. The difference must be equal to the total of all manual withdrawals performed while the system was down. The ATM Safekeeping Custodial Officer should contact the ATM at Sea Fleet Support

Office by message or phone at commercial (757) 523-8034 (DSN 565-8034) for assistance in resolving system failures.

★2611 CASH VERIFICATION REQUIREMENTS FOR THE ATM AT SEA SYSTEM

The ATM at Sea system is subject to the quarterly cash verification requirements. At unannounced intervals, not less frequently than once each quarter, the cash verification team appointed by the commander shall verify all safekeeping deposits in the presence of the ATM custodial officer. Specific requirements for conducting the verification are prescribed in Chapter 27 and Appendix A of this volume.

★2612 ATM SYSTEM FOR RECRUITS

★ 261201. General. The ATM system operated for payment of recruits is an extension of the paying disbursing office to accomplish cash payment to the recruits. It is not an automated mechanism for providing continual access to funds or safekeeping of funds. For each designated payment date, the amount to be paid the recruits is computed by the appropriate military pay system. The disbursing officer or a designed deputy disbursing officer or agent then loads the ATM cannisters with the appropriate amount of cash to accomplish the required payroll. An ATM account is established for each recruit to be paid. The value of the ATM account for each recruit is established as the amount to which the recruit is entitled. Each recruit is issued an ATM card for access to his or her ATM account. At the designated time, the recruit can then withdraw the desired amount of funds, not to exceed the amount to which entitled. The amount actually withdrawn by the individual recruit becomes the amount posted to the pay account as the amount paid. The account balance is then reduced to zero. As an extension of the disbursing office, all security requirements prescribed in Chapter 3 of this volume for protection and safeguarding of public funds are applicable. Complete balancing and reconciliation of the ATM system shall be accomplished daily.

★ 261202. Withdrawals. Withdrawals from the individual ATM accounts shall be accomplished through the ATMs by the account holders using their ATM card. All withdrawals from the ATM accounts shall be disbursed from the appropriate military pay appropriation which supports payment to the members involved. At the end of each business day, the end-of-day ATM balancing reports shall be generated and used as supporting documentation for the payroll. A covering Payroll Voucher, DD Form 117, shall be prepared for the amount of the payroll (amount actually withdrawn from the ATM system) and processed in the same manner as any other cash payroll. The DD Form 117 shall be included in the DO's accountability on DD Form 2657 as a gross disbursement on line 4.1A and a decrease to U.S. currency on hand on line 6.2A.

★ 261203. End of Day Balancing. The end of day balancing is the process used to balance the ATM system and backup all data files and records. On a daily basis, a printout shall be obtained from each ATM. This printout shows the number of remaining bills that should be in each canister. The disbursing officer, designated deputy or agent shall total the remaining bills listed on the printout to arrive at the total amount of funds that should be on hand in the ATM.

The funds remaining in each container shall then be counted in the presence of the disbursing officer, deputy or agent. The total funds remaining should equal the predetermined amount. At this time the actual amount remaining is subtracted from the total amount loaded in the ATM at the beginning of the business day. The result gives the total amount paid. The Training Military Pay Section (TMPS) will process an end of day procedure which will generate payment listings to support payments made through the ATM(s) for that day. The listings indicate name, Social Security Number, and amount paid as well as total amount paid to all individuals. The total of the listings prepared must equal the amount arrived at earlier by the disbursing officer, deputy and/or cashier. Differences in the ending balance and the payment listings shall be accounted for as physical losses or overages of funds as described below.

★ A. Physical Loss. If the ending balance is less than the payment listing, the resulting discrepancy shall be considered as a physical loss of funds. The procedures in Chapter 6 of this volume for reporting, investigating and requesting relief of liability for physical losses of public funds apply.

★ B. Overage. If the ending balance is more than the payment listing, the discrepancy shall be considered as an overage of funds. The procedures in Chapter 6 of this volume for reporting and resolving overages of public funds apply.

ATM AT SEA SECURITY LEVELS AND FUNCTIONS	
LEVEL	FUNCTIONS PERMITTED
1	All functions are permitted. Only the ATM Custodial Officer can be assigned to this level.
2	All functions are permitted except the following: Payroll/Balance Adjustments (Menu item #8) File Maintenance (Menu item #14) Backup and Recovery (Menu item #15)
3	Only the following functions are permitted: Account Inquiry (Menu item #4) Customer Search/Assistance (Menu item #5) UMIDS/SJUMPS Payroll (Menu item #9) Manual Payroll (Menu item #10) Reports (Menu item #11) Statements (Menu item #12)
4	Only the following functions are permitted: Open/Establish Accounts (Menu item #1) Change Account (Menu item #2) Close Account (Menu item #3) Account Inquiry (Menu item #4) Customer Search/Assistance (Menu item #5) Reports (Menu item #11)
5	Only the following functions are permitted: Account Inquiry (Menu item #4) Customer Search/Assistance (Menu item #5) Reports (Menu item #11)
6	This level is used only for social security/account number verification.

TABLE OF CONTENTS

CHAPTER 27 SAFEKEEPING OF FUNDS AND VALUABLES (OTHER THAN PUBLIC FUNDS)

- 2701 Authority for Safekeeping Deposits
- ★2702 Safekeeping of Funds - Morale and Welfare Support Activities
- ★2703 Safekeeping of Personal Funds and Valuables Military Members and DoD Civilian Employees
- 2704 Balancing and Verification of Safekeeping Deposits

CHAPTER 27

SAFEKEEPING OF FUNDS AND VALUABLES (OTHER THAN PUBLIC FUNDS)2701 AUTHORITY FOR SAFEKEEPING DEPOSITS

★ 270101. Authority. All DoD DOs, deputies, and agents are authorized to accept for safekeeping the funds of morale and welfare support activities, including cash and checks, for which safe custody would not otherwise be available. When a DO is not available, or when it is impractical for the DO to accept and account for safekeeping deposits, the commander may designate any military member or DoD civilian employee as a safekeeping custodian to accept and account for these safekeeping deposits, provided a suitable safe is furnished and appropriate audit procedures are established. The procedures prescribed in section 2702, below, shall be followed for safekeeping of funds for morale and welfare support activities. DOs, deputies, agents or other specifically appointed custodians are authorized to accept for safekeeping the personal funds and valuables of permanently assigned members as well as military and DoD civilian personnel on temporary duty assignment to the activity. See section 2703, below, and for Naval vessels equipped with the ATM at Sea system, Chapter 26 of this volume. In all cases, funds and/or valuables accepted for safekeeping are not public funds and shall not be considered as a part of the DO's financial accountability for public funds.

★ 270102. Restrictions. All deposits and withdrawals are subject to the commander's local regulations which, based on the available facilities, shall establish necessary and proper restrictions as to the time, place, and frequency of deposits and withdrawals, and the type of objects classified as valuables. Necessary restrictions must be imposed so as not to interrupt the activity's priority operations, such as special and regular payrolls. Also, this service shall not be abused by the deposit of objects which, because of their nature or value, are not usually afforded additional protection. Deposits of valuables shall be limited to funds, negotiable instruments (bonds, credit cards, traveler's checks, check books, etc.), and objects classified as jewelry having an intrinsic value requiring additional protection. Objects such as wallets, snapshots, keys or letters having no intrinsic value to justify additional protection shall not be accepted for safekeeping. For the ATM at Sea system addressed in Chapter 26 of this volume, safekeeping deposits shall be limited to the personal funds of the depositors.

270103. Responsibility for Deposits

A. Custodial Officers. Custodial officers are held responsible for the proper handling and accounting for all safekeeping deposits. If a loss is sustained, the depositor shall be advised of the right to submit a claim for reimbursement for loss of personal property as provided in DoD Component regulations. Submission of a claim need not be deferred to await findings of any investigation initiated to determine responsibility for the loss.

★ B. Assistant Custodians. Within activities where the volume or nature of safekeeping deposit transactions so warrant, an assistant custodian shall be appointed by the custodial officer (who is appointed by the commander) for initial receipt and temporary custody of safekeeping deposits pending delivery to the designated custodian. Separate safekeeping facilities, to which no other person may have access, shall be provided to the assistant custodian for safeguarding funds and valuables. All custody transfers between the custodian and assistant custodians shall be covered by receipt. An assistant custodian is responsible for the proper handling of and accounting for all safekeeping deposits received and for prompt delivery of all safekeeping deposits to the custody of the permanent custodian.

270104. Deposit of Postal Funds. Safekeeping deposits of postal funds as prescribed in DoD Manual 4525.6-M (reference (ao)) shall be received and handled as prescribed in paragraph 270201, below. The deposit shall be identified as "postage stamp fund" or "postal money order funds," as applicable, on the safekeeping deposit receipt.

270105. Deposit of Funds Under Emergency Conditions. Safekeeping deposits of funds by MBFs, non-appropriated fund custodians, and other DoD-sponsored activities shall be received and handled as prescribed in paragraph 270202, below. The safekeeping deposit receipt shall identify appropriately the depositing agency, custodian making the deposit, and the deposit itself.

★2702 SAFEKEEPING OF FUNDS – MORALE AND WELFARE SUPPORT ACTIVITIES

★ 270201. Accounting for Separate Funds. Except as provided in paragraph 270202, below, and in Chapter 26 of this volume for the ATM at Sea program, each safekeeping deposit shall be placed in a separate sealed envelope bearing the deposit number, the name of the depositor, and the amount of the deposit. The safekeeping custodial officer shall issue a receipt using DD Form 2674 (Record and Receipt of Deposits and Withdrawals of Safekeeping Funds) for each deposit. The receipt shall identify appropriately the depositor, date of deposit, and the amount deposited. Deposit numbers shall be assigned to each receipt in a consecutive series beginning with "1." The receipt portion of DD Form 2674 shall be furnished to the depositor and the record portion shall be retained by the custodial officer. When the depositor desires to withdraw the safekeeping deposit, the depositor shall present the receipt to the custodial officer. After the identity of the depositor and authenticity of the receipt have been established, the depositor shall acknowledge receipt of the deposit by signature and date in the space provided on the record portion of DD Form 2674. The identical currency which was presented by the depositor shall be returned to the depositor when the deposit is withdrawn.

★ 270202. Accounting for Commingled Funds. At non-tactical activities and Naval vessels equipped with the ATM at Sea system, where the volume of safekeeping deposits warrants--and it is desirable to provide for more than one deposit or more than one withdrawal in safekeeping deposit accounts, custodial officers are authorized to commingle safekeeping funds. However, the safekeeping funds shall be placed in a separate container identified as safekeeping funds and never shall be commingled with official funds. At activities other than Naval vessels,

if the total value of commingled safekeeping funds on hand is normally large, a bank checking account may be established as provided in paragraph 270203, below.

A. Deposits

1. Receipt for Deposit. DD Form 2674 shall be issued for each deposit. Deposit numbers shall be assigned in a consecutive series beginning with "1" and preceded by the letter "D." Each depositor shall be assigned a depositor's account number using a consecutive series of numbers beginning with "1." The DD Form 2674 shall appropriately identify the depositor, depositor's account number, date of deposit, and the amount deposited. The receipt portion of DD Form 2674 shall be furnished to the depositor and the record portion shall be retained by the custodial officer.

2. Individual Ledger Sheets. The custodial officer shall maintain a separate ledger sheet for each depositor. The heading of the ledger sheet shall include the following information: depositor's account number; name and location of the depositing morale and welfare activity; and the signature of the morale and welfare activity representative making the deposit. The amount of each deposit shall be entered in the debit column of the ledger sheet and the total amount on deposit shall be entered in the balance column. The date of each deposit and the deposit receipt number shall also be entered in the ledger.

3. Cash-on-Hand Ledger Control Sheet. In addition to the individual ledger sheets described in the preceding subparagraph, the custodial officer shall maintain a cash-on-hand ledger control sheet. The amount of each deposit shall be entered in the debit column of the ledger control sheet and the total amount on deposit by all depositors shall be entered in the balance column. If preferred, daily summary posting may be made to the ledger control sheet showing inclusive deposit numbers. The balance of the ledger control sheet must agree with the aggregate of balances in the individual depositors' ledger sheets.

★ B. Withdrawals. The depositor shall present the original deposit receipt(s) to the custodial officer when withdrawing the entire balance on deposit. If the depositor only wishes to withdraw a portion of the balance on deposit, the depositor shall provide a signed request for withdrawal of the desired amount to the custodial officer. The custodial officer shall verify the depositor's balance in the account and shall verify the depositor's signature requesting withdrawal with the depositor's signature on the deposit record and/or the individual ledger sheet. After verification, the custodial officer shall enter a withdrawal number on the withdrawal request. A series of consecutive numbers beginning with "1" and preceded by the letter "W" shall be used as withdrawal numbers. If the withdrawal is paid in cash, receipt shall be obtained from the depositor. For withdrawals by check as authorized in paragraph 270203, below, the check number shall be entered on the withdrawal request. The withdrawal shall be entered as a credit in the depositor's individual ledger sheet and the custodial officer's ledger control sheet. In lieu of individual entries in the custodial officer's ledger control sheet, a daily summary posting may be made showing inclusive withdrawal numbers.

270203. Bank Account Procedures

A. General. Upon approval of the commander, and providing that the amount of safekeeping funds available for deposit is large enough to preclude the payment of bank service charges or other fees, custodians of commingled safekeeping funds are authorized to establish and maintain a checking account in a local bank for deposit of safekeeping funds. Such accounts shall be maintained only in banks or savings institutions insured by the Federal Deposit Insurance Corporation (FDIC) or credit unions insured by the National Credit Union Share Insurance Fund (NCUSIF). Funds in excess of the insured limits shall be collateralized by the financial institution in accordance with Treasury Department Circular 176 (reference (bm)). The account shall be established in the name of the disbursing activity, the safekeeping fund, and the custodian (e.g., "U.S. Naval Activity, Boston, MA, Safekeeping Deposit Fund, LT J. A. Hancock, SC, USN, Custodian"). If the total balance on deposit in the checking account exceeds \$40,000, a report shall be made in accordance with Volume 13 of this regulation. No investments or loans shall be made from safekeeping deposit funds. When use of a bank account for deposit of safekeeping funds is authorized, the procedures in the following subparagraphs shall be followed for maintenance of the safekeeping fund bank checking account.

B. Check Records. All checks shall be prenumbered serially. A complete record of all checks drawn and deposits to the safekeeping checking account and a running bank balance shall be maintained in the checkbook. Bank statements shall be reconciled immediately upon receipt and paid checks returned from the bank shall be filed with the corresponding bank statement. Spoiled checks shall be marked "VOID" and filed in sequence with the paid checks returned from the bank.

C. Deposits to Safekeeping Fund Bank Account. Checks, money orders, and cash received for safekeeping, except cash required to be kept on hand to meet safekeeping withdrawal requirements, shall be deposited promptly to the bank account. Checks and money orders may be accepted for deposit to the safekeeping fund bank account subject to collection. Withdrawals, however, shall not be authorized until sufficient time has elapsed for clearance of the checks and money orders through the banking system.

D. Disbursements from Safekeeping Fund Bank Account. Withdrawals of safekeeping funds should be paid by checks issued on the safekeeping deposit fund bank account whenever practical. Checks shall be drawn on the safekeeping fund account only for: payment to a depositor for withdrawal; an authorized transfer of a depositor's account to another activity; exchange-for-cash checks for replenishment of cash on hand needed to meet safekeeping withdrawal requirements; and transfers of unclaimed moneys.

E. Cancellation of Checks. All checks drawn on the safekeeping deposit fund bank account shall bear the following stamped endorsement on the reverse: "This check is not valid unless presented for payment within 12 months from date of issue." If a check is so canceled, the custodian shall confirm stop payment action with the bank and credit the depositor's safekeeping account for the amount of the canceled check. An effort shall then be made to locate

the depositor and effect payment. If the depositor cannot be located, the account shall be closed by drawing a check payable to the Department of the Treasury for deposit by the DO. The DO shall prepare a DD Form 1131 with credit to **1060, Forfeitures of Unclaimed Money and Property, when the amount is less than \$5 or to 20X6133, Payment of Unclaimed Moneys (T), when the amount is \$5 or more. The collection voucher shall include all information available as to the identity and location of the depositor. Any claim subsequently received for the funds shall be forwarded with a copy of the related DD Form 1131 to the servicing DFAS Center for processing.

F. Bank Ledger Control Sheet. In addition to the cash-on-hand ledger control sheet, a separate ledger control sheet shall be maintained for "cash-in-bank." When cash, checks, and/or money orders are deposited in the bank, the cash-in-bank ledger control sheet shall be debited and the cash-on-hand ledger control sheet shall be credited. Exchange-for-cash checks shall be posted as a credit to the bank ledger control sheet and a debit to the cash-on-hand ledger control sheet. Withdrawals by check shall be posted as a credit to the bank ledger control sheet and as a debit to the individual ledger sheet. The sum of the cash-in-bank and the cash-on-hand ledger control sheets must agree with the aggregate of balances in the individual depositors' ledger sheets.

★2703 SAFEKEEPING OF PERSONAL FUNDS AND VALUABLES – MILITARY MEMBERS AND DOD CIVILIAN EMPLOYEES

★ 270301. General. This section prescribes the policy and procedures for handling safekeeping deposits of personal funds and valuables at all activities and Navy vessels not equipped with the ATM at Sea safekeeping system. In addition, the policy and procedures in this section apply to safekeeping of personal valuables (other than cash) on Navy vessels equipped with the ATM at Sea system.

★ 270302. Deposits. Deposits shall be recorded on DD Form 2674 (Record and Receipt of Deposits and Withdrawals of Safekeeping Funds). A series of consecutive numbers beginning with "1" shall be used for assignment to safekeeping deposits. Each deposit, at the time it is made, shall be assigned the next number in this series. The following data shall be entered in the appropriate spaces on the receipt portion of the DD Form 2674 and by carbon impression on the record portion of the form: the deposit number; the date of deposit; a description of the deposit (if money, enter the amount in figures and words); and the signature and rank of the custodial officer (or assistant custodian) receiving the deposit. The depositor then shall be required to enter his or her SSN, signature, and rank or rate in the spaces provided on the record portion of the form. The receipt portion shall be detached and given to the depositor.

★ 270303. Withdrawals. When the depositor wishes to withdraw a deposit, the depositor shall present the receipt portion of the DD Form 2674 to the custodial officer. The custodial officer shall verify the depositor's signature and determine that the serial number, date and description appearing on the receipt correspond with the data appearing on the record portion

of the form. After the identity of the depositor and authenticity of the receipt have been established, the depositor shall acknowledge receipt of the deposit by entering his or her signature and the date of withdrawal in the space provided on the record portion of the DD Form 2674. The receipt portion then shall be destroyed in the presence of the depositor. If the receipt has been lost, the deposit may be returned to the depositor only after the custodial officer is satisfied as to the identity of the depositor and the depositor's entitlement to the deposit. In all instances, the entries in the record portion of the DD Form 2674 constitute the official record of the deposit. At the time of withdrawal the entire deposit must be withdrawn. Partial withdrawals are not authorized; however, subject to the restrictions prohibiting unreasonable repeated deposits, a new deposit in a new amount may be made.

★ 270304. Withdrawal of Funds or Valuables Subsequent to Transfer of Depositor. If a depositor is transferred before withdrawing safekeeping deposits, the custodial officer shall deliver the depositor's cash balance to the DO in exchange for a Treasury check. The Treasury check shall be drawn in favor of the depositor. The check and the depositor's valuables (if any) shall be forwarded with a letter of transmittal, to the commander of the activity to which the depositor was transferred, for delivery to the depositor. The transmittal letter shall include all available details about the depositor and request acknowledgement of receipt. Data regarding the transfer shall be inserted on the record portion of the DD Form 2674.

★ 270305. Deposit and Withdrawal of Funds by Incapacitated Persons. Deposit and withdrawal of funds and valuables shall be handled as prescribed in this section except that an officer, or any other person designated by the commander, shall witness and sign each transaction and the receipts for safekeeping deposits shall be delivered to the commander.

★ 270306. Deposits of Deceased or Missing Persons. Cash on deposit shall be delivered to the DO in exchange for a Treasury check. The check shall be made payable to the payee designated by the officer (or inventory board) appointed by the commander to take custody of the depositor's personal effects. The object for which drawn shall be "Exchange-for-Cash; Safekeeping Deposit No. _____ of (name, rank or rate, SSN). The check and the depositor's valuables (if any) held for safekeeping shall be delivered to the appointed officer (or inventory board) for disposition in accordance with the applicable DoD Component Regulations. A receipt shall be obtained for the check and valuables (if any) transferred in accordance with these instructions, and the record portion of DD Form 2674 shall be closed by a notation describing the disposition. The receipt portion of DD Form 2674 shall be destroyed if available.

2704 BALANCING AND VERIFICATION OF SAFEKEEPING DEPOSITS

★ 270401. Balancing. The safekeeping custodial officer shall balance all safekeeping deposits on the last day of each month. The cash on hand (and in the safekeeping fund bank account, if applicable) must equal the total of the amounts credited in all of the active depositors' accounts as shown on the active record portion of DD Forms 2674, or the individual ledger sheets and ledger control sheet, as applicable. See Chapter 26 of this volume for balancing

requirements of the ATM at Sea safekeeping system. The custodial officer shall certify that balancing was accomplished on the ledger control sheet or the last DD Form 2674 issued:

"All safekeeping deposits, serial Nos. ____ through ____, balanced and verified (date). Total cash deposits equal \$ (amount) .

(Signature and rank of custodial officer)."

270402. Verification

★ A. General. At unannounced intervals, not less frequently than once during each quarter, all safekeeping deposits (including all safekeeping deposits in the ATM at Sea safekeeping system) shall be verified in the presence of the custodial officer by the cash verification team appointed by the commander. Results of the verification shall be included in the report of verification to the commander.

 B. Separate Deposits. Separate deposits shall be verified by verifying the contents of each envelope against the record portion of DD Forms 2674. The verifying officers shall certify on the last DD Form 2674 issued:

"All active safekeeping deposits, serial Nos. ____ through ____, verified (date) . Total cash deposits equal \$ (amount) .

(Signature and rank of verifying officer)

(Signature and rank of verifying officer)."

★ C. ATM at Sea Funds. Funds held in the ATM at Sea safekeeping system shall be verified by counting the actual cash held for safekeeping and comparison with the ATM system generated report totals and the system generated total of the individual depositors' accounts. The verifying officers shall certify below the last entry on the DD Form 2670:

"We, the undersigned, on (date) have verified the commingled safekeeping funds by actual count and certify that the total amount on hand is \$ (amount) , which is in agreement with active safekeeping accounts, Nos. ____ through ____, and with the ledger control sheet.

(Signature and rank of verifying officer)

(Signature and rank of verifying officer)."

★ D. Commingled Funds. Commingled funds shall be verified by counting the cash held for safekeeping and comparison with an adding machine tape total of the individual depositors' ledgers as well as with the balance shown on the ledger control sheet. At activities maintaining a safekeeping deposit fund checking account, the latest bank statement shall be examined and the amount on deposit in the checking account shall be verified. The verifying officers shall certify below the last entry on the ledger control sheet:

"We, the undersigned, on (date) have verified the commingled safekeeping funds by actual count and certify that the total amount on hand is \$ (amount), which is in agreement with active safekeeping accounts, Nos. through , and with the ledger control sheet.

(Signature and rank of verifying officer)

(Signature and rank of verifying officer)."

★ E. Reporting of Shortage or Overage. Any shortage or overage of safekeeping deposits shall be reported promptly to the commander. The commander shall take action similar to that prescribed in Chapter 6 of this volume for a shortage or overage of public funds. However, a shortage or overage of safekeeping deposits shall not be considered or reported as a shortage or overage of public funds in the DO's accountability.

★ 270403. Transfer of Safekeeping Deposits Upon Relief of Custodial Officer. In preparation for being relieved of custodial duties, the outgoing custodial officer shall balance all safekeeping deposits and prepare, in duplicate, a list on which all active deposits are described. The list and all deposits shall be turned over to the custody of the relieving officer. The relieving custodial officer shall verify all deposits and receipt the original list. The original receipted list shall be returned to the relieved officer. DD Forms 2674 and/or the records of commingled deposits, as applicable, shall be transferred to the relieving officer. If a checking account is maintained, the account shall be reconciled and transferred to the relieving officer. Arrangements shall be made with the bank to transfer the account to the new custodial officer. For transfer of ATM at Sea safekeeping deposits upon relief of the ATM custodial officer, refer to paragraph 260305, Chapter 26 of this volume.

TABLE OF CONTENTS

CHAPTER 28 GENERAL PROVISIONS ON INDEBTEDNESS

2801 Applicability

2802 General Organizational Responsibilities

★ Figure 28-1. Defense Debt Management System (DDMS) Debt Collection Steps

CHAPTER 28

GENERAL PROVISIONS ON INDEBTEDNESS2801 APPLICABILITY

★ 280101. Debts Covered. Policies in this chapter apply to debts of individuals, except foreign individuals, owed the United States. They do not apply to contract debts, sovereign debts owed the United States, or collection of child support, alimony, or commercial debts from the pay of DoD civilian employees or military members through garnishment or involuntary allotment. Contract debt collection procedures are contained in Volume 10 of this regulation. Sovereign debt collection procedures are contained in chapter 12, Volume 6 of this Regulation. Procedures for collection of child support, alimony, or commercial debts from military members or civilian employees through garnishment or involuntary allotments are contained in Volume 7 and Volume 8, respectively, of this regulation.

280102. Recovering DoD Component Property. Policies in this volume are directed primarily at recovery of debts on behalf of the United States and the circumstances in which debts may be disposed of for less than the full amount. Nothing contained in this volume is intended to preclude a DoD Component from demanding return of specific property or, alternatively, payment of its value.

280103. Alternative Administrative Remedies. Nothing contained in this volume will preclude using any other administrative remedy which may be available for collecting debts owed a DoD Component. When a DoD Component debtor is employed by another DoD Component or another federal agency, and collection cannot be accomplished using procedures, including offset, contained in this volume, the debtor's employing Component or agency will be contacted to arrange for the debtor to pay by allotment or other means according to regulations which implement financial responsibility requirements of federal employees under Section 206, Executive Order No. 11222, May 8, 1955, 30 FR 6469 (reference (ap)).

280104. Required Administrative Proceedings. Nothing contained in this volume requires a DoD Component to omit or duplicate debt collection procedures required by other regulations.

280105. Omissions Not a Defense for Debtors. Requirements in this volume apply to the administrative collection of debts. Failure of a DoD Component to comply with any of the requirements will not be available as a defense for a debtor.

2802 GENERAL ORGANIZATIONAL RESPONSIBILITIES

280201. Identifying and Correcting Debt Causes. DoD Components will establish procedures to identify causes of indebtedness, delinquencies, and defaults and take corrective actions to eliminate those causes and reduce the numbers of debts subject to collection.

280202. Debt Collection Programs. DoD Components vigorously will pursue debt collection. Collection programs at all organizational levels will be established as required to implement policies in this volume.

280203. Debt Controls. DoD Components will establish effective administrative controls over debts owed. Debts will be recorded promptly in the accounting system when incurred and collected and controlled according to requirements specified in this volume. Debts will be aged in the following categories so that appropriate corrective actions can be taken and required aging reports rendered:

A. Debts Not Delinquent;

B. Debts Delinquent -

1 - 30 days;
31 - 60 days;
61 - 90 days;
91 - 120 days;
121 - 180 days;
181 days - 1 year;
Over 1 year - 2 years;
Over 2 years - 3 years;
Over 3 years.

280204. DoD Debtor Information Exchange Program. DoD Components will participate in the DoD debtor information exchange program for delinquent and defaulted debtors.

280205. Interagency Debt Collection. DoD Components will cooperate with each other and other federal agencies in collecting debts owed by employees and members. Salary and administrative offset requests from non-DoD federal agencies will be coordinated by the Defense Manpower Data Center.

280206. Files Matching. DoD Components requesting debtor files matching through the Defense Manpower Data Center will ensure that all other debt collection alternatives are less effective, more expensive, or would present a greater threat to the debtors' personal privacy.

280207. Documenting Collection Activity. DoD Components will document their collection activities. The basis for debt compromise or for suspending or terminating collection action will be documented. Documentation will be retained in individual debtor files.

280208. Personal Interviews With Debtors. Creditor components may hold personal interviews at the debtor's request concerning the individual circumstances surrounding the debt and the amount involved. Expenses incurred by debtors to attend interviews will be paid by debtors. Matters discussed which will affect debt collectibility will be documented. Documents will be retained in individual debtor files.

280209. Obtaining Debtor Mailing Addresses From the Internal Revenue Service. DoD Components attempting to locate a debtor may send requests to the Secretary of the Treasury, or designee, to obtain a debtor's mailing address from the records of the Internal Revenue Service (IRS). Mailing addresses obtained from the IRS may be disclosed to other agents of the DoD Component, including contract collection agencies, to facilitate debt collection and compromise. A mailing address obtained from the IRS may be disclosed to a commercial credit bureau only for obtaining a commercial credit report. However, this disclosure limitation no longer applies once a debtor's mailing address is independently confirmed by the DoD Component.

280210. Determining Debt Amount for Compromises, Suspensions, and Terminations. Debts will not be subdivided to avoid monetary ceilings for debt compromise or suspension or termination of collection actions. A debtor's liability arising from a particular transaction will be considered a single claim in determining if a debt is \$100,000 or greater for purposes of debt compromise, collection suspension, or termination according to chapter 31 of this volume.

280211. Collection Priorities for Multiple Debts. Deductions currently being made normally will continue until a debt is paid. However, consideration will be given applicable statutes of limitations and priority of collections will be changed when necessary to ensure maximum amounts are collected. Debts owed by employees to more than one DoD Component or federal agency will be collected in the following priority sequence:

- A. Debts to the debtor's employing agency or department.
- B. Debts to other DoD Components.
- C. Debts to other federal agencies.

280212. Accounts to Which Collections Will Be Credited. If collected in time to be credited to a current fiscal year appropriation, debt principal amounts collected by DoD Component employees or contract collection agencies on the DoD Component's behalf will be refunded or reimbursed to appropriations from which funds were originally disbursed. Otherwise, debt principal amounts will be credited to another appropriation specified by law.

Interest, penalties, and administrative charges will be credited to appropriate Treasury Department receipt accounts.

280213. Automating Debt Collection and Reporting Systems. Debt collection and reporting systems, automated to the extent it is cost effective, will be used for recording, processing, and controlling debts. Existing debt collection procedures and processes in pay systems may be retained until debt collection and reporting systems are implemented.

280214. Liquidating Security or Collateral To Satisfy Debts. DoD Components holding security or collateral that may be liquidated through a power of sale or nonjudicial foreclosure will do so if debtors fail to pay debts within a reasonable time after demand. Consideration will be given to security or collateral disposition costs as compared to amounts which might be received from a sale. A DoD Component that liquidates security or collateral will give the debtor a notice of sale, an accounting of surplus proceeds, and any other procedures required by regulation or law.

280215. Debt Payment by Surety or Insurance Concern. Collection from other sources, including liquidation of collateral or security, is not a prerequisite to requiring payment by a surety or insurance concern unless such action is expressly required by law.

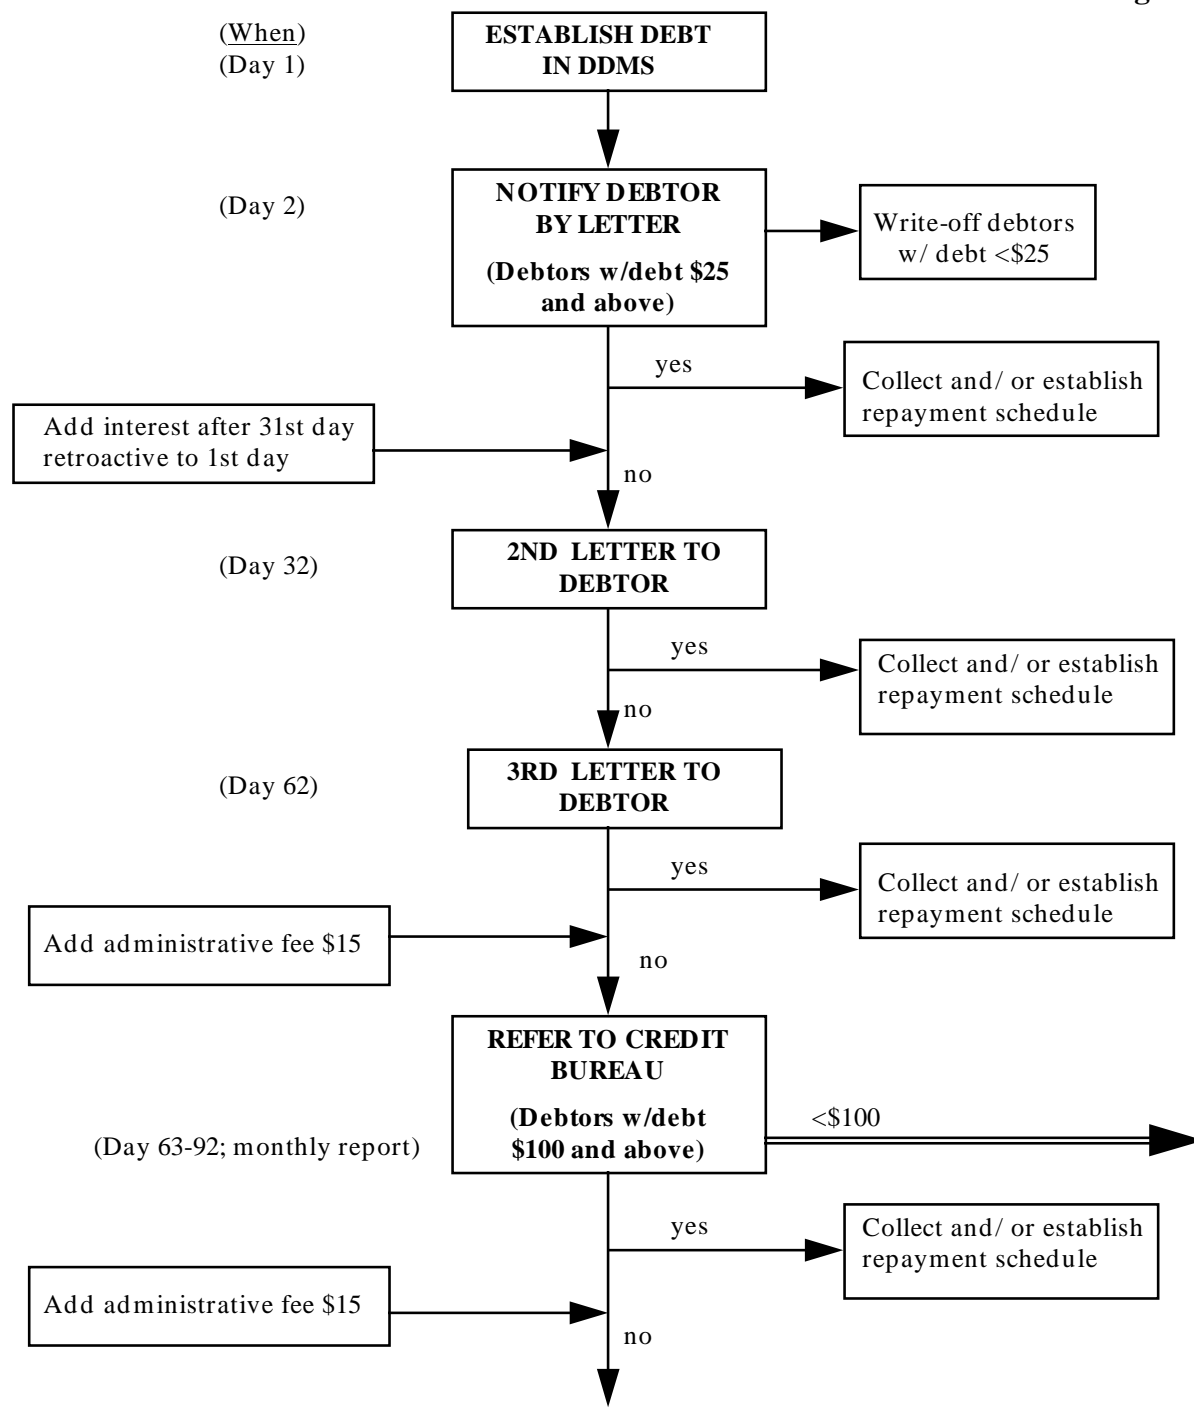

280216. Reporting a Surety's Dishonored Obligation. DoD Components will report immediately to the Department of the Treasury the failure of any surety to honor its obligations under 31 U.S.C. 9305 (reference (e)). The Treasury Department will forward notification that a surety's certificate of authority to do business with the federal government has been revoked or forfeited to appropriate organizations.

★ 280217. Obtaining Collection Assistance for Delinquent Debts. Creditor Components make the initial demand for debt payment and accomplish follow-up action. When local collection action is exhausted, the DFAS will offer collection assistance using the Defense Debt Management System (DDMS). Collection assistance includes referral to a collection agency, reporting to a credit bureau, use of the IRS tax refund offset program, and submission to the Department of Justice for possible litigation. These debt collecting steps are illustrated in figure 28-1. DDMS is maintained at the DFAS-Denver Center (DFAS-DE/FY) and operated by the DFAS Center. Collection assistance is obtained by sending the debt case to the supporting DFAS Center. Controlled transmission procedures will be used to ensure that debt cases transferred by an installation are received at DFAS. Creditor Components and agencies must certify the validity of the debt and furnish all background documents prior to seeking collection assistance from DFAS Centers. Creditor Components also must ensure that all notifications, reclama, or appeal actions have been completed and resolved.

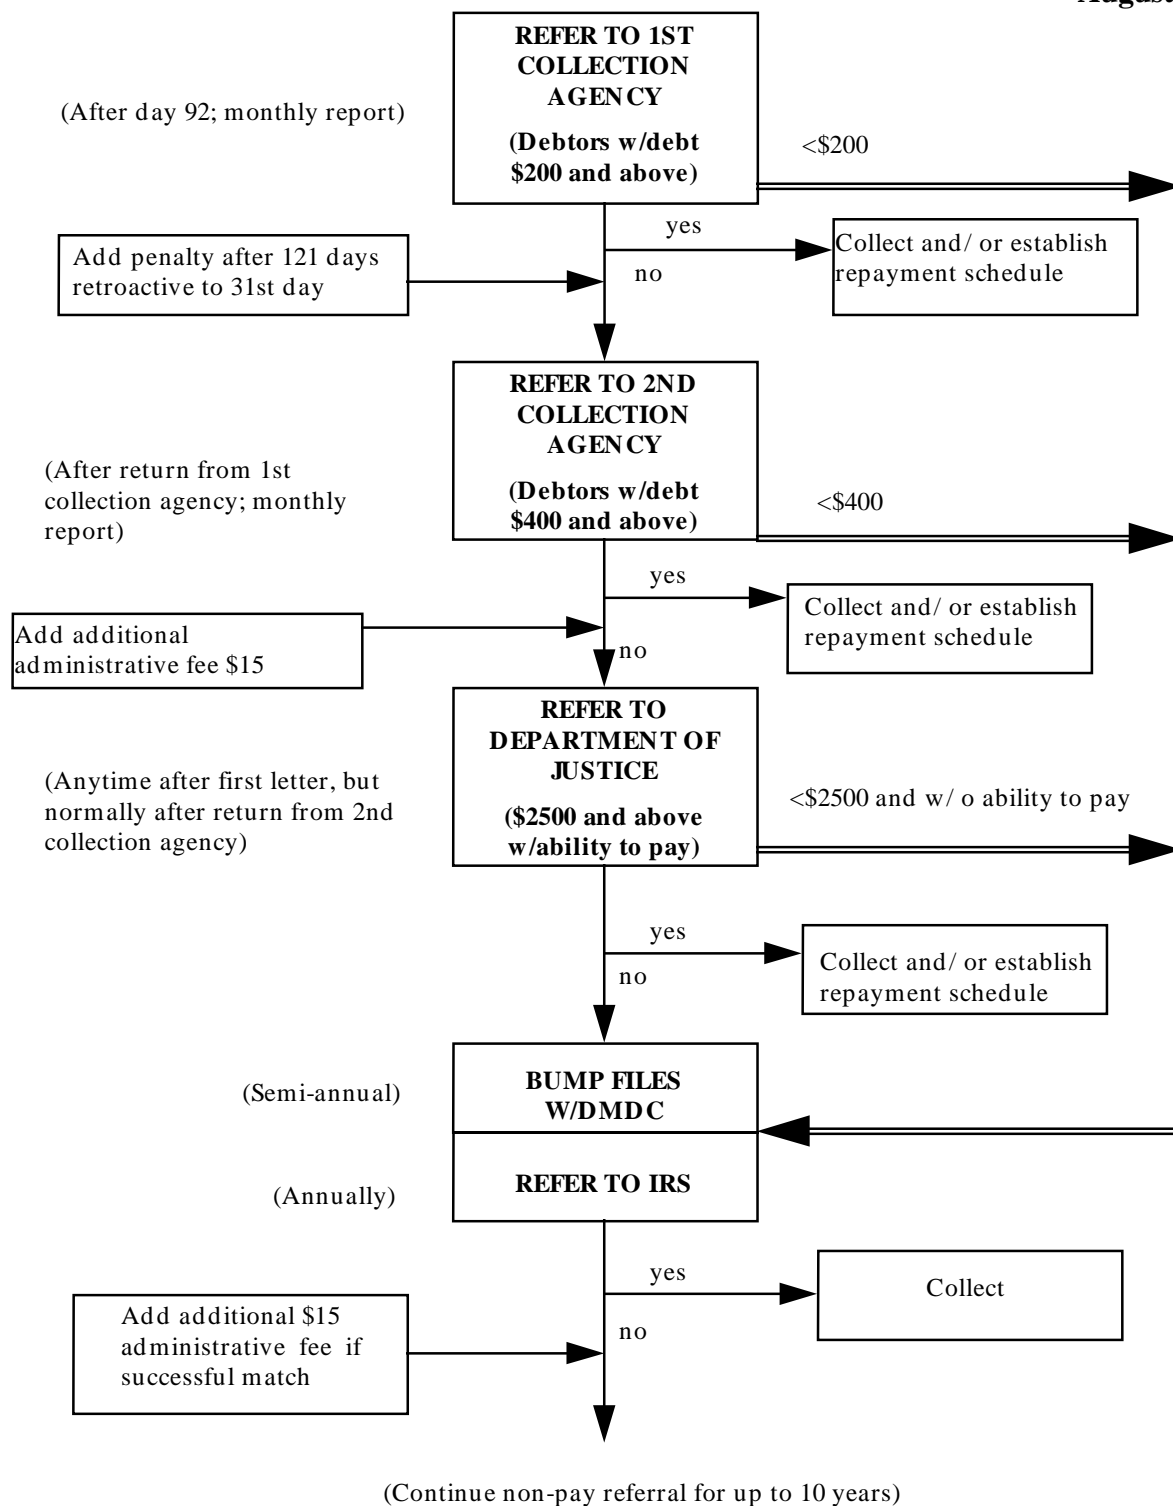

A. To ensure the integrity of the accounting records and the debt case files and records, periodic reconciliations will be accomplished in the most efficient and expedient manner possible.

B. To avoid costly reconciliations with transferring activities, DFAS Centers will establish and maintain accountability where feasible for debts transferred for collection assistance. When accountability for a debt is established at DFAS, the submitting activity will be notified to remove accountability from its accounting records. This notification will be accomplished as part of the controlled transmission procedure. Debt accountability will be dropped and established in a manner to preclude either omission or dual reporting of the debt in accounting reports. DFAS will establish debt accountability at the minimum level of detail necessary to fulfill accounting and reporting requirements. Accountability will not be transferred if the process creates an Antideficiency Act violation in the accountable station records. If this situation appears likely, DFAS will accept the file for debt collection as usual while the DO and related budget officer work the transfer of funding to cover the accountability transfer. If DFAS is able to collect on the account, efforts by the DO will cease and collection will be processed to DO. If DFAS exhausts collection efforts as defined in Chapter 31 of this volume and write-off action is appropriate, the write-off notice will be sent to the DO for action. No Antideficiency Act violation is created during the administrative process; a violation may be incurred only after complete attempt at collection, review, and process of official write-off notification.

C. The DDMS will facilitate centralized processing of remittances. Cash management criteria will be considered and Treasury Department mechanisms will be used as indicated in figure 28-1 to process remittances.

TABLE OF CONTENTS

CHAPTER 29 DEBT COLLECTION REQUIREMENTS

- ★2901 Applicability
- 2902 Collection Activity
- 2903 Installment Collections
- 2904 Interest, Penalty, and Administrative Charges
- 2905 Debt Reconsideration

CHAPTER 29

DEBT COLLECTION REQUIREMENTS★2901 APPLICABILITY

Policies in this chapter apply to debts of individuals, except foreign individuals, owed the United States. They do not apply to contract debts, sovereign debts owed the United States, or collection of child support, alimony, or commercial debts from the pay of DoD civilian employees or military members through garnishment or involuntary allotment. Contract debt collection procedures are contained in Volume 10 of this regulation. Sovereign debt collection procedures are contained in chapter 3, Volume 15 of this Regulation. Procedures for collection of child support, alimony, or commercial debts from military members or civilian employees through garnishment or involuntary allotments are contained in Volume 7 and Volume 8, respectively, of this regulation.

★2902 COLLECTION ACTIVITY

290201. Timely and Aggressive Collection Action. DoD Components will take timely and aggressive collection action with effective follow-up to collect all claims for money or property due their activities. When necessary to protect the DoD Component's interests, for example, to prevent the 6-year statute of limitations from expiring, written demands for payment will be preceded by any other appropriate collection actions specified by this Regulation. This may include immediate referral to the Department of Justice for litigation. When reply to a debtor's correspondence is appropriate, the reply will be made promptly, normally not later than 30 days from receipt of the debtor's communication. When it becomes necessary to extend the 30-day demand letter interval (see paragraph 290203, below), DoD Components will act promptly thus, should it become necessary to refer debts to the Department of Justice for litigation, referrals can be made within 1 year of the date the fact and amount of debts are confirmed.

290202. Written Demands for Debt Payment. Demands for debt payment (including follow-up demands) will be made in writing. When a debtor is given time limits to reply to creditor organization correspondence, 15 additional days will be allowed if correspondence must go through non-United States mail systems. Notification of routine pay adjustments will be made according to the policies in Volumes 7 and 8 of this regulation, as appropriate.

290203. Initial Demand Letter. After the facts and amounts of debts are confirmed, creditor organizations will deliver promptly to the debtor a written demand for debt payment. Initial demand letters will be dated and mailed or hand-delivered to allow 30 days for the debtor to reply before interest is assessed and debts are considered delinquent. If a creditor organization uses advance billing (that is, mails a bill before a debt is actually owed), it can include the

required interest notification, but interest will not accrue until the debt is actually owed. Initial demand letters will, when applicable:

- A. Inform the debtor that the DoD Component intends to take salary or administrative offset.
- B. Require full debt payment within the time specified in the demand letter.
- C. Require the debtor to furnish with the initial reply, evidence to support any dispute of facts and amounts of the debt if the debtor requests a creditor organization to reconsider the debt.
- D. Advise the debtor of debt basis.
- E. Advise the debtor of the legal requirement for assessing interest, penalties, and administrative charges.
- F. Advise the debtor of the legal requirement to refer the delinquent debt to the Department of Justice and commercial credit bureaus.
- G. Advise the debtor of the intention to refer the delinquent debt to private collection agencies.
- H. Advise the debtor of the creditor organization's willingness to review the debtor's financial statements and proposals for repayment agreements. However, the debtor will be advised that such reviews by themselves will not stay assessment and later collection of interest, penalties, and administrative charges.
- ★ I. Advise the debtor of entitlement to waiver or remission consideration (applicable when mandatory statutory authority exists).

290204. Follow-Up Demand Letters. The debtor shall respond to initial demand letter with full payment, or agree to a repayment schedule within the time specified in initial demand letter. If the debtor does not respond to the initial demand for payment, when applicable, at least two more demand letters, with progressively strong wording, at not more than 30-day intervals (45 days if correspondence must go through non-United States mail systems), will be sent unless the debtor's response to either the first or second demand indicates further demands would be futile. See paragraph 300310 of this volume.

290205. Lump-Sum Collections. Debts owed to the DoD Component along with interest, penalty, and administrative charges will be collected in lump-sum except when otherwise provided by law. This is true whether a debt is being collected by salary or administrative offset or any other method including voluntary payment. Lump-sum collections

by offset from current salary, unless voluntary, cannot exceed the offset percentages specified by paragraph 300305 of this volume.

★2903 INSTALLMENT COLLECTIONS

★ 290301. Installment Criteria. If debtors represent to the creditor organization that they are financially unable to pay a debt in one lump-sum, payment will be accepted in regular installments. A decision to accept installment payments will be based on a debtor's financial statement submitted under penalty of perjury. Financial statements, if submitted, will become part of the permanent debt record.

290302. Installment Timing and Amount. Installment payments usually will be monthly. Installment payments will bear a reasonable relationship to the size of a debt and the debtor's ability to pay. Except when a debtor can prove financial hardship or another reasonable cause exists, installment payments will be at least \$50 each month and will be sufficient to liquidate debts within 36 months. Installment collections from current salary, unless voluntary, cannot exceed the offset percentages specified by paragraph 300305 of this volume.

290303. Installment Security. Security for debts paid by installment will be accepted in appropriate cases. Creditor organizations will accept installment payments notwithstanding a debtor's refusal to give security.

290304. Installment Payment Agreement. Creditor organizations that agree to accept installment payments will obtain signed, legally enforceable payment agreements from the debtor. The agreement will include a provision accelerating the debt so that the remaining balance is due and payable immediately should the debtor default on the agreement. The debtor will be required to annually submit financial statements, completed under penalty of perjury, during the repayment period whenever installment payments are less than \$50 each month or the repayment period exceeds 36 months.

290305. Installment Application to Multiple Debts. DoD Components accepting installment payments on multiple debts of a debtor will apply payments to the various debts according to the best interests of the Department and the United States as determined by facts and circumstances of each debt. Careful attention will be paid to applicable statutes of limitations. Debtor designations as to which of multiple debts the payments may be applied against, will be followed. However, the statute of limitations will not be allowed to expire on any debt because of debtor designations.

290306. Installment Application to Penalty and Administrative Charges, Interest, and Debt Principal. Installment payments will be applied first to accrued administrative and penalty charges, second to accrued interest, and third to debt principal balance.

290307. Installment Payment Review. Creditor organizations collecting debts by installment will review the debtor's annual financial statements and determine whether to collect

the balance due in a lump-sum or continue installment payments at the same or increased amounts. Smaller installment payments will be accepted on request of a debtor in exceptional cases fully supported by financial statements confirming inability to pay agreed to installment payments. Installment payments will not be reduced if a debtor could have controlled the financial condition which reduced ability to meet existing installment payments.

★2904 INTEREST, PENALTY, AND ADMINISTRATIVE CHARGES

290401. Interest Charges. The intent of interest is to stimulate prompt payment of debts and to recover the cost of Treasury Department borrowing necessitated by delinquent debts. Creditor organizations will accrue, assess, and collect interest on all debts. Unless otherwise stipulated in this section, interest will accrue from the date the debt notice and interest requirements are hand-delivered to a debtor or mailed to a debtor using the most current address available to the DoD Component. Once accrued and assessed, interest will be collected unless collection action is foregone under a provision of this Regulation.

290402. Interest Rate. Creditor organizations will assess an interest rate that is equal to the current value of funds to the United States Treasury as prescribed by the Secretary of the Treasury in the Federal Register and Treasury Financial Manual bulletins quarterly or annually. A different rate will be assessed if a statute or regulation explicitly fixes the rate of interest for that particular type of debt. An initial interest rate will remain fixed for the duration of that debt. However, if a debtor defaults on an interest bearing installment-payment agreement, the creditor organization will set an interest rate for any new installment payment agreement that reflects the current rate of interest established by the Treasury Department. The interest rate for a new installment payment agreement will reflect the current value of funds and may be higher or lower than the interest rate charged in the original payment agreement.

290403. Interest Computation. Interest charges will be computed using the formula: $I = DNF$. Where: I = interest charge; D = debt principal balance; N = number of days in computation period; F = interest rate per day (365- or 366-day year).

290404. Interest Compounding. Generally, interest will not be assessed on interest, penalties, or administrative charges. However, if a debtor defaults on an installment payment agreement, interest, penalty, and administrative charges assessed until the time of default, but not collected, will be added to the outstanding debt principal and will be collected along with interest under any new payment agreement. Also, interest may be compounded if authorized by a regulation or statute.

290405. Penalty Charges. Creditor organizations will assess a penalty charge of 6 percent per annum on any debt principal delinquent more than 90 days. Penalty charges will accrue from the date the principal amount became delinquent.

290406. Administrative Charges. Creditor organizations will assess administrative charges against the debtor to cover the additional administrative costs incurred in processing and

handling the debt because it became delinquent. Administrative charges will be based on the actual costs incurred and will include costs of obtaining credit reports and using private collection agencies to the extent these costs are attributable to collecting delinquent debts. When actual costs are not available, administrative costs will be based on cost analyses establishing an average of actual costs incurred in processing and handling claims against other debtors in similar stages of delinquency.

290407. Decisions Not to Accrue or Assess Interest, Penalty, and Administrative Charges

A. These charges will be assessed on all debts owed DoD Components, excluding routine pay adjustments. However, 31 U.S.C. 3717 and the Federal Claims Collection Standards (4 CFR Parts 101 through 105) authorize issuance of regulations governing application of these charges. Decisions not to accrue or assess these charges can be made by the creditor organization on a case-by-case basis according to the following criteria:

1. When a debt is subject to permissive waiver or remission statutes and collection action is suspended pending outcome of the waiver or remission, these charges will not accrue or be assessed while the waiver or remission request is being considered and finalized.

a. Charges accrued before receipt of a waiver or remission request will not be assessed if the request is received by the designated official within 30 days of hand delivery or mailing of the debt notice to the debtor. Extend the 30-day period to 45 days if the debt notice goes through non-United States mail systems or is sent to an APO/FPO address.

b. These charges will not accrue or be assessed on any part of a debt principal balance that is waived or remitted.

c. Charges will again begin to accrue on any portion of the debt principal not waived or remitted from the date the debtor is formally notified in person or by mail of the final waiver or remission determination.

2. When a debtor who is entitled to a hearing petitions the creditor organization for a hearing, these charges will not accrue from the date the petition is received by the creditor organization until the date the debtor is formally notified in person or by mail of the hearing decision. Charges that accrued before the creditor organization received a petition for a hearing will be assessed on that portion of the debt principal upheld by the decision of the hearing official.

3. When a debtor is entitled to and has petitioned for a hearing, these charges will not accrue or be assessed while a debt is being reconsidered.

4. When debts are routine pay adjustments, these charges will not accrue or be assessed.

5. When the debt of an individual arose under the tariff laws of the United States, the Social Security Act, or the Internal Revenue Code of 1954, these charges will not accrue or be assessed.

6. When a DoD Component is requested to collect a debt by another DoD Component or federal agency, these charges will not accrue or be assessed by the Component accomplishing the collection. Note that the creditor Component or agency requesting collection assistance has authority to accrue and assess applicable late payment charges and these charges should be included in the total amount identified for collection.

7. When an applicable statute or regulation prohibits application of these charges to the debt involved, these charges will not accrue or be assessed.

8. When these charges would not be in the best interest of the government, would cause extreme hardship, or if facts and circumstances indicate that charges accrued would not be collected per paragraph 290408, below, they will not be assessed.

B. Blanket decisions to not accrue or assess these charges are not authorized. Documentation shall support every decision not to accrue or assess these charges. If there is documentation in the official debt file or associated with the debt transaction that clearly supports and explains the reason(s) for the decision not to accrue or assess these charges, no further documentation is required. Exception: See requirements for subparagraph 290407.A.8, above.

290408. Decisions Not to Collect Interest, Penalty, and Administrative Charges. Once accrued and assessed, these charges normally will be collected. However, a decision not to collect these charges can be made on a case-by-case basis.

A. General. The dollar limits imposed by regulation on various levels for write off of debt principal also determine the authority for making the decision not to collect these charges. The decision not to collect shall be documented and retained in the official debt file. Blanket decisions not to collect interest, penalty, or administrative charges are not authorized.

B. Mandatory Grace Period. Interest will not be collected on a debt or on any part of a debt paid within 30 days after the date interest began to accrue. The 30-day period can be extended for an additional 30 days on a case-by-case basis. Document and retain in the official debt file the reason(s) for any extension.

C. Criteria for Not Collecting. Decisions not to collect these charges can be made on a case-by-case basis when the following general standard for not collecting and any one of the appropriate circumstances or standards are present.

1. General Standard. Collection of these charges would be against equity and good conscience or not in the best interest of the government.

2. Appropriate Circumstances and Standards

a. These charges accrued and were assessed on a debt principal balance that was incurred through no fault or lack of good faith on the part of the debtor.

b. Financial inability of the debtor to pay the accrued and assessed charges within a reasonable period of time.

c. The underlying debt principal balance was waived or remitted by the appropriate authority, or an other administrative review process (e.g., hearing or reconsideration) determined that it was not valid.

d. Reasonable doubt exists concerning the government's ability to prove that charges are owed because of the issues involved or a bona fide dispute as to facts.

e. The amount of charges that could be collected is less than the cost of collection.

f. Reasonable efforts to locate the debtor have been unsuccessful.

g. Collection would have an adverse effect on the diplomatic relations between a debtor nation and the United States which would impair the ability of the Department to conduct its mission from installations located within the debtor nation.

★2905 DEBT RECONSIDERATION

290501. Debts That Will Be Reconsidered. Creditor organizations will reconsider debt validity and amount and the appropriateness of involuntary offset schedules upon timely receipt of a debtor's request. Debts, for which the debtor is entitled to and has petitioned for a hearing under this Regulation, also will be reconsidered. However, creditor organizations will comply with hearing procedures unless the debtor waives hearing or administrative hearing rights.

290502. Providing Debtors With Debt Records. Creditor organizations will make available to each debtor a copy of records relating to the debt when requested. Records will be provided at debtor's expense. Fee charges will be determined on an individual basis according to the appropriate fee schedule.

290503. Effect on Interest, Penalty, and Administrative Charges. Neither debt reconsideration nor requests for records by themselves will stay debt collection proceedings including accrual of interest, penalty, or administrative charges.

290504. Document Support. Debtors who request reconsideration of salary offset schedules established other than by agreement with the debtors, will explain why they believe the offset schedule will cause undue financial hardship. These debtors will submit proposed alternative offset schedules and the financial statements specified by paragraph 300408.F of this volume. Debtors who request reconsideration of debt validity or amount will submit documents and statements, if required, to support their positions.

290505. Written Decisions. Creditor organizations reconsidering debts will give debtors written decisions as follows:

A. If, after considering a debtor's statements and documentation, the debt is valid and the amount is partially or fully reaffirmed:

1. A statement of the reasons for reaffirming the debt, including, if applicable, reasons for adjusting the amount.

2. If a debtor is not entitled to, or has not petitioned for, a hearing or administrative hearing, notice of the collection actions that will be taken if full payment is not received within 30 days.

B. After considering a debtor's statements and documentation contesting an offset schedule, give the debtor either: a statement that the alternate offset schedule proposed by the debtor has been accepted; or a statement that the offset schedule established by the creditor organization does not impose undue financial hardship. If the debtor is not entitled to or did not petition for a hearing or administrative hearing, give notice that offset will begin the next established pay period if full payment is not received before pay deductions are initiated.

C. If a reconsideration so warrants, notify a debtor that the debt was invalid.

CHAPTER 30

**DEBT COLLECTION BY INVOLUNTARY SALARY AND
ADMINISTRATIVE OFFSET**★3001 APPLICABILITY.

Policies in this chapter apply to debts of individuals, except foreign individuals, owed the United States. They do not apply to contract debts, sovereign debts owed the United States, or collection of child support, alimony, or commercial debts from the pay of DoD civilian employees or military members through garnishment or involuntary allotment. Contract debt collection procedures are contained in Volume 10 of this regulation. Sovereign debt collection procedures are contained in chapter 3, Volume 15 of this Regulation. Procedures for collection of child support, alimony, or commercial debts from military members or civilian employees through garnishment or involuntary allotments are contained in Volume 7 and Volume 8, respectively, of this regulation.

3002 STATUTORY AUTHORITY

300201. Salary Offset Under 5 U.S.C. 5514, Installment Deduction for Indebtedness to the United States. Creditor organizations will use 5 U.S.C. 5514 (reference (j)), as the statutory authority to collect member's and employee's debts by salary offset when salary or administrative offset are not authorized specifically or required by other, more specific, statutes. Debtors whose debts are being collected under this authority will be given opportunities for oral or administrative hearings regarding the validity and amount of debts, or offset schedules established other than by agreement with the debtors. Provisions in this Regulation for salary offset and hearings specifically required by reference (j) are not required for debts being collected under other statutory authority covered in this Regulation.

300202. Requirement to Use 31 U.S.C. 3716, Administrative Offset Procedures. Creditor organizations will use administrative offset requirements of 31 U.S.C. 3716 (reference (e)), when collecting debts by administrative offset under the following statutes which specifically authorize or require administrative offset. Reference (e) administrative offset requirements apply to collections under any other statutes authorizing or requiring administrative offset to the extent such procedures are not included in those statutes.

A. 5 U.S.C. 5705, Advancements and Deductions (reference (j)) for civilian employees.

B. 10 U.S.C. 2775, Liability of Members for Damages to Housing and Related Equipment and Furnishings (reference (b)).

C. 37 U.S.C. 1007, Deduction From Pay (reference (ar)) for military members.

300203. Administrative Offset under 5 U.S.C. 5705, Advancements and Deductions When making collections of unearned advance per diem or mileage allowances, civilian employees will be given an opportunity to immediately pay the amount due. If immediate payment is not made, full offset (which does not cause undue financial hardship) will be made automatically made against accrued pay, retirement credit, or any other amount due the civilian employee from the United States. If the civilian employee does not pay, or there is no amount available for offset, all other appropriate debt collection provisions of this Regulation will be followed. The requirements for immediate repayment of unearned advances of per diem and mileage allowances will be explained at the time the advances are made. Explanation of the requirement will fulfill requirements of the initial demand letter should automatic deduction become necessary. Hearings are not required. Debts will be reconsidered upon request of debtors.

300204. Administrative Offset under 10 U.S.C. 2775, Liability for Damages to Housing and Related Equipment and Furnishings. Hearings are not required for debts being collected by administrative offset from members under 10 U.S.C. 2396(b) (reference (b)). All other provisions of this Regulation, except salary offset under 5 U.S.C. 5514 (reference (j)), apply to these debt collection actions. These debts will be reconsidered on request of debtors.

300205. Administrative Offset under 37 U.S.C. 1007, Deductions From Pay. Administrative offset under 37 U.S.C. 1007 (reference (ar)) is authorized for amounts administratively determined to be owed a DoD Component by a member. Except where there are questions of debt validity or truthfulness, oral or administrative hearings are not required for debts being collected by administrative offset under this statute. Policies for collecting routine pay adjustments under this statutory authority are in Volume 7 of this Regulation.

300206. Offset Under Statutes Not Specifically Covered. Nothing contained in this Regulation will prevent a DoD Component from pursuing collection under any statutory authority not specifically covered herein.

3003 REQUIREMENTS FOR INVOLUNTARY SALARY AND ADMINISTRATIVE OFFSETS

300301. General. Creditor organizations will collect debts by salary or administrative offsets in every instance that such collection is feasible and is not otherwise prohibited, and the debtor refuses to pay the debt in lump sum or agrees to a voluntary payment schedule acceptable to the creditor organization. DoD Components have discretionary authority to accept voluntary payment agreements rather than offset salaries. If debts are delinquent and their existence and amount are not in dispute, maximum permissible amounts (that will not cause undue financial hardship on debtors or be against equity and good conscience) will be offset from salaries. DoD Components will use sound discretion when collecting debts by administrative

offset from non-salary amounts. Consideration will be given both to whether the offset can be accomplished both practically and legally, and whether offset is best suited to further and protect all interests of the Department and the United States. Salary and administrative offsets are permitted for debts owed a DoD Component or another federal agency.

300302. Time Limits Action will not be initiated to collect debts by involuntary salary or administrative offset more than 10 years after the right to collect a debt first accrued unless facts material to the right to collect the debt were not known and could not reasonably have been known by the responsible DoD Component official. When the right to collect a debt first accrued is determined according to existing law such as 28 U.S.C. 2415 (reference (k)).

300303. Non-Waiver of Rights - Involuntary Payments under 5 U.S.C. 5514. A debtor's involuntary payment of all or part of a debt being collected under reference (j) authority will not be construed as a waiver of any rights the debtor may have under that statute or any other provisions of law unless there are statutory provisions to the contrary.

★ 300304. Scheduling Offset. Salary deductions will begin the next established pay period after receipt of offset requests, with appropriate claim forms and debt certification as specified in paragraph 300504, below, from DoD creditor organizations or the DFAS-Cleveland Center/ABA. Salary deduction may begin in a later pay period upon request by a creditor organization. Administrative (non-salary) amounts will be offset when they become due and payable to the debtor giving consideration to administrative offset requirements in paragraph 300301, above.

★ 300305. Maximum Allowable Current Salary Offset. Amounts collected involuntarily under 5 U.S.C. 5514 (reference (j)) may not exceed 15 percent of disposable pay, unless the debtor consents to a higher percentage. Collection of judgments by offset from civilian pay under section 124 of Public Law 97-124 (1982) may not exceed 25 percent of disposable pay, unless a greater percentage is necessary to make the collection within the period of anticipated employment. Section 124 of Public Law 97-124 may not be used to collect by offset from military pay. Collection of judgments by offset from military pay will be made under 5 U.S.C. 5514. The agency submitting the judgment and requesting the offset (which is usually the Department of Justice) must provide the certification that the due process requirements of 5 U.S.C. 5514 have been complied with when requesting that a judgment be offset from a military member's pay.

★ 300306. Determining Disposable Pay. Organizations will use procedures contained within this regulation, Volumes 7A, 7B, and 8 to compute disposable salary when taking involuntary offset against an employee's current salary. Use Volume 7A, paragraph 500103.D to compute active duty, Reserve, and Guard pay; Volume 7B, paragraph 60202 to compute retired pay; and Volume 8, paragraph 080307 to compute civilian salary.

300307. Amounts Not Deductible When Determining Disposable Pay. The following are amounts that will not be deducted from pay when computing disposable pay.

- A. Existing indebtedness being collected for a DoD Component or other federal agency.
- B. Court ordered garnishments.
- C. Court judgments.
- D. Court ordered bankruptcy payments under chapter 13 of the Revised Bankruptcy Act.
- E. Voluntary allotments for child support.
- F. Union dues deductions.
- G. Charity deductions.
- H. United States savings bonds deductions.
- I. Federal (IRS) tax levies.
- J. Savings allotments.
- K. Thrift savings.

300308. Determining Undue Financial Hardship. An offset produces undue financial hardship when it prevents debtors' from meeting costs necessarily incurred for essential subsistence expenses for them, their spouses, and their dependents. Essential subsistence expenses are: food, housing (including public utilities), clothing, transportation, and medical care. In making a final determination whether an offset within the percentage limits of paragraph 300305, above, will impose undue financial hardship, creditor organizations will use the following information.

- A. Income from all sources for debtors, their spouses and dependents.
- B. The extent to which assets of debtors, their spouses, and their dependents are available to meet the offset and essential subsistence expenses.
- C. Whether subsistence expenses have been reduced to minimum essential amounts.
- D. The extent to which debtors, and their spouses can borrow money to meet the offset and minimum essential subsistence expenses.

E. The extent to which debtors and their spouses and dependents have other exceptional expenses that should be taken into account and whether the exceptional expenses have been minimized.

300309. Debts for Which Administrative Offset, According to this Regulation, Is Not Authorized. Administrative offset under this Regulation is not authorized with respect to:

A. debts owed by any (United States) federal agency or (United States) state or local government;

B. any case in which collection of the debt involved by administrative offset explicitly is prohibited by statute; or,

C. debts arising under or payments made under the Social Security Act, the Internal Revenue Code, or the tariff laws of the United States.

300310. Authority To Eliminate Second and Third Demand Letters. Availability of a debtor's funds for involuntary salary or administrative offset and a creditor organization's decision to take offset, releases the organization from the second and third debt notification letter requirements of this Regulation.

300311. Salary and Administrative Offsets Before Due Process. Salary or administrative amounts payable to debtors will be offset involuntarily before initiation of or at any time during due process procedures if: failure to take the offset would substantially prejudice the DoD Component's ability to collect the debt; time before payment must be made does not reasonably permit completion of the procedures; and such prior offset is promptly followed by due process procedures.

3004 DUE PROCESS

300401. Debtor Notification Creditor organizations are responsible for ensuring due process. They will certify completion of due process procedures to the organization making the involuntary salary or administrative offset. In debt cases where due process previously has been provided to debtors, organizations accomplishing offsets will not duplicate the requirements before taking offset. The organization responsible for providing due process must ensure that all requirements were met. In debt cases where salary or administrative offset has been taken before completion of due process, the requirements will be met as soon as possible after offset is initiated. Before offset is requested, creditor organizations must be able to demonstrate that debtors have received demand letters and notices of intent to offset. If hand-delivery and execution of a receipt of notice is not possible, certified or registered notices with return receipt requested may be used.

A. Except as provided in paragraph 300311, above, debtors must be advised of the following in addition to requirements of the initial demand letter as stated in paragraph

290203 of this volume, before salary can be involuntarily offset under statutes other than 5 U.S.C. 5705 (reference (j)):

1. a minimum of 30-days written notification, if not already provided, of the intent to collect by offset.
2. the right to inspect and copy DoD Component records related to the debt for which the debtor will bear the cost.
3. the amount, frequency, beginning date, and duration of the intended deduction if full payment is not received by the due date.
4. the fact that any amounts paid or deducted for a debt that is later found not owed will be promptly refunded unless there are applicable statutes or regulations to the contrary.

B. For salary offset under 5 U.S.C. 5514 (reference (j)), debtors also will be advised of the following:

1. the right to an oral or paper hearing on the DoD Component determination of the existence and amount of the debt or, when a repayment schedule is established other than by written agreement with the debtor, concerning the repayment schedule terms.
2. the right to request a hearing based on written submissions in lieu of an oral hearing when a creditor organization has determined an oral hearing would otherwise be appropriate.
3. the method and time period for requesting a hearing.
4. the fact that the timely filing of a petition for a hearing will stay debt collection proceedings including accrual of interest, penalty, and administrative charges.
5. the fact that the final decision on the hearing will be issued the earlier of 15 days from hearing completion or, unless the creditor agency has arranged an extension with the hearing official, not more than 60 days from the date the debtor submitted the petition.
6. the address to which correspondence regarding the hearing will be sent.
7. the fact that any knowingly false or frivolous statements, representations, or evidence may subject the debtor to: disciplinary procedures appropriate under Title 5, U.S.C., chapter 75 (reference (j)), or any other applicable statute or regulation; penalties under the False Claims Act, Title 31, U.S.C., sections 3729 - 3731 (reference (e)), or any other

applicable statutory authority; or, criminal penalties under Title 18, U.S.C., sections 286, 287, 1001, and 1002 (reference (i)), or any other applicable statutory authority.

300402. Hearings. Hearings are a due process requirement of 5 U.S.C. 5514 (reference (j)). Debtors are entitled to petition for hearings to contest debt existence or amount or the amount of an involuntary offset established other than by agreement with the debtor. Except as provided in paragraph 300311, above, hearings will be offered to debtors before involuntary offset is initiated. Oral hearings are not required if the debt type rarely involves issues of credibility or truthfulness. Creditor organizations will determine when a review of written records (administrative hearing) is sufficient to resolve debt issues. Debtors may elect an administrative hearing in lieu of an oral hearing when a creditor organization determines an oral hearing would otherwise be appropriate.

300403. Administrative Hearings. When debtors petition for hearings and the creditor organization determines an oral hearing is not required, the debtor nevertheless will be given an administrative hearing. Administrative hearings will be made by a hearing official who would otherwise be authorized to hold an oral hearing for the debt being contested. Administrative hearings will be based on written submissions of the creditor organization and the debtor.

300404. Documenting Oral Hearings. Creditor organizations and agencies requesting oral hearings by DoD officials are responsible for documenting significant matters discussed at oral hearings held on their behalf.

300405. Authorized Hearing Officials. No DoD employee, except an administrative law judge, under the control or supervision of a creditor DoD Component or employing DoD Component will hold an oral hearing or make an administrative hearing on any debt owed that DoD Component by an employee of that DoD Component. DoD personnel eligible to hold oral hearings or make administrative hearings for other DoD Components or federal agencies include grievance and appeals examiners, attorney advisors, judge advocates, and other persons who have been trained in or who have performed hearing officer duties. Hearings for debts owed to DoD Components by its employees should be held by eligible DoD Components according to table 30-1. Individuals not employed by the Department may be employed temporarily or intermittently to act as hearing officials but only when it is impractical to use DoD personnel. Control of DoD debt collection hearings is centralized at DFAS-Indianapolis Center. Refer all debtor requests for hearings to the DFAS-Indianapolis Center for action.

300406. For either an oral hearing or administrative hearing. Hearing officials will hold only one hearing (oral or administrative) for a debt owed a DoD Component or federal agency.

300407. Creditor Organization Hearing Responsibilities. Following are oral and administrative hearing requirements for DoD Component creditor organizations.

A. Upon receipt of a debtor's oral or administrative hearing petition, reexamine debt basis, amount, and repayment schedule.

B. Within 15 days after receiving the petition provide debtors with the following:

1. a statement that the debt has been reconsidered, results of the reconsideration indicating whether the debtor's contentions have been accepted in whole or part, and a request that the debtor accept the reconsideration in lieu of an oral or administrative hearing.

2. notification of the time, date, and location of the oral hearing to be held if the debtor does not accept results of debt reconsideration and the creditor organization determines that an oral hearing is required.

3. notification that debt issues will be resolved by administrative hearing if the debtor does not accept results of debt reconsideration and the creditor organization determines an oral hearing is not required.

4. a list of submissions required of the debtor and the address to which submissions must be sent.

C. Also within 15 days after receiving the petition, creditor DoD Components will give the following both to the debtor and the hearing official:

1. copies of debt records in the creditor organization's possession (provided to the debtor only if requested and not previously provided and then at the debtor's expense).

2. a statement supporting determination of debt basis and amount.

3. a statement setting forth reasons why an offset schedule, if being protested, does not create undue financial hardship.

4. for oral hearings, names of creditor organization witnesses and their anticipated statements.

D. For oral hearings, whenever feasible, coordinate a site, time and date convenient for debtors.

E. Creditor organizations will change oral hearings to administrative hearings on request of debtors if such requests are received at least 3 working days before established oral

hearing dates and if all submissions will be available to hold the reviews at established times and places. Debtor-elected administrative hearings will not be changed to oral hearings.

F. When a debtor accepts results of debt reconsideration, notify the hearing official that the oral or administrative hearing is not required.

300408. Debtor Oral and Administrative Hearing Responsibilities

A. Debtors must indicate, in their initial written response, whether they are contesting debt validity, amount, or offset schedule. When a creditor organization has determined that an oral hearing is required for a debt, a debtor may petition for an administrative hearing in lieu of the oral hearing. Debtors who petition for administrative hearings (in lieu of an oral hearing) will forfeit their right to an oral hearing and agree to accept the hearing official's decision as final, in writing, at the time of their request. The petition will not be revocable by a debtor.

B. Debtors and their representatives and witnesses are responsible for their expenses incident to inspecting and copying government debt records and attending oral hearings.

C. Debtors forfeit their oral or administrative hearing rights and will have their salaries offset according to established offset schedules if they fail to: file an oral or administrative hearing petition with the creditor organization by the date specified in the offset notification letter; appear on time at a scheduled oral hearing; or file required submissions with the creditor organization and the hearing official within 3 working days of due dates.

D. During oral and administrative hearings, debtors will not raise any issues not previously raised with the creditor organization nor will they introduce any facts or records not previously submitted to the creditor organization.

E. Debtors who have petitioned for oral or administrative hearings regarding the validity and amount of debts and who do not accept results of debt reconsideration will have 30 days from receipt of notification of reconsideration results or 45 days from receipt of debt records provided under this Regulation, to give both the creditor organization and the hearing official the following:

1. a statement of the reasons why the debtor believes that a creditor organization's determination of the debt validity and amount is clearly erroneous, including all facts on which the debtor bases his or her belief.

2. copies of any pertinent records the debtor plans to introduce to the oral or administrative hearing process if the records differ from those provided by the creditor organization.

3. for oral hearings, the name of a representative if the debtor has elected one.

4. for oral hearings, if the debtor will have witnesses, a list of their names and a summary of their anticipated statements.

F. Debtors who have petitioned for oral or administrative hearings regarding salary offset schedules, established other than by agreement with the debtors, and who do not accept results of debt reconsideration will have 30 days from receipt of notification of reconsideration results or 45 days from receipt of debt records provided under this Regulation to give both the creditor organization and the hearing official the following:

1. a proposed alternative salary offset schedule.

2. specific details on family, including debtor, spouse, and dependents, financial position for the 1-year period preceding and projected for the proposed alternative offset period.

3. a statement of the reasons why the debtor believes the salary offset schedule will impose undue financial hardship.

4. copies of any pertinent debt records the debtor plans to introduce to the oral or administrative hearing process.

5. for oral hearings, the name of a representative if the debtor has selected one.

6. for oral hearings, if the debtor will have witnesses, a list of their names and a summary of their anticipated statements.

300409. Hearing Official Responsibilities. Oral and administrative hearings will be held according to the following requirements.

A. An oral hearing will consist of an informal conference before a hearing official.

B. Both the creditor DoD Component and the debtor will be given full opportunity to present documents, witnesses, and arguments.

C. The only evidence permitted, except oral testimony, will be that submitted as prehearing submissions.

D. Debtors will not raise any issues not previously raised with the creditor DoD Component or non-DoD federal agency.

E. Creditor DoD Components and non-DoD federal agencies will maintain a summary record of oral hearings.

F. A written decision will be provided to both the debtor and creditor DoD Component or other federal agency the earlier of 15 days from oral or administrative hearing completion or, unless the creditor DoD Component or non-DoD federal agency has arranged an extension with the hearing official, 60 days from the date the debtor submitted the oral or administrative hearing petition. Hearing officials will not be responsible for delays caused by DoD Components or non-DoD federal agencies.

G. A hearing official's decision will be final and will discuss basic facts documenting the debt. The decision will include conclusions concerning debt validity, amount, or propriety of contested offset schedules.

H. Hearing officials will review debtors' submissions received not later than 3 working days after the due dates to determine whether debtors forfeited oral or administrative hearing rights. If debtors show good cause, these rights will not be forfeited.

3005 PROCESSING OFFSET REQUESTS FOR ANOTHER DOD COMPONENT OR FEDERAL AGENCY

300501. Determining Debt Validity. Organizations processing offset requests from another DoD Component or non-DoD federal agency are not authorized to determine the merits of debts for which offset is requested.

300502. Debtor Notification. Organizations making salary and administrative offsets for another DoD Component or non-DoD federal agency will give debtors with a copy of the debt claim form. If the date salary deductions will begin differs from the date on a debt claim form, debtors will be advised of the date deductions will begin. Debtors also will be advised when collections will be made from administrative (other than salary) amounts.

300503. Reporting Debtor Change of Employing Agency. Creditor DoD Components or non-DoD federal agencies will be notified by the collecting organization when employees, whose debts are being collected by salary or administrative offset, transfer to different paying agencies or terminate federal employment before debts are satisfied. Collecting organizations will certify amounts collected to creditor DoD Components or non-DoD federal agencies and provide copies of certifications to debtors. For interagency transfers, originals of the debt claim forms and copies of certifications of amounts collected will be included in debtors' official personnel folders.

★ 300504. Processing Requests From DoD Components. DoD Components will process salary and administrative offset requests received directly from other DoD Components. These offset requests must include the following certifications and information:

A. a statement certifying that the debtor has been provided due process including the applicable statutory authority.

B. a DD Form 139 (Pay Adjustment Authorization), DD Form 2481 (Request for Recovery of Debt Due the United States by Salary Offset) or other authorized or prescribed debt claim form or automated transaction.

C. total amount and nature of the debt.

D. point of contact at the creditor agency for any questions or disputes the debtor may have.

★ 300505. Processing Requests From Non-DoD Federal Agencies. All requests from non-DoD federal agencies for salary and administrative offset against DoD Component employees will be forwarded to DFAS-Cleveland Center/ABA for acknowledgment and certification. The Defense Manpower Data Center completes a matching process to identify which DoD activity is paying the debtor.

3006 REQUESTING SALARY AND ADMINISTRATIVE OFFSET FROM ANOTHER DOD COMPONENT OR NON-DOD FEDERAL AGENCY

★ 300601. Debt Certification. Organizations requesting salary and administrative offset against a debtor employed by another DoD Component or non-DoD federal agency will send the request and certifications required in paragraph 300504, above, to the debtor's employing component or agency. Offset requests will be accomplished by sending a DD Form 139, DD Form 2481, other authorized or prescribed form, or automated transaction to the paying agency.

300602. Debt Certification Waiver. When a debtor consents to salary or administrative offset in writing or signs a statement acknowledging receipt of due process procedures and the writing or statement is attached to the debt claim form sent to the employing agency, debt certification specified in paragraph 300601, above, is not required.

★ 300603. Coordinating Offset Requests. The organization requesting offset by another DoD Component or non-DoD federal agency is responsible for coordinating the amount and frequency of installment payments and a date for the first installment if a date different from the next established pay period is required.

300604. Collection Upon Interagency Transfer. Organizations that have requested offset by a DoD Component or non-DoD federal agency and later receive notification that a debtor has transferred to another DoD Component or non-DoD federal agency, will ensure the new employing component or agency resumes debt collection.

3007 REQUESTING OFFSET AGAINST AMOUNTS DUE AND PAYABLE FROM THE CIVIL SERVICE RETIREMENT AND DISABILITY FUND

300701. When Offset Will Be Requested. When a debtor already has separated and all payments due from a former employing agency have been paid, DoD creditor organizations will request administrative offset from amounts due and payable from the Civil Service Retirement and Disability Fund. Offset will be requested from lump sum and annuity payments.

300702. Time Limits. Requests for administrative offset against amounts payable from the Civil Service Retirement and Disability Fund will be made promptly. A request for offset satisfies requirements that offset be initiated before expiration of any applicable statute of limitations. Organizations that are both creditor and paying agency have a maximum of 60 days after a debtor separates or is no longer covered by the civil service retirement system to send to the prescribed debt notice or claim form to the OPM. When a DoD Component is the creditor agency but not a debtors' paying agency the DoD creditor organization will ensure OPM receives the debt claim or notice before expiration of the applicable statute of limitations and, if a refund is payable to a debtor, before the refund is paid. No other time limits apply for sending debt claims or notices to OPM.

300703. Notifying OPM To Prevent Lump-Sum Payment. When a DoD Component cannot immediately send to OPM a complete debt claim which would preclude lump-sum payment to a debtor, OPM should be notified of the intent to request offset. Notification will be by made by submitting the claim form prescribed by OPM. If the prescribed form is not available, a separate document will be used that identifies the debtor by name, date of birth, social security number, and date of separation, if known. If a debt notice did not include the debt amount, the requesting DoD Component must establish the amount and notify OPM in writing as soon as possible after submitting the notice.

300704. Follow-Up Submissions for Debt Notices and Incomplete or Incorrect Debt Claims Forms. DoD Components that send debt notices to OPM or receive advice from OPM that a debt claim was either incorrect or incomplete must forward to OPM a complete or corrected debt claim within 120 days. Organizations may request one 60 day extension which must be received by OPM before expiration of the 120 days specified above. OPM will not hold a lump sum payment more than 180 days awaiting a complete or corrected debt claim. These time limits do not apply to offsets against annuity payments.

300705. OPM Authority to Review Debt Merits. OPM is not authorized to review merits of DoD Components' determinations as to debt validity or amount.

300706. Notice to Debtors. The DoD Component making offset requests will notify debtors when their debts are sent to OPM for offset against the Civil Service Retirement and Disability Fund.

300707. Supporting Documents for Court Judgments. When a debt is supported by a court judgment specifying the debt amount, two certified copies of the court judgment will be sent to OPM with the debt claim.

300708. Debtors' Rights To Offer Repayment Schedules. If at least 1 year has elapsed since an offset request originally was made, when a debtor makes a claim for payments against the retirement and disability fund, the debtor will be permitted to offer a repayment schedule to the creditor organization. In making a decision to accept a repayment schedule, the creditor organization will consider the circumstances under which debts remained unpaid before debtors made claims against the fund. To be acceptable, debtors must, as a minimum, establish that financial circumstances would make the offset unjust.

300709. Collection Actions After Referral to OPM Creditor organizations will pursue debt collection by other means under this Regulation after debts are referred to OPM for offset. If collections are made, OPM will be promptly notified to modify or terminate offset requests.

300710. Minimum Debt Amount Referable. Debts less than \$100 will not be referred to OPM for offset from the Civil Service Retirement and Disability Fund. However, requests for offset of debts in any amount will be sent to OPM if debts were caused by an employee's failure to pay health benefits premiums while in non-pay status or when salary was not sufficient to pay premiums.

300711. Establishing Offset Schedules. If an offset must be made in installments, the organization submitting the request will advise OPM of the number of installments, the amount of each installment, and the date the first installment should be collected.

300712. Maximum Permissible Offset. Involuntary individual offsets are limited by OPM to 25 percent of net annuity for court judgments and 15 percent of net annuity for all other debts.

300713. Court Ordered Refunds. Organizations requesting offsets will certify to OPM that, if competent administrative or judicial authority issues an order directing OPM to pay a debtor an amount previously paid to the creditor organization, the amount will be reimbursed to OPM or paid to the debtor within 15 days of the order date.

300714. Certifications. DoD Components requesting administrative offset against the Civil Service Retirement and Disability Fund will include the following certifications and information:

- A. a statement that the debtor owes the debt;
- B. a statement that the debtor has been provided due process including the applicable statutory authority;

- C. a certified debt claim form if specified by OPM;
- D. details of the debt including basis, amount, payment due date, and date the debt was due;
- E. a statement that DoD regulations pertaining to salary offset have been approved by OPM;
- F. a statement that there has been compliance with applicable statutes, regulations, and procedures required by OPM; and
- G. two copies of certification of the amount collected and a copy of notice to the debtor that the claim was sent to OPM.

300715. Debts Subject to Specific OPM Regulations. DoD Components will follow specific regulations published by OPM when sending the following debts for OPM offset:

- A. debts due because an employee failed to pay health benefits premiums while in non-pay status or when salary was not sufficient to cover premium costs;
- B. no more than 6 months of retroactive premiums are due because an annuitant elected Part B Medicare coverage; or
- C. overpayments of military retired pay that annuitants elected in writing to have withheld from their annuity.

300716. Requesting Offset for Debts Not Otherwise Processed under this Regulation. DoD Components will comply with the following procedures when requesting OPM offset from the Civil Service Retirement and Disability Fund for debts not otherwise processed under this Regulation.

- A. Make the certifications required by paragraph 300714, above.
- B. If the offset must be made in installments, advise OPM of the number of installments to be collected, the amount of each installment, and the date the first installment should be collected.

SELECTION OF HEARING OFFICIALS FOR DOD COMPONENT DEBTS (Note 1)

**CHAPTER 31 DEBT COMPROMISE: SUSPENDING AND TERMINATING
COLLECTION ACTIVITY; DEBT WRITE-OFF AND RETENTION**

- ★3101 Applicability
- 3102 Debt Compromise
- 3103 Suspending and Terminating Collection Activity
- 3104 Debt Write-Off, Close-Out, and Retention

CHAPTER 31

**DEBT COMPROMISE: SUSPENDING AND TERMINATING COLLECTION
ACTIVITY; DEBT WRITE-OFF AND RETENTION**★3101 APPLICABILITY

Policies in this chapter apply to debts of individuals, except foreign individuals, owed the United States. They do not apply to contract debts, sovereign debts owed the United States, or collection of child support, alimony, or commercial debts from the pay of DoD civilian employees or military members through garnishment or involuntary allotment. Contract debt collection procedures are contained in Volume 10 of this regulation. Sovereign debt collection procedures are contained in chapter 3, Volume 15 of this Regulation. Procedures for collection of child support, alimony, or commercial debts from military members or civilian employees through garnishment or involuntary allotments are contained in Volume 7 and Volume 8, respectively, of this regulation.

3102 DEBT COMPROMISE

310201. Authority To Compromise. Only the Department of Justice (DOJ) has authority to compromise debts exceeding \$100,000 exclusive of interest, penalties, and administrative charges. The Secretary of Defense has the authority to delegate and has properly delegated the authority to compromise debts of \$100,000 or less to the Directors of DFAS Centers and the heads of other DoD Components. Designated DoD Components may compromise debts that do not exceed \$100,000 exclusive of interest, penalties, and administrative charges after deducting amounts paid. No compromise action is authorized on debts referred to the GAO or the DOJ unless the debt is returned to the DoD Component for disposition. DoD Components will not compromise, but will refer to the DOJ, any debts that appear to be based on fraudulence or which are based on a violation of antitrust laws.

★ 310202. Referring Compromise Offers to the GAO and the DOJ. A DoD Component holding a debtor's firm written and substantial compromise offer for a debt less than \$100,000 exclusive of interest, penalties, or administrative charges may refer the matter to the GAO or the DOJ if there is uncertainty whether the offer should be accepted. Referral will include all supporting information. The GAO or the DOJ may act on the offer or provide instructions or advice. If a compromise offer for a debt exceeding \$100,000 exclusive of interest, penalties, and administrative charges is received and is acceptable to the DoD Component, the debt case will be referred to the DOJ using a Claims Collection Litigation Report. Referrals will specify reasons for compromise recommendations.

310203. Compromise Because of Litigative Risks. Designated DoD Components will compromise debts when there is real doubt as to the government's ability to prove its case in court for the full debt amount either because of legal issues involved or a bona fide dispute as to

facts. In determining litigative risks, proportionate weight will be given the probable amount of court costs and attorney fees which may be assessed against the government under the Equal Access to Justice Act if litigation is unsuccessful. Amounts accepted in compromise under these circumstances should reasonably reflect the probability of prevailing on legal questions involved, probability of full or partial recovery of a judgment paying due regard to availability of witnesses, other evidentiary government support, and related practical considerations.

310204. Compromise With Joint and Severally Liable Debtors. DoD Component organizations will not attempt to allocate the burden of paying a debt among jointly and severally liable debtors but will liquidate debts as quickly as possible. Compromise agreements taken with one jointly and severally liable debtor will be taken so that the agreement does not release the DoD Component's claim against other debtors. The amount of a compromise with one jointly and severally liable debtor will not be considered binding when determining the amount which will be paid by other debtors.

310205. Compromise Because of Inability To Enforce Collection. Debts will be compromised when the government will be unable to enforce collection. When making this determination, DoD Components will consider applicable exemptions available to debtors under state and federal laws and uncertainty as to the price collateral or other property might bring at a forced sale. Amounts compromised will bear a reasonable relationship to amounts which can be recovered by enforced collection having regard for exemptions available to debtors and the time to effect collection.

310206. Compromise Because Collection Costs Exceed Amounts Recoverable. Debts will be compromised when collection costs do not justify enforced collection of the full amount. Generally, collection costs will be a significant factor in small-debt compromise decisions but will not be a significant factor in large-debt compromise decisions. When determining which debts to pursue, creditor organizations will weigh the positive effect of a vigorous small-debt collection policy against the cost of collecting debts. Consideration will be given to practical benefits that vigorous collection of some small debts will demonstrate to other debtors that resistance to debt payment is unlikely to succeed. When making compromise decisions under these circumstances, DoD Components will consider an appropriate discount for administrative and litigative collection costs and the time to effect collection.

★ 310207. Compromise Because Debtors Are Unable To Pay Full Amount. Debts may be compromised if debtors are unable to pay the full amount in a reasonable time or if debtors refuse to pay in full and the government would be unable to enforce full collection within a reasonable time. The following factors, as a minimum, will be considered when determining a debtor's ability to pay:

- A. debtor's age and health.
- B. debtor's current and potential income.

- C. debtor's inheritance prospects.
- D. possibility that assets were concealed or transferred to avoid debt payment.
- E. availability of assets or income realizable from enforced collection proceedings.

310208. Compromise for a Combination of Reasons. Debts will be compromised using any applicable combination of reasons in this section.

310209. Obtaining Debtor Credit Information. If the DoD Component's files do not contain up-to-date financial information on which to base compromise decisions, credit information will be obtained from commercial credit bureaus and from debtor's statements executed under penalty of perjury.

310110. Compromises Payable in Installments. Compromised debts will be collected in lump sum. However, if installment payments are necessary, the compromising authority will obtain from the debtor, a legally enforceable agreement for reinstatement of the original debt less principle payments, and acceleration of the total balance due upon default of an installment payment.

310111. Compromises for Other than Cash. DoD Components will not accept either a percentage of a debtor's profits or stock in a debtor's corporation in compromise of a claim.

3103 SUSPENDING AND TERMINATING COLLECTION ACTIVITY

310301. Authority to Suspend or Terminate Collection Activity. Only the DOJ has authority to suspend or terminate collection action on debts exceeding \$100,000 exclusive of interest, penalties, and administrative charges after deducting amounts paid. Designated organizations may suspend or terminate collection actions on debts not exceeding \$100,000 exclusive of interest, penalties and administrative charges, after deducting amounts paid. No suspension or termination action is authorized on a debt referred to the GAO or DOJ unless the debt is returned to the DoD Component for disposition. DoD Components will refer to the DOJ any debt that appears to be based on fraudulence or which are based on a violation of antitrust laws.

310302. Referring Suspension and Termination Actions to the DOJ. DoD Components authorized to suspend or terminate collection actions also are authorized to refer debts to the DOJ for suspension or termination action. If, after evaluating a debt exceeding \$100,000 according to this section, a Component believes collection action should be suspended or terminated, the debt will be sent to the DOJ according to procedures in chapter 32 of this Volume.

★ 310303. Suspension when Debtors Cannot Be Located. Collection action may be suspended when debtors cannot be located and there is reason to believe future collection action will be sufficiently productive to justify periodic review and action on debts. Every reasonable effort will be made to locate debtors sufficiently in advance of the bar of the statute of limitations to permit timely filing of suit if such action is warranted.

★ 310304. Suspension when Debtors Are Unable to Pay. Collection action may be suspended when debtors own no equity in real or personal property and are unable to make payments or effect compromise at the time but future prospects justify retention of the debt for periodic review and action and:

- A. the applicable statute of limitations has been suspended;
- B. future collection can be made by offset notwithstanding the statute of limitations or the 10-year offset limitation prescribed for salary and administrative offset in this Regulation;
- C. the debtor agrees to pay interest on the debt amount on which collection is suspended; and
- D. suspension is likely to enhance a debtor's ability to pay the full debt principal and accrued interest at a later date.

310305. Suspension when a Permissive Waiver Statute Applies. Collection action will be suspended even though waiver statutes are permissive and do not prohibit collection action while waiver requests are being considered if:

- A. there is reasonable probability that waiver will be granted or that debts, in whole or part, will be found not owing;
- B. DoD interests will be protected, if there is a reasonable assurance that debts would be recovered if debtors do not prevail; or
- C. collection will cause undue financial hardship.

310306. Suspension when Refunds would Not Be Authorized. Collection action will be suspended if an applicable statute or regulation does not authorize refund of amounts collected before waiver determination if the waiver authority should act favorably on the request. Inability to make a refund will not be a factor in determining whether to suspend collection if a waiver request and surrounding circumstances are frivolous and the request apparently was made to delay debt collection.

310307. Terminating Collection of Erroneous Debts. Collection will be terminated on debts which are clearly erroneous or clearly without legal merit.

310308. Termination When Debtors Are Unable to Pay. Collection will be terminated and case files closed when it becomes clear the DoD Component cannot collect or enforce collection of any significant sum because debtors are unable to pay. Determinations will be made giving due regard to judicial remedies available to the government, debtors' future financial prospects, federal and state legal exemptions available to debtors, and applicable statutes of limitations. The following factors applicable to debtors will be considered:

- A. Age and health.
- B. Current and potential income.
- C. Inheritance prospects.
- D. Possibility that assets were concealed or transferred to avoid debt payment.
- E. Availability of assets or income realizable from enforced collection proceedings.

310309. Termination Because Costs Exceed Amounts Recoverable. Debt collection normally will be terminated when collection costs will exceed the amount recoverable. Creditor organizations will weigh practical benefits that vigorous collection of some of these debts will demonstrate to other similar debtors that resistance to debt payment is unlikely to succeed.

310210. Termination Because Debtors Cannot Be Located. Collection action will be terminated when debtors cannot be located; the applicable statute of limitations has run; and prospects of collecting by offset, notwithstanding the bar of the statute of limitations, are too remote to justify debt retention.

3104 DEBT WRITE-OFF, CLOSE-OUT, AND RETENTION

310401. General. Designated DoD Components will develop write-off procedures that identify and remove uncollectible accounts from accounts receivable records and close-out procedures that discontinue collection activity. These procedures will improve accounting for the cost of collection programs and allow management to focus efforts on accounts most likely to be collected.

310402. Debt Write-Off. Debts will be written off when:

- A. A judgment was obtained but full or partial debt collection could not be made.
- B. A debtor was unable to pay.

C. Collection costs would exceed the amount recoverable.

D. A debtor could not be located and the statute of limitations has expired.

E. A collection agency was unable to collect a debt and returned the debt to the referring organization with documentation sufficient to demonstrate that further collection action would be futile.

★ 310403. Debt Close-Out. DoD Components, when closing out written-off accounts and removing the accounts from other active receivables, shall:

A. Maintain subsidiary records of accounts that may be collected by offset against future benefit claims.

B. Maintain an IRS referral log by calendar year which contains a record of amounts written off and debtor-identifying information for income reporting on IRS Form 1099-C, "Canceled Debt" (see paragraph 310404, below).

★ C. Reinstitute collection action on closed-out accounts if there is subsequent evidence that a debtor has new ability to repay.

310404. Debt Retention. Unless documentary evidence shows there is no potential for future collection, debts written off for which collection costs are not a factor, will be retained in an inactive file until the 10-year administrative offset limitation expires. Inactive debts will be matched periodically against the Defense Manpower Data Center United States-employee files and collected by salary or administrative offset when debtors are found to be employed by the United States. These debts may be collected by other means required or authorized by this Regulation if the 6-year statute of limitations has not expired. DoD Components that write off or compromise debts will maintain logs for later reporting to the IRS. Debt write offs and compromises totaling \$600 or more for an individual debtor in a calendar year will be reported to the IRS as income to the debtor. Write offs and compromises will be included in the total only if the debtor received something of value.

3205 Debt Referrals to the Internal Revenue Service for Tax Refund Offset

CHAPTER 32
DEBT REFERRALS OUTSIDE THE DEPARTMENT OF DEFENSE

★ 3201 APPLICABILITY

Policies in this chapter apply to debts of individuals, except foreign individuals, owed the United States. They do not apply to contract debts, sovereign debts owed the United States, or collection of child support, alimony, or commercial debts from the pay of DoD civilian employees or military members through garnishment or involuntary allotment. Contract debt collection procedures are contained in Volume 10 of this regulation. Sovereign debt collection procedures are contained in chapter 3, Volume 15 of this Regulation. Procedures for collection of child support, alimony, or commercial debts from military members or civilian employees through garnishment or involuntary allotments are contained in Volume 7 and Volume 8, respectively, of this regulation.

3202 REFERRALS TO THE GENERAL ACCOUNTING OFFICE AND THE DEPARTMENT OF JUSTICE

320201. Debts that Will Be Referred. DoD Components will refer to the DOJ any debt where there is an indication of fraud or the presentation of a false claim. The DOJ must authorize collection action on these debts. Except where preliminary referral to GAO is provided in paragraphs 320204 and 320205, below, debts on which aggressive collection action has been taken according to this Regulation and which cannot be compromised, suspended, or terminated, will be referred promptly, without prior GAO referral, to the DOJ for litigation. The DOJ establishes minimum dollar thresholds for referring these debts.

320202. Timing. Referrals will be made as early as possible consistent with collection actions and will be made well within the time limit for bringing suit against debtors. Ordinarily, referrals will be made within 1 year of creditor organizations' final determinations as to facts and amounts of debts.

320203. Department of Justice Referral Addresses. Debts with an original gross amount of \$100,000 or more will be referred to the DOJ Central Intake Facility.

320204. Debts Arising from GAO Exceptions. Debts arising from exceptions taken by the GAO to payments made by DoD Component DOs will be referred to the GAO for review before referral to the DOJ for litigation.

320205. Questionable Debts. Questionable debts will be referred to the GAO for resolution or instructions before collection actions or referral to the DOJ for litigation. DoD Components will follow instructions and observe monetary limitations in the GAO Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)) when making preliminary referrals to GAO. Questionable debts include those where there is doubt as to:

- A. Merits or amount of a debt.
- B. Propriety of proposed compromise.
- C. Propriety of suspending or terminating collection action.

320206. Claims Collection Litigation Report. DoD Components will use Claims Collection Litigation Reports, prescribed by the DOJ, for making preliminary referrals to the GAO and referring debts to the DOJ for litigation. Attachments to the reports include a checklist or brief summary of action taken to collect or compromise debts and, for any noncompliance with administrative collection actions required by the Federal Claims Collection Standards, 4 C.F.R. 102, (reference (aq)), reasons for omitting the requirements. Reasonable steps will be taken to locate missing debtors and reports will include debtors' current addresses. Referrals to the DOJ for foreclosure or other proceedings, in which a debtor's address is unknown, will include a list of prior known addresses and a statement of steps taken to locate the debtor. Reasonably current credit data will also be included in reports. Debtors' credit should indicate there is reasonable prospect of enforcing debt collection having due regard for exemptions available under federal and state laws and judicial remedies available to the government. Credit data must be in one of the following forms:

- A. A commercial credit report.
- B. An investigative report showing debtor's assets, liabilities, income, and expenses.
- C. A debtor's own financial statement, executed under penalty of perjury, showing assets, liabilities, income, and expenses.

320207. Criteria for Omitting Claims Collection Litigation Report Credit Data. DoD Components may omit credit data from a Claims Collection Litigation Report if: a debtor is bankrupt or in receivership; a debtor's liabilities to the DoD Component are fully covered by insurance, in which case, the referring organization will provide information on the insurer's identity and address and the type and amount of insurance; or the nature of a debtor is such that credit data is not normally available or cannot be reasonably obtained, for example, a state or local government unit.

320208. Contacting Debtors After Referral. Once debts have been referred to the GAO or the DOJ, DoD Components will refrain from contact with referred debtors. Debtors who raise questions pertaining to these debts will be referred to the GAO or the DOJ as appropriate. DoD Components will immediately notify the agency holding the debt of any payments received subsequent to referral.

3203 DEBT REFERRALS TO PRIVATE COLLECTION AGENCIES

320301. Authority to Use Private Collection Agencies. Centralized debt collection organizations may use private collection agencies to supplement their debt collection programs.

320302. Contracting for Private Collection Agency Services. Contracts awarded by a DoD Component for private collection agency services will have the following minimum provisions:

A. The DoD Component will retain authority to resolve disputes, compromise debts, suspend and terminate collection activity, and refer debts to credit bureaus and to the DOJ for litigation.

B. Contractors will be subject to the Privacy Act of 1974 to the extent specified in 5 U.S.C. 552a(m) and other federal and state regulations and laws.

C. Contractors will be required to account strictly for all amounts collected.

D. Contractors will record all collection activity for each debt and provide, when available, any information needed by the DoD Component to complete a claims collection litigation report.

E. Contracts will specify minimum requirements for the following collection activities:

1. Locating and contacting debtors.

2. Installment payments.

3. Returning uncollectible debts to the DoD Component.

F. Contractors will be required to calculate, assess, collect, and return to the DoD Component, interest, penalties and administrative charges as specified in this Regulation.

320303. Collection Contract Funding. Collection agency contracts awarded by a DoD Component normally will be funded by contingency fees. Fees will be based on a percentage of collections and will be consistent with prevailing commercial rates. Collection agency contracts awarded by a DoD Component may be funded on a fixed-fee basis but only to the extent funds are available in advance appropriations or other legislation.

320304. Referring Government Employees. DoD Components normally will not refer U.S. Government employees to commercial collection agencies. However, such referral is not precluded.

3204 DEBT REFERRALS TO COMMERCIAL CREDIT BUREAUS

320401. Authority To Refer Debtors. Centralized debt collection organizations authorized to terminate or write-off debts will report the following debt categories to commercial credit bureaus:

- A. Delinquent debts which are not feasible to collect.
- B. Debts referred to the GAO for collection.
- C. Debts referred to the DOJ for litigation.

320402. Due Process Protection. Before referring debts to commercial credit bureaus, DoD Components will ensure debtors are provided due process. Debtors will be provided a minimum of 60-days' advance notice before debts are referred.

320403. Maintaining Referred Debts Current. The referring organization will notify the credit bureau when there is a substantial change to a referred debt. Referring organizations will establish procedures to disclose promptly current information on debts when requested by those credit bureaus to which debts were referred.

320404. Maintenance of Debt Records. Records for debts referred to commercial credit bureaus on which no other collection action will be taken shall be retained for 13 months for commercial debts or 7 years for individual debts.

3205 DEBT REFERRALS TO THE INTERNAL REVENUE SERVICE FOR TAX REFUND OFFSET

320501. Authority To Refer Debts. Title 31, U.S.C., section 3720A (reference (e)) authorizes the IRS to collect certain past due and legally enforceable debts by offset against tax refunds. Referring organizations will comply with agreement between the IRS and DoD for implementing and administering tax refund offset. The single DoD manager and contact point for the program is DFAS-Denver Center (DFAS-DE/Y).

320502. Due Process and Certification. Before referring debts for tax refund offset, all debtor due process protections and notifications afforded by statute, regulation, or agreement will be satisfied. Certification of compliance will be furnished the IRS as required by statute, regulation, or agreement.

320503. Maintaining Referred Debts Current. Periodic updates to data submitted under this program will be furnished the IRS as required by statute, regulation, or agreement.

320504. Access To and Use of Tax Information. Federal officers or employees operating or using this debt collection process must be made aware that access to and use of

confidential tax information in connection with offset of federal tax overpayment under IRS Code, section 6402(d), is restricted by section 6103 of the IRS Code. Confidential tax information received must be adequately safeguarded. Personnel who access or use confidential tax information must be informed of these restrictions and of the sanctions or penalties that may be imposed for violation of restrictions on access and use of tax information.

★ CHAPTER 33 ★

ACCOUNTABLE OFFICIALS AND CERTIFYING OFFICERS3301 PURPOSE AND INTRODUCTION

330101. Purpose. Prior to a 1996 legislative change (Public Law 104-106, section 913), the Department did not have certifying officers, and only disbursing officers were pecuniarily liable for fiscal irregularities, including erroneous payments. That legislation requires certifying officers within the Department. Sound financial management and internal control practices dictate that such certifying officers be independent and organizationally separate from disbursing officers, whenever practicable. This chapter addresses: (1) responsibilities of accountable officials, certifying officers and disbursing officers, (2) minimum qualifications for certifying officers, (3) pecuniary liability of accountable officials, certifying officers and disbursing officers, (4) the selection and appointment process for certifying officers, (5) certification of vouchers for payment, and (6) pre- and post-payment random review. A glossary of terms is at section 3310.

330102. Introduction. The centralization of disbursing processes and the increased use of automated systems, coupled with the volume and complexity of business processes, reduces the ability of the Department's officials to exercise direct personal control over all aspects of each business transaction. Accordingly, it is extremely difficult for any single Departmental official to personally ensure the accuracy, propriety and legality of every payment. Consequently, the certifying and disbursing officer must depend on other personnel involved in the payment authorization process to provide accurate and timely data and quality service. (For example, a certifying officer for payroll must depend on information provided by the personnel office.) To ensure that a payment is correct, personnel who provide information to certifying officers must provide accurate information.

3302 POLICY

The law (31 U.S.C., section 3325) requires certifying officers within the Department. These officers are pecuniarily liable for erroneous payments (see paragraph 330303). Further, it is the policy of the Department of Defense that other officials involved in authorizing a payment are accountable, and that these accountable officials, as well as certifying and disbursing officers, shall be pecuniarily liable for erroneous payments resulting from the negligent performance of their duties.

3303 RESPONSIBILITIES

330301. General Responsibilities of Accountable Officials. All accountable officials are responsible for:

A. Ensuring that a system of internal procedures and controls for the portion of the entitlement- and/or payment-related process under their cognizance is in place to minimize

opportunities for erroneous payments, and to ensure that all procedural safeguards effecting proposed payments are observed;

B. Complying with all applicable DoD regulations, policies and procedures, including local standard operating procedures;

C. Supporting their respective certifying officers with timely and accurate data, information, and/or service to ensure proper payments, i.e., payments that are supportable, legal, and computed correctly;

D. Requesting advice from a certifying officer concerning a doubtful matter within the accountable official's responsibilities upon which the certifying officer will rely in making certification of (i) an entitlement to payment, (ii) a document for payment or (iii) other information/data associated with a payment, and

E. Taking timely action in response to inquiries initiated by a review official with regard to possible or actual erroneous payments.

330302. Specific Responsibilities of Accountable Officials by Functional Area.
(Note: This is not a complete list of all potential accountable officials.)

A. Purchase Card Program:

1. Agency program coordinators are responsible for the implementation and execution of the purchase card program in accordance with established Office of the Secretary of Defense and applicable DoD Component regulations, policies and procedures.

2. Cardholders are responsible for the timely and accurate update of the cardholder's automated system.

3. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred, and for maintaining a system of positive funds control.

4. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

B. Temporary Duty Travel:

1. Agency program coordinators are responsible for the implementation and execution of the travel card program in accordance with established official DoD regulations, policies and procedures.

2. Authorizing officials are responsible for authorizing travel orders and signing/approving travelers' claims.

3. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred, and for maintaining a system of positive funds control.

4. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

C. Contract and Vendor Pay:

1. Contracting officers are responsible for the timely and accurate update of prime contracting modifications that support payments, e.g., payee's name and address.

2. Administrative contracting officers are responsible for the timely and accurate update of contract modifications and other administration documents that support payments, e.g., unit price.

3. Receiving officials are responsible for the timely and accurate update of receipt data, e.g., quantity and receipt date.

4. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred, and for maintaining a system of positive funds control.

5. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

D. Civilian Pay:

1. Personnel officers are responsible for the accurate and timely update of personnel data supporting payment.
2. Employees' supervisors are responsible for the accuracy of employees' time and attendance records and supporting documentation, such as requests and approval of leave, overtime, and compensatory time.
3. Supervisors of time and attendance clerks are responsible for the accuracy of the time and attendance data input by clerks under their supervision.
4. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred, and for maintaining a system of positive funds control.
5. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

E. Military Pay:

1. Personnel officers are responsible for the accurate and timely input of personnel data supporting payment.
2. Military members' supervisors are responsible for accurate and timely input of data, such as leave slips.
3. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred or promulgation of detailed field procedures, and for maintaining a system of positive funds control.
4. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

F. Permanent Change of Station:

1. Personnel officers are responsible for the timely and accurate input of data supporting a payment.

2. Commanders/directors are responsible for ensuring that members performed in accordance with travel orders.

3. Resource Managers/Fund Holders. In addition to other responsibilities, resource managers/fund holders are responsible for the proper assignment of funding on an obligation document before the obligation is incurred, and for maintaining a system of positive funds control.

4. Automated Information System (AIS) Administrators. In addition to other responsibilities, AIS administrators are responsible for the operation and maintenance of automated system(s) used to support the entitlement, certifying and disbursing processes. Specifically, the AIS administrator's responsibility in this context is to ensure that these systems operate in accordance with prescribed functional requirements and to maintain the integrity of the data and prevent unauthorized access to the data.

330303. Certifying Officer. Certifying officers are responsible for:

A. Information stated in a voucher, supporting documents, and records;

B. Computation of a certified voucher under sections 3528 and 3325 of title 31, United States Code;

C. Legality of a proposed payment under the appropriation or fund involved;

D. Issuing advice to accountable officials;

E. Seeking advance decisions under 31 U.S.C., section 3529 from the DoD Office of Deputy General Counsel (Fiscal), or designee; and

F. Repaying a payment:

1. that is determined to be illegal, improper, or incorrect because of an inaccurate or misleading certificate;

2. that is determined to be prohibited by law; or

3. that does not represent a legal obligation under the appropriation or fund involved.

G. Designating accountable officials under paragraph 330505.

330304. Heads of the DoD Components. Heads of the DoD Components (or their designees) are responsible for the appointment of certifying officer(s) and review official(s) as required, for the oversight of certifying officers and review officials, and for carrying out the duties described in paragraph 330805. Heads of the DoD Components (or their designees) are not accountable officials by reason of the execution of these responsibilities.

330305. Disbursing Officer. Disbursing officers are responsible for:

A. Disbursing money only as provided by vouchers duly certified by authorized certifying officers.

B. Examining vouchers to determine if they are in the proper form, certified and approved by an authorized certifying officer, computed correctly on the facts certified, and except for the correctness of computations on a voucher are accountable for disbursing money only as provided by a certified voucher and performing the voucher examination.

C. Returning, to the certifying officer, any voucher that is not in the proper form, is incomplete, or is not properly certified.

330306. Supervisors. Supervisors of accountable officials and certifying officers are responsible for training, including initial training for new personnel and periodic refresher training for other personnel. Supervisors also are responsible for periodic review or inspection of the actions of all accountable officials and certifying officers under their supervisory control to ensure compliance with established regulations, policies and procedures, including local standard operating procedures.

3304 CERTIFYING OFFICER QUALIFICATIONS

To promote professionalism and strengthen internal controls, a certifying officer should be a supervisor and have the following minimum qualifications: (1) knowledge of the subject matter, (2) background or experience in the preparation of a voucher for payment, (3) knowledge of appropriations and other funds and accounting classifications, and (4) knowledge of payment process (e.g., availability of funds and location of designated paying and accounting offices).

3305 CERTIFYING OFFICER SELECTION AND APPOINTMENT AND ACCOUNTABLE OFFICIAL DESIGNATION

330501. DoD personnel eligible to be appointed to certify vouchers and forward to a disbursing office for payment include (but are not limited to): commanders, deputy commanders, resource managers/fund holders, travel authorizing officials, purchase card approving officials and other personnel in equivalent positions. For example, a traveler's supervisor could be a travel authorizing official and a certifying officer. The Heads of the DoD Components (or their designees) shall appoint certifying officers. For purposes of the purchase card program, the designated approving official shall be appointed as the certifying officer. A certifying officer shall

be appointed by the issuance of a letter of appointment and the completion of a DD Form 577, Signature Card. The appointment letter and DD Form 577 specifically shall identify the types of payments, such as vendor pay and civilian pay, to be certified.

330502. A disbursing officer is not eligible for appointment as a certifying officer and may not appoint a certifying officer. An individual under the direct supervision of a disbursing officer (e.g., deputy disbursing officer) may be appointed as a certifying officer only in special, limited situations as described in paragraph 330504.

330503. At installations or activities where a computation function is performed independently of the disbursing function, certifying officers may be appointed at the first line supervisory level or higher within the computation organization. These appointments may be accomplished either directly by the respective Head of the DoD Component or by delegation through command channels.

330504. Where computations for payment are performed under the direction of the disbursing officer during tactical operations (including afloat units, military training exercises, noncombatant evacuations, and contingency operations), certifying officers may be appointed from among personnel within the disbursing office. These appointments must be accomplished either by direct written notification from the respective Head of the DoD Component to the designated appointee, or by delegation through command channels excluding the disbursing officer.

330505. Accountable officials shall be designated by the certifying officer whose certifications are supported by the accountable official(s). An accountable official shall be notified by the issuance of a letter of designation which appraises the accountable official of his/her pecuniary liability for erroneous payments that result from the negligent performance of accountable official duties.

3306 CERTIFICATION

330601. By affixing a manual, electronic or digital signature to a voucher, a certifying officer states (certifies) to a disbursing officer that the items listed therein are correct and proper for payment from the appropriation(s) or other funds designated thereon or on supporting vouchers, and that the proposed payment is legal, proper and correct. Certifying officers may certify payments by manual or electronic methods and may certify individual vouchers, or a summary of several vouchers.

330602. Manual certifications are made on the voucher. A manual certification shall include the certifying officer's signature, typed or printed name, the title "Authorized Certifying Official," the date and the dollar amount. Manually certified vouchers may be submitted to the disbursing office by mail or fax.

330603. Electronic certification must include adequate safeguards. An electronic certification adopted by a certifying officer must be: (1) unique to the certifying officer,

(2) under the sole control or custody of the certifying officer, (3) linked to the data certified in such a manner that if the data are changed, the digital or electronic signature is invalidated, and (4) capable of being verified by the disbursing officer.

3307 PECUNIARY LIABILITY

330701. Accountable officials shall be pecuniarily liable for erroneous payments that result from information, data or service they negligently provide to a certifying officer. Pecuniary liability shall be for the full amount of the erroneous payment up to one month's compensation. One month's compensation is one month's regular military compensation as defined in 37 U.S.C. 101(25) in the case of military members and one-twelfth of annual pay in the case of civilian employees. For Reserve component personnel, one month's regular military compensation refers to the amount that would have been received by the Service member if on active duty.

330702. A certifying officer is pecuniarily liable for payments in accordance with the provisions of 31 U.S.C., section 3528.

330703. A disbursing officer is pecuniarily liable for payments in accordance with:

- A. 31 U.S.C., section 3325 and other applicable law;
- B. This volume.

330704. The amount of pecuniary liability is the amount of the erroneous payment, reduced by any amounts recovered from the recipient. Generally, the amount is determined during the investigation and relief from liability process (see sections 3308 and 3309 below).

3308 PRE- AND POST-PAYMENT RANDOM REVIEW

330801. Coincident with the appointment of a certifying officer, an individual shall be appointed in writing to serve as a review official. Where feasible, personnel who are serving in a review-type position, e.g., head of the internal review office, should serve as the certification review official. The person so appointed shall conduct pre- and post-payment reviews of payments certified by the certifying officer. The person appointed as a review official may not concurrently serve as an accountable official, or as a certifying or disbursing officer. Except where impracticable within afloat or tactical operating forces, persons appointed as review officials shall not be in the supervisory chain of command of a certifying officer or disbursing officer.

330802. The review official appointed to perform pre- and post-payment reviews shall perform such reviews in accordance with guidance issued by the Under Secretary of Defense (Comptroller) memorandum dated October 31, 1996 (Revision to Travel Reengineering Implementation Memorandum #8). When the review official identifies a certified proposed payment, or an actual payment, as being of questionable legality, propriety or correctness, the review official shall issue an inquiry to the certifying officer. Such an inquiry shall direct the

certifying officer to provide an explanation as to why payment was certified. A copy of the inquiry shall be provided to the applicable accountable official(s) and disbursing officer. If requested, the accountable official(s) and disbursing officer shall assist the certifying officer in providing the required explanation.

330803. If the certifying officer utilizes a prepayment statistical sampling procedure approved by the Office of the Under Secretary of Defense (Comptroller) or designee, and reviews only those vouchers selected in the sample as a basis for certification, the vouchers selected for review must be identified. By law, certifying and disbursing officers are not pecuniarily liable for an erroneous payment on vouchers and documents not selected for review based on the use of approved sampling procedures if diligent collection action is pursued. However, the applicable accountable official shall be liable in accordance with the policies specified herein.

330804. Review officials shall maintain a file of all inquiries that result from the review process or that are received from other sources, e.g., payees, the accounting office or the disbursing office. Additionally, review officials shall ensure that all inquiries are resolved within 30 calendar days from the date of an inquiry. If, based on the response from the certifying officer, the applicable review official determines that a payment was legal, proper, and correct, no further action is required. If there is doubt, the Director, Defense Finance and Accounting Service shall determine the legality, propriety and correctness of payments that have been made. If the results of an inquiry fail to establish that a payment was legal, proper and correct, and if recovery has not been made, the review official must raise a charge against the applicable accountable officials, the certifying officer, and/or the disbursing officer, as appropriate.

A. The raising of a charge is mandatory, except that no charge shall be raised against a certifying or disbursing officer if the payment was certified based upon reliance of an approved pre- and post-payment statistical sampling procedure and the voucher in question was not included in the sample. A review official shall not close an inquiry until satisfied that appropriate collection action is being taken against the recipient of the payment, as well as negligent accountable officials, the certifying officer or the disbursing officer who are liable and have not been relieved of liability under section 3309.

B. A review official must maintain a file of all charges and may close such files only upon final disposition (e.g., recovery from the payee, or relief of, or recovery from, an accountable official or a certifying or disbursing officer).

330805. A review official must notify the applicable commander/director whenever charges are made against an accountable official, or a certifying or disbursing officer. When an accountable official, or a certifying or disbursing officer, is charged by a review official with an erroneous payment, the commander/director of the review official must convene or order an investigation in accordance with chapter 6 and Appendix C of this volume. After considering the findings of the investigation in cases where a charge has been raised against an accountable official, a determination must be made as to whether the erroneous payment was the result of the accountable official's negligence. If the commander/director determines that the erroneous

payment was not the result of the accountable official's negligence, the charge against that official shall be cleared.

3309 RELIEF FROM LIABILITY

In the case of certifying and disbursing officers, pecuniary liability attaches automatically when there is a fiscal irregularity. A fiscal irregularity is either: (a) a physical loss of cash, vouchers, negotiable instruments, or supporting documents or (b) an erroneous payment. Pecuniary liability in the case of accountable officials attaches when the commander/director determines that an erroneous payment was the result of an accountable official's negligence. Certifying officers and disbursing officers should bear in mind that in all cases there is a presumption of negligence and those individuals bear the burden of proof in establishing the absence of negligence; i.e., they must produce evidence to establish that there was no contributing fault or negligence on their part. A presumption of negligence does not apply to accountable officials. In accordance with procedures in this regulation, an investigator must obtain the relevant facts concerning: (1) whether there is a fiscal irregularity, and (2) whether there is evidence of fault or negligence on the part of an accountable official, and evidence of the absence of fault or negligence on the part of a certifying or disbursing officer. Efforts to recover from the recipient must be undertaken in accordance with the debt collection procedures prescribed in chapters 29 and 30 of this volume.

330901. If recovery action is successful, credit shall be made to the appropriation or fund that was charged originally, and the charge against an accountable official, or a certifying and/or disbursing officer shall be cleared.

330902. If recovery action is wholly or partially unsuccessful, a certifying officer or disbursing officer may request relief from liability supported by a statement explaining how the evidence shows the absence of negligence on the officer's part; an accountable official may submit a request for relief supported by a statement explaining how the evidence fails to show negligence on the official's part.

330903. If an accountable official, certifying officer or disbursing officer elects not to request relief, the individual shall remit personal funds for the amount of the fiscal irregularity. That remittance shall have the same effect as if the remittance had been submitted by the recipient of the original payment.

330904. If an accountable official submits a request under paragraph 330902, it must be routed through the applicable certifying officer. All requests under paragraph 330902, must be routed via the appropriate commander/director to the Defense Finance and Accounting Service Headquarters for consideration.

330905. A request from an accountable official, or a certifying or disbursing officer, under paragraph 330902 may be delayed pending the outcome of collection efforts against the recipient, but in all cases shall be submitted within one (1) year following the attachment of liability against the individual.

A. If the request is granted, the charge against the individual shall be cleared.

B. If the request is denied and collection from the recipient is wholly or partially unsuccessful, the individual must clear the charge by remitting personal funds or otherwise arranging repayment with the Defense Finance and Accounting Service.

C. If the accountable official, or the certifying or disbursing officer, leaves civilian employment, or is released from military duty, appropriate collection action(s) must be made prior to termination of employment/release from military duty.

330906. Relief is granted if the evidence shows that the irregularity was not the result of a certifying or disbursing officer's negligence. In the case of accountable officials, relief is granted if it is determined that the commander/director erred in finding that an erroneous payment was the result of the accountable official's negligence. An indication of lack of negligence is evidence that the individual followed established official DoD regulations, policies and procedures, including local standard operating procedures. Conversely, failure to act in accordance with such regulations, policies, and procedures is generally considered evidence of negligence. Evidence that an accountable official, certifying officer, or disbursing officer followed orders of a superior is not evidence of the absence of negligence or bad faith. The following factors are not relevant in determining relief from liability: (a) heavy workload or shortage of personnel; (b) good work record, reputation, or character; (c) length of loyal and dependable service; (d) lack of experience, supervision, or training; (e) financial hardship in making restitution; or (f) acceptance of extra duties.

3310 GLOSSARY OF TERMS

331001. Accountable Officials. For the purposes of this chapter, DoD military members and civilian personnel, who are designated in writing and are not otherwise accountable under applicable law, who provide source information, data or service (such as a receiving official, a cardholder, and an automated information system administrator) to a certifying or disbursing officer in support of the payment process. They are pecuniarily liable for erroneous payments resulting from their negligent actions.

331002. Administrative Contracting Officer. A military member or civilian employee of the Department who is warranted to administer contracts.

331003. Approving Official. An individual who has responsibility for one or more Government Purchase Card (IMPAC) cardholders.

331004. Automated Information System Administrator. An individual responsible for the programming, scheduling or operation of computerized programs, and the maintenance of one or more automated information systems.

331005. Cardholder. An individual designated by an agency/activity to be issued a government purchase card and/or government travel card.

331006. Certification.

A. Certifying Officer--The act of attesting to the legality, propriety and correctness of a voucher for payment as provided for in 31 U.S.C., section. 3528(a).

B. Accountable officials--The act of attesting to the legality, propriety and/or the correctness of a document that supports a payment voucher in accordance with this regulation.

331007. Certifying Officer. A DoD military member or civilian employee of the Department appointed in writing to certify a voucher for payment (see “Certification” above).

331008. Civilian Pay. Entitlements to DoD civilian employees. A functional area within the payment process.

331009. Commander/Director. An individual assigned as a commander-in-chief, commanding officer, base commander, installation commander, director of a defense activity, officer-in-charge, or equivalent civilian head.

331010. Contract. A mutually binding legal relationship obligating the seller to furnish the supplies or services and the buyer to pay for them. It includes all types of commitments that obligate the Government to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. This includes (but is not limited to) rental and lease agreements, purchase orders, delivery orders, service contracts, requirements-type contracts and bilateral instruments.

331011. Contract Pay. An entitlement process to pay contractors. A functional pay area.

331012. Contractor. Any person, organization, or business concern engaged in a profession, trade, or business and any not-for-profit entity operating as a vendor (including State and local governments and foreign entities, but excluding federal entities and foreign governments).

331013. Disbursing. The act of paying public funds to entities to whom the government is indebted; the collection and deposit of moneys; the safeguarding of public funds; the documenting, recording, and reporting of these transactions.

331014. Disbursing Officer. An officer or employee of a Federal department, agency or other individual designated to disburse moneys and render accounts according to laws and regulations governing the disbursement of public moneys.

331015. Document. A business record in hard copy or electronic form.

331016. Electronic Certification. An approved electronic signature adopted by a certifying officer that is unique to the certifying officer; capable of verification by the disbursing officer; under the sole control or custody of the certifying officer; and linked to the data certified in such a manner that if the data are changed, the electronic signature is invalidated.

331017. Erroneous Payment (also referred to as an Illegal, Incorrect, or Improper Payment). A fiscal irregularity resulting from regularly processed payments that are not in strict conformity with laws and regulations. For example, an erroneous payment results from: (a) an overpayment of a payee; (b) two or more payments to a payee for the same entitlement; (c) a payment to the wrong payee; (d) a U.S. Treasury check issue over-draft in some cases; (e) a shortage caused by negotiation of both an original and a substitute U.S. Treasury check; (f) a shortage caused by a negotiation of both an original and a recertified U.S. Treasury check; (g) payment based on fraudulent, forged, or altered documents (usually); or (h) a payment made in violation of a law or regulation.

331018. Fiscal Irregularity. An irregularity in a disbursing officer's account is any action (or lack thereof), event, practice, or circumstance that causes an out-of-balance condition in the financial accountability to the United States of the disbursing officer and/or deputies, agents, and cashiers to whom public funds have been entrusted. Irregularities resulting from physical losses of funds or erroneous payments.

331019. Internal Controls. The manner in which financial, manpower, and property resources are controlled and safeguarded by the regular authorization, approval, documentation, recording, reconciling, reporting, and related accounting processes.

331020. Military Pay. An entitlement process for military active duty personnel, Reserve personnel, National Guard personnel, retired military personnel, annuitants, academy cadet/midshipman, and Armed Forces Health Professions Scholarship participants, and inactive duty travel. A functional pay area.

331021. Negligence. Ordinary or simple negligence, including the failure to adhere to established official DoD regulations, policies, and procedures, and local standard operating procedures; bad faith.

331022. Pecuniary Liability. Personal financial liability for fiscal irregularities of disbursing and certifying officers and accountable officials as an incentive to guard against errors and theft by others, and also to protect the government against errors and dishonesty by the officers themselves.

331023. Procurement Contracting Officer. A person with authority to enter into and/or terminate contracts and make related findings and determinations.

331024. Receiving Official. A military member or civilian employee of the Department authorized to substantiate the receipt, inspection, and acceptance of goods and/or services.

331025. Relief from Liability. Action taken by someone with the legal authority to do so, which absolves accountable officials, or certifying and disbursing officers of pecuniary liability.

331026. Review Official. A military member or civilian employee of the Department who is appointed in writing to conduct pre- and post-payment reviews, to issue and control inquiries and to initiate charges against the certifying, disbursing, and accountable officials for financial irregularities.

331027. Travel Authorizing Official. An official, or a designated representative, to whom final authority to issue travel orders (order issuing official) is delegated in writing by a DoD Component, by organizational title, and/or name.

331028. Travel Order. A document that authorizes official government travel.

331029. Traveler. A military member, DoD employee or invitational traveler traveling in an official capacity.

331030. Vendor. Any person, organization, or business concern engaged in a profession, trade, or business including a not-for-profit entity operating as a vendor (including State and local governments and foreign entities, but excluding Federal entities and foreign governments).

331031. Vendor Pay. The process of computing the amount to be paid to a contractor or vendor for all contract/purchase orders, except those administered by the Defense Contract Management Command. A functional pay area.

331032. Voucher. A voucher, voucher schedule, invoice, bill, or any other document used as a voucher, certified by a certifying officer based on which a disbursing officer makes a payment.

TABLE OF CONTENTS

APPENDIX A CASH VERIFICATION

- A. Cash Verification Team Procedures
- B. Cash Verification Team Check-Off List
- C. Finalization

APPENDIX A

CASH VERIFICATIONA. CASH VERIFICATION TEAM PROCEDURES

1. Nature and Time of the Verification. At least once during each calendar quarter the cash verification team shall conduct a surprise verification of the cash and other assets under the cash accountability of the DO. Generally, it is not practical to conduct the cash verification on days involving unusually high volumes of disbursing transactions. The cash verification team shall ensure that the DO and his or her agents are given neither formal nor informal advance notification of the intent to conduct the verification. The scheduling of the verifications should be determined in random fashion to insure they do not predictably fall during a particular time period each quarter. If an audit of the DO's accountability by transfer of account, Component investigative, or audit agencies has been conducted during any given quarter, the commander may elect to omit a separate cash verification for that quarter.

2. Verification Procedures

a. General. Immediately upon arrival, the cash verification team shall present a copy of its letter of appointment and assume control over all cash and other assets in the DO's cash accountability. If access is refused, the verification team leader immediately shall notify the commander. Each custodian of public funds shall prepare a DD Form 2665 and the DO shall prepare a DD Form 2657 as for the close of business of that day and turn it over to the cash verification team. At this time, no further business may be conducted by any custodian of public funds until the cash verification team has completed the count of that custodian's funds. Normally, the duty cashier's funds are the first to be verified in order to minimize the impact on disbursing operations.

b. Cash and Other Assets. All vaults, safes, security containers, and cash drawers housing cash or other assets shall be secured and their contents shall be inventoried by actual count in the presence of the person accountable for their safekeeping. If the commander determines that it is not practical to inventory the funds in the possession of some of the DO's agents because of inaccessibility or geographic separation, the cash verification team shall verify the amounts shown on custody receipts by telephone with the accountable person; by examination of the permanent file of cash verifications and certification held by the disbursing office; or by any other means available in order to complete the cash verification process and make note of the limits to their verification in their report. However, if agent cash accountability is not physically verified at the time the DO's cash accountability is verified, no quarterly verification of agent cash is considered to have been made. Documents representing unvouchered expenditures shall be verified further by determining that checks were issued to the designated payee, or that the signature on cash receipts is authentic. Undeposited checks shall be examined

to insure that they are negotiable instruments the DO has been authorized to exchange for cash; that they are not dated more than 10 days prior to the cash verification date; and that checks received as collections are kept apart from those checks received in accommodation exchange transactions.

c. Authorizations and Records. Blank checks, both working stock and bulk storage, shall be inventoried to insure that all check issues have been properly reported. Where roll stock of blank checks are used, the inventory shall be conducted by recording the ending number from the reels and not by unrolling of the reel which may destroy the stock. Voided and spoiled checks held by the DO pending local destruction shall be examined to insure they are properly defaced and stored in authorized containers. Undelivered checks shall be inventoried to insure that: none are missing; none exceed the time limit to be held; and all are properly safeguarded. Amounts of cash held at personal risk by the DO and his or her agents shall be compared to the authorization to hold such cash by the commander.

d. Imprest Funds and Change Funds. All imprest funds and change funds shall be verified at least once each quarter by members of the cash verification team. Verification of imprest fund cashier and change fund custodian cash may be simplified by appointment of an individual (rather than a team) to do the applicable cash verification. The verification shall be accomplished by totalling all receipts and counting all cash to prove the total shown on the cash receipt held by the DO. Any receipts for cash advanced by the imprest fund cashier more than five days old shall be investigated and commented on in the cash verification report if not redeemed before the report is issued. All change funds shall be certified as being intact in writing by the accountable individual at the time of the cash verification. The verification of change funds shall consist of verifying that the cash drawer contains the amount of the change fund, after deducting any sales proceeds or receipts. Verifications of both imprest fund cashiers and change fund cashiers shall insure that none of the change fund consists of personal checks from the cashier, any of the cashier's supervisors, or the individual charged with accountability for the change fund.

e. DD Form 2657 (Daily Statement of Accountability). After proving all the entries for cash and other assets by the preceding verifications, the cash verification team shall insert the following statement on (or attach to) the DD Form 2657:

"On (date) at (time), the undersigned verified by actual count cash in the amount of \$, together with all documents held supporting collections and disbursements, which (is)/(is not) in agreement with this daily statement of accountability.

"Signature and Rank of Verifying Official"

★ f. Safekeeping Deposits. Immediately after the verification of the DO's cash accountability, the cash verification team shall verify all safekeeping deposits and the postal stamp funds (if applicable) with established procedures contained in Chapters 26 and 27 of this volume.

★ g. Report of Verification. The cash verification team shall report its findings in writing to its appointing official immediately on completion of verification of both official funds and safekeeping deposits. The report shall be prepared in original and three (3) copies. The original shall be forwarded to the appointing official. If the appointing official is not the commander of the DO, the report shall be addressed jointly to the appointing official and the commander of the DO so that both receive an original of the verification report. The first copy of the verification report shall be forwarded to the DO, the second copy shall be forwarded to the DFAS Center supporting the DO and the third copy shall be retained by the cash verification team in a permanent file. In those instances where safekeeping of personal funds and valuables is authorized and the designated safekeeping custodian is other than the DO, a copy of the report of verification will be provided to the safekeeping custodian. The verification report shall contain: the date the verification was conducted; the date of the preceding verification; a statement as to whether or not safe combinations have been changed as required and the dates of the last changes; the identity of each person holding cash under the DO's cash accountability that was not verified by actual count, the amount of cash each held, and the method of contact made with each custodian, if any contact was made; a statement as to whether or not the verified cash accountability of the DO agrees with the DD Form 2657 cash and other assets totals; a list of undeposited checks containing a description of those not handled as prescribed by this volume; a statement as to whether or not the DO is taking timely action to clear debit vouchers, check issue discrepancies, check issue reporting gaps, double payments, forgery recoveries through the banks, and reissue of limited payability check cancellations; and, a statement as to whether or not safekeeping deposits verified agree with safekeeping deposit records. The cash verification team shall follow-up during the next quarterly cash verification to ensure that deficiencies noted in the previous cash verification report have been corrected by the DO and report the results to their appointing official in the form required by that official. The senior member of the cash verification team shall insure that all rough working papers and correspondence pertaining to the cash verification are maintained as a permanent part of the cash verification teams' records.

h. Followup. The cash verification team shall follow-up during the next quarterly cash verification to ensure that deficiencies noted in the previous cash verification report have been corrected by the DO and report the results to their appointing official in the form required by that official. The senior member of the cash verification team shall insure that all rough working papers and correspondence pertaining to the cash verification is maintained as a permanent part of the cash verification teams' records.

B. CASH VERIFICATION TEAM CHECK-OFF LIST

1. The senior member of the cash verification team shall inform the DO's immediate supervisor of its arrival to conduct the surprise verification of cash and other assets.

2. Secure all accessible safes holding DO cash accountability items until their contents can be verified.

★ 3. Require the DO to balance the DD Form 2657 and make a list of items due the U.S. Government that are included in the balance.

★ 4. Commence the actual count of currency and other assets.

a. Cash

(1) Count all currency and coin in the presence of the individual accountable for the asset.

(2) Count all items representing cash, including exchange-for-cash checks, in the presence of the individual accountable for the asset.

(3) Verify the cash and receipts held by agents in the disbursing office equals the receipts signed by those agents and held by the DO.

(4) Count all negotiable instruments representing cash held by the DO awaiting deposit.

b. Other Assets

(1) Review and total all receipts for cash held by agents of the DO who are located outside the disbursing office.

(2) Review and total all SFs 215 for which both the memorandum and agency copies are held, indicating that the deposit has not been confirmed, and require the DO to commence tracing items over three weeks old as lost in transit deposits.

(3) Review the SFs 5515 and the associated dishonored checks and require the DO to commence collection from the drawers of the dishonored checks.

(4) Review documents for unvouchered expenditures and money lists.

(5) Review exchange-for-cash checks in transit.

(6) Review FMS Forms 5206 representing overdrafts and underdrafts.

(7) Review actions on previously-reported losses of funds.

(8) Verify bank statements and balances of foreign currency held in limited depositary checking accounts.

(9) Verify by actual count the amount of foreign currency against the subsidiary records and the foreign currency reports.

- ★ 5. Review the vouchers supporting gains and losses on foreign currency transactions.
- ★ 6. Review the DO's compliance with the provisions of this volume for cashing personal checks and the collection of dishonored checks.
- ★ 7. Ensure that checks representing collections are properly identified and supported by collection vouchers so that dishonored personal checks received as collections may be charged back to the receiving activity and are not held as losses due to accommodation exchanges carried out by the DO.
- ★ 8. Examine previous cash verification reports and insure that deficiencies being reported a second time in the current cash verification report are noted as serious conditions and advise the commander of action necessary to immediately remedy the deficiencies of the DO.
- ★ 9. Review DD Form 2658 (Returned and Undeliverable Check/Bond Record) maintenance and DO's attempts to make delivery of checks within the prescribed 60 day holding period.
- ★ 10. Compare military payroll vouchers and money lists with related pay accounts to ensure payments are posted to the member's account.
- ★ 11. Verify all undeposited checks in relation to the prescribed frequency and timeliness of deposits.
- ★ 12. Review all letters of authorization to hold cash at personal risk to ensure that cash held is commensurate with needs and in compliance with the letters of authorization.
- ★ 13. Verify date safe combination was last changed.
- ★ 14. Verify all payments made to pay record access (PRA) personnel and list any discrepancies found on each PRA record.
- ★ 15. Verify safekeeping deposits, postal funds, postage stamp stock, and postal money order stock, if applicable. If ATMs are operated by the DO or other authorized safekeeping custodial officer, direct the custodial officer to conduct a full end-of-session with the ATM system before the actual cash count of ATM currency is conducted.
 - ★ a. The custodial officer or, where applicable, the assistant custodians responsible for each ATM terminal shall remove all canisters, whether empty or loaded, and deliver them to the cash verification team for counting and verification.

★ b. Use the ATM end-of-session reports to balance the ATM system. Require the ATM custodial officer or assistant custodian, as applicable, to complete DD Form 2672, ATM Cash Balance Sheet for each assigned ATM terminal. The DD Form 2672 will reconcile the funds remaining in the ATM terminal to the original amount loaded in the terminal and the amount of funds withdrawn from the terminal. The end-of-session reports will show how much cash was dispensed by each terminal. If the DD Forms 2672 and the end-of-session reports agree, the ATM terminal is in balance. Complete the identical process for each ATM terminal and the ATM system is in balance.

★ c. Insure DD Form 2670, Automated Teller Machine (ATM) Ledger is properly maintained and in balance.

★ d. Insure that ATM passwords and ATM safe combinations are changed every six months as required.

★ e. Insure that ATM cards and personal identification numbers are properly safeguarded and that ATM accounts are being closed when the account holder is transferred.

★ f. Review all closed and dormant ATM accounts for audit. Closed accounts shall not be deleted from the system for 30 days. After 30 days, if no funds are in these accounts, they shall be deleted from the system. If funds are still in these accounts after 30 days, adjustment action shall be taken to refund the balance to the account holder.

★ g. Inventory all blank ATM cards (bulk and working stock) to ensure that custody of blank ATM cards is properly maintained.

C. FINALIZATION

1. Verify totals from the above reviews with the amounts reported on the DD Form 2657.

2. Notify the DO's immediate superior and the commander of any deficiencies and advise them that a written report shall be prepared.

3. All members of the cash verification team shall sign and certify the results of the cash verification on the DD Form 2657 or a paper attached to the DD Form 2657.

★ 4. Distribute the original of the cash verification report to the appointing commander, a copy to the DO and, when applicable, the safekeeping custodial officer, and retain a copy for the cash verification team records.

APPENDIX C**LOSS OF FUNDS - INFORMATION FOR INVESTIGATING OFFICER****A. OVERVIEW**

This appendix contains general information concerning the main issues that should be addressed in a loss of funds investigation and fully considered in making findings of fact and recommendations.

B. APPOINTMENT OF AN INVESTIGATING OFFICER OR BOARD OF OFFICERS

★ 1. General. The convening authority shall appoint either an investigating officer or investigating board of officers to investigate the loss. The purpose of the investigation is to: develop all facts leading up to and connected with the loss, including the amount, date, time and place of the loss; identification of accountable individuals and others involved; the authenticity of documentary evidence; and the veracity of oral testimony. If possible, the investigation should identify the cause of the loss. The investigation should also include a determination with respect to the adequacy of internal controls and whether they were effectively implemented. Specific instructions for conducting both formal and informal investigations are contained in regulations of each of the DoD Components. The following paragraphs summarize the basic requirements as related to fiscal irregularities.

2. Appoint an Investigating Board of Officers (IBO). The convening authority shall appoint an IBO in writing. When feasible, members of the IBO should include officers who are skilled in investigative techniques, financial accounting control, and interpretation of law, and who do not have a vested interest in the outcome of the investigation. If considered necessary, military members or DoD civilian employees with these skills may be designated as technical advisors to the IBO.

3. Appointment of an Investigating Officer (IO). The convening authority shall direct issuance of an order to appoint an IO. The order shall name the individual, specify the matter to be investigated, and cite this volume and any authorizing DoD Component directive as the authority for the investigation. The order also shall specify the approximate period of time allowed for the investigation. A copy of the order shall be entered in the report of investigation as an exhibit. Only commissioned officers of field grade or equivalent civilian employees may be appointed an IO. Officers appointed to conduct investigations under this Regulation should be senior in rank to persons under investigation (whenever possible) and must not have a vested interest in the outcome of the investigation. The best qualified officers should be appointed as IOs. They should be familiar with investigative techniques and have knowledge of the required internal controls, pertinent laws and directives. (This requirement should not be interpreted to require the appointment of comptroller personnel. Comptroller personnel should be used only when there is no feasible alternative.) Officers appointed as IOs, who do not fully meet these

requirements, should be given technical guidance by the base comptroller and staff judge advocate.

4. Required Loss Status Reports. Status reports must be made as follows:

a. Loss of Funds. The IO or IBO must report every 30 days on the current status of each case. Reports shall be sent through the commander to the servicing DFAS Center with an information copy to the major command.

b. Loss of Blank Treasury Checks or Blank Savings Bonds. Status reports are not required.

5. Investigations

★ a. Investigations by Board of Officers. Before conducting its hearing, the IBO must ensure that each accountable individual receives and reviews Chapters 6 and 33 of this volume regarding liabilities and responsibilities of accountable individuals and statutory authority for relief of liability. Prior to testifying, an accountable individual may examine records or documents relating to the loss in the DO's or IBO's custody. All factual information pertaining to the loss or deficiency should be developed and be available for use by higher authority.

b. Investigations by Investigating Officer. The IO shall obtain evidence in the form of statements from accountable individuals and others concerning the loss. The IO shall ensure that each accountable individual receives and reviews Chapters 6 and 33 of this volume regarding liabilities and responsibilities of accountable individuals and statutory authority for relief of liability before the IO interviews the individual for the first time. An accountable individual may examine records or documents in the IO's custody that relate to the loss. Testimony may be reported verbatim or summarized by the IO. Whenever possible, the transcript or summary of testimony should be reviewed, sworn to, and signed by the witness. (When sworn testimony cannot be obtained, the IO shall submit a statement giving the substance of the interview and the reason for absence of attestation.) In addition, the IO shall gather records, documents, photographs, and sworn affidavits relating to the loss. The IO may use evidence developed in investigations already conducted concerning the loss by other agencies (e.g., FBI, U.S. Secret Service or local authorities). However, those investigations usually are for purposes other than those outlined above, and it might be necessary to obtain additional evidence from a source previously contacted in another investigation. The IO, by further investigation, shall make a determined effort to resolve or clarify all apparent discrepancies or contradictions in the evidence.

6. Preparation of the Report of Investigation (ROI). Within 90 days after the loss was discovered, the IO or IBO shall complete the investigation and submit an ROI to the convening authority in triplicate. When extraordinary circumstances require it, the IO or IBO may request an extension from the supporting DFAS Center through the convening authority. The ROI must include the following elements:

a. Facts

(1) Identities of all accountable individuals who are pecuniarily liable for the loss, the amount for which each is accountable, and the involvement of each in the loss.

(2) Circumstances leading to the loss, or the efforts undertaken to discover the cause of a loss that remains unexplained.

(3) Description of the internal controls prescribed to prevent losses of the type experienced and the steps taken to implement them.

(4) Other relevant information that would aid in understanding how the loss occurred and in evaluating whether relief is appropriate for the accountable individuals involved.

(5) Documentary evidence (for example, statements, transcripts, affidavits, investigative reports of other agencies, records, and photographs) as exhibits to the ROI.

b. Findings

(1) Whether there was a loss to the U.S. Government.

(2) The amount of the loss.

(3) Whether the loss is a physical loss or one that involves fraud.

★ (4) Whether the accountable individual was acting in the line of duty with respect to the loss.

★ (5) Whether the loss was due to the fault or negligence of the accountable individual. A separate finding shall be made for each accountable individual involved.

c. Recommendations

★ (1) Whether the accountable individual should be relieved of pecuniary liability for the loss. Separate recommendations concerning each accountable individual involved are required.

(2) Corrective action for improving controls or procedures, if applicable.

(3) Any other recommendations that are appropriate considering the facts developed during the investigation.

7. Distribution of the Report of Investigation (ROI). Prepare the ROI in triplicate and deliver to the convening authority. The convening authority will distribute the ROI as follows:

a. Upon completion of action by the convening authority, the original ROI and allied papers will be sent through the major command to the supporting DFAS Center.

★ b. If the major command is the convening authority, one copy of the ROI will be forwarded to the commander of the base, station, activity, ship, or unit where the accountable individual is located. For Army Finance Battalions, a copy also shall be transmitted to the parent Finance Group or Command.

c. The convening authority will keep one copy of the ROI.

8. Convening Authority Actions on Reports of Investigation. Without delay, the convening authority will review the ROI for compliance with the requirements set forth above. If a report is not thorough, comprehensive or complete, the convening authority will return it to the original investigator, if possible, explaining the defects and directing supplementation. Upon acceptance of the ROI, the convening authority will send one copy to the commander of the base, station, camp, post, activity, vessel, or unit where the accountable individual is located. Note that the convening authority does not have the authority to grant relief. Within 30 days following acceptance of the ROI, the convening authority will:

a. Consider all the facts, findings, and recommendations.

★ b. Determine whether satisfactory evidence exists to support a recommendation for relief from liability of each accountable individual involved as a part of the ROI.

c. If sufficient evidence exists, recommend relief from liability for each accountable individual involved. Otherwise recommend denial of relief. A specific, separate recommendation is required for each accountable individual involved.

d. Attach these actions, with a detailed explanation of the reasons therefor, to the ROI.

★ e. Set forth all evidence used to support a recommendation for denial of relief of each accountable individual involved in the loss or deficiency. The convening authority should formally inform the individual(s) concerned of the recommendation to grant or deny relief.

f. Forward the ROI, and all attachments thereto, through the major command to the supporting DFAS Center.

9. Commander Actions on Report of Investigation. Recommendations by local commanders other than the convening authority are not required. However, the ROI may be used for disciplinary or administrative action considered necessary by the commander.

10. Major Command Actions on Report of Investigation. All transmittals and correspondence between the convening authority and the servicing DFAS Center concerning a loss shall be routed through the major command. This will keep the major command informed of issues involved in the loss and the progress toward their resolution. The major command also must review the ROI and forward its own comments and recommendations to the supporting DFAS Center within 30 days. Requests for an extension should be sent to the servicing DFAS Center with a complete explanation of the delay and the estimated date of submission. Note that the major command does not have the authority to grant or deny relief.

11. DFAS Center Action on Report of Investigation. The ROI will be reviewed by the supporting DFAS Center. If the ROI is not considered thorough, comprehensive or complete, it will be returned to the convening authority, with an explanation of the deficiencies, for correction. The convening authority will review the supplementary report from the investigator and, if there is no change in action, forward it to the DFAS Center. The supporting DFAS Center Director will use the completed ROI as the basis from which to determine whether the accountable individual(s) will be granted or denied relief of liability. If the DFAS Center Director holds the DO or any other accountable individual liable for a loss investigated by an IO or IBO, and that individual(s) has not been afforded an opportunity to file a rebuttal to the findings of the ROI, the file will be returned through the major command to the convening authority giving the reasons for the adverse determination. The convening authority must give the individual(s) held liable the opportunity to file a rebuttal. Upon receipt of the rebuttal, the convening authority will return the file through the major command to the supporting DFAS Center with comments on the rebuttal (if any). The Director of the DFAS Center will reconsider the adverse determination and affirm or reverse the determination.

★C. ACCOUNTABLE INDIVIDUALS

An accountable individual is any government employee or military member who, by reason of his or her position, is responsible for or has custody of government funds. There may be, and usually is, more than one accountable individual in a given case. This occurs since the concept of accountability is not limited to the person in whose name the account officially is held, but also extends to those individuals who actually have control of the funds. Examples of those individuals considered to be accountable include deputy DOs, agents, cashiers, collection agents, paying agents, imprest fund cashiers, change fund custodians, cash control officers, certifying officers and accountable officials as defined in Chapter 33 of this volume.

★D. LIABILITY OF ACCOUNTABLE INDIVIDUALS

Certifying officers, DOs, deputy DOs, agents, cashiers, collection agents, paying agents, imprest fund cashiers, change fund custodians, cash control officers, and other accountable individuals who have physical custody of government funds are held to a standard of strict liability. They are, in effect, insurers of the public funds and are excusable only for losses due to acts of God or the public enemy. This liability has been established in a line of Supreme Court decisions (United States v. Prescott, 44 U.S. (3 How) 578 (1845); United States v. Thomas, 82 U.S. (15 Wall 337) (1872); Smythe v. United States, 188 U.S. 156 (1903)). A certifying officer, DO deputy DO, agent, cashier, collection agent, paying agent, imprest fund cashier, change fund custodian, or cash control officer automatically is liable at the moment either a physical loss occurs or an illegal, incorrect, or improper payment is made. See Volume 54, Decisions of the Comptroller General, 1974, pages 112, 114. Where a subordinate of the DO actually disburses the funds, the DO will be relieved of liability only upon a showing that the DO properly supervised the subordinate, maintained an adequate system of procedures and controls to safeguard the funds, and took steps to insure the system's implementation and effectiveness. The standard of automatic liability does not apply to accountable officials appointed as prescribed in Chapter 33 of this volume. For these accountable officials, liability attaches upon a showing that the official negligently provided information, data or service to a certifying officer.

★E. RELIEF OF ACCOUNTABLE INDIVIDUALS

It is important to distinguish between liability and relief from such liability. The basic legal liability of an accountable individual (excluding an accountable official as prescribed in Chapter 33 of this volume) is strict, automatic, and not affected by any lack of fault or negligence on his or her part. However, lack of fault or negligence may provide a basis for relief upon proper administrative request.

1. The relief of accountable individuals of the DoD (excluding accountable officials as prescribed in Chapter 33 of this volume) responsible for the physical loss or deficiency of any public funds, vouchers, or records is authorized by 31 U.S.C. 3527(b) (reference (e)). In order for relief to be granted, the Secretary of Defense, or designee, shall make the following determinations.

- a. The individual was carrying out official duties when the loss or deficiency occurred.
- b. The loss or deficiency was not the result of an illegal, incorrect, or improper payment.
- c. The loss or deficiency was not the result of fault or negligence by the individual.

2. As relief may be granted only when the Secretary of Defense, or designee, is able to make these determinations based upon a review of available evidence, these requirements

should be considered during the course of the investigation. Additionally, findings of fact in this regard should be made in conjunction with all accountable individuals for whom relief is being sought.

3. Title 31 U.S.C. 3527(b) (reference (e)) also provides the authority for the granting of relief of an official of the armed forces for an illegal, improper, or incorrect payment. Relief of liability is granted when the Secretary of Defense determines that diligent collection action was taken, the certification was based on official records, and that the official did not know, and by reasonable diligence and inquiry could not have discovered the correct information, or the obligation was incurred in good faith, no law specifically prohibited the payment, and the U.S. Government received value for the payment.

4. Accountable officials appointed under the provisions of Chapter 33 of this volume shall be pecuniarily liable for erroneous payments that result from information, data or service they negligently provide to a certifying officer. For relief of liability of an accountable official, a presumption of negligence does not apply. The investigator must obtain relevant facts concerning (1) whether there is a fiscal irregularity, and (2) whether there is evidence of fault or negligence on the part of the accountable official.

★F. STANDARDS OF NEGLIGENCE

The liability of an accountable individual (excluding an accountable official as prescribed in Chapter 33 of this volume) is strict and independent of any fault or negligence. However, in evaluating the facts to determine whether any accountable individual (including an accountable official as prescribed in Chapter 33 of this volume) was negligent for purposes of relief from liability, the standard of "reasonable care" is applied. This is the standard of simple or ordinary negligence, not gross negligence. The standard has been stated as what the reasonably prudent and careful person would have done to take care of his or her own property of the like description under like circumstances. See Volume 54, Decision of the Comptroller General, page 112.

★G. PRESUMPTION OF NEGLIGENCE

Since liability of an accountable individual (excluding an accountable official as prescribed in Chapter 33 of this volume) is strict and automatic at the time of the loss or deficiency, the fact of the occurrence of a loss or deficiency gives rise to a presumption of negligence on the part of the accountable individual. While the presumption may be rebutted by evidence to the contrary, it is the accountable individual's burden to produce the evidence. The administrative determination that there was not fault or negligence, unsupported by evidence, is not sufficient to rebut the presumption. The accountable individual shall come forward with affirmative evidence that he or she exercised the required degree of care. It should be emphasized that the government does not have to produce evidence to establish that the accountable individual was at fault to hold him or her liable; liability is automatic. Rather, in order to be entitled to relief, the accountable individual must produce evidence to show that there was no contributing fault or negligence on his or her part. Thus, in the case of an unexplained loss or deficiency where there is no evidence to rebut the presumption of negligence, there is no

basis upon which to grant relief. The presumption of negligence and its application to unexplained losses are discussed in Volume 48, Decisions of the Comptroller General, page 566 (case no. B-166174). The Court of Claims has affirmed this concept in *Serrano v. United States*, 612 F.2d 525 (Ct. Cl. 1979). For accountable officials as prescribed in Chapter 33 of this volume, the government must establish that the loss or deficiency was the result of negligence on the part of the accountable official. The accountable official may submit a request for relief supported by a statement explaining how the evidence fails to show negligence on the accountable official's part.

★H. PROXIMATE CAUSE

An accountable individual may be relieved from liability even though negligent if it can be established that the negligence was not the proximate cause of the loss. The proximate cause concept implies a cause-and-effect relationship between the negligence and the loss. In other words, the negligence must have contributed to the loss. In analyzing proximate cause, it may be helpful to ask certain questions. First, if the accountable individual had not been negligent, would the loss have occurred? If the answer to this question is yes, the negligence is not the proximate cause of the loss and relief will probably be granted. However, it may not be possible to answer this question with any degree of clarity. If not, the next question to ask is whether the negligence was a "substantial factor" in bringing about the loss. If the answer to this question is yes, relief probably will be denied.

I. LOSSES BY CASHIERS

1. If the shortage is in funds for which a cashier is accountable, the following questions should be considered when completing the investigation.

a. Have the disbursing officer and any other persons who might be held liable for the loss been afforded all the rights and privileges of parties in interest?

b. Has testimony been obtained from every person who should be questioned in regard to the circumstances surrounding the loss?

c. Have sufficient questions been asked of each witness and has any other investigation made of the loss been considered, with the exception of such part, if any, that pertains to lie detector tests?

d. Was a thorough search of the physical area made for missing cash or vouchers?

e. Were the day's transactions thoroughly reviewed in an effort to determine the cause of the shortage?

f. Were any individuals contacted in an effort to determine if an overpayment has been made and could be recovered?

g. Were individuals who made collections contacted to determine if they found a compensating overage in their accounts?

h. Was all the cash-on-hand in the disbursing office counted to make sure that there was no compensating overage?

i. What was the number of transactions handled by the cashier during the period in which the loss occurred? Did distracting influences exist or were working conditions poor?

j. Was the cashier working under pressure because of the heavy volume of business?

k. Was the cashier handling new currency that has a tendency to stick together?

l. Was the cashier experienced or inexperienced?

m. What procedures and internal controls has the disbursing officer established for safeguarding funds? What written standard operating procedures (SOPs) has he or she provided for the guidance of cashiers? Has he or she issued any oral instructions?

n. Are the SOPs adequate?

o. Has the cashier complied with the SOPs?

p. On the day of the loss, what procedures were followed by the cashier in counting money when he or she received advances of public funds from the disbursing officer or his or her deputies, made disbursements, or received collections?

q. What actions were taken by the cashier to protect cash and vouchers during temporary absences from the cashier's window?

r. What facilities were furnished to the cashier to protect cash for which he or she was accountable, such as a cash drawer with key lock or a separate safe?

s. Was the cashier's cage accessible to persons other than the cashier?

t. What procedures were followed by the disbursing officer, deputy, cash control officer, and/or chief cashier in making daily settlements with the cashier?

u. Did theft occur?

- v. Are there any inconsistencies between the testimonies of different witnesses?
- w. Are orders appointing cashiers, deputies, etc., amended where appropriate?
- x. Were paid vouchers properly safeguarded by both the cashier and the disbursing officer?

J. LOSSES BY RECEIPT OF COUNTERFEIT CURRENCY

- 1. If the loss was caused by receipt of counterfeit currency, the following questions should be considered when completing the investigation.
 - a. Have the disbursing officer and any other persons who might be held liable for the loss been afforded all the rights and privileges of parties in interest?
 - b. Has testimony been obtained from every person who should be questioned in regard to the circumstances surrounding the receipt of the counterfeit currency?
 - c. When and by whom was the receipt of counterfeit currency detected?
 - d. Was an effort made to determine the source of the counterfeit note(s)?
 - e. Has the disbursing officer provided instructions in detecting counterfeit money for those in the office who shall handle money?
 - f. Does the volume of transactions handled by cashiers preclude a careful inspection of each and every piece of currency?
 - g. Are there any inconsistencies between the testimonies of different witnesses?

K. LOSSES BY AGENT OFFICERS

- 1. If the loss involved agent officers, the following questions should be considered when completing the investigation.
 - a. Have the disbursing officer and any other persons who might be held liable for the loss been afforded all the rights and privileges of parties in interest?
 - b. Has testimony been obtained from every person who should be questioned in regard to the circumstances surrounding the loss?
 - c. Have sufficient questions been asked of each witness?

- d. Have any other investigations made of the loss been considered, with the exception of such part, if any, that pertains to lie detector tests?
- e. Was a thorough search of the physical area made for missing cash or vouchers?
- f. Were the day's transactions thoroughly reviewed in an effort to determine the cause of the shortage?
- g. Do exhibits show the amount of entrustment made by the disbursing officer to the agent officer, signature of agent officer in receipt of funds, turn-in made by agent officer, and the amount of the shortage, or a statement of the agent officer's account?
- h. Does an exhibit show the appointment of the individual as an agent officer?
- i. Has the disbursing officer provided the agent officer with adequate instructions?
- j. If the loss involves funds in the hands of an agent officer, has the disbursing officer inspected and supervised the agent office, or arranged for such inspections?
- k. If the loss involves funds advanced to an agent officer appointed for the specific purpose of exchanging foreign currency for MPCs, has the disbursing officer made certain that verification of the fund on an unannounced basis has been made at least once each quarter?
- l. Did the agent officer verify money at the time of receipt?
- m. What precautions did the agent officer take to safeguard government funds?
- n. If the agent officer used a safe to which any other persons had access, did he or she attempt to obtain other safekeeping facilities? Was he or she directed to use the safe in question?
- o. Were all persons who had access to the funds during the period in which the loss occurred questioned?
- p. Did theft occur?
- q. What procedures did the agent officer follow in making payments?
- r. Was the agent officer working under pressure?

- s. Did the agent officer have previous experience in making payments.
- t. Were working conditions poor in any respect?
- u. Are there any inconsistencies between the testimonies of different witnesses?

L. LOSSES BY FRAUD IN THE DISBURSING OFFICE

1. If the loss involved payments as a result of fraud in the disbursing office, the following questions should be considered when completing the investigation.

a. Have the disbursing officer or any other persons who might be held liable for the loss been afforded all the rights and privileges of parties in interest?

b. Has testimony been obtained from every person who should be questioned in regard to the circumstances surrounding the fraudulent payments?

c. Has consideration been given to any other investigation made, with the exception of such part, if any, that pertains to lie detector tests?

d. Has a thorough investigation been made in order to discover the full extent of the loss due to fraudulent activity that has been uncovered?

e. Have the methods used to defraud the U.S. Government clearly been described?

f. What internal controls have been established by the disbursing officer in an effort to preclude fraudulent activity by disbursing personnel?

g. Has all possible collection action been taken?

(1) In the case of military personnel, is collection action being taken in the field or by the servicing DFAS Center in cases when personnel have been separated from the service?

(2) In case of civilian employees, has the individual involved authorized application of pay to the shortage? Have steps been taken to secure application of final pay to settlement of the indebtedness? If the amount of indebtedness has been determined, has a request been made to the Office of Personnel Management for set off against the Civil Service Retirement and Disability Fund?

M. LOSSES BY IMPREST FUND CASHIERS AND CHANGE FUND CUSTODIANS

1. If the loss was in funds advanced to imprest fund cashiers or individuals accountable for change funds (e.g., the accountable officer for quartermaster account, medical services accountable officer or post signal officer), the following questions should be considered when completing the investigation.

a. Has the disbursing officer and any other person who might be held liable for the loss been afforded all the rights and privileges of parties in interest?

b. Has testimony been obtained from every person who should be questioned in regard to the circumstances surrounding the loss?

c. Has consideration been given any other investigation made of the loss, with the exception of such part, if any, that pertains to lie detector tests?

d. Did the accountable individual follow procedures applicable to the particular fund?

e. Has the cause of loss been clearly established?

f. Did theft occur?

g. Are there any inconsistencies between the testimonies of different witnesses?

★ APPENDIX D

NAVY DISBURSING OPERATIONSA. OVERVIEW

1. Purpose. This appendix is provided to amplify instructions contained in the basic text of this volume relative to unique operations of the Department of the Navy (DoN) disbursing offices. Guidance contained herein is not intended to conflict with other publications and directives. This appendix amplifies guidance for disbursing operations at DoN overseas activities, Personnel Support Activities (PSA) and their detachments (PSD), Naval vessels and tactical units.

2. Application and Scope. Compliance with guidance contained herein is mandatory except in the case of specific statutory authority for deviation therefrom. Requests for deviation from or interpretation of the guidance contained herein shall be directed for consideration through channels to the Defense Finance and Accounting Service, Disbursing and Cash Management Activity, DCMA-DB, 1500 E. 95th Street, Kansas City, MO 64197-0030. Final determination will be made by the Director of Financial Commerce, OUSD(C).

3. Policy. The instructions contained herein are intended to provide guidance on unique Navy disbursing processing requirements and procedures. These instructions are not intended to supercede guidance contained in the basic text of this volume or any other law or regulation issued by higher authority. In any case where the instructions herein conflict with instructions or directives of higher authority, the guidance of the higher authority shall prevail. In any situation where conflicting instructions are discovered, they should be reported through channels to the Defense Finance and Accounting Service, Disbursing and Cash Management Office, DCMO-DB, 1500 E. 95th Street, Kansas City, MO 64197-0030 for clarification.

4. Responsibilities. It is the responsibility of each disbursing officer to become thoroughly familiar with the provisions of this volume and associated references as they pertain to the legality and methodology of payments and accountability.

B. COLLECTIONS

1. Collection Documents - Preparation, Required Information, and Accounting Data. Use DD Form 1131 (Cash Collection Voucher) when directives governing the collection function do not prescribe the use of a specific voucher.

a. Date. Enter the actual date of collection unless the voucher is supporting a monthly collection. For vouchers supporting monthly collections, enter the period covered by the voucher.

b. Reference/Receipt Number. Enter the document or receipt number furnished in support of the collection document.

c. Remitter. Enter the name of the person, firm, title of officer and the name of the ship/activity to identify the source of the collection.

d. Purpose. Enter a concise statement of the purpose for which the collection was received.

e. Amount. Enter one amount for each remitter. If the proceeds of the collection must be credited to two or more appropriations enter each appropriation and the amount for each appropriation separately.

See figures D-1 through D-3.

2. Collections for Loss of or Damage to Government Property

a. Recoveries from Naval Personnel

(1) Voluntary Action. Credit to appropriation 173019, Recoveries for Government Property, Lost or Damaged, not otherwise classified.

(a) Pay Checkage in accordance with paragraph 70702, Volume 7A of this regulation. Family housing unit - credit to appropriation 17-7035, Family Housing, Navy and Marine Corps (FH, N & MC).

(b) Unaccompanied personnel housing unit. Credit to the Operations and Maintenance (O&M) account of the station operating the unaccompanied personnel housing unit.

3. Collections for Government Services

a. Laundry Service

(1) Ship's Store Afloat

(a) Refer to Ship's Store Afloat Manual (NAVSUP P-487), (reference (as)).

(b) Credit to appropriation 178723, Profits from Sale of Ship's Store, Navy.

(c) When collections are made for laundry services procured from commercial sources, attach a list with name, rank, and amount paid by each member to collection voucher (CV).

4. Collections for Sales

a. Proceeds of Sales from "Lucky Bag". Amounts realized on sales from "lucky bag," in accordance with paragraph 13136 of the Naval Supply Systems Command Manual (reference (at)), will be turned over to the disbursing officer and taken up in his or her accounts with credit to 171060, Forfeitures of Unclaimed Money and Property.

b. Meals from Navy General Messes. Cash collected from the sale of meals for the general mess will be deposited with the disbursing officer in accordance with the Food Service Management Manual (NAVSUP P-486) (reference (au)).

(1) Accounting Data. Credit amounts received from sale of meals from the general mess to appropriation and subhead 17*1453.2241, Military Pay, Navy (MPN). Operating costs will be credited 50 percent to appropriation and subhead 17*1453.2202, Military Pay Navy, (MPN) and 50 percent to appropriation Operations and Maintenance, Navy (O&M,N) as an unfunded transaction. Operating costs for contractor operated messes will be credited to appropriation O&M,N.

(2) Collection Voucher. At the end of the accounting period, the officer-in-charge of the general mess will furnish to the disbursing officer an original and three copies of NAVSUP Form 1357 (Ration and Sales Report) covering the total deposited for meals sold. To acknowledge receipt of funds, the disbursing officer will sign the original NAVSUP Form 1357 and return it to the officer-in-charge of the general mess. See figure D-3.

c. Ship's Store Afloat. All collections, including cash, traveler's checks, and personal checks will be collected and turned over to the disbursing officer in accordance with procedures outlined in the Ship's Store Afloat Manual (NAVSUP P-487) (reference (as)). A DD Form 1149 (Requisition and Invoice/Shipping Document) in original and three copies will be submitted by the ship's store officer to the disbursing officer. The disbursing officer will complete the required certificate on the original and return it to the ship's store officer.

d. Subsistence Items

(1) Proceeds from sales of subsistence items carried in the Navy Stock Account will be credited to the Navy Stock Fund by preparing a DD Form 1149 (Requisition and Invoice/Shipping Document).

(2) Proceeds from sales of subsistence items charged to appropriation 17*1453, Military Personnel, Navy (MPN) will be credited to appropriation 17*1453, MPN. The collection voucher will be a NAVSUP Form 1357. See figure D-3.

(3) The value of subsistence items sold will be reflected in the DD Form 2657 (Daily Statement of Accountability).

5. Other Collections

a. Collections for Marine Corps, Army, Air Force, and Coast Guard. Under certain circumstances, it may become necessary for Navy disbursing officers to make collections for the Marine Corps, Army, Air Force, or Coast Guard. Such situations might include collections from military personnel whose pay accounts are administered by a Navy disbursing officer or refunds on public vouchers paid by a Navy disbursing officer. Generally, Marine Corps, Army, Air Force, and Coast Guard collections will be accounted for in the same manner as Navy collections. All appropriate Marine Corps, Army, Air Force, or Coast Guard accounting data will be cited on the collection voucher.

b. Distribution of the Collection Voucher. The original and two copies will be submitted with the financial returns and an additional copy will be submitted for each fiscal station cited. If the credit is to an allotment held by a Navy activity, an additional copy will be forwarded to the Navy activity indicated.

c. Deposits to Liquidate Checkages. Funds received by a disbursing officer to offset a checkage in accordance with the DFAS-Cleveland Center, Pay Procedures Manual (DFAS-PPM) (reference (av)) will be processed using a DD Form 1131 crediting the appropriation, object class and functional account against which the individual's pay is charged.

d. Deposits to Protect Insurance Allotments. Navy members in a non-pay status are authorized to make cash deposits to a disbursing officer to protect National Servicemen's Life Insurance allotments. The disbursing officer will prepare a DD Form 1131 and credit the appropriation, object class and functional account to which the member's pay is charged.

e. Telephone Collections. Collections for unofficial telephone service will be deposited to a general depository or a local disbursing officer. Collections for occasional use of official telephones for unofficial calls will be deposited at least once a month. Funds received by disbursing officers from the telephone company for commissions on collections from telephone pay stations will be credited to appropriation 173210, Commissions on Telephone Pay Stations.

f. Unsuccessful Completion of Courses Funded by the Navy Tuition Assistance Program. When Navy personnel do not successfully complete a course for which tuition assistance was granted, and repayment is required, collections will be recorded against the annual appropriation or working capital fund that originally funded the related tuition assistance authorization.

C. DISBURSEMENTS

1. Preparation and Payment of Public Vouchers

a. General

(1) Format. Use SF 1034 (Public Voucher for Purchases and Services Other Than Personal) as a public voucher (PV) when governing directives do not prescribe use of a specific disbursement voucher. See figure D-4.

(2) Requirements for a PV

- (a) It must discharge a U.S. Government liability.
- (b) Supporting documents must be complete.
- (c) The expenditure must be charged to an appropriation/fund.
- (d) The control, maintenance, and disposition of records must preclude duplicate payments or overpayments by the Government.
- (e) The chargeable accounting data must be accurate and complete.

(3) Completion Requirements for the SF 1034 and, when required, the SF 1035 (Continuation Sheet). Complete appropriate blocks as follows:

- (a) Applicable DoD Component and place prepared.
- (b) Date prepared. (No entry required in this block).
- (c) Vouchers must be numbered in accordance with procedures established by each payment office.
- (d) On payments for supplies or non-personal services, show the number and date of the numbered contract, requisition, or purchase order.
- (e) Payee's name and address (include social security number (SSN) for military members and DoD civilian employees if payment affects the pay account or is a taxable payment). Enter the name and address of the contractor who supplied the services or articles.

(4) Body

- (a) First Column. Invoice or delivery order number and date.
- (b) Second Column. Date(s) supplies delivered or services performed.

(c) Third Column. Enter description of supplies or services unless the attached invoice gives the description. If it does, enter the following statement: "Per attached invoice." Special notations will also be made in this column. Reference any previous partial payments in this column together with the voucher number and date paid.

(d) Fourth, Fifth, and Sixth Columns. Do not use these columns if the invoice is attached as prescribed above. If the invoice is not attached, complete as follows:

1 Fourth Column. Enter the quantity of each item.

2 Fifth Column. Enter the unit price of each item.

3 Sixth Column. Enter the unit of measurement for each item.

(e) Seventh Column. Enter the extended value of each item. If the amount is stated in foreign currency, insert the name of the currency. When attached invoices are referred to, show the extended total for each individual invoice. When SF 1035 is used, show the extended total for each sheet in this column. Use the "Differences" block for cash discounts identified as "Disc" and the net of any other adjustments to the amount in the total block identified as "Adj". For vouchers involving multiple invoices, the paying office may attach a list of invoice discrepancies to the original and retained copies instead of recording each discrepancy on the face of the SF 1034. "Amount verified correct for" will be the adjusted total. Enter either a signature or initials to show who computed and verified the payment.

(f) Account Classification Block. Enter each accounting classification and the amount charged to it. Use a separate line for each accounting classification charged. If only one line of accounting classification is cited on the voucher and foreign currency or voucher deductions are not involved, it is not necessary to show the amount following the accounting classification.

(g) Station Number of Paying Office. Enter the disbursing station symbol number (DSSN) of the paying office on all copies of a disbursement voucher.

(h) Money Amounts - How Expressed

1 U.S. Dollars and Cents. Except as prescribed in the following subparagraph, show all money amounts as U.S. dollars and cents. If less than one-half cent occurs in the footing of a voucher, disregard it. If the fraction is one-half cent or more, count it as a whole cent.

2 Foreign Currency. Enter the amount of foreign currency, U.S. dollar equivalent, and exchange rate in the blocks marked "Approved For" and "Exchange Rate" on the SF 1034. Show the amount in U.S. dollars in the Accounting

Classification block. The amount of the check may be shown in the foreign currency if a limited depository checking account is maintained in those terms.

(i) Payment Notations. Check blocks under Payment as follows:

1 Complete. When paying the entire amount of the contract or purchase order.

2 Partial. When paying for partial delivery, show the number of the partial payment, e.g., whether 1st, 2nd, etc.

3 Final. When making the final payment of two or more partial payments.

4 Advance. When making an advance payment to a contractor, vouchers covering additional advances must refer to vouchers covering prior advances under the same contract in the "Articles or Services" block. References must show the voucher number, name, and DSSN of the disbursing officer, and the date paid. Advance payments are referred to as "first advance," "second advance," etc.

5 Supplemental. When supplemental payments are made, use the block for final payments and cross out the word "Final" and replace it with "Supplemental." Reference the original voucher on the supplemental voucher in the "Articles or Services" block. Such references must show voucher number and date paid.

2. Purchases and Services

a. Use the SF 1034 as the PV to effect payment of purchases and services other than personal.

b. The activity responsible for check issuance is the activity designated to make the payment.

c. Contract/Purchase Order does not Specify the Activity Designated to Make Payment

(1) When the delivery is made to a ship located in the continental United States (CONUS) or Hawaii, the PV is prepared and payment made by the DFAS Operating Location (OPLOC) serving the area where the dealer is located.

(2) When the delivery is made to a ship located outside the continental United States (OCONUS) or Hawaii by a dealer located OCONUS or Hawaii, the PV is prepared by the receiving activity and forwarded to the servicing disbursing officer for payment.

(3) When there is no supply activity in the vicinity, forward the documents to nearest DoD or U.S. disbursing office for payment.

d. Dealers' Bills Rendered Against Decommissioned Ships

(1) Dealer Located in CONUS or Hawaii. The settlement responsibility for outstanding bills is the DFAS OPLOC designated in purchase document.

(2) No Disbursing Office Designated or No Written Document

(a) Deliveries in CONUS and Hawaii. The DFAS OPLOC serving the receiving activities has settlement responsibility.

(b) Other deliveries. The DFAS OPLOC serving the dealer's location has settlement responsibility.

(c) Dealer Located OCONUS or Hawaii. The primary responsibility for settlement is the activity designated to settle the disbursing account. If the designated activity is in CONUS, forward dealers' bills with supporting documents to DFAS OPLOC, Charleston, SC, for preparation and payment. If the designated activity is OCONUS, voucher preparation is the responsibility of the settlement activity and payment is done by the disbursing officer servicing the settlement activity.

e. Evidence to Support Payment. The settlement officer will determine whether the amount billed is payable by analyzing the available documents which will be retained by the paying office.

f. Unsupported Bills. The bill will be returned to the dealer with the reason(s) for declination of payment. The dealer will be informed that the bill can be submitted to the GAO via the DFAS OPLOC, Charleston, SC, for settlement.

3. Substantiating Documents and Certificates

a. Purchase Documents

(1) Contracts. The paying disbursing officer will maintain a contract file containing each contract and all contract modifications for verification of proper payment. A separate log will annotate the date of receipt for all contracts.

(2) Purchase Orders. Distribution instructions for purchase and delivery orders are found in Navy Supply Acquisition Regulation Supplement (SUPARS) (reference (aw)).

b. Dealer's Bill

(1) General Requirements. All dealer's bills must be expressed in the currency in which the transaction was made. The original dealer's bill will be attached to the original PV.

(2) Supplemental Payments. Disbursing officers will establish the necessary internal controls to identify supplemental payments to the original payment and to prevent duplicate refunds of deductions or other erroneous supplemental payments.

(3) Dealer's Bill Expressed in Foreign Currency. The PV will show all amounts in equivalent U.S. currency at the rate of exchange at which foreign currency is disbursed. The exchange rate will be shown on the PV.

c. SF 44, U.S. Government Purchase Order - Invoice Voucher as a Purchase Invoice

(1) Purpose. The SF 44 combines the informal purchase order, certificate of receipt and acceptance, and dealer's bill. It is used only in over-the-counter purchases and only when the government-wide purchase card is not accepted by the dealer or other dealers of like goods or services in the vicinity.

(2) Payment by Disbursing Officer. When the SF 44 is used in an informal purchase, it should contain the signature of the ordering officer (which could be an aircraft commander in the case of procurement of fuel, lodgings, and subsistence on extended aircraft flights), the signature of the person receiving the material or services, and the chargeable accounting data. Therefore, it may be submitted by the vendor directly to the payment office designated thereon. In the case of the fleet aircraft, the payment office will be designated as the DFAS OPLOC, Norfolk or San Diego, except where the SF 44 is executed OCONUS and is payable in a foreign currency. In these cases the payment office will be designated as the U.S. Navy Area Commander or the U.S. Navy Component of Combatant Commands. In accordance with the option pre-printed on Copy 2, Seller's Copy of the order, the seller may prepare an invoice and use the original of the SF 44 as a supporting document, or the seller may submit the SF 44 as an invoice.

d. Certificate of Receipt and Inspection at Destination

(1) Ships. Certificates of receipt and acceptance will be furnished to the appropriate paying office as required by governing contracting regulations.

(2) Duplicate Certificates. When a second certification of the receipt and acceptance is made, it will be accompanied by a statement notifying the preparing activity of the accomplishment of a previous certification in a separate memorandum or on the second copy of the invoice.

4. Timely Settlement of Dealers Bills

a. Operating Forces. Units of the operating forces will comply with the requirements of this paragraph to the greatest extent possible. However, in the case of ships leaving a foreign port, the supply officer will make every effort to prepare and pay all PVs covering dealer's bills for materials (including ship's store stock) or services from foreign vendors. If payment of the dealers' bills cannot be made to foreign vendors before a ship leaves port, arrangements for payment of the bills will be made with local U.S. Military or State Department representatives; or in accordance with the governing fleet and area commanders' directive. In the case of ships leaving a U.S. port, the supply officer will make every effort to have all dealers' bills properly certified and forwarded to the appropriate DFAS OPLOC before leaving the port.

b. Precautions Against Duplicate Payments

(1) Naming of Paying Office in Contract or Purchase Orders. All contracting officers are required to insert in every contract and purchase order the name of the disbursing office designated to make payment. Payment will be made only by the disbursing office specifically authorized by the provisions of the contract or purchase order. In addition, Title 7 of the U.S. General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (reference (n)), and the Treasury Financial Manual (reference (m)) require that paying office controls over disbursements include the necessary safeguards to prevent duplicate payments.

(2) Responsibilities of Preparing Officer. It is the responsibility of the preparing officer to check for possible duplications. If duplicate payment does occur, the cause must be fully investigated and appropriate action taken to avoid recurrence of similar duplications. Every effort must be taken to recoup the duplicate payment as soon as it is discovered and validated that it actually occurred.

(3) Criteria for Detecting Suspected Duplicate Payments. All invoices should be checked against the data base of prior payments for possible duplication. The following data elements must be checked as the mandatory criteria for detecting suspected duplicate payments:

- (a) contractor invoice date,
- (b) contractor invoice number,
- (c) invoice gross amount,
- (d) Procurement Instrument Identification Number (PIIN), and
- (e) Supplementary Procurement Instrument Identification Number (SPIIN), where applicable.

If a suspected duplicate is detected, records of previous payment containing the same identical data elements will be researched prior to executing payment. Optimally, 12 months of file data will be researched; 6 months minimally. Suspected duplicates will not be paid while research is pending.

5. Other Types of Payments

a. Payments for Travel and/or Official Expenses

(1) Military Personnel. The methods of settlement of government travel and official expenses incident to travel for military personnel are contained Volume 9 of this regulation.

(2) Civilian Personnel

(a) Advance. Instructions concerning entitlement, limitations on amounts of advances, and repayment of advances are contained in the Joint Travel Regulations (JTR), Volume 2 (reference (ax)).

(b) Preparation and Payment of Travel Claims. Procedures for preparation and payment of travel claims are contained in Volume 9 of this Regulation.

b. Payment of Witnesses

(1) Military Personnel. Entitlement and payment of transportation allowances to military personnel summoned as witnesses will be as prescribed in chapter 7, part E of the JFTR (reference (ay)) and Volume 9 of this Regulation.

c. Payment for Transportation of Personnel. Transportation for personnel purchased by U.S. Government Transportation Request will be paid by DFAS OPLOC, Norfolk, VA, when a Navy appropriation is chargeable.

d. Claim for Reimbursement for Expenditures on Official Business

(1) Non-Government Personnel. Claims will be made on an SF 1164 (Claim for Reimbursement of Expenditures on Official Business) signed by the claimant and approved by an authorized certifying officer.

(2) Invitation to Travel. Persons invited to perform travel in accordance with reference (ax) are authorized transportation, allowances, and other proper expense reimbursement in connection with official activities of the Department as contained in Title 5, United States Code, Section 5703 (5 U.S.C. 5703) (reference (j)). Reimbursement will be made on SF 1164. If there is entitlement to per diem allowances, a DD Form 1351-2 (Travel Voucher or Subvoucher) will be used to file their claim.

6. Responsibility for Payment of Public Vouchers

a. Tactical Disbursing Officers. The following types of payments are not considered as payments to vendors and will be made by the local disbursing officer immediately serving the activity receiving the material or services.

- (1) Purchase of post office box rental.
- (2) Purchase of street car, bus, bridge, or road toll tickets and tokens.
- (3) Reimbursement of Naval personnel for sundry expenses, official documents, or for authorized official entertainment as provided in Volume 9 of this Regulation.
- (4) Mileage, per diem for travel or temporary duty, and other reimbursements for expenses incident to official travel.
- (5) Fees of visiting lecturers, clergymen, and medical and dental lecturers utilized in the Medical Department training programs; expenses of the Board of Visitors of the Naval Academy; and expenses of the Board of Advisors to the Naval War College.
- (6) Monthly ration vouchers.

(a) Payment to Navy Mess Treasurer. Each month, the mess treasurer will submit a list of members subsisted in the mess on a locally prepared form, in triplicate, to the disbursing officer. After the action prescribed in DFAS-PPM (reference (av)) has been taken, payment will be made to the officer or mess treasurer on an SF 1034 supported by the locally prepared form. The disbursing officer will furnish a copy of the paid SF 1034 and a copy of the locally prepared form to the payee.

(b) Officers' Messes Afloat. Payment of commuted rations for enlisted personnel subsisted in officers' messes afloat will be effected on an SF 1034, supported by a list of the enlisted personnel and the certificate prescribed in subparagraph D10306.A.6.a, above. In accordance with the Food Service Management Officers' Quarters and Messes Afloat and Chief Petty Officers' Messes Afloat Manual (NAVSUP P-486), Volume II (reference (az)), on a locally prepared form, the mess treasurer will determine the amount payable by comparing the cost of provisions eaten by the enlisted members to the total value of the commuted rations of the enlisted members. The amount payable will be lesser of the two amounts. The original of this local form will support the SF 1034. See figure D-5.

(c) United States Naval Academy (USNA) and Naval Reserve Officers Training Corps (NROTC) Midshipmen

1 General. In accordance with 10 U.S.C. 2109(b)(3) (reference (b)), the Secretary of the Navy has set the maximum daily rate that a nonappropriated

fund (NAF) mess may be reimbursed from appropriated funds for subsisting NROTC midshipmen. This rate will not exceed the lesser of:

- a cumulative food costs; or
 - b within the contiguous United States and the District of Columbia, a cumulative amount not to exceed \$4.50 per meal; or
 - c outside the contiguous United States and District of Columbia, a cumulative amount for each meal consumed not to exceed 14 percent of the per diem prescribed by reference (ay).

2 Subsistence in Kind. USNA midshipmen and NROTC midshipmen subsisting in a general mess or hospital mess are entitled to rations in kind at government expense. Charges will be centrally billed and paid. Those charges applicable to the subsistence of NROTC midshipmen will be charged to the appropriation Reserve Personnel, Navy. Those charges applicable to the subsistence of USNA midshipmen will be charged to the appropriation Military Personnel, Navy. In either case, the fiscal year chargeable will be the year in which the meals were consumed.

3 Reimbursement. Appropriated funds will be used to reimburse NAF messes for USNA and NROTC midshipmen for the billing period. The billing for USNA midshipmen will not exceed the lesser of cumulative food costs or a cumulative amount based on the daily rate prescribed in Volume 7A of this Regulation. The billing for all NROTC midshipmen will not exceed the cost as stated in subparagraph D10306.A.6.c(1)(b), above. An SF 1034 will be submitted to the disbursing officer and will be substantiated with a listing similar to and containing all the data shown herein.

b. Payment Procedure. DOs will effect prompt payment of the NAF mess bills. Payments will be made on an SF 1034. Accounting data on the voucher must be shown separately for USNA and in each of the 2 NROTC categories. Use an attached summary of the accounting data if there is not enough space on the voucher for the required breakdown. DOs will ensure the use of the proper functional account number (FAN) (as the last five digits of the cost code) when making payments for midshipmen.

- (1) Rewards and expenses for return of absentees and deserters.
- (2) Special diets procured from an officers' mess for sick personnel.
- (3) Payment of ship's store profits to the commanding officers of ships.
See figure D-4 and reference (as).
- (4) Dealers' Bills for subsistence and quarters purchased by military personnel as authorized by paragraph 22415 of reference (at).

(5) Imprest fund purchases when payment by check is required because of supplier's failure to ship c.o.d.

(6) Payment of advances and invoices for civilian employee training at non-Governmental facilities.

(7) Payments to exchanges for health and comfort items furnished military prisoners as authorized by the Naval Supply Systems Command Manual, Volume IV (reference (at)) and references (as) and (ay).

(8) Payments for claims for reimbursement of payments made to car rental agencies for the cost of deductible damage to rented vehicles that occurred during the performance of official business will be made on a DD Form 1351-2 supported by the documentation specified in reference (ay).

(9) Payment of tuition aid claims of Navy members as provided in Chief of Naval Education and Training Instruction (CNETINST) 1560.3 (reference (ba)).

(10) Payment to civil authorities for the cost of board and care of Navy members.

(11) Expenses in connection with activities of the informational program for foreign military trainees and visitors to the United States as authorized in the current series of Chief of Naval Operations Instruction (OPNAVINST) 4950.1 (reference (bb)) and orientation training tours as defined by DoD 5105.38-M (reference (bc)) will be reimbursed under the provisions of this paragraph when paid from personal funds of military members or civilian employees. When required and authorized in writing by a commanding officer or his designee authorized to incur obligations for the informational program, the DO may advance amounts required for direct payment by an escort officer in connection with a particular tour, visit, or other business. The DO will credit the appropriation, including the transaction type code (TTC) "1K" cited when the advance was made, and charge the appropriation data cited in the letter designation. For travel away from escort's duty station, a DD Form 1351-2 should be used.

(12) Payment of canal tolls by the DO of an individual ship is authorized. In most instances, local area commander's instructions or fleet directives, as in the case of the Suez Canal, take precedence and preclude the disbursing officer from making such payments. In these instances, the nearest shore based disbursing officer will make payments. When a ship is required to make payment, it immediately will be made upon leaving the canal or as soon afterward as the responsible canal commission presents its bill for payment. No payment will be made by the disbursing officer of a ship for passage through the Panama Canal. All toll bills for ships transiting the St. Lawrence Seaway and related canals will be received by the Commander, Eastern Sea Frontier for processing. The Commander, Eastern Sea Frontier will forward Canadian dealers' bills for transit and pilotage to the DFAS OPLOC, Charleston, SC, for payment. Bills of U.S. dealers shall be forwarded to DFAS OPLOC, Norfolk, VA, for payment.

(13) Costs of ship-to-shore telephone service will be collected from personnel using the service by the communications officer of the ship. The communications officer immediately will turn over the amounts collected to the disbursing officer who will take up the collection as a credit to Suspense, Navy. When the telephone company bills the ship for this service, settlement will be made by a U.S. Treasury check payable to the telephone company and issued by the disbursing officer using an SF 1034.

(14) Authorized payments for medical and dental care furnished by civilian non-Federal sources can be found in the current version of Naval Medical Command Instruction (NAVMEDCOMINST) 6320.1 (reference (bd)). Claims for reimbursement from individuals who have defrayed the expense of authorized care will be paid using the SF 1164. The SF 1164 will bear the claimant's signature on the face of the form as well as the certification of the approving authority, and will be supported by paid itemized invoices.

In addition to these payments, local disbursing officers on ships in foreign countries will make payment for purchases of materials and services procured from foreign vendors. The Afloat Supply Procedures Manual (NAVSUP P-485) (reference (be)), and local fleet and type commander directives regarding ships making arrangements for payment of dealer's bills prior to leaving a foreign port refer.

c. Miscellaneous Payments

(1) Rewards

(a) Notice and Acceptance of Offers of Rewards. Before there can be a valid acceptance of an offer of reward so as to authorize payment of money, there must be a notice of the offer. The government, as the offerer, announces that a certain individual has absented himself, deserted, escaped, or is missing, or that a boat, aircraft, mine, paravane, torpedo, or any other material is lost and offers a reward for the recovery of the person or thing or for the information leading to such recovery. Annual or blanket notices or notices of reward attached to the material may be considered notice of the offer. The individual who, knowing of such offer of reward, performs the acts specified therein prior to its revocation will become entitled to the reward. A member of the Armed Forces or other salaried officer or employee of the U.S. Government is not eligible to receive a reward.

(b) Payment. Unless otherwise specified, payment of rewards will be made on an SF 1034 supported by a signed offer of reward or a signed letter or certified copy of a message from the cognizant command, office, or bureau offering or confirming the declaration of a reward. If such documents are not available at the paying activity, the cognizant command, office, or agency will be requested to furnish them.

(c) Lost Mines. Commanding officers are authorized to offer rewards up to \$100 for the recovery of or for information furnished leading to the recovery of a lost mine or related components. Funds for payment of rewards will be made available for use by the Naval Mine Engineering Facility, Yorktown, VA. Commanding officers will forward

funding requests for rewards to the Naval Mine Engineering Facility by message. The circumstances for the reward requirement, including the amount needed, will be stated for each request.

(d) Lost Torpedoes, Mobile Targets, and Self-Propelled Mines.

Commanding officers are authorized to offer rewards up to \$500 for the recovery of or for information leading to the recovery of lost torpedoes, mobile targets, and self-propelled mines and to offer up to \$250 for the return of their related major components. The term "major components" refers to major sections of the weapon (e.g., exercise heads or battery compartments) but does not include minor assemblies of accessories (e.g., depth mechanisms, gyros or stabilizers). Funds for payment of rewards will be made available for use by the Naval Underwater Systems Center, Newport, RI. Commanding officers will forward funding requests for rewards to the Naval Underwater Systems Center by message. The circumstances for the reward requirement, including the amount needed, will be stated for each request.

(e) Lost Aircraft and Lost Target Pilotless Aircraft and Aircraft Equipment. Commanding officers are authorized to offer up to and including \$500 as a reward for the recovery of or for information leading to the recovery of lost aircraft and up to and including \$100 for aircraft equipment. Payment of rewards will be charged to the operation and maintenance allotment of the reporting custodian of the recovered aircraft or to the operation and maintenance allotment of the custodian of the aircraft equipment.

(f) Lost Submarine Target Training Devices. The Commanding Officer, Naval Training Equipment Center, is authorized to offer a reward of \$100 for the recovery of lost submarine target training devices. Payment of rewards will be charged to the Naval Training Equipment Center operation and maintenance allotment current at the time of payment.

(g) Lost Radio Equipped Buoys. The Commanding Officer, Naval Research Laboratory, is authorized to offer a reward of \$500 or any lesser sum depending on specific instances, for the recovery of or information leading to the recovery of lost radio equipped buoys. Payment of rewards will be charged to appropriation Navy Working Capital Fund (NWCF), 97X4930, subhead NH4A.

(h) Transosonde Type Balloon Equipment. The Commanding Officer, Naval Research Laboratory, is authorized to offer a reward of \$150, or any lesser sum depending on specific instances, for the recovery of or for information leading to the recovery of lost equipment attached to Transosonde type balloons. Payment of such rewards will be charged to appropriation NWCF, 97X4930, subhead NH4A.

(i) Lost Payload - Reentry Capsules. The commanding officer or senior officer present, Port Hueneme - Point Mugu - Santa Barbara area (Commander, Pacific Missile Range), is authorized to offer up to \$100 as a reward for the recovery and return of or for information leading to the recovery of lost property of the Navy relative to the missile and

satellite programs. Payments of rewards will be charged to the operation and maintenance allotment of the Pacific Missile Range.

(j) Lost Radio Sonobuoys. The Commanding Officers, Naval Inshore Undersea Warfare Group ONE and Group TWO, Naval Ship Research and Development Laboratory, Panama City, FL, are authorized to offer a reward of \$25 for the recovery of or for information leading to the recovery of lost radio sonobuoys. Payment of rewards will be charged to the Inshore Undersea Warfare Groups' operation and maintenance allotment current at the time of payment.

(k) Lost Elliptical Parabolic Hyperbolic High-Speed Depth Recorders. The Commanding Officer, Naval Ship Research and Development Laboratory, Panama City, FL, is authorized to offer a reward of \$25 for the recovery of or for information leading to the recovery of elliptical parabolic hyperbolic high-speed depth recorders. Payment of rewards will be charged to the Naval Research and Development Laboratory operation and maintenance allotment current at the time of payment.

(l) Lost Oceanographic Instruments. The Commander, Naval Oceanographic Office is authorized to offer up to and including \$100 as a reward for the recovery of or for information leading to the recovery of lost oceanographic observation devices such as, but not limited to, current meters, sub-surface buoys, acoustic release devices, and wave recorders, when the entire device is recovered intact regardless of condition. Payment of the reward will be charged to the operation and maintenance allotment of the Naval Oceanographic Office.

(m) Lost Detectors, Sensors, Simulators, and Associated Equipment. The Commander, Naval Surface Weapons Center, is authorized to offer up to \$250 as a reward for the recovery of or for information leading to the recovery of lost detectors, sensors, simulators, and associated instrumentations used in research, development, and testing of naval ordnance. Payment of the reward will be charged to the project using the equipment at the time of loss.

(n) Increased Rewards and Rewards for Other Material. Prior to offering a reward for other material not listed herein, or for an amount in excess of the reward authorized herein, authority for payment must be obtained from the Secretary of the Navy as prescribed in 10 U.S.C. 2252 (reference (b)). Commanding officers or senior officers present, bureau, or command having cognizance of the material involved will request such authority from the Secretary of the Navy. In each case, the request will contain:

1 the proposed amount of reward to be offered on a continuous basis;

2 the proposed amount of reward to be offered on a one-time basis for material lost but not recovered and for which it is desired to offer a reward to aid in recovery; and

3 the proposed amount of increase on an existing reward authorized to be offered on a continuous basis. The recommended amount of the reward to be offered will be stated in each case. Upon approval of the proposal, the cognizant office, bureau, or command, will forward to the Secretary of the Navy, via the Director, Defense Finance and Accounting Service-Cleveland Center, 1240 East Ninth Street, Cleveland, OH 44199-2055, a request for authorization to offer the reward on a one-time basis for material lost but not yet recovered, or to increase the amount of an authorized reward.

(o) Return of Absentees

1 Payment of Rewards. When authorized by military officials of the Armed Forces, any civil officer having authority to arrest offenders may apprehend an individual absent without leave from the military service of the United States and deliver the individual into custody of military authorities. The receipt of a DD Form 553 (Absentee Wanted by the Armed Forces) or any authorized communication, oral or written, from a military or federal law enforcement official or agency requesting active cooperation in the apprehension or delivery to military control of an absentee or deserter wanted by the Armed Forces will constitute the basis for a reward. When such a reward has been offered, persons or agency representatives (except employees of the federal government or service members) apprehending or delivering absentees or deserters to military control will be entitled to a payment of:

a \$50 for the apprehension and detention until military authorities assume control, or

b \$75 for the apprehension and delivery to military control.

Payment of the reward will be made to the person or agency representative actually making the arrest and turnover or delivery to military control. If two or more persons or agencies join in performing these services, payment may be made jointly or severally, but the total payment or payments may not exceed \$50 or \$75, as applicable. Payment of a reward is authorized whether the absentee or deserter voluntarily surrenders to civil authorities or is apprehended. Payment is not authorized for information merely leading to the apprehension of an absentee or deserter. Rewards may be paid to civil authorities of foreign countries or other foreign nationals who have been authorized to apprehend absentees or deserters if the requirements prescribed herein are complied with, and provided that the commanding officer of the activity to which the absentee or deserter is delivered believes the situation warrants such action. The DO, special disbursing agent, or other agent, as authorized, of the military activity to which an absentee or deserter is first delivered, will be responsible for payment of the reward. The claimant must present a signed statement specifying that he apprehended (or accepted voluntary surrender of) the absentee or deserter and that he either detained the absentee or deserter until military authorities assumed control or that he delivered the individual to military control. This statement must be supported by a copy of DD Form 553 or other form of notification that an individual is absent and that his return to military control is desired. If oral notification was made in lieu of written notification, the claimant will so certify and

provide the date of notification and the name, rank or rate, title, and organization of the person who made the authorization notice of reward. The payment will be charged to the accounting data specified in subparagraph D10306.C.1.o(6), below, and the voucher will include the absentee's or deserter's name and branch of service. When paid in cash, the claimant's receipt will be taken on his original statement. Payments may be consolidated periodically on SF 1129 (Reimbursement Voucher) or may be vouchered on an individual SF 1034.

2 Reimbursement for Actual Expenses. When a reward has not been offered or when conditions for payment of a reward cannot otherwise be met, reimbursement, not to exceed \$75, may be made to any person or agency for actual expenses incurred in the apprehension, detention, or delivery to military control of an absentee or deserter. If two or more persons or agencies join in performing these services, payment may be made jointly or severally, but the total payment or payments may not exceed \$75. Reimbursement may not be made for the same apprehension and detention or delivery for which a reward has been paid. Actual expenses for which reimbursement may be made will include:

a transportation costs, including mileage at the rate of \$0.25 per mile for travel by privately owned vehicle, for a round trip from either the place of apprehension or civil police headquarters to place of return to military control;

b meals furnished the member for which the cost was assumed by the apprehending person or agency representative;

c telephone or telegraph communication costs; damage to property of the apprehending person or agency if caused directly by the member during the apprehension, detention, or delivery; and

such other reasonable and necessary expenses incurred in actual apprehension, detention, or delivery as may be considered justifiable and reimbursable by the commanding officer.

3 Non-Reimbursable Expenses. Reimbursement will not be made for:

a lodging at non-military confinement facilities;

b transportation performed by the use of official federal, state, county, or municipal vehicles; or

c personal services of the apprehending, detaining or delivering person or agency.

Payment of actual expenses will be made in accordance with the payment procedures in this paragraph except that an itemized statement of costs approved by the commanding officer is required and notice on DD Form 553 or other form is not required.

4 Reimbursement for Subsistence Furnished. Civil authorities may be reimbursed for the cost of subsistence furnished Navy and Marine Corps members placed in custody for safekeeping at the request of military authorities. Such reimbursement will be in addition to rewards and reimbursement for actual expenses. Payment of subsistence will be made in accordance with the procedures for payment of other actual expenses except that an itemized statement of charges approved by the officer who directed the confinement is required. Notice on DD Form 553 or other form is not required.

5 Transportation Costs. Costs associated with an absentee's or deserter's own transportation will be charged to the pay account of the individual member as prescribed in Volume 9 of this Regulation. When a guard is required to apprehend and escort absentees and/or deserters from more than one service, the cost of travel of the guard will be charged to the service providing the guard when returning absentees and deserters to military control. Cost of travel for guards accompanying the absentee or deserter being returned to the parent service will be charged to the Military Personnel appropriation of the service to which the absentee/deserter is accountable.

6 Accounting Data. Payments for rewards, actual expenses, and for subsistence cost will be charged to the accounting data listed below, as appropriate.

a Apprehension, Retention and Return of Prisoners (Navy). 17*1453.2260 000 60600 0 000022 2D 000000 000000071165.

b Travel of Guards (Navy). 17*1453.2260 000 60600 0 000022 2D 000000 000000074146.

(2) Incentive Awards

(a) Administrative Regulations. Regulations governing the granting of cash awards to military personnel are contained in the current edition of Secretary of the Navy Instruction (SECNAVINST) 5305.2 (reference (bf)).

(b) Payment Procedure For Cash Awards

1 Military Personnel. Cash award payments are subject to the withholding provisions of the federal income tax law, but in the case of military personnel are not subject to the provisions of the Federal Insurance Contributions Act (FICA) of 16 August 1954, as amended (26 U.S.C. 3101) (reference (bg)). Income tax will be withheld at the rate of 28 percent. Cash award payments will be made by the disbursing office holding the pay account of the member. If the member no longer is on active duty at the time that the award

has been approved, payment will be made by the DFAS-Cleveland Center. Upon receipt of the original and 1 copy (2 copies in the case of associate disbursing officers) of the letter approving the award and designating applicable accounting data, payment will be made on an SF 1034. The payment will be identified on the voucher as "beneficial suggestion per attached letter of award."

The original letter of award and the original SF 1034 will be filed with the financial returns. Copies of the letter of award and SF 1034 will be filed in the DO's retained files or sent to the financial information processing center as appropriate. The voucher will show the amount of the award, the amount deducted for Federal income tax withholdings, and the amount due the payee.

Payment may be made by cash or check. DO's will make payment of the withheld tax in the same manner as other withheld taxes. Checks will be drawn in favor of the Federal Reserve Bank (FRB) or branch and will be deposited with other checks due the Internal Revenue Service (IRS). DOs afloat that do not have an employer identification number (EIN) will forward Copy A of the IRS Form W-2, Wage and Tax Statement, together with the check drawn to the FRB of Cleveland and a copy of the SF 1034, to the DFAS-Cleveland Center. An IRS Form W-2 will be prepared for each incentive award payment. The payee's copies will be delivered to the payee with the payment and advice that he or she retain the IRS Form W-2 for filing annual income tax returns. The IRS copy of the IRS Form W-2 will be attached to a copy of the SF 1034 submitted with the financial returns. Additional copies of the IRS Form W-2 will be distributed as indicated on the W-2 Form.

d. Prohibited Payments. The following types of payments cannot be made by tactical DOs:

(1) Payments to vendors located in the United States will be made by the appropriate DFAS OPLOC.

(2) Payment for deliveries to ships will be made by the DFAS OPLOC serving the area in which the billing office is located.

(3) Vouchers for disbursement and/or collection using SF 1034 or DD Form 1131 involving pay and allowances will be paid by the DFAS-Cleveland Center.

(4) The deputy DO of the DFAS OPLOC, Norfolk, VA is designated to pay all claims of Navy Personnel for reimbursement of costs of shipment of household goods under permanent change-of-station orders, shipments authorized under temporary additional duty orders, and local movement of household goods in connection with assignment to or vacating government quarters when directed by competent authority due to the quarters becoming uninhabitable.

(5) Claims of military members for personal property loss or damage will be paid by the financial information processing center of the disbursing officer or of other shore activities providing disbursing service for claims adjudicating authorities.

e. Ships Without a Disbursing Officer in Foreign Countries. If a ship is operating without a disbursing officer, arrangements will be made for payment by the nearest

DoD or U.S. disbursing officer. If such arrangements cannot be made, the dealer's bill will be forwarded to the financial information processing center most convenient to the ship or shore activity except that all such Canadian dealer's bills will be forwarded for payment to the DFAS OPLOC Charleston, SC.

7. Payment and Payment Restrictions

a. Items to be Verified. The paying officer is responsible for verifying the legality and propriety of the payment to be made and is required to establish that:

- (1) payment is made only by the designated paying office and the payment has not been made previously;
- (2) purchase was made in accordance with pertinent laws, regulations, and directives;
- (3) materials or services were received and accepted or performance was completed;
- (4) the extensions, and totals are correct;
- (5) the required supporting documents are present; and
- (6) the accounting data are complete and correct.

b. Method of Payment

(1) Within the United States and its Possessions. Within the United States and its possessions, vouchers covering dealers' bills will be paid by electronic funds transfer (EFT) or U.S. Treasury check. Other types of vouchers likewise will be paid by EFT or U.S. Treasury check. Note: All payments must be by EFT no later than January 1, 1999. All remittances by mail will be by check. Any number of vouchers to the same payee may be paid by a single EFT transmission or U.S. Treasury check.

(2) Canadian Dealers' Bills

(a) Ships. In the event a Canadian dealer's invoice cannot be obtained and paid prior to departure and payment arrangements as prescribed in the paragraph 4336 of reference (b) have not been made, action will be taken as prescribed in items D10307.B.2.a.(1) or D10307.B.2.a.(2) below, when the invoice is received:

1 if the invoice is expressed in U.S. dollars, forward the invoice and supporting documents to DFAS OPLOC, Norfolk, VA, or San Diego, CA, as appropriate, for payment; or

2 if the invoice is expressed in Canadian dollars, forward the invoice and supporting documents to DFAS OPLOC, Charleston, SC, for payment.

(3) Outside the United States

(a) Foreign Currency Controls. Payments to vendors in a foreign country will be made in a currency authorized by local foreign currency control laws or regulations. Department of State officials located in the area will be contacted for guidance and information on currency controls in effect. If there is no Department of State official in the area, the DO must ascertain and comply fully with local foreign currency controls.

(b) Currency Used. Payment to a vendor in a foreign country will be made by U.S. Treasury check or U.S. currency when:

1 payment in U.S. currency is required by the purchase documents; or

2 the foreign currency billed is not available to the disbursing officer serving the activity billed or to another overseas military DO, unless the foreign currency is listed as excess or near-excess in Chapter 12 of this volume.

When the bill is stated in foreign currency and payment is made in U.S. currency or by U.S. Treasury check, the rate of exchange current at the time of payment will be used. If the foreign currency billed is listed in excess or near-excess and such currency is not available to the disbursing officer serving the shore activity billed, the bill will be forwarded for payment to a U.S. military disbursing officer having access to the currency involved, or if none, to the DFAS OPLOC, Charleston, SC.

c. Entries Made by the Paying Officer

(1) Payment Data. The paying officer must enter the following data in the upper right payment block on the face of the public voucher:

(a) the word "Paid" (not required on vouchers bearing the pre-printed word "Paid" in the space provided for payment data);

(b) unit identification code (UIC) and the name of ship to which the disbursing officer is assigned;

(c) business day (date); and

(d) disbursing station symbol number (DSSN) of the disbursing office.

The required data must be legible on all copies of the voucher.

(2) Lower Payment Data Lines

(a) Cash Payments. If either partial or full payment is made in cash, the amount and date of payment, and the name of the payee must be shown on the designated line on the original and all copies of the public voucher. At the time of actual payment, the signature of the payee will be obtained on the original of the public voucher unless his or her signature, acknowledging receipt of the payment, already appears on a sundry voucher supporting the public voucher, for example, when the SF 1164 is used as a sundry voucher.

(b) Check Payments. If full payment is made by a single check drawn to the order of the payee shown in the heading of the public voucher, it is sufficient to insert the serial number of the check on the original public voucher only. The date and amount need not be shown. The serial number of the check may be inserted on the public voucher by typewriter, autographically, or by numbering machine.

D. AFLOAT FOREIGN CURRENCY TRANSACTIONS

1. Procurement. Afloat disbursing officers will comply with the following procedures in connection with obtaining foreign currency for visits to foreign ports.

a. Purchase from Government Sources

(1) Disbursing officers of ships arriving in an operational area may request, via official communication channels, excess foreign currency from the disbursing officers of ships leaving the area.

(2) Disbursing officers, in units within the same operational area should advise other fleet units of their requirement, in case an excess of foreign currency exists.

(3) Ships within the group also may be assigned as the foreign currency coordinator.

(4) Department of Defense DOs of shore commands, within the operational area, also may be able to provide the type of currency required.

(5) American Embassies or Legations also may be able to provide needed foreign currency.

b. Purchase from DoD Contract Military Banking Facility (MBF) and Commercial Sources. Currency can be obtained from MBFs. Commercial foreign banking facilities may be used when MBFs and other government sources are not available. See Chapter 13 of this volume.

2. Disposition. Afloat DOs will comply with the following procedures in connection with disposition of foreign currency, prior to leaving the foreign port or operational area.

a. Sale to Authorized Personnel

(1) Navy DOs assigned to afloat units are authorized to provide accommodation exchange sales to assigned personnel without prior approval.

(2) Sales of the currency will not be made at a rate that results in a loss by exchange. Sales will be made at rates as near as possible to that at which the currency is carried without causing a loss or requiring the holding of currency in units of insignificant value.

(3) Gains or losses resulting from sales or revaluation will be vouchered as gains or losses by revaluation. See figures D-6 through D-9.

(4) A daily DD Form 2664 (Currency Exchange Record) will be maintained for each sale.

(5) Repurchase of foreign currency is authorized provided:

(a) the disbursing officer will be able to dispose of the currency prior to departing the operational area;

(b) the disbursing officer maintains a DD Form 2664 to reflect the amount and source of funds;

(c) the repurchase from the authorized individual is not for an amount greater than the last purchase; and

(d) the authorized individual or unit is departing the area.

b. Priority for Disposal of Foreign Currency. DOs should attempt to dispose of the foreign currency in the following order:

(1) sales to other DoD DOs (i.e., ships arriving in the operational area, afloat foreign currency coordinator or DoD shore activities);

(2) sales to DoD-contracted MBF;

(3) sales to commercial sources (i.e., foreign banks); or

(4) deposits to the Federal Reserve Bank of New York by shipment, if all other methods are determined to be impractical, to avoid loss through the exchange rates.

3. Miscellaneous Procedures Affecting Foreign Currency

a. Protection of Foreign Currency in Transit in Foreign Countries. Provide the same security as for U.S. currency. However, consideration of host country laws pertaining to carrying weapons must be taken into account. Contact the American Embassy or Legation for local guidance.

b. Foreign Coin. Although acquiring foreign coin is discouraged, afloat DOs may find that some coin is required when paying local vendors in foreign currency. However, crew members must be advised that the DO will be unable to repurchase foreign coins in their possession

c. DD Form 2663 (Foreign Currency Control Record). This form is required to be maintained for each foreign currency used.

d. DD Form 2664 (Currency Exchange Record). This form is required when accommodation exchanges are made to crew members. In addition, afloat DOs must ensure that any authorized individual requesting repurchase is not converting an amount greater than he or she last purchased as recorded on the DD Form 2664.

e. Quarterly Foreign Currency Reports. A series of quarterly reports are required at the end of each quarter (see sample report in figure D-10). A negative report is not required.

E. MISCELLANEOUS DISBURSING OFFICER ACCOUNTABILITY PROCEDURES

1. Purpose. This section highlights the unique procedures in maintaining accountability relative to afloat disbursing officers.

a. Appointment and Acceptance of a Deputy Position. Deputy DOs are appointed by the DO with a formal letter of appointment addressed to the individual. The letter shall state the specific duties authorized to be performed by the deputy. The letter must be signed by both the DO and by the deputy who acknowledges that "I agree to hold myself accountable to the United States for all public funds received." See Chapter 2 of this volume.

b. Common Daily Transactions. Figures D-11 through D-14 are provided to illustrate entries on the DD Form 2657 (Daily Statement of Accountability). These are the most common transactions to afloat DOs connection with check cashing and ship's store collections.

c. Safeguarding Funds and Related Documents. When DO, deputies, agents and cashiers aboard tactical units and Navy vessels have custody of government funds, each shall be provided with a separate secure container which is assigned exclusively for his or her use. The combination of the safe or container shall be known only to the DO, deputy, agent or cashier and shall not be divulged orally or in writing to any other individual. See Chapter 3 of this volume.

d. Detailed Analysis of Cash and Other Assets

(1) General. In order to provide the supporting DFAS OPLOC with an accurate picture of the status of the DO's assets, all tactical units and Navy vessels will prepare a Detailed Analysis of Cash and Other Assets in support of Section I, Parts B and C of the SF 1219 (Statement of Accountability). This information will enable the individual assigned to examine the financial returns and the disbursing settlement clerk in determining if cash holdings are within authorized limits, whether deposits are being made on a timely basis, and whether aggressive action is being taken to clear non-cash items.

(2) Heading. The page will be headed by the name of the ship or shore activity to which the disbursing officer is assigned, followed by the title "Detailed Analysis of Cash and Other Assets." Following the title will be the name of the DO, DSSN, and the month and year of the corresponding SF 1219. If the period covered by the financial returns is other than a full month, the beginning and ending dates will be cited.

(3) Cash Authorized to be Held at Personal Risk. State the total amount of cash authorized to be held by the DO at personal risk, the title of the approving authority, and the date of the approval letter. This amount includes cash held by deputies, agents, and cashiers in the main disbursing office. Therefore, a breakdown of authorized levels by main office deputies and agents is not necessary.

(4) Analysis of Incumbent Officer's Accountability. Each group of cash and other asset items will be identified by the applicable line number in Section I, Part B of the SF 1219. If the amount on any particular line is zero, the line number may be omitted.

(a) Line 6.1. List the total U.S. dollar equivalent of cash on deposit in designated depositaries. No further breakdown is required.

(b) Line 6.2. List the total amount of cash held as defined for line 6.2 of the SF 1219. If holdings are entirely in U.S. currency, no further breakdown is required. If foreign currency is included, state the name and country of origin of each currency, the U.S. dollar equivalent for each currency, and the total U.S. dollar equivalent for all currency held. The sum of lines 6.1 and 6.2 should not exceed amounts authorized to be held at personal risk. If multiple currencies are held and there is insufficient space to enter all required data on the Standard Form 1219 a subsidiary schedule should be prepared.

(c) Line 6.3. List the total dollar amount of undeposited collections and the total number of instruments on hand for each of the following categories: U.S. Treasury checks, personal checks, and all other negotiable instruments. For each of the latter two categories, state the date of the oldest instrument on hand.

(d) Line 6.4. Leave blank.

(e) Line 6.5. Cash held by accountable persons outside the main office will be broken down into three major categories and described as follows:

1 Deputies, Agents and Cashiers at Branch Offices.

List each accountable position number, the amount authorized to be held at personal risk, the title of the authorizing official, the date of the authorization, and the amount actually held as included on the SF 1219. The last figure should also be totaled. If the advance is in foreign currency, the name and country of origin and the U.S. dollar equivalent should be listed.

2 Deputies, Agents and Cashiers under Other

Commands. Provide the same information as required above for deputies, agents and cashiers at branch offices.

3 Imprest Fund Cashiers, Agents and Others. List the

title of the individual holding the advance and the date of the DD Form 1081 (Statement of Agent Officer's Account). Also provide a total of all advances in this category as well as a grand total of all cash held by government cashiers. For advances made in foreign currency also list the name of the currency, the country of origin, and the U.S. dollar equivalent.

(f) Line 6.6. Leave blank.

(g) Line 6.7. List each individual item included on the SF 1219 as funds in transit. For an exchange-for-cash check, list the check number, the amount, date of mailing, and the organization to which the check was mailed. For all counterfeit or altered currency, list the denomination and the date the request for removal of the deficiency was forwarded.

(h) Line 6.8. List the total amount of funds held for regular payrolls by the DO and deputies, agents and cashiers located in the main disbursing office. A breakdown by individual accountable officer or agent is not necessary. Identify any foreign currency by name of the currency, country of origin, and U.S. dollar equivalent. Also state the most distant payday for which the funds are being held. Shore based disbursing offices should specify whether the funds are being held for military or civilian payroll, and if both, separate amounts for each type of payroll should be listed.

(i) Line 6.9. Identify each other cash item, including a brief description of action being taken to effect clearance of the item.

(j) Line 7.1. List each deferred charge by type (e.g., travel advances, civilian payroll, military payroll) and by amount. If an entire payroll is deferred, list the payroll number rather than the individual payees.

(k) Line 7.2. List each check issue overdraft receivable by check number, date of check, payee, and amount. Briefly describe action being taken to effect clearance.

(l) Line 7.3. List each loss of funds by name and position of the accountable officer or agent and the amount. In addition, for cash deposits which have been determined to be lost in transit, include the deposit number and date presented or mailed. For all items listed, include the date the loss was reported and a brief description of action being taken to clear the deficit.

(m) Line 7.4. List each dishonored check by debtor's name, date and number of the applicable debit voucher, and amount. Also, list each deposit which was composed of only checks and money orders and determined to be lost in transit by deposit ticket number, date presented or mailed, and amount. Include a brief description of action being taken to clear the deficit for each item listed.

(n) Line 7.5. Since a breakdown of advance payments is provided by a separate report, no further breakdown is required.

(o) Line 7.9. Identify any other non-cash item, including a brief description of the action being taken to effect clearance of the item.

(5) Analysis of Predecessor Officer's Accountability. DOs at shore-based activities performing settlement duties on the accounts of previous DOs of that activity will report items included in Section I, Part C of the SF 1219. If no entries are made in Section I, Part C, this portion of the analysis may be omitted.

(a) Line 9.2. List each check issue overdraft receivable by name of accountable DO, check number, date of check, payee, and amount. Briefly describe action being taken to clear the deficit.

(b) Line 9.3. List each loss of funds by name of accountable DO, name and position of accountable agent if applicable, amount of loss, and date the loss was reported. If the loss was a cash deposit determined to be lost in transit, include the deposit number and date presented or mailed to the depository. Also, include a brief description of action being taken to clear the deficit.

(c) Line 9.4. List each dishonored check item by name, date and number of the applicable debit voucher, and amount. If the deficiency includes a deposit composed of only checks and money orders determined to be lost in transit, list the name of the accountable DO, deposit number, date presented or mailed to the depository, and the amount. Include a brief description of action being taken to clear the deficit for each item listed. See figure D-15.

e. Appointing the Cash Verification Team. The appointment shall be made in writing and include at least two qualified personnel. For tactical units and Navy vessels, the senior member on the cash verification team should be the supply officer or a senior member of the Supply Department. See Chapter 3 of this volume.

f. Records of Balancing and Cash Verification. Appendix A of this volume requires each custodian of public funds to prepare a DD Form 2665 (Daily Agent Accountability Summary) and each DO to prepare a DD Form 2657 (Daily Statement of Accountability) for the close of business of that day and turn it over to the cash verification team. After proving all the entries for cash and other assets by the preceding verifications, the cash verification team will stamp the DD Form 2657 with the statement shown in Appendix A of this volume. In addition, the following statement will be inserted on each DD Form 2665:

"On (date) at (time) the undersigned verified by actual count cash in the amount of \$_____, and vouchers held as cash in the amount of \$_____, total \$_____, which is (or is not) in agreement with the DD Form 1081 held by the disbursing officer."

A copy of the DD Forms 2665 and DD Form 2657 will held as part of the retained disbursing records.

F. SUSPENSE ACCOUNTS

1. General. Reports of the status of suspense accounts will be made by disbursing officers prior to the 15th calendar day of the month following the end of each quarter. Separate reports will be made for Budget Clearing Account, 17F3875, and Suspense, Navy, 17X6875.1220. Each report will show the DSSN and the following:

- a. The balance in the suspense account at beginning of the quarter.
- b. The net amount of collections and transfers during the quarter with subtotals for each month of the quarter.
- c. The total disbursements during the quarter with subtotals for each month of the quarter.
- d. The balance in the suspense account at end of the quarter.

The ending balance will be checked to ensure agreement with the balance of the control ledger and with the total of the appropriate documents or records. Any discrepancies will be investigated and corrected prior to submission of the report, if practicable. If the correction requires a current transaction or if the investigation is not completed, the report will be so annotated. The report will be certified as follows:

"I certify that the balance reported herein is in agreement with records maintained."

When necessary, and in the event local efforts have been unsuccessful, DOs will request assistance from their respective support offices or commands on uncleared items remaining in a suspense account in excess of three months. Deposits on contracts may remain in a suspense account until completion of the contract.

2. Budget Clearing Account, 17F3875, and Suspense, Navy, 17X6875.1220. All Navy DOs will forward separate quarterly reports for suspense accounts 17F3875 and 17X6875.1220 to the supporting DFAS OPLOC. The balance reported by each disbursing office for each account will be recorded by the OPLOC in a column to the right of the applicable balance on each of the summary reports prepared in accordance with current machine procedures. The amount of any difference between the two balances will be entered in an additional column to the right. A credit (CR) difference will indicate that the DO's balance is less than the summarized balance. A notation will be made on the summary report that differences will be investigated and clearance action initiated. The DFAS OPLOC will submit the original summary reports to the DFAS-Cleveland Center on or before the 15th calendar day of the second month following the end of the quarter. Quarterly reports received from DOs will be retained together with a copy of the summary reports and copies of correspondence initiated to eliminate differences between the OPLOC records and DO reports.

G. NAVY POSTAL FUNDS

1. The Navy Postal Service. Regulations and instructions concerning operation of the Navy Postal Service, including procedures for custody and handling of postage stamp stock and funds, the conduct of postal money order service, and the audit and inspection of Navy and Marine Corps post offices are set forth in the current DoD 4525.6-M, Volume I (reference (bh)) and Chief of Naval Operations Instruction (OPNAVINST) 5112.6 (reference (bi)). In accordance with these references, money order auditing and custodial officers and postal effects custodial officers will be designated in writing by commanding officers afloat. These duties may be assigned to the DO or his/her deputy unless personnel are attached who hold the postal rating (PC) and pay grade E-7 or above. The procedures in this section are provided to clarify the provisions of references (bh) and (bi), which take precedence over this information. It is recommended that disbursing officers are provided a copy of chapters 5 and 7 of reference (bh) for guidance in the performance of these duties.

2. Money Order Service

a. Custody and Control. The money order custodial officer will maintain custody of blank money order stock and comply with the instructions in references (bh) and (bi) regarding custody, control and distribution of money order forms. Blank money order forms will be stored in a three-number combination safe or equivalent secure storage to which the custodial officer has exclusive access. A DD Form 885 (Money Order Control Record) will be maintained for all blank money order forms that are:

- (1) received from the accountable postmaster or other source.
- (2) issued to the money order clerk,
- (3) unused by the money order clerk, and
- (4) remaining as a balance on hand.

Sufficient blank money order forms will be issued to the money order clerk each day for the anticipated business requirements of that day. Unused blank money order forms will be returned to the custodial officer by the money order clerk at the close of business each day along with the daily report of money order business. Due to extenuating circumstances, the commanding officer may authorize the money order clerk to hold blank money orders overnight provided a secure storage area is available. The exchange of blank money order forms between custodial officers and money order clerks will be recorded and signed for in the DD Form 885. The custodial officer and money order clerk(s) will maintain separate DD Forms 885 for control and accountability purposes. See figure D-16.

3. Money Order Funds. At the end of each day, money order clerks are required to turn over to the disbursing officer all funds derived from the sale of money orders that day. The funds will be counted by the disbursing officer in the presence of the money order clerk. If the amount of the funds is \$100 or more, the disbursing officer will issue an exchange-for-cash remittance check payable to the Disbursing Officer, U.S. Postal Service, for transmission with the daily report of money order business. If the amount of money order funds is less than \$100, the funds may be accepted by the DO as a safekeeping deposit until accumulation of \$100 or more and then converted to an exchange-for-cash check. However, if it is more convenient, the exchange-for-cash check may be issued for remittance to the Disbursing Officer, U.S. Postal Service even though the amount of money order funds is less than \$100.

4. Audit of Money Order Accounts. An audit and verification of money order business is required to be conducted at the close of money order business each day. The audit will be conducted by a commissioned or warrant officer or a senior petty officer (E-7 and above) designated by the commanding officer as the responsible auditing officer.

5. Postal Stamp Stock and Funds

a. Duties. The requirements and procedures in references (bh) and (bi) will be followed in the custody and handling of postage stamps and funds. The designated postal effects custodial officer will maintain custody of that portion of the postage stamps and funds that are in excess of the amount authorized to be in the custody of the custodian of postal effects (COPE). The stamps and funds will be received and handled as a safekeeping deposit from the COPE, except that the safekeeping deposit will be identified as "postage stamp fund" rather than in the name of the COPE. Stamps will be issued to the COPE in exchange for funds derived from the sale of stamps. The custodial officer will maintain a duplicate of the PS Form 3295 (Daily Record of Stamps, Stamped Paper and Nonpostal Stamps on Hand). See figure D-17.

b. Stamp Replenishment. When replenishment of stamps is required, postage stamp funds will be converted to an exchange-for-cash remittance check payable to the accountable postmaster. Requisitions are prepared and submitted on a PS Form 17 (Stamp Requisition) which is prepared in quadruplicate. The original and a duplicate copy, together with the remittance check are forwarded by mail in accordance with Rule 3, Table 5-1 of reference (bh) and an additional copy is forwarded in accordance with Table 5-1, Note 1. A signed copy of the PS

Form 17 is retained by the postal effects custodial officer with the postage stamp fund safekeeping deposit. Upon receipt and verification of the stamps requisitioned, the accompanying duplicate copy of PS Form 17 is returned to the COPE for the post office files and the copy retained by the postal effects custodial officer should be destroyed. The postage stamp funds must not be commingled with any other safekeeping deposit or other funds, including money order funds. New safekeeping receipts are required to be issued only when there is a change in the amount of the fund or a change in either the accountable postal clerk or custodian.

6. Audit of Money Order Business

a. Frequency. At the close of money order business each day, the money order clerk is responsible for preparing the PS Form 6019 (Military Post Office (MPO) Report of Money Order Business) and submitting it to the designated officer for audit and verification. See figure D-18. The commanding officer immediately will be notified if a satisfactory accounting for money order funds and forms is not made by the money order clerk at the close of business each day.

b. Audit Procedures. Designated money order auditing officers will ensure their audits are in compliance with the requirements and procedures regarding money order service set forth in the current editions of references (bh) and (bi). Follow the steps below to conduct the daily audit of money order business:

(1) Check the date and heading on the PS Form 6019 for accuracy of preparation.

(2) Verify that the serial number of the first money order used is the next succeeding serial number after the last money order used the preceding business day.

(3) Verify that the first serial number of the unused money order forms is the next succeeding serial number after the last one used that day.

(4) Ensure that all unused money order forms are accounted for and that they are returned to the custodial officer.

(5) Examine by numerical sequence the money order post office vouchers to ensure that all used and spoiled money orders are accounted for.

(6) Verify the "No. Used" and "No. Spoiled" entries in Section I, "Money Orders Issued".

(7) Prepare an independent adding machine tape from the money order post office vouchers to prove the grand total money order amount and fee entered in Section I.

(8) Check the adding machine tape of money orders issued and fees prepared by the money order clerk for submission with the original report to ensure that it has been prepared correctly and signed by the money order clerk.

(9) Examine the paid money orders to verify correctness of serial numbers and amounts shown in Section II, "Paid Money Orders." Prepare an independent adding machine tape from the paid money orders to prove the total shown in Section II, "Total Paid Money Orders".

(10) Examine the reverse side of the paid money orders to confirm that each paid money order has been signed by the proper payee, purchaser, or endorsee and that the money order clerk has entered the date stamp and his or her initials below the endorsement.

(11) Verify the entries in Section II, "Checks" to ensure that U.S. Treasury checks (including the exchange-for-cash remittance check) are properly identified by serial number, symbol number, and amount. Prepare an independent adding machine tape from the checks to prove the total shown in Section II, "Total Checks".

(12) Verify that the totals in Section I and II are properly carried forward to the appropriate items of Section III, "Cash Summary".

(13) Verify Section III, Item 1, "Balance From Item 13 of Previous Report" with the auditing officer's retained copy of the previous report.

(14) Check entries in Section III, Items 6 and 12, "Debit Corrections" and "Credit Corrections" with the PS Form 1908, Financial Adjustment Memorandum.

(15) If an entry is shown in Section III, Item 13, "Balance Carried to Items of Next Report", confirm that the cash was verified by actual count and accepted by the disbursing officer as a safekeeping deposit of the amount shown.

(16) If an excess or a shortage of money order funds exists, verify that it is properly handled in accordance with references (bh) and (bi).

(17) Verify that when excess funds have been remitted, the remittance is reported by entry in Section III, Item 4, opposite the typed-in caption "Overage" or "Excess Funds".

(18) Prepare an independent adding machine tape to prove the "Total Debit" and the "Total Credit" (Items 7 and 14 of Section III), and compare them for agreement.

(19) Prepare one independent adding machine tape showing each section of the report. Verify the accuracy of the tape, then sign the tape and attach it to the auditing officer's retained copy of the report.

(20) When two or more money order clerks issue money orders on the day being reported, verify that the name of clerks who do not prepare the report are listed in the remarks section.

(21) Ensure that the original and all copies of the report have been signed by the money order clerk and stamped with the post office dating stamp.

(22) After completion of the audit and determination that the report is correct, sign the original and all copies of the PS Form 6019.

c. Disposition of PS Form 6019. The original PS Form 6019, accompanied by the paid money orders, remittance checks, spoiled money orders, post office vouchers for money orders issued with the money order clerk's adding machine tape, and additional supporting documents, when required, will be returned to the money order clerk to be forwarded, via registered mail, to the Money Order Division, Postal Data Center, St. Louis, MO. One signed copy of PS Form 6019 will be retained by the money order clerk and one signed copy will be retained by the auditing officer with the signed adding machine tape prepared by the auditing officer. The auditing officer's file will be maintained in chronological order with each calendar day, including Saturdays, Sundays, and holidays, accounted for. Money order records will be retained in accordance with references (bh) and (bi).

d. No Business Reports. A PS Form 6019 "NO BUSINESS" report will be combined with a business report, when appropriate, covering preceding days on which no business was conducted. An entry shall be made in the block "No Business was Conducted" to account for the entire period that no money order business was conducted.

H. AUTOMATED TELLER MACHINE (ATM) AT SEA PROCEDURES

1. Purpose. The ATM at Sea pay delivery system is described in detail in Chapter 26 of this volume. The purpose of this section is to illustrate some of the procedures for maintaining accountability of funds in the ATM system.

a. ATM Appointment Letters. Various types of appointment letters are listed in section D110 of this guide.

b. Custody of Blank Unissued ATM Cards. See figure D-19.

c. Automated Teller Machine. In addition to the ATM procedures prescribed in Chapter 26 of this volume, tactical units and Navy vessels will accomplish the following:

(1) Maintain a separate DD Form 2671 for any negative adjustments made to a member's ATM account.

(2) For a negative adjustment to close a transferred member's account and refund the balance to the member, enter the check number in the column "WITHDRAWAL - CASH" of the DD Form 2671

(3) Attach a copy of the end-of-session Grand Total Terminal Balance report and a copy of all DD Forms 2671 to the retained copy of the voucher prepared for the ATM transaction.

I. LETTERS OF AUTHORITY, NOTICES AND INSTRUCTIONS

1. General. The following sample letters of authority, notices and instructions are available on the DFAS-CL bulletin board.

a. Letters of Authority, Notices and Instructions

- (1) Appointment of deputy disbursing officer.
- (2) Advancement of cash for change.
- (3) Authority for the procurement of foreign currency, cashing of checks and money orders, custodian of postal stamp stock and funds, and designation as money order auditing and custodial officer.
- (4) Appointment of agent/ cashier and receipt.
- (5) Appointment of paying agent.
- (6) Authority to sign documents affecting pay and allowances (for agent/cashier).
- (7) Authority to sign documents affecting pay and allowances.
- (8) Authority to hold cash at personal risk (disbursing officer).
- (9) Authority to hold cash at personal risk (deputy disbursing officer), first endorsement, and approval.
- (10) Authority to hold cash at personal risk (agent/cashier), first endorsement, and approval.
- (11) Deposits and withdrawals of safekeeping deposits.
- (12) Authorization to approve special pay requests.
- (13) Disbursing office operating procedures.

- (14) Relief of disbursing officer.
- (15) Appointment as senior member of the cash verification board.
- (16) Quarterly verification of official funds in the custody of the disbursing officer.
- (17) Appointment as member of the cash verification board.
- (18) Letter of introduction.
- (19) Disbursing office security.
- (20) Notice of commencement of disbursing duty.
- (21) Appointment as agent/cashier (assistant custodian) for ATMs.
- (22) Appointment as customer service clerk for ATMs.
- (23) Appointment as custodian of blank ATM cards.
- (24) Transfer of NAVCOMPT Form 8/8a, Record and Receipt of Deposits and Withdrawals of Safekeeping Funds.
- (25) Transfer of blank U.S. Treasury checks.
- (26) Transfer of blank U.S. Postal Money Orders.
- (27) Internal procedures and controls for disbursing operations.

J. ASSEMBLY AND TRANSMITTAL OF FINANCIAL RECORDS

1. Detachment with Relief. Retained disbursing records will be packaged in accordance with Chapter 21 of this volume and forwarded to the following DFAS-CL OPLOC:

- a. Disbursing officers under the Commander in Chief, U.S. Atlantic Fleet:

DFAS Operating Location Norfolk
Code IEBBA
9712 Virginia Avenue
Norfolk, VA 23511-3297

- b. Disbursing officers under the Commander in Chief, U.S. Pacific Fleet:

DFAS Operating Location San Diego
Code SDBRR
937 North Harbor Drive
San Diego, CA 92132-5111

2. Detachment Without Relief. When an afloat disbursing officer is detached without relief, or when a vessel or unit is decommissioned, the disbursing officer should contact the appropriate DFAS OPLOC for guidance.

3. Assembly and Transmittal. Records will not be shipped without a SF 135, Records Transmittal and Receipt, National Stock Number (NSN) 7540-00-634-4093, and appropriate cartons (NSN 8115-00-117-8249 or 811-00-290-3379). See figure D-21.

4. Disbursing Office Files and Miscellaneous Information

a. Daily. Files will contain the following and will be held in the disbursing officer's safe:

Original: DD Form 2657 (Daily Statement of Accountability)
DD Form 2665 (Daily Agent Accountability Summary)
DD Form 1081 (Statement of Agent Officer's Account)

Original: Attachments (with supporting documents)
Public Vouchers
Collection Vouchers
Other

Documents will be maintained in date of payment order.

b. Monthly. Retained files will contain the following documents:

Original DD Form 2657 (Daily Statement of Accountability)
DD Form 2665 (Daily Agent Accountability Summary)
DD Form 1081 (Statement of Agent Officer's Account)

Copies: Attachments (with supporting documents)
Public Vouchers
Collection Vouchers
Other

Documents will be maintained in a separate folder by month in date of payment order.

c. Vouchering. Disbursing officers will annotate the payment voucher or collection voucher number on the face of each DD Form 2657.

d. Special Distribution of Vouchers. One copy of each paid voucher (with supporting travel orders, endorsements and worksheets) which contain the appropriations and subheads shown in table D-1 will be forwarded to:

Bureau of Naval Personnel
Permanent Change of Station
Variance Component
1240 East 9th Street
Cleveland, Ohio 44199-2088.

DEPARTMENT OF DEFENSE

FINANCIAL MANAGEMENT REGULATION

VOLUME 6

REPORTING POLICY AND PROCEDURES

FEBRUARY 1996

WITH CHANGES THROUGH JANUARY 1998

**UNDER SECRETARY OF DEFENSE
(COMPTROLLER)**

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the DoD. It directs financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume of the Regulation through its normal publication channels. Other Federal agencies and the public may obtain copies of this volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone (703) 487-4650.

Alice C. Maroni
Principal Deputy Under Secretary
of Defense (Comptroller)

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller), (USD(C)). The Regulation consists of the following 15 volumes:

- | | |
|---|--|
| <ol style="list-style-type: none"> 1. General Financial Management Information, Systems, and Requirements 2. Budget Formulation and Presentation 3. Budget Execution - Availability and use of Budgetary Resources 4. Accounting Policy and Procedures 5. Disbursing Policy and Procedures 6. Reporting Policy and Procedures | <ol style="list-style-type: none"> 7. Military Pay Policy and Procedures 8. Civilian Pay Policy and Procedures 9. Travel Policy and Procedures 10. Contract Payment Policy and Procedures 11. Reimbursable Operations, Policy and Procedures 12. Special Accounts, Funds and Programs 13. Nonappropriated Funds Policy and Procedures 14. Administrative Control of Funds and Antideficiency Act Violations 15. Security Assistance Policy and Procedures |
|---|--|

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense

Instruction 7000.14 "DoD Financial Management Policy and Procedures," dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The 6 digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A. 1. a. (1) (a)
SUBPARAGRAPHS

PUBLICATIONS SUPERSEDED

This Volume of the Regulation
(Volume 6) will supersede the following:

DoD 7220.9-M "DoD Finance and Accounting
Manual" (Chapters: 76, 91, 92, 93, 94, 95, 97, 98,
and 99).

DoD Instruction 2140.4, "Collecting and
Reporting of Foreign Indebtedness Within the
Department of Defense"

DoD Instruction 7200.9, "Financing and
Reporting Costs of Military Resources Used in
Civil Disturbances"

CHAPTER 1

GENERAL REPORTING0101 GENERAL010101 Purpose

A. This chapter provides guidance to DoD Components on the reports that must be produced for submission to the Defense Finance and Accounting Service, Office of the Secretary of Defense (OSD), Office of Management and Budget (OMB) and the Department of the Treasury. The reports are end products of the accounting process and must be accurate, timely, and provide full disclosure to users.

B. Accounting report requirements are incorporated into the concept and detail designs of DoD accounting systems. Therefore, they are exempt from Report Control Symbol (RCS) assignment in accordance with paragraph E.4.f. of 7750.5-M, "DoD Procedures for Management of Information Requirements." Over the years, some reports have become identified throughout the Department of Defense by their RCS assignments. In order to provide continuity in accounting report identification, certain report designations shall be assigned by the Defense Finance and Accounting Service (DFAS). For example, the Report on Appropriation Status by Fiscal Year Program and Subaccounts, which was assigned RCS: DD-Comp(M)1002, has been known for many years as the "1002 Report." It now shall be redesignated as the "Acct Rpt (M) 1002" to maintain its well-recognized identification.

010102 Overview

A. The provisions of this chapter and other chapters in this Volume, covering detailed reporting requirements, apply to all DoD Components and, when applicable, to DoD disbursing officers.

B. The following chapters of this Volume provide detailed guidance on the report forms required, authorized formats, or exceptions. In some instances, reproducible

facsimile copies are provided for use by DoD Components. Specific guidance is also provided regarding whether hard copy or electronic submissions are required or authorized.

0102 STANDARDS

010201 Financial reports shall be prepared and issued to the Department of the Treasury or other designated recipient at the end of each fiscal year or other period as specified in the appropriate report chapters in this regulation. These reports shall be the culmination of a systematic, disciplined financial information process. The amounts contained in the reports, shall be obtained only from the general ledger accounts prescribed in this regulation or subsidiary records supporting such general ledger.

010202 Financial reports shall result from an accounting and budgeting system that is an integral part of its total financial management system and one that contains sufficient discipline, internal controls and reliable data. In addition, interfaces with both logistic and acquisition systems should be provided.

010203 The financial reports and underlying financial system shall report on the total operations of the reporting entity and shall comply with the policies and procedures and related requirements as implemented in this regulation.

010204 Should circumstances warrant additional disclosures not specifically provided for in a report, DoD Components are responsible for assuring that all appropriate disclosures considered necessary for fair presentation of their financial position are included in the report.

010205 General purpose reports have been coded, line by line, to identify the specific general ledger accounts from which the financial data are to be obtained to complete the statement.

010206 When DoD Components discover errors or identify changes required to be made to information previously reported, an amended report shall be prepared that clearly identifies the material corrected. The statement shall be clearly identified as an "Amended Report."

010207 When required by the Office of the Secretary of Defense, the presentation of financial information from the preceding year shall be included in annual financial statements.

A. The annual financial statements shall include consolidated comparative financial data from the immediate prior year if the DoD Component was in operation during the prior year. Data shall be reported in a format consistent with the current years.

B. Reclassification of significant prior year amounts to achieve comparability shall be explained in the footnotes.

C. Footnotes and other explanations from prior-year statements necessary to disclose information regarding the prior-year data properly shall be included in the current-year statements.

D. Comparative financial statements need not be included in the first year that financial statements are prepared. Thereafter, comparative financial statements shall be included.

010208 Under certain circumstances financial events are recognized as adjustments to prior period financial statements.

A. Expenses, losses, gains, transfers out, and financing sources (e.g., appropriations and revenues), related to the correction of an error in the financial statements of a prior period, and changes in DoD Components shall be reported as adjustments to previously reported results, when material. All other expenses, financing sources, gains, losses, and transfers recognized in an accounting period shall be reported in the operations of that period.

B. Errors in prior-period financial statements include the following:

1. Mathematical errors in statement preparation or information supporting the statements.

2. Errors in the application of accounting principles contained in this Regulation.

3. Errors using or interpreting information that existed at the time the prior period statements were developed.

C. A change from an unauthorized accounting principle to a principle included in this Regulation shall also be reflected in a DoD Component's financial statement as an adjustment to prior periods when the unauthorized principle was used.

D. The nature of a material error in prior-period financial statements shall be disclosed in the financial statements of the period in which it is discovered.

1. If financial statements for only the current period are presented, the correction of the error shall be reported as an adjustment to the accumulated results of operations as of the beginning of the current period. The impact on the excess of costs over financing sources (excess of financing sources over costs) in the period that the error occurred shall also be disclosed.

2. If the prior period data containing the error are included in comparative financial statements, the amount of the correction applicable to the prior period presented shall be added to or subtracted from previously reported amounts, and the impact disclosed in a footnote to the statements. The amount of the correction, if any, applicable to periods before the prior period presented shall be applied to the accumulated results of operations at the beginning of the earliest period presented. The impact on the excess of costs over financing sources (excess of financing sources over costs) for each prior period affected shall be disclosed.

0103 REPORTS

010301 Audited Financial Statements. Chapter 2 of this Volume provides the requirement for the annual submission of financial statements.

010302 Accountability for Cash. Chapter 3 of this Volume provides guidance on monthly reports that disbursing officers submit to the Treasury Department. The chapter prescribes detail reporting requirements for the Statement of Accountability (SF 1219) and the Statement of Transactions (DD Form 1329), which supports the Statement of Accountability. Special data are required to highlight Borrowing Account (Payable) Transactions under the Homeowners Assistance or DoD Family Housing Programs and transactions for trust fund investments in U.S. Government securities.

010303 Appropriation and Fund Status. Chapter 4 of this Volume prescribes detailed specifications for preparing periodic reports on the status of DoD appropriations and funds. The chapter provides instructions for preparation and submission of reports required by OSD and OMB on the status and application of budgetary resources. These include the monthly "Flash Report on Obligation Status," the DD Form 1176, "Report on Budget Execution," and its related detailed reports, "Appropriation Status by Fiscal Year Program and Subaccounts," and "Report on Reimbursements." Instructions also are included for the quarterly SF-225, "Report on Obligations," semiannual FMS Form 7304, "Status of Contract Authority," and the annual FMS Form 2108, "Yearend Closing Statement," which are required by the Treasury Department.

010304 General Purpose Financial Statements. Chapter 5 of this Volume prescribes the general purpose financial statements and a series of related schedules required by the Treasury Department. The statements may also be used by OMB; OUSD(C) and DFAS in verifying and evaluating current year data submitted by DoD Components as a part of their budget justification.

010305 Foreign Currency Reports. Chapter 7 of this Volume prescribes the reporting requirements for tracking all transactions to the Foreign Currency Fluctuation Accounts.

010306 Other Funds Statements. Chapter 8 of this Volume prescribes the detailed procedures for preparing financial statements and other reports on special funds not discussed in chapters 3 through 7 of this Volume.

010307 Family Housing. Chapter 9 of this Volume discusses accounting and reporting for the Family Housing Program.

010308 Information Returns, Form 1099. Chapter 10 of this Volume addresses the preparation of Form 1099.

010309 Military Resources Used in Civil Disturbances. Chapter 11 of this Volume prescribes the requirements for financing and reporting costs associated with civil disturbance operations.

010310 Foreign Indebtedness Within the Department of Defense (DOD). Chapter 12 of this Volume establishes standard procedures to be used for the collecting and reporting of foreign indebtedness.

010311 International Balance of Payments Reporting and Estimating. Chapter 13 will be issued at a later date.

010312 Depot Maintenance Reporting. Chapter 14 prescribes requirements that the DoD Components must satisfy with regard to reporting the accomplishment and status of depot maintenance workloads.

010313 Business Operations Fund Statements. Volume 11B of this regulation provides guidance on the preparation of Defense Business Operation Fund Statements.

CHAPTER 2

DEPARTMENTAL FINANCIAL REPORTS
ROLES AND RESPONSIBILITIES0201 GENERAL

The preparation and issuance of DoD Component financial reports, for which accounting support is provided by the Defense Finance and Accounting Service (DFAS), is a responsibility of the DFAS. Both the DFAS and DoD Component customers of the DFAS are responsible for reviewing financial reports to assess the accuracy of the reported financial information and take corrective actions, when needed, to improve the timeliness and quality of those financial reports. Ultimately, however, the DoD Component customer is responsible for the financial information in reports which present the financial effects of the Component's operations.

020101. PURPOSE. The purpose of this chapter is to define the roles and responsibilities of the DFAS and its customers regarding the proper and consistent preparation of the financial reports at the DoD Component departmental level and the treatment of transactions from which the financial data included in the reports are derived. (Additional guidance will be developed, and provided separately at a later date, to address the responsibilities for financial reports at the intermediate and installation levels.)

020102. SCOPE. These policies apply to departmental-level financial reports prepared by the DFAS for its DoD Component customers -- the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff or the Joint Staff, the Unified and Specified Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as DoD Component customers). The departmental financial reports encompassed within the scope of this chapter are listed in Appendix 1.

0202 RESPONSIBILITIES

020201. Stewardship and General Responsibilities. The Congress provides resources to finance the programs, missions, and functions of the Department and its Components. Financial reports are a tool to display the status and uses of those resources. For managers to exercise proper stewardship over their resources, it is essential that financial reports be accurate and timely. To achieve the objective of quality and timely financial reports, the following general responsibilities apply:

A. Under Secretary of Defense (Comptroller). The Under Secretary of Defense (Comptroller) is responsible for the development and approval of DoD policy on financial reports and oversight of the issuance and implementation of such policy. This responsibility includes determination of policies governing:

1. The division of responsibilities between the DFAS and its customers.
2. The establishment of internal controls and audit trails required for the preparation of financial reports and the processing of associated transactions (see paragraphs 020202 and 020203, below).
3. The reconciliation of subsidiary records with financial balances (see paragraph 020204, below).
4. The establishment and approval of schedules required to meet financial reporting deadlines (see paragraph 020205, below).
5. Customer approval and adjustment of draft annual reports (see paragraphs 020206 and 020207, below).

6. The types and levels of adjustments that the DFAS is authorized to make without specific prior approval of the customer (see paragraph 020207, below).

7. The types of documentation required from the customer to support adjustments to the official accounting records (see paragraph 020207, below).

8. The processing of prior period adjustments (see paragraph 020208, below).

9. The release of reports (see paragraph 020209, below).

10. Requirements for certifications and letters of representation (see paragraph 020210, below).

11. Adjudication of adjustments and other issues where there is a disagreement between the DoD Component customer and the Defense Finance and Accounting Service (See paragraph 020206.A.1.e.).

B. DoD Components (DFAS Customers). DoD Components are responsible for:

1. Ensuring the accuracy, completeness, timeliness and documentary support for all data generated by the customer and input electronically into finance and accounting systems or submitted to the DFAS for input and/or recording in the finance and accounting systems and inclusion in financial reports.

2. Establishing appropriate internal controls to assure the accuracy of data provided to the DFAS.

3. Reviewing all reports provided by the DFAS to assess the accuracy of the financial information being reported.

a. For financial reports prepared at appropriation level, the

appropriation manager(s) should be involved in such reviews.

b. Such reviews should identify obvious errors, omissions, and significant diversions from expected or planned amounts.

c. Such reviews should compare budgeted and planned levels of activity with the data included in the reports.

d. When errors or omissions are identified, changes to the reports shall not be made by the DoD Component customer, but instead should be referred to the DFAS for correction. This is because other reports, including subsequent iterations of the same report, are/should be produced from official accounting records. These official accounting records must be accurate in order for such other reports to be accurate. Additionally, proposed adjustments to the accounting records are required in order to establish a proper audit trail for all the transactions impacting reports.

4. Perform program and management analyses on the information contained in financial reports.

5. Ensuring that the amounts in the financial reports are consistent and reconcilable with the same data included in management reports prepared by the DoD Component customer.

6. Reconciling and validating that source data for financial transactions.

7. Identifying any conditions in the financial reports that indicate an apparent violation of the Antideficiency Act and initiating an investigation in accordance with Volume 14 of this regulation.

C. The Director, Defense Finance and Accounting Service (DFAS). The Director of the DFAS shall establish procedures to ensure that:

1. The process for preparing financial reports is consistent, timely, auditable, and controls are in place to provide for the accuracy of the reports.

2. Repetitive or comparable financial reports are prepared consistently in the same manner by use of the same procedures, practices, and systems. Implementing this policy may require the joint efforts of the DFAS and its customers to achieve standard procedures, practices, and systems used in preparing financial reports. To achieve this:

a. It is envisioned that a report prepared on a regular recurring basis should be consistently prepared by use of the same correct procedures, practices, and system at a particular location from reporting period to reporting period.

b. It is not envisioned that all financial reports will be required to be prepared at a single location or by use of a single automated financial system.

c. It is not intended that the introduction of improvements in policies, procedures, or systems used to prepare financial reports will be prohibited or limited.

3. Repetitive or comparable reports are edited and validated for accuracy and consistency between reports from the prior period(s) and reports for the current period.

4. Reports are validated to ensure that all data elements are included in the reports and that the same data elements included in different reports are reported consistently from the same source during the same reporting period.

5. Data provided by the customer (including data input to finance and accounting systems by the customer) is accurately and timely recorded and processed in finance and accounting systems. This includes performing designated disbursing and accounting operations

on behalf of the customer and recording the results of those operations in a timely and accurate manner.

6. Reports are prepared and verified to the official accounting records. The DFAS shall ensure that reported amounts agree with the appropriate general ledger balance(s), whenever applicable.

7. A complete, documented audit trail to the source transactions supports the DFAS-prepared reports.

8. Classified financial information is properly safeguarded.

020202. Internal Controls

A. DoD Components (DFAS Customers). DoD Components shall establish appropriate internal controls to ensure that data provided to the DFAS, whether electronically or otherwise, to be recorded in the accounting systems and subsequently used in financial reports is accurate, complete, and supportable. DoD Components shall install controls to ensure that:

1. All financial transactions are submitted to the DFAS. These controls should include tools to identify and track the numbers, types, and dollar amounts of transactions submitted to the DFAS.

2. Before submission to the DFAS, all transactions (whether hard copy or electronic) are edited to assure accuracy, e.g., that the transaction is identified correctly in terms of the type of transaction, reported quantity(ies), the dollar amount(s) and other data.

3. Transactions that have occurred during a reporting period are uniquely identified with the reporting period and transmitted to the DFAS during that same reporting period. The reporting period normally ends on the last day of each month, quarter, or fiscal year. The last day of the reporting period, and the final due

date for transactions, may be established for a date(s) other than the last day of each month, quarter, or fiscal year if agreed between the DFAS and the DoD Component customer, and approved by the Office of the Under Secretary of Defense (Comptroller).

4. Draft reports provided by the DFAS for review, certification or approval are returned to the DFAS, with proposed adjustments, if any, for verification with official accounting records. Upon verification with official accounting records, the reports will be released directly by the DFAS to the external recipients of the reports. The requirement to return draft reports to the DFAS for release only applies to financial reports being provided to recipients external to the DoD Components.

5. Annual certifications required by 31 U.S.C. 1501(a) and management representation letters required by the Inspector General, Department of Defense (DoDIG) for annual Chief Financial Officer's financial statements are prepared and submitted when required.

6. The Defense Business Operations Accounting Report (Accounting Report(M)1307) is validated and approved by the DoD Component customer each month.

7. Noted potential Antideficiency Act violations are reviewed and investigated in accordance with Volume 14 of this regulation.

B. Defense Finance and Accounting Service. The DFAS shall establish internal controls to ensure that data provided by each DoD Component customer is recorded accurately and processed timely into the finance and accounting systems. The DFAS shall install controls to ensure that:

1. All transactions that are received are processed correctly. These controls should include tools to identify and track

numbers, types, and dollar amounts of transactions that are received by the DFAS. Such controls also apply to all transactions generated by the DFAS.

2. All transactions generated (whether electronic or hard copy) are edited to assure accuracy, e.g., that the transaction is identified correctly in terms of the type of transaction, reported quantity(ies), the dollar amount(s) and other data.

3. Transactions that have occurred during a reporting period are uniquely identified with the reporting period and processed in order to meet the reporting schedule for the report due date.

4. DFAS-prepared reports are supportable, reliable, and accurate. These controls include tools to ensure that:

a. All transactions applicable to the effective period of the report have been edited and posted to the official accounting records.

b. All DFAS or DoD Component customer proposed adjustments to a previously issued report that are material (see paragraph 020208, below) are edited, validated, documented and posted to the official accounting records.

c. Reported amounts are verified to the amounts contained in the official accounting records.

d. Report lines have the proper sign (plus or negative).

e. Mathematical calculations on each report are validated.

f. Identified relationships between amounts on report lines within a report and from one report to another report are checked and validated.

g. Current reports are compared to prior reports and checks are made to identify significant errors, omissions, and distortions.

h. Applicable corrections are made to the reports before release to the recipients.

5. Noted potential Antideficiency Act violations are reported to customers for their review and investigation in accordance with Volume 14 of this regulation.

020203. Audit Trails

A. DoD Components (DFAS Customers). DoD Components shall ensure that audit trails are maintained in sufficient detail to permit tracing of transactions with a unique identity from its source to its transmission to the DFAS. This is necessary to demonstrate the accuracy, completeness, and timeliness of a transaction; as well as to provide documentary support, if required, for all data generated by the DoD Component and submitted to the DFAS for recording in the accounting systems and use in financial reports.

B. Defense Finance and Accounting Service. The DFAS shall ensure that a complete and documented audit trail is maintained to support the reports it prepares. The audit trail shall include assurance that:

1. The numbers, types, and dollar amounts of transactions transmitted by the customer are received and tracked by the DFAS to ensure that they are properly processed and recorded.

2. The numbers, types, and dollar amounts of transactions received from customers, as well as those generated by the DFAS, are processed timely and entered accurately into the finance and accounting systems.

3. All transactions received from customers, as well as generated by the DFAS, with an effective date of the current reporting period are included in the data reported for that reporting period.

4. Specific edits shall be applied by type of transaction in each finance or accounting system. Those transactions failing to pass edits, and/or otherwise not entered, are controlled and assigned for research and correction by the DFAS and/or the customer and, to the degree feasible, are recorded in suspense accounts in the accounting system. Examples of input transactions that may require research by the customer include but are not limited to:

a. Personnel transactions inputting data to the payroll system that exclude data essential to pay employees.

b. Obligation transactions as a result of contracts or purchase orders that exclude data essential for recording the transactions in accounting or payment systems.

c. Receipt and acceptance transactions that exclude data essential for recording the transactions in accounting or payment systems.

d. Disbursements that do not match obligations or receipts because of missing program data.

5. The preparation of all financial reports is consistent from one reporting period to another reporting period, and that the same financial information is used as the source for different reports whenever the same information is reported.

6. Ending balances for one reporting period will be perpetuated as the beginning balances for the next reporting period and those values shall not be changed as they are carried forward to the subsequent reporting period.

7. The source of financial information for all financial reports is recorded in the official accounting records. Supporting documents or images of the supporting documents should be retained by the organization that translates the information into an electronic mode. Incoming electronic information need not be supported with documentation, provided that internal controls are in place to assure that the transactions are:

a. Adequately edited for accuracy and completeness.

b. Properly controlled from unauthorized access and use.

c. Identified, tracked and controlled to ensure that the numbers, types and dollar amounts are complete.

d. Properly authorized and approved by duly designated officials.

8. The major sources of data provided to the accounting and reporting systems are documented at a high level and a copy of the documentation provided to the customer for their information and appropriate action, if required.

020204. Reconciliation of Subsidiary Records with Financial Balances. Many financial balances (e.g., general ledger proprietary and budgetary accounts such as assets, liabilities, commitments and undelivered orders) require supporting subsidiary records to validate the amount of the financial balance. Such subsidiary records shall be reconciled to financial balances in accordance with the policies, requirements, and frequencies prescribed in the DoD Financial Management Regulation.

A. DoD Components (DFAS Component Customers). The supporting records for many financial balances are maintained by the DFAS customers and are outside the control of the DFAS--for example, assets such as inventories, plant property, and equipment. This

also is true of some liabilities such as some claims payable.

1. When subsidiary records are maintained by the DoD Component customer, outside the control of the DFAS, the DFAS shall establish a reconciliation schedule, mutually agreed to by the DoD Component customer and subject to approval by the Office of the Under Secretary of Defense (Comptroller), to reconcile the subsidiary records with the financial balance. The reconciliation of such supporting records with the financial balance is a joint responsibility of the DFAS and the customer.

2. The accuracy of such subsidiary records shall be validated periodically, on a sample or other authorized basis, against applicable physical assets or other appropriate confirmations of the source documents.

a. For example, in the case of equipment, inventories, supplies and materials, or real property, periodic counting or other physical verification of the assets is required by various regulations depending upon the nature of the asset.

b. In the case of commitments, obligations and accounts payable; periodic validation of source data is required. These validations shall include reviews of requests for procurement actions, contracts and other procurement actions, personnel status information, supply requisitions, receipts and acceptances to ensure the integrity and currency of the source data.

3. Changes in the source data shall be documented and provided to the DFAS for recording as financial transactions.

B. Defense Finance and Accounting Service.

1. The DFAS shall establish procedures to ensure that all general ledger balances and other associated financial balances which require supporting subsidiary records are

reconciled, at least on a quarterly basis, or more frequently, if specifically required by the Office of the Under Secretary of Defense (Comptroller), with the amounts contained in the supporting records, including original source data.

2. Unreconciled differences shall be investigated in accordance with applicable provisions of this Regulation and appropriate adjustments documented and processed to balance the general ledger amount with the amount of the subsidiary records.

3. Many of the supporting subsidiary records for the financial balance amounts are established and maintained by the DFAS. Examples of these subsidiary records are accounts receivable, accounts payable, and various other asset and liability balances. DoD Component customer participation may be required in the reconciliation process for the DFAS maintained subsidiary records if the original source documents or transactions that require research to complete the reconciliation are retained by the customer.

4. When unreconcilable differences between the general ledger and the subsidiary ledger records exceed \$1 million, the reconciliations shall be performed on a monthly basis in order to determine the cause of the differences and to take appropriate corrective actions to ensure the accuracy and integrity of the accounting system and monthly reports.

020205. Reporting Schedules

A. The DFAS shall establish procedures to require their activities that prepare external financial reports to develop report preparation schedules jointly with customers. The purpose of these schedules is to meet the reporting due dates consistent with the policies in this chapter.

B. Reporting schedules for reports being provided to external recipients shall

include the opportunity to present a draft of the report to the customer for approval prior to release to the recipients.

C. Reporting schedules for DoD Departmental-level reporting entities shall be submitted to the Office of the Under Secretary of Defense (Comptroller) for approval.

020206. Draft Reports

A. DoD Components (DFAS Customers). DoD Component customers shall take the following actions on all financial reports including draft annual reports:

1. Review the reports provided by the DFAS to assess the accuracy of the financial information being reported.

a. The review should attempt to identify obvious errors, omissions, and significant diversions from expected or planned amounts.

b. The review should compare budgeted and planned levels of activity with the data included in the reports.

c. When material errors or omissions are identified in a draft report, the DFAS will be requested to revise the report and include the changes in the final report.

d. DoD Component customers shall not make changes to draft annual reports nor release the reports to external recipients. To do so will result in the official accounting records being unreconcilable to such reports and the reports will not be supported fully with documented audit trails for all the transactions impacting the reports.

e. Requests for adjudication may be submitted by either the DoD Component or the DFAS. DoD Component-proposed changes to the draft annual reports with which the DFAS does not concur shall be referred to

the OUSD(C) for adjudication within fifteen calendar days.

f. When the amount of the proposed adjustments are material (see paragraph 020208, below), the DFAS shall revise the report as a result of processing the adjustments.

2. Research and propose adjustments to correct, as appropriate, abnormal account balances in terms of reverse signs, unusual amounts, and other obvious errors.

3. Research any unusual trends and comparisons with prior year and/or prior period amounts to determine what corrective actions are appropriate or needed.

4. Ensure that the amounts in financial reports are consistent and reconcilable with the same financial data included in management reports prepared by the DoD Component customer.

B. Defense Finance and Accounting Service. Prior to release of a draft report to the customer for review and approval, or release of a final report to a recipient, the DFAS shall validate the report to ensure that the reported amounts agree with the official accounting records. The DFAS shall perform quality reviews on all reports to confirm that:

1. Amounts on the report are mathematically correct.

2. Internal relationships of amounts included in a report that are interdependent are proven to be correct.

3. Abnormal account balances in terms of reverse signs, unusual amounts, and other obvious errors are identified and assigned for research and correction to the DFAS or to the customer.

4. Reported amounts for the same data elements for the same report period are consistent across all similar financial reports.

5. Unusual trends and comparisons with prior year and/or prior period amounts are identified and called to the attention of the customer for appropriate action or analysis by the customer.

020207. Current Period Adjustments

A. DoD Components (DFAS Customers). In addition to other reports, these procedures also apply to the Chief Financial Officer's annual financial statements that have been provided to the DODIG for audit. DoD Components shall adequately document and support any proposed adjustment.

1. This documentation shall consist of evidence of the need for the adjustment in sufficient detail to provide an audit trail to the source transaction(s) that requires the adjustment.

2. Adjustments to recurring monthly, quarterly, and semiannual reports shall be made during the course of routine operations and provided to the DFAS as with any other input as a part of current period business.

3. The Component may be required to review and approve documentation of adjustments proposed by the DFAS in accordance with the policies specified in this chapter.

4. The Component also shall maintain records of notifications, by the DFAS, of adjustments made by the DFAS.

B. Defense Finance and Accounting Service. The DFAS shall identify the requirement for adjustments to financial data.

1. There are many reasons for adjustments. In some cases, the need for

correction of errors is apparent. Examples include:

a. The total of the subsidiary records for an account does not agree with the financial balance representing the total.

b. Correction of a transaction.

c. Correction of an earlier adjustment that has been determined to have been made in error.

d. Adjustments to obligations and, if applicable, liabilities and expenses by aligning the obligation, accrual, or expense amount with the liquidation amount for receipts, acceptances, and/or disbursements. Such adjustments may be required when the unit price of an item or service being procured is revised, when special terms are offered on an invoice such as a voluntary price reduction or when a final payment for a delivery of products or services varies from the amount obligated or accrued for the delivery, and when final payment on a contract or order varies from the total amount obligated or accrued.

2. DFAS errors that are corrected prior to the results of the error being provided to the customer are not adjustments, but merely the correction of errors and need not be reported to the customer.

3. The DFAS shall support adequately, and justify in writing, any adjustment to the official accounting records. Documentation shall consist of evidence that supports the need to correct the error and adjust the balances in sufficient detail to provide an audit trail to the source transaction(s) that requires the adjustment.

a. The documentation shall include the rationale and justification for the adjustment, the detail numbers and dollar amounts of errors or conditions that are related to the transactions or records that are proposed for adjustment, the date of the adjustment, and

the name and position of the individual approving the adjustment. The documentation also shall be sufficient to provide an audit trail to the detail transaction(s) being adjusted or corrected.

b. The following types of adjustments may be made by the DFAS without the prior approval of the customer.

1 Adjustments to correct systems processing deficiencies. For example, a systems programming error may under some conditions cause a sign of a transaction to be reversed. Therefore, instead of accounts payable being increased as a result of a receipt and acceptance, the accounts payable may be reduced. Correction of these types of programming deficiencies requires the processing of an adjustment by the DFAS.

2 Adjustments to correct an error made by the DFAS in processing a transaction or a previous adjustment.

3 An adjustment to correct a financial balance (i.e., general ledger amount) to equal the sum of subsidiary records.

4 Adjustments to obligations and, if applicable, liabilities and expenses by aligning the obligation, accrual, or expense amount with the liquidation amount for receipts, acceptances, and/or disbursements when such adjustments are required by applicable supporting information.

5 Adjustments to correct errors made by the DFAS in the preparation of a report, i.e., calculation errors and similar mistakes, shall be corrected by the DFAS with notice provided to the customer only when the customer previously was provided a copy of the report. A corrected report will be provided to the customer.

6 Adjustments to correct other DFAS errors.

c. Those adjustments proposed by the DFAS not identified in paragraph 020207.B.3.b, above, shall be approved by the customer before the adjustment is recorded.

d. The DFAS shall advise the customer at least once each month of the total amount, by type, and the categories of reasons for such adjustments made by the DFAS at the operating activity level. DFAS errors that are corrected before the customer is aware of the error need not be included in this report.

e. If a proposed adjustment by the DFAS or by a DoD Component customer to any amount on a draft annual report is not material (see paragraph 020208, below), the DFAS shall request the customer to approve the annual report without a revision to the report. The DFAS shall process such non-material adjustments as current business for inclusion in the next current report period.

f. The chief of the applicable DFAS reports section shall ensure that any proposed adjustments to an annual report are documented and supported in terms of reasons for the adjustment. If the reason for the adjustment is adequately documented and supported, the adjustment will be processed provided that there is an identifiable audit trail to the source transactions. The documentation shall include the name, position and title of the approving official, as well as, the date approved.

020208. Prior Period Adjustments Guidance describing the roles and responsibilities for recording and controlling Prior Period Adjustments pertaining to the Chief Financial Officer Act financial statements and Defense Business Operations Fund accounting report statements are contained in "DoD Guidance on Form and Content of Financial Statements" (as updated yearly) and Financial Management Regulation (DoD 7000.14R, Volume 11B), "Reimbursable Operations, Policy and Procedures--Defense Business Operations Fund", respectively.

Guidance describing the recording and reporting of prior year corrections in budgetary accounts are contained in Chapters 24 and 93 of the DoD Accounting Manual (DoD 7220.9-M). That information is scheduled for incorporation into Chapter 4 of this Volume.

020209. Release of Reports

A. DoD Components (DFAS Customers). DoD Components shall approve draft annual reports and return those reports to the DFAS for appropriate revision, validation, and release as final reports. The DoD Component customers shall take the following actions on all reports, including monthly, quarterly, semiannual and annual reports, after release by the DFAS:

1. Review the reports provided by the DFAS to assess the accuracy of the financial information being reported. The review should attempt to identify obvious errors, omissions, and significant diversions from expected or planned amounts.

2. The review should compare budgeted and planned levels of activity with the data included in the reports. When errors or omissions are identified, proposed adjustments will be identified for inclusion in the next current report period.

3. Research and correct, as appropriate, abnormal account balances in terms of reverse signs, unusual amounts, and other obvious errors that are identified by the DFAS.

4. Research any unusual trends and comparisons with prior year and/or prior period amounts to determine if corrective actions are appropriate to deal with adverse trends or cycles.

5. Ensure that the amounts in the financial reports are consistent and reconcilable with the same financial data included in

management reports prepared by the DoD Component.

6. The DoD Component customer, shall not release officially any reports--including monthly recurring reports such as budget execution reports--submitted to any organization external to the DoD Component. (Such reports may be released only by the DFAS.)

B. Defense Finance and Accounting Service. The DFAS shall validate all final reports using the official accounting records prior to release to the recipients.

1. Upon receipt of approved annual draft reports from the DoD Components, such reports shall be reviewed to ensure that the reported amounts agree with the official accounting records or that properly documented material adjustments have been submitted to support any proposed changes to the reports.

2. For annual financial reports that have been revised for material adjustments as indicated in paragraph 020208, above, the DFAS departmental-level reports section shall have on file documentation supporting the prior period adjustments along with an audit trail of the approval and recording of the transactions and reports on the recording of the associated installation level adjustments.

3. For adjustments requested by DoD Component customers, the request shall be provided in writing with the documentation for the proposed prior period adjustments.

4. When material errors or omissions are identified after a final report has been released to the recipients, the DFAS will not revise and reissue the final reports. However, the DFAS will process and control all material prior period adjustments solely for presentation in a supporting schedule for the prior year column in the subsequent year's Chief Financial Officer comparative financial statements. The prior year column of the report will reflect the amounts previously reported for

that fiscal year. The report will be footnoted and a schedule included with the footnote to disclose the prior period adjustments processed after the report was finalized and the related impacts on the applicable report lines in the prior year column.

5. The DFAS, rather than the DoD Component customer, shall release officially all reports--including monthly recurring reports such as budget execution reports--submitted to any organization external to the DoD Component. This action shall be taken after final validation that corrections and adjustments have been made, the reports agree with the official accounting records and annual reports are approved by the customer.

020210. Certifications/Letters of Representation

A. DoD Components/Reporting Entity. A reporting entity is the organization represented by the financial information on the report. This may be a DoD Component headquarters, or a subordinate command/organization. For example, reporting entities may include an individual command or activity such as a shipyard or a supply depot. It also could encompass a number of activities within a business area (such as all shipyards or aircraft depot maintenance activities) in a Military Department. A reporting entity also can be at a DoD Component level. For example, the Chief Financial Officer annual financial statements for a Military Department include all financial information required to portray fully all relevant activities of the Military Department.

1. The information presented in the financial reports for a reporting entity, at a subordinate reporting entity, major command or Departmental-level reflects the net effect or results of decisions made, and actions taken, by the personnel responsible for conducting the programs, operations and affairs of the reporting entity.

2. It is recognized that the DFAS is authorized to perform disbursing for some

payments and accounting functions on behalf of the reporting entity.

a. However, the originating decisions that resulted in the obligation and/or the acceptance of performance and ultimately the need for a disbursement were made by operating officials of the reporting entity. The disbursement is merely the satisfaction of a liability incurred as a result of such decisions taken by operating or program officials of the reporting entity. The DFAS does not make the decisions to incur the liabilities but merely to make payment in conformance with the liabilities incurred by the operating or program officials.

b. The same operational concept applies to accounting adjustments. Adjustments are needed to correct errors of commission and omission in financial data. The purposes for adjustments include revising records to permit payments to be made accurately and/or to properly present financial information in accordance with the decisions made and actions taken by the program and operating officials of the reporting entity.

c. The DFAS performs these payment and accounting functions on behalf of the DoD Component customer only to the degree of carrying out the full intent and effect of the actions taken or decisions made by the program and operating officials of the reporting entity. Thus, only to this limited degree could the performance of the disbursing and accounting functions by the DFAS be viewed as being responsible for the actions summarized in the information contained in financial reports.

d. Therefore, the financial information presented in the report is considered to be a representation of the financial status of the reporting entity and not the organization preparing the report (DFAS).

3. For the above reasons, the reporting entity is responsible for annual certifications required by 31 U.S.C. 1501(b) and representation letters in support of annual Chief

Financial Officer's financial statements required by the DoDIG.

4. The reporting entity also is responsible for signing the "Defense Business Operations Fund Accounting Report," (Accounting Report(M)1307).

5. However, because of the role that the DFAS plays in these functions and in the preparation and presentation of the financial reports, the DFAS is required to provide supporting certifications and letters to the reporting entity, as described in the following section, in order to properly support the reporting entity's certification and representation letter.

B. Defense Finance and Accounting Service. The DFAS has been designated to provide accounting and reporting support for the Military Departments and selected DoD Agencies. The DFAS has certain responsibilities, as defined above, in regard to the processing of financial data and the preparation of the financial reports for these customers. Therefore, the DFAS shall provide the following for the DoD Component customer:

1. The DFAS is responsible to the reporting entity for the performance of disbursing, accounting, and reporting responsibilities and shall provide assurances and certifications, when requested, to the reporting entity regarding the quality of the accounting and report preparation services performed for the DoD Component customers.

2. The DFAS is responsible for signing the recurring monthly, quarterly and semiannual reports on behalf of the DoD Component customers with the exception of the "Defense Business Operations Fund Accounting Report," (Accounting Report(M)1307).

3. In support of the DoD Component customers requirement to provide annual certifications required by 31 U.S.C.

1501(b), the Director of the DFAS Center preparing the report shall provide the following certification with the annual TFS 2108, "Year-end Closing Statement":

"I hereby certify that the amounts shown in this report are a complete compilation of amounts contained in official accounting records, have been validated to the official accounting records, and have been reconciled, as required, to appropriate general ledger and subsidiary ledgers. All known material transactions have been included in the report."

4. A similar certification shall be provided by the chief of the applicable reports section to the customer with the monthly "Defense Business Operations Fund Accounting Report," (Accounting Report(M)1307).

5. In support of the DoD Component customers requirement to provide a management representation letter with the annual Chief Financial Officer's financial statements to the DoDIG, or audit activities designated by the DoDIG, the Director of the DFAS shall provide the customer with a certification letter before the due date for the management representation letter.

a. The DFAS certification letter shall include the following statements:

"I hereby certify that the amounts reported in the Chief Financial Officer financial statements are a complete compilation of amounts contained in official accounting records, have been validated to the official accounting records, and have been reconciled, as required, to appropriate general ledger and subsidiary ledgers. All known material transactions have been included in the financial statements."

b. To the degree that problems have been identified to, and acknowledged by, the DFAS in audit reports or other means, the annual certification letter issued by the DFAS to the customer shall disclose such conditions. The recognition of problems shall include any known deficiency that could prevent an auditor from issuing an unqualified opinion; any unresolved financial policy issues; uncorrected material errors, omissions, or unrecorded adjustments; proposed material writeoffs of assets or liabilities; identification of "stop payment" conditions, or evidence of potential or apparent violations of the Antideficiency Act.

CHAPTER 3

ACCOUNTABILITY FOR CASH0301 GENERAL

030101 This chapter provides guidance necessary to prepare the consolidated monthly reports of DoD disbursing officers and the monthly report on cash transactions.

A. The disbursing officers reports are required by 31 U.S.C. 3522, 7 GAO 28.8, and Treasury Financial Manual (TFM) 2-3100. These reports provide the Treasury Department with data for reporting purposes and for maintaining the central accounts of the U.S. Government.

B. The statement of transactions provides the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) with a summarized classification of receipts and outlays.

030102 This chapter applies to all DoD Components and to their disbursing officers, including the Department of the Navy associate disbursing officers (referred to collectively as "disbursing officers").

0302 STATEMENT OF ACCOUNTABILITY (SF 1219)

030201 Report Form and Frequency. The Statement of Accountability and certain supporting schedules are prescribed by TFM 2-3100 for use in reporting to the Treasury. Treasury has agreed to accept the Statement of Accountability and supporting schedules in a machine-sensible format in advance of the hard copy reports in order to obtain reporting by the eighth workday following the close of the reporting month. The hard copy format is shown in Figure 3-1. The tape format specifications are shown in figure 3-2. The tape must be forwarded to the Treasury no later than the close of business of the eighth workday after the close of the reporting month.

030202 Report Preparation

A. Hard Copy Report. The Statement of Accountability or equivalent machine listing previously approved by the Department of the Treasury and supporting schedules must be prepared in accordance with this chapter. The hard copy report is required for certification purposes even though the data are received in advance in a tape format. Because of this advance submission, the hard copy must reach Treasury no later than the tenth workday after the reporting month.

B. Electronic Submissions.

1. For reports submitted in electronic media, magnetic tape containing the information in the hard copy reports is prescribed. The information should be recorded in the following format:

Tape Format

IBM labeled
ASCII
80 characters per logical record
1600 characters per physical record
9 track
density--1600 bpi

2. The information reported shall be at the departmental total level except as follows:

a. Checks issued and related adjustments shall be by Disbursing Station Symbol Number and by month of issue (Statement of Accountability Transaction Codes 210, 211 and 212).

b. Confirmed Deposits, Debit Vouchers and Letters of Credit shall be reported at the document level (Statement of Accountability Transaction Codes 213 and 420).

3. The prescribed level of detail results in a tape with an average of 1,500 records for each Component.

030203 SECTION I - GENERAL STATEMENT OF ACCOUNT

A. PART A - TRANSACTIONS DURING PERIOD AFFECTING ACCOUNTABILITY

1. Line 1.00 Total Accountability - Beginning of Period. Report on this line the balance of accountability for the disbursing office or station as of the close of the previous accounting period. This balance must be the same figure reported as the closing balance on line 5.00 of the SF 1219 for the prior accounting period.

2. Line 2.1 Checks Issued on U.S. Treasury. Report on this line the total amount of checks drawn on the U.S. Treasury for the period, including any adjustments of check issue amounts reported in prior periods. An analysis of this total amount, by check symbol, shall be shown in Section II, Part A, on the reverse of the statement.

3. Line 2.3 Other Transactions. All amounts reported under this classification must be analyzed on a separate support schedule. Each separate support schedule must list each detail transaction which supports the summary line total.

a. Discrepancies in D.O. Accounts - Credits. Report on line 2.34 the total amount of all unidentified transactions during the period of account that increases the disbursing office accountability and that cannot accurately be classified to line 2.36 or 2.37. Activity reported on this line must be carefully researched before entry. Every effort should be made to clear items reported on this line in the next period of account.

b. Payments by Another D.O. Report on line 2.36 the total amount of Treasury check payments issued by another disbursing office, at the reporting office's request, during the period of account.

c. Transfers from Other Disbursing Officers. Report on line 2.37 the total amount of transfers received from other disbursing officers during the period of account.

d. Line 2.39 shall only be used when authorized by Treasury.

4. Line 2.9 Total Increases in Accountability. Show in this line the sum total of lines 2.1, 2.34, 2.36, 2.37, and 2.39.

5. Line 3.0 Subtotal. Report on this line the sum of the accountability at the beginning of the period and the increases in accountability during the reporting period, line 1.00 plus line 2.9.

6. Line 4.1 Net Disbursements. Report on this line the total of gross vouchered charges to appropriation and fund accounts net of collections for the reporting period. The detail of the accounts charged shall be reported on the related Statement(s) of Transactions. Components which do their own disbursing shall include payment vouchers on letters of credit on an issue month basis. See TFM 6-2000 for more detailed information concerning letters of credit.

7. Line 4.2 Deposits Presented or Mailed to Bank. This line is used to report deposits of disbursing officers net of related debit vouchers. A summary analysis by deposit symbol and date presented or mailed to bank will be shown on the reverse of the statement, Section II, Part B.

8. Line 4.3 Other Transactions. All amounts reported under this classification must be analyzed on a separate support schedule. Each separate support schedule must list each detail transaction that supports the summary line total.

a. Discrepancies in D.O. Accounts - Debits. Report on line 4.34 the total amount of all unidentified transactions during the period of account that decreases the disbursing office accountability and that cannot accurately be classified to line 4.36 or 4.37.

FIGURE 3-1

FIGURE 3-1 (CONT.)

Activity reported on this line must be carefully researched before entry. Every effort should be made to clear items reported on this line in the next period of account.

b. Payments for Another D.O.

Report on line 4.36 the total amount of Treasury check payments issued by your disbursing office, at the request of another disbursing office, during the period of account.

c. Transfers to Other Disbursing Officers. Report on line 4.37 the total amount of transfers sent to other disbursing officers during the period of account.

d. Line 4.39 shall only be used when authorized by Treasury.

9. Line 4.9 Total Decreases in Accountability. Report on this line the sum total of lines 4.1, 4.2, 4.34, 4.36, 4.37, and 4.39.

10. Line 5.0 Total Accountability Close of Period. The total to be reported on this line will be the difference between the amounts reported on line 3.0 and line 4.9. This amount will be detailed in the analysis required by Section I, Parts B and C.

B. PART B - ANALYSIS OF INCUMBENT OFFICER'S ACCOUNTABILITY

NOTE: Disbursing officers shall maintain a separate account for each classification of accountability shown in Parts B and C.

1. Line 6.1 Cash on Deposit in Designated Depository. Report on this line the total of all checkbook balances in U.S. dollar or U.S. dollar equivalent of foreign currencies on deposit in designated depository accounts. The grand total of all depository funds shall be shown on line 6.1.

2. Line 6.2 Cash on Hand. Report on this line the total of cash items held at the disbursing office or station. This shall include coin or currency, checks, money orders, and other forms of negotiable paper. Depending upon the system of cash accounts maintained by the disbursing office, this classification may

include cash collections that have been credited to government accounts and are in the process of preparation for deposit to the credit of the U.S. Treasury. If a separate accounting is maintained for undeposited collections, as distinguished from disbursing cash on hand, show such classification on line 6.3.

NOTE: On the September 30 final account for each fiscal year, that portion of the totals shown on lines 6.1 and 6.2, which represents U.S. equivalent of foreign currency, shall be shown in parenthesis on the respective line.

3. Line 6.3 Cash - Undeposited Collections. Report on this line the cash collections on hand at the close of the accounting period that are for deposit to the credit of the U.S. Treasury.

4. Line 6.5 Cash in Custody of Government Cashiers. Report on this line the total cash that has been advanced to officially authorized government cashiers for which they are accountable to the disbursing officer.

5. Lines 6.6 thru 6.9. These lines have been provided for the reporting of special classifications of cash maintained by the disbursing office that have not been specially provided for on other lines.

6. Line 7.1 Deferred Charges - Vouchered Items. Report on this line all payments that have been made on vouchers that are not complete, and therefore cannot be charged to the appropriation or fund account in the current reporting period. All amounts reported on this line shall be cleared in the next accounting period.

7. Line 7.2 Receivables - Check Overdrafts. Report on this line the total of uncollected check overdrafts (checks drawn in excess of certified voucher amounts) as of end of accounting period.

8. Line 7.3 Losses of Funds. Report on this line the total funds that have been lost, stolen, or are otherwise not available.

9. Line 7.4 Receivables - Dishonored Checks. Report on this line the total of all dishonored checks held for redemption by the drawer. If the item cannot be collected within the following 30-day period and the collection was credited to an appropriation, fund or receipt account, the collection credit should be reversed (reducing the appropriation, fund, or receipt account originally credited) to clear the disbursing office receivable. Otherwise, the item should be reported on this line until collected or ultimately processed as a loss of funds.

10. Lines 7.5 thru 7.9. These lines have been provided for reporting any additional classifications that may be maintained to reflect an appropriate analysis of accountability.

11. Line 8.0 Total of My Accountability. Report on this line the total of lines 6.1 through 7.9. This amount shall be the total of the incumbent disbursing officer's accountability for which he is personally liable.

C. PART C - ANALYSIS OF PREDECESSOR OFFICER'S ACCOUNTABILITY

1. Line 9.2 Receivables - Check Overdrafts. Report on this line the amount of uncollected check overdrafts applying to checks issued by predecessor disbursing officers.

2. Line 9.3 Losses of Funds. Report on this line the total funds of the predecessor disbursing officer that have been lost, stolen, or are otherwise not available.

3. Line 9.4 Other Accountability. Report on this line the total of any other items of accountability relating to predecessor disbursing officers that were carried forward to the accounts now maintained by the incumbent disbursing officer.

4. Line 10.0 Total Predecessor Officer's Accountability. Report on this line the total of lines 9.2 through 9.4.

5. Line 11.0 Total Disbursing Office Accountability. Report on this line the sum of the totals shown on lines 8.0 and 10.0.

This total shall be the same as reported on line 5.00.

030204 SECTION II - SUMMARY BY SYMBOL OF CHECK AND DEPOSIT TRANSACTIONS WITH U.S. TREASURY (Double Space All Line Entries)

A. PART A - CHECKS ISSUED AND ADJUSTMENTS FOR PRIOR PERIODS

The detailed information required to be reported in this part is indicated by the columnar headings. The information must be shown for each check symbol under which there were checks issued or check issue adjustment transactions in the current period. The amounts reported in the respective columns for each check symbol must agree with amounts reported on SF 1179 "Month End Accounting Summary of Checks Issued" for the same check issue transactions. The columns shall be completed as follows:

1. Column 1 Check Symbol. Report in this column the check symbol number under which the checks were drawn or to which the check issue adjustment transactions apply.

2. Column 2 Amount of Checks Issued This Period. Report in this column the total amount of all checks issued during the current accounting period under the related check symbol. This amount must agree with the amount reported on line 1 of the related SF 1179. Such amounts will be supported by listings, magnetic tapes, or check copies, in accordance with the requirements of the Financial Management Service (FMS), Department of the Treasury.

3. Columns 3 & 4 Adjustments for Prior Months Issues.

a. By TFS Forms 5206. Report in column 3 the issue month and year and the net total of the check issue discrepancy notices, TFS Form 5206, received and entered in the disbursing office accounts for the current accounting period. The totals shown will agree with the amounts on line 2(a) of the SF 1179.

b. Other. Report in column 4 the issue month and year and the net total of adjustments (Optional Form 1017-G "Journal Voucher" etc.) initiated by the disbursing office to correct prior periods check issue totals, for which adjustments have been entered in the current month accounts and reported on line 2(b) of the SF 1179 for the current month.

4. Column 5 Total Checks Issued. Report in this column the net total of the amounts reported in columns 2, 3, and 4 for each check symbol number being reported. Each amount column shall also be totaled if more than one check symbol is reported to show the grand total for all check symbols. The grand total amount of column 5 shall be the amount to be reported on line 2.1 of Section I, Part A, of SF 1219.

B. PART B - SUMMARY OF DEPOSITS PRESENTED OR MAILED TO BANK (Line 4.2)

In this part, an analysis shall be shown by deposit symbol number of the deposit items and related debit vouchers that have been taken up in the accounts of the disbursing office during the current accounting period. The information to be shown in the respective columns is as follows:

1. Column 1 Deposit Symbol. Report in this column the deposit symbol

numbers used by the disbursing office. Normally, only one deposit symbol is used by a disbursing office. Where more than one deposit symbol is used at the direction of FMS, the deposit symbol affected shall be shown in this column and an analysis of the deposits shown in columns 2, 3, and 4 as explained below.

2. Column 2 Deposits Presented Or Mailed to Bank This Month. Report in this column the total deposits presented or mailed to bank this month at the deposit symbol level, net of debit vouchers recorded during the current month.

3. Columns 3 & 4 Deposits Presented or Mailed to Bank in Prior Months But Recorded in Accounts This Month. Report in column 3 the month presented or mailed to bank and in column 4 the total amount of deposit items less debit vouchers entered in the disbursing officer's accounts during the current accounting month.

4. Column 5 Total Deposits Presented Or Mailed To Bank. Report in this column the sum of amounts shown in columns 2 and 4 for each deposit symbol. The grand total of column 5 shall be the amount to be reported on line 4.2 in Section I, Part A of the Statement of Accountability.

TAPE FORMAT FOR STATEMENT OF ACCOUNTABILITY AND SUPPORTING REPORTS INCLUDING THE STATEMENT OF TRANSACTIONS

The tape format for submitting the Statement of Accountability and necessary supporting reports including the Statement of Transactions and the Statement of Inter-Fund Transactions is as follows:

A. HEADER

1. Positions 1--4 Identification. Enter 1HDR
2. Position 5 Blank. Not used
3. Positions 6--10 Serial. Locally generated tape serial number.
4. Positions 11--15 Blank. Not used

FIGURE 3-2

5. Positions 16--19 Reel Sequence No. Use a dash (-) in position 16 followed by the number of the reel in sequence preceded by zeros (e.g. -001).
6. Position 20 Blank. Not used
7. Positions 21--30 File Identification. Enter XXXXXTRAll
8. Positions 31--35 Creation Date. The date the tape was created. The last two digits of the calendar year are shown in positions 31 and 32. The numeric day of the year preceded by zeros as applicable in positions 33--35. January 8 is 008; February 11 is 042 (YYDDD).
9. Positions 36--39 Retention Cycle. Use a dash (-) in position 36 followed by numeric 090.
10. Positions 40--80 Blank. Not used

B. STATEMENT OF ACCOUNTABILITY

1. Positions 1--4 Blanks. Not used
2. Positions 5--8 Reporting Organization. Enter departmental index number of the reporting organization in positions 5 and 6 followed by two zeros. (Navy shows 1700, Army shows 2100, Air Force shows 5700, WHS shows 9711 and 9720, and DLA shows 9700.)
3. Positions 9--22 Amount. Enter the amount in dollars and cents. In the event the value is negative, the sign shall be entered in position 22.
4. Positions 23--27 Accounting Date. Positions 23 and 24 indicate the month, positions 25 and 26 the day, and position 27 the last digit of the calendar year (MMDDY).

(NOTE: Treasury has a waiver to use this nonstandard data element for the present. Plans are in being to convert to the standard data element. Adequate advance notice shall be provided.)

5. Positions 28--33 Transaction Date. Enter the transaction date; for example, the date the deposit was confirmed or the date of the voucher drawn against a letter of credit. The first two digits indicate the year, the second two digits indicate the month, and the last two digits the day (YYMMDD)
6. Positions 34--37 Prefix for Agency Station Symbol for Letter of Credit Transactions (Transaction Code 215). Enter the first four digits of the Agency Station Symbol for letter of credit transactions. (Army shows 2100, Navy 1700, Air Force 5700. If any other organizations issue letters of credit, Treasury will assign a symbol.) For all other Transaction Codes, leave blank.
7. Positions 38--41 Accounting Station Symbol Number. For all detail records except letter of credit (Transaction Code 215), enter the four digit accounting station symbol number assigned by Treasury. This symbol is commonly referred to as the Disbursing Station Symbol Number (DSSN), the Check Issue Symbol Number, or the DO Symbol Number. For letter of credit records enter 9701.

FIGURE 3-2 (Con't)

8. Positions 42--49 Debit Voucher or Letter of Credit Number. Enter the debit voucher number or letter of credit number, if applicable. A debit voucher is indicated by Transaction Code 420 (positions 50--52) and special code 3 (position 61). When both of these conditions exist, show the debit voucher number in this field and a minus sign in position 22 (amount field). If the Transaction Code is 215, enter the letter of credit number. Either number must be right justified. If the number is 8 digits or more, report the last 8 digits of the number. If 7 digits or less, leave unfilled positions blank.
9. Positions 50--52 Transaction Code. The first two positions indicate the line on the Statement of Accountability. The Transaction Code shall be used in conjunction with position 61 for complete transaction identification. Definitions of the line items may be found in appendix I of I TFM 2-3100. The Transaction Codes are as follows:

<u>CODE</u>	<u>TITLE</u>
100	Total Accountability at Beginning of Period, U.S. Dollars
120	Total Accountability at Beginning of Period, Foreign Currency
130	Total Accountability at Beginning of Period, Military Payment Certificates
210	Checks Issued on U.S. Treasury, Current Period (Initial reporting of all checks issued even if issued in a prior month)
211	Checks Issued on U.S. Treasury, (Adjustments for Prior Months Issued based on an advice of Check Issue Discrepancy (TFS Form 5206))
212	Checks Issued on U.S. Treasury, (Adjustments for Prior Months Issues, Other)
215	Payment Vouchers on Letters of Credit
230	Other Transactions
234	Discrepancies in D.O. Accounts - Credits
236	Payments by another D.O.
237	Transfers From Other D.O.s
290	Total Increase in Accountability
300	Subtotal
410	Net Disbursements
420	Confirmed Deposits with U.S. Treasury, (NOTE: Normal transactions must show a 2 in position 61. Debit vouchers will also bear Transaction Code 420, but must show a 3 in position 61.)
430	Other Transactions

FIGURE 3-2 (Con't)

<u>CODE</u>	<u>TITLE</u>
434	Discrepancies in D.O. Accounts - Debits
436	Payments for Another D.O.

920	Predecessors' Accountability--Receivables--Check Overdrafts
930	Predecessors' Accountability--Losses of Funds

FIGURE 3-2 (Con't)

- | <u>CODE</u> | <u>TITLE</u> |
|-------------|---|
| 940 | Predecessors' Accountability--Other |
| 100 | Total Predecessor Officer's Accountability |
| 110 | Total Disbursing Office Accountability (same as code 500) |
10. Positions 53--60 Certificate of Deposit or Letter of Credit Voucher Serial Number. Enter the certificate of deposit number or letter of credit voucher serial number. A certificate of deposit is indicated by Transaction Code 420 (positions 50-52 and Special Code 2 (position 61)). A letter of credit is indicated by Transaction Code 215. The letter of credit voucher serial number is preprinted on the document and has 7 digits. Components shall account for all letter of credit serial numbers. Vouchers voided must also be reported by serial number in this field. To show the voucher was voided, zero fill the Amount Field (positions 9--22) and leave the Transaction Date Field (positions 28-33) blank. Letter of credit voucher serial number and certificate of deposit numbers are right justified, with zero fill to the left.
11. Position 61 Special Code. Enter one of the following Special Codes. It is used in conjunction with the Transaction Code (positions 50-52) to identify the type of transaction being reported.
- a. Transactions during period affecting accountability:
- | <u>CODE</u> | <u>USED FOR</u> |
|-------------|---|
| 1 | Transaction Codes 100, 120, 130, 215, 230, 410, 430, 500, 520, and 530. |
| 2 | Transaction Codes 210, 211, 212, and 420 if a Confirmed Deposit. |
| 3 | Transaction Code 420 if transaction represents a debit voucher. |
- b. Analysis of Accountability by type of currency (Transaction Codes 610 through 940)
- | | |
|---|--|
| 6 | U.S. Dollar equivalent of purchased foreign currency |
| 7 | Military Payment Certificates |
| 8 | U.S. Dollars |
- c. Other Use:
- | | |
|---|---|
| 9 | All totals and subtotals not otherwise identified as a separate transaction code. The inclusion of such totals is optional. |
|---|---|
12. Positions 62--63 Area Code. This code identifies the reporting Component. The Air Force shall report a constant 61, the Army a constant 62 and the Navy a constant 63.
13. Position 64 Record Mark. Enter the end of the record mark.

FIGURE 3-2 (Cont)

C. STATEMENT OF TRANSACTIONS

Tape positions must be as follows to report Statement of Transactions data:

1. Positions 1--4 Blanks. Not used
2. Positions 5--8 Reporting Organization. Enter the departmental index number of the reporting organization: (Navy-1700, Army-2100, and Air Force-5700)
3. Positions 9--22 Amount. If negative, the sign is entered in the units position (position 22).
4. Positions 23--27 Accounting Date. Positions 23 and 24 indicate the month, positions 25 and 26 the day, and position 27 the last digit of the calendar year (MMDDY). The accounting date for the 12th report is the last day of the fiscal year.

(NOTE: As indicated above, a waiver has been issued to use this nonstandard data element for the present. Plans are in being to convert to the standard data element. Adequate advance notice shall be provided.)

5. Positions 28--32 Processing Date. Enter the date the tape is forwarded to Treasury. As in positions 23--27, above, this date must be shown MMDDY. The same note is also applicable.
6. Positions 33--34 Departmental Index No. Enter the two digit departmental index number assigned by Treasury to the funded DoD Component. This number is the two digit prefix assigned to appropriations of that Component that immediately precedes the fiscal year code.
7. Positions 35--36 Transferring Department Index No. Enter the departmental index number of the organization to whom the appropriation was originally made when the transaction affects a transfer appropriation account. If not applicable leave blank.
8. Positions 37--40 Account Number. Enter four digit basic account number assigned by Treasury to the appropriation, other fund, or receipt account.
9. Positions 41--43 Appropriation Suffix. Enter any applicable suffix assigned by Treasury to the account number reported in positions 37--40, above. Units must be shown in position 43. Zero fill unused positions. For example; for account 17X8008.1, this field would be coded 001; for account 2IX4080, this field would be coded 000.
10. Positions 44--47 Fiscal Year. Four positions are provided for entering the appropriation or fund account availability period. All unused positions must be left blank.
 - a. Annual Appropriations. Enter the last two digits of the fiscal year of availability in positions 46 and 47.
 - b. Multi-year Appropriations. Enter the first fiscal year of availability in positions 44 and 45. Enter the last fiscal year of availability in positions 46 and 47:

FIGURE 3-2 (Con't)

- c. No Year Appropriations. "X" in position 47.
 - d. Receipt Clearing Accounts. "F" in position 47.
 - e. Estimate Clearing Account. "A" in position 47.
 - f. Deposit Fund Accounts. Enter the fiscal year in positions 46 and 47 or "F" or "X" in position 47, as applicable.
 - g. Transfer Appropriation and Trust Fund Accounts. Enter the fiscal year in positions 46 and 47 or an "X" in position 47, as applicable.
 - h. Miscellaneous Receipt Accounts. Not used.
11. Positions 48--49 Appropriation Prefix. Enter the appropriation prefix (called subclass) assigned by Treasury for identification of selected transactions. The standard codes are:

61	Disbursements
71	Reimbursements

13. Position 52 Blank. Not used

FIGURE 3-2 (Con't)

14. Positions 53--56 Reporting Organization. Enter the departmental index number followed by two zeros. These positions shall agree with positions 5 through 8.
15. Positions 57--60 Blank. Not used
16. Position 61 Report Identifier. Enter "T" to identify records applicable to the Statement of Transactions and "I" to identify the records applicable to the DD Form 1400, "Statement of Inter-Fund Transactions."
17. Positions 62--63 Area Code: This code identifies the reporting department. The Air Force shall enter 61, the Army 62, and the Navy 63.
18. Position 64 Record Mark. Enter the end of the record mark.

D. TRAILER

1. Positions 1--4 Identification. Enter IEOF
2. Position 5 Blank. Not used.
3. Positions 6--10 Record Count. Enter the number of records in the file. Units will be shown in position 10. Zero fill unused portions of the field. The field shall be right justified.
4. Positions 11--80 Blanks. Not used.

FIGURE 3-2 (Cont)

0303 STATEMENT OF TRANSACTIONS (DD Form 1329 or DD Form 1329m)

030301 Purpose and Report Control Number
This section prescribes the preparation and submission of monthly reports of outlays incurred in the appropriations and funds of the Department of Defense. These reports are a valuable tool in monitoring the planned monthly execution of approved DoD programs. The reporting requirements prescribed in this section are designated as DD Form 1329.

030302 Applicability and Scope. Outlay reporting applies to the DFAS Centers as the departmental-level accounting entity for the Military Departments and the Defense Agencies with respect to outlays incurred for all military functions.

030303 Report Form and Frequency. The Statement of Transactions shall be submitted to the Director for Program and Financial Control, OUSD(C), not later than the close of business on the eighth workday of the month after the close

of the reporting month. This information shall be submitted electronically as illustrated in figure 3-2, section C. Minor deviations in the mode of submission of data are permitted if approved in advance. The DFAS has primary responsibility for the submission of this data. The DoD Components will assist the DFAS to ensure the integrity and timeliness of the data to be submitted. Hard copy Statements of Transactions, either DD Form 1329 or 1329m, shall be submitted in support of the electronic transmission (see figures 3-3 and 3-4, respectively). Report deviations must be approved in advance.

030304 Distribution. The DFAS shall furnish a Statement of Transactions to each DoD Component and other agency for which it collects or disburses showing the transactions for that Component. In addition, a Statement of Transactions summarizing the transactions by appropriation for each Defense Agency shall be provided by DFAS. These reports shall be in hard copy unless the recipient has agreed to accept the report in some other form. Report

recipients may require additional detailed information in specified tape format.

030305 Hard Copy Report Preparation

A. General

1. Each DD Form 1329 or 1329m shall show the name and office location, the period covered by the statement, the reporting department index number, and, if desired, an optional Component number for which the statement is rendered. The department index number is the two-digit number assigned by Treasury as a prefix to that department's appropriation symbols.

2. If more than one sheet is used to report the amounts of transactions, the grand total for each column shall be shown on the last page of the statement. Page totals are optional.

3. Each hard copy statement shall be signed by the officer under whose direction it was prepared.

4. Negative amounts shall be identified by the suffix "Cr."

B. Columnar Entries

1. Column a Appropriation, Fund, or Receipt Symbol. Enter the symbol of the appropriation, other fund, or receipt account for which the amounts of transactions are being reported. Include any prefix or suffix prescribed by the Treasury Department on the Classification Authorization (TFS Form 7102 or 7103). No other suffix or prefix may be shown.

2. Column b Receipts. Enter the amounts of receipt transactions (including voucher deductions which apply to general, special, and trust fund receipt accounts, net of any uncollectible (dishonored check) items and any related adjustment transactions.

3. Column c Reimbursements. Enter the amount of appropriation reimbursements collected applicable to each related appropriation or other fund account. The amounts so reported are net of any uncollectible

(dishonored check) items and any related adjustment transactions.

4. Column d Disbursements (Net of Refunds). Enter the amount of disbursements, by check, cash, or voucher deduction chargeable to each appropriation or other fund account shown in column a. The amounts so reported are net of amounts collected as refunds to the applicable appropriation or other fund. Cancelled check transactions are reported as reductions of disbursements.

030306 Electronic Media Submissions

A. For reports submitted electronically, magnetic tape or diskettes containing the information in the hard copy reports is prescribed. The information should be recorded in the following formats:

1. Tape Format

IBM labeled
ebcdic
64 characters per logical record
1280 characters per physical

record

9 track
density--1600 bpi

2. Diskette Format

3 1/2" diskette--double sided and
high density
formatted PC DOS--release 5.0 or
later

ASCII
character record length--64
paper label showing file name
and transaction count

B. The information reported shall be at the department total level.

030307 Special Reporting of Borrowing Account Transactions

A. A DoD Component becomes the mortgagor when it acquires property subject to a previous mortgage under the DoD

Homeowners Assistance Program, or when it borrows money to finance or issues a mortgage instead of immediate payment for new construction under the DoD Family Housing Program.

B. The total acquisition cost of property, including mortgages payable, shall be reported as a disbursement along with all other disbursements without prefix to liquidate the entire related obligation. The amount of the mortgage assumed shall be reported in column c as a reimbursement with prefix (97). Amounts reported shall be extracted from General Ledger account Number 2592.

C. Payments to the mortgagee shall be reported in two parts: Payments on principal as disbursements with prefix (87); Interest payments included in the balance of regular disbursements without prefix.

D. The sale of property subject to a previous mortgage that is assumed by the buyer shall be shown as a receipt or reimbursement, as appropriate, in the amount of the total sales price without prefix. Report amount of the existing mortgage assumed by the buyer as a disbursement identified by the appropriation symbol prefix (87).

030308 Special Reporting for Trust Fund Investments in U.S. Government Securities.

A. The purchase of U.S. Government securities as an investment by a trust fund must be reported as a disbursement at par value in column d identified by the prefix (88). Investments in Federal Securities are recorded in General Ledger account Number 1610. Any difference between par value and the purchase price must be shown without prefix as a disbursement in column d or as a reimbursement in column c, as the case may be. This difference is recorded in General Ledger account No. 1611.

B. Report securities acquired as a gift at par value as a disbursement in column d identified by the prefix (88). The par value is to be reported as a receipt along with all other reportable amounts in column b.

C. Report the sale of securities at par value as a receipt identified by the prefix (98) in column b. The difference between par value and the amount received shall be reported without prefix as a reimbursement or disbursement, as the case may be.

D. Detailed guidance on special reporting for the Military Retirement Fund and the Education Benefit Fund can be found in Volume 12, of this Regulation.

030309 Reconciliation of DD Forms 1329 and 1329m with SF 1219. The totals reported on DD Forms 1329 and 1329m shall be consistent with the totals for the related transactions reported on the SF 1219, "Statement of Accountability," for each disbursing officer or any consolidation of disbursing officers.

030310 Foreign Currency Transactions. A separate Statement of Transactions and Accountability is required by Volume 5 of this Regulation to meet OMB and Treasury information needs on foreign currency transactions.

030311 Equivalent Instruments.

DoD 4000.25-7-M prescribes two reports to the Treasury that are closely related to the Statement of Transactions. These reports are the Statement of Inter-Fund Transactions (DD Form 1400 or 1400m) and the Statement of Intra-Governmental Transactions (no form number). These statements are illustrated in appendices C1, C2, and C6 of DoD 4000.25-7-M. These reports serve the same purpose as Statements of Transactions; that is, they are the warrants for charging applicable appropriation or other fund accounts and crediting the applicable DoD or GSA appropriations or revolving funds on the central records of the agencies concerned and the Treasury Department. The amounts shall be reported in the tape format prescribed in figure 3-2, section C, as an integral part of the Statement of Transactions. (The amounts are not included in the disbursing officers' Statements of Accountability, although they are included in the reports of the agency that processed the transactions.)

CHAPTER 4

APPROPRIATION AND FUND STATUS REPORTS

TO BE ISSUED AT A LATER DATE

CHAPTER 5

GENERAL PURPOSE REPORTING0501 REPORT ON FINANCIAL POSITION,
(SF 220)

050101 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of the annual report on appropriations and funds required pursuant to I TFM 2-4100. The report discloses the basis on which major categories of assets are accounted for and reported, the nature of any significant restrictions on the use of assets, the amount and nature of significant contingent liabilities, and such explanatory information on the assets, liabilities and equity as is necessary to fully and clearly disclose the financial position of the reporting entity. The reporting requirements prescribed in this section are designated as SF 220 (IAR 1178-TD-XX)

050102 Applicability and Scope

The provisions of this section apply to all DoD Components. It covers the following types of appropriation and fund accounts:

- A. General funds
- B. Deposit and special funds
- C. Management and revolving funds
- D. Trust funds

050103 Report Form. I TFM 2-4100 contains a copy of the SF 220. This form may be reproduced, or a machine-produced facsimile may be used. Figure 5-1 illustrates SF 220.

050104 Frequency and Distribution

A. Reports shall be prepared as of September 30 of each year unless otherwise specified and are due to Treasury as established by Treasury's annual bulletin on year-end closing dates by memorandum.

Departmental-level accounting entities shall establish year-end closing due dates to meet reporting dates established by the DFAS.

B. Reports shall be submitted under cover of a transmittal letter signed by the responsible official. Departmental-level accounting entities will make distribution in accordance with the addresses provided in the addendum to this chapter. The Treasury Department encourages Federal agencies to submit the SF 220 series of reports on the Federal Agencies' Centralized Trial-Balance System (FACTS). To the extent DoD Components can do so, the reports should be transmitted electronically.

050105 Preparation Instructions for the SF 220

A. General. Amounts for the SF 220 and all supporting reports shall be reported in dollars. Negative figures shall be identified by the use of a minus sign (-).

B. Heading. Complete the heading identifying: (1) "as of" date of the report (September 30, 19XX); (2) reporting DoD Component and the reporting entity; and (3) OMB Identification Code (Appropriation Symbol), when applicable, and fund type. (See table 5-2.) Each OMB Identification Code assigned for type 1, 2, and 3 funds requires a separate series of reports.

C. Line 1. Fund Balance with Treasury and Cash. This is a title line for lines 1.a. through 1.d. No dollar amounts are reported on line 1. This account balance includes amounts of available expenditure authorizations as shown in the reporting departmental-level accounting entity accounts with the Treasury and as reported on TFS Form 6653, "Undisbursed Appropriation Accounts." It also indicates all other cash, currency, bank, and other financial institution amounts, and imprest funds.

1414 Advances-All Others-Public
1450 Prepayments

3. Line 3.c. Subtotal. Enter the sum of lines 3.a. and 3.b.

F. Line 4. Inventories. The amounts recorded as the value of inventories shall agree with SF 220-1 (figure 5-2).

1. Line 4.a. Operating consumables. Enter the net sum of the following general ledger accounts:

1510 Inventory for Agency Operations
1519 Allowance for Loss on Inventory for
Agency Operations
1580 Inventory in Transit

2. Line 4.b. Product or service components. Enter the net sum of the following general ledger accounts:

1520 Inventory For Sale
1529 Allowance for Loss on Inventory
for Sale
1530 Inventory-Raw Material and Supplies
1539 Allowance for Loss on Inventory-Raw
Materials and Supplies
1540 Inventory-Work in Process
1549 Allowance for Loss on Inventory-
Work in Process
1550 Inventory-Finished Goods
1559 Allowance for Loss on Inventory-
Finished Goods

NOTE: Only the Special Defense Acquisition Fund (SDAF) shall report amounts under account 1520, "Inventory For Sale," and account 1529, "Allowance for Loss on Inventory for Sale."

3. Line 4.c. Stockpiled materials.

Enter the net sum of the following general ledger accounts:

1570	Stockpiled Materials and Supplies
1579	Allowance for Loss on Stockpiled Materials and Supplies

4. Lines 4.d.1. through 4.d.4.

Other. Enter the net sum of the following general ledger accounts:

1560	Other Inventory
1569	Allowance for Loss on Other Inventory

5. Line 4.e. Subtotal. Enter the

sum of lines 4.a. through 4.d.

G. Line 5. Investments, net. The amounts recorded as the value of investments shall agree with SF 220-1, (figure 5-2).

1. Line 5.a. Federal securities.

Enter the net sum of the following general ledger accounts:

1610	Federal Securities (At Par)
1611	Federal Securities-Unamortized Premium or Discount

2. Line 5.b. Non-Federal

securities. No entries shall be made by DoD Components without prior approval of the OUSD(C).

3. Line 5.c. Other. No entries

shall be made by DoD Components.

4. Line 5.c. Subtotal. Enter the

sum of lines 5.a. through 5.c.

H. Line 6. Loans receivable. The amounts recorded as loans receivable shall agree with SF220-8, "Direct and Guaranteed Loans Reported by Agency and Program Due From the Public" (figure 5-3) and SF 220-9, "Report on

Accounts and Loans Receivable Due From the Public" (figure 5-4).

1. Line 6.a.1. Federal agencies, Current. Enter the balance in general ledger account 1351, "Loans Receivable-Government-Current."

2. Line 6.a.2. Federal agencies, Noncurrent. Enter the balance in general ledger account 1352, "Loans Receivable-Government-Noncurrent."

3. Line 6.b.1. Public, Current. Enter the balance in general ledger account 1353, "Loans Receivable-Public-Current."

4. Line 6.b.2. Public, Noncurrent. Enter the balance in general ledger account 1354, "Loans Receivable-Public-Noncurrent."

5. Line 6.c. Less Allowances. Enter the balance in general ledger account 1359, "Allowance for Loss on Loans Receivable."

6. Line 6.d. Subtotal. Enter the sum of lines 6.a. through 6.c.

I. Line 7. Property, plant, and equipment, net. The amounts recorded as plant, property, and equipment shall agree with the SF 220-1, "Additional Financial Information" (figure 5-2).

1. Line 7.a. Structures, facilities, and leasehold improvements. Enter the sum of the following general ledger accounts:

1730	Buildings
1740	Other Structures and Facilities
1820	Leasehold Improvements

2. Line 7.b. Military equipment. Enter the sum of the following general ledger accounts:

1760	Military Equipment (Summation of Accounts 1761-1766)
1770	Equipment in Transit

3. Line 7.c. ADP software.
Enter the sum of the following general ledger account 1830, "Automated Data Processing Software."

4. Line 7.d. Equipment. No entry shall be made without the prior approval of DFAS.

5. Line 7.e. Assets under capital lease. Enter the balance in general ledger account 1810, "Assets Under Capital Lease." This account indicates the fair market value of assets under capital lease. Amounts due under capital leases shall also be reported in the liabilities section of this report.

6. Lines 7.f.1. through 7.f.4. Other. Enter the sum of the following general ledger accounts:

1840 Other Natural Resources
1890 Other Fixed Assets

Identify the nature of any asset that (a) comprises more than 25 percent of the total amount reported for this category, and (b) exceeds \$100,000.

7. Line 7.g. Construction-in-progress. Enter the balance in general ledger account 1720, "Construction in Progress."

8. Line 7.h. Land. Enter the balance in general ledger account 1710, "Land."

9. Line 7.i. Allowances. Enter the sum of the following general ledger accounts:

1739 Accumulated Depreciation on Buildings
1749 Accumulated Depreciation on Other Structures and Facilities
1769 Accumulated Depreciation on Military Equipment
1819 Accumulated Depreciation on Assets Under Capital Lease
1829 Accumulated Amortization on Leasehold Improvements
1839 Accumulated Amortization on Automated Data Processing Software

1849 Allowance for Depletion

10. Line 7.j. Subtotal. Enter the net sum of lines 7.a. through 7.i.

J. Line 8. Other assets

1. Lines 8.a. through 8.d. Other assets. Enter the net sum of the following general ledger accounts:

1900 Other Assets, Net
1919 Allowance for Loss on Acquired Collateral

Identify the nature of any asset that (a) comprises more than 25 percent of the total amount reported for this category, and (b) exceeds \$100,000.

2. Line 8.e. Subtotal. Enter the sum of lines 8.a. through 8.d.

K. Line 9. Total assets. Enter the sum of lines 1. through 8.

L. Line 10. Accounts payable

1. Line 10.a. Federal agencies. Enter the net sum of the following general ledger accounts:

2111 Accounts Payable-Government-Current
2112 Accounts Payable-Government-Noncurrent

2. Line 10.b. Public. Enter the net sum of the following general ledger accounts:

2113 Accounts Payable-Public-Current
2114 Accounts Payable-Public-Noncurrent
2115 Claims Payable
2120 Disbursements in Transit
2130 Contract Holdbacks
2190 Other Accrued Liabilities

NOTE: The amount reported on this line shall include all amounts payable to the public, off-budget U.S. Government Agencies and instrumentalities, and deposit funds.

3. Line 10.c. Subtotal. Enter the sum of lines 10.a. and 10.b.

M. Line 11. Interest payable

1. Line 11.a. Federal agencies. Enter the interest owed to Federal agencies; such as, Treasury and the Federal Financing Bank. This line is not applicable to DoD Components.

2. Line 11.b. Public. Enter the balance in general ledger account 2140, "Accrued Interest Payable."

3. Line 11.c. Subtotal. Enter the sum of lines 11.a. and 11.b.

N. Line 12. Accrued payroll and benefits. Enter the balance in general ledger account 2210, "Accrued Funded Payroll and Benefits." This account balance includes the total funded (appropriated) but unpaid personnel compensation and benefits that have been earned by employees as of the close of the reporting period.

O. Line 13. Accrued unfunded annual leave. Enter the balance in general ledger account 2220, "Accrued Unfunded Annual Leave."

P. Line 14. Unearned revenue (advances)

1. Line 14.a. Federal agencies. Enter the balance in general ledger account 2311, "Unearned Revenue-Advances from Government Agencies and Funds."

2. Line 14.b. Public. Enter the sum of the following general ledger accounts:

2312	Unearned Revenue-Advances from the Public
2320	Deferred Credits

3. Line 14.c. Subtotal. Enter the sum of lines 14.a. and 14.b.

Q. Line 15. Deposit Funds. Enter the balance in general ledger accounts 2410,

"Treasury Cash Advances to Disbursing Officers" and 2411, "Deposit Fund Liabilities."

R. Line 16. Debt issued under borrowing authority. Line 10., SF 220-1, "Additional Financial Information" (figure 5-1) requires disclosure of changes in account balances reported on this line.

1. Line 16.a. Gross Federal debt. No entries shall be made by a DoD Component.

2. Line 16.b. Intragovernmental debt. Enter the sum of the following general ledger accounts:

2510	Borrowing from Treasury
2520	Borrowing from Federal Financing Bank
2540	Participation Certificates

3. Line 16.c. Other debt. Enter the sum of the following general ledger accounts:

2530	Securities Issued by Federal Agencies Under Special Financing Authority
2590	Other Debt

4. Line 16.d. Subtotal. Enter the sum of lines 16.a. through 16.c.

S. Line 17. Actuarial liabilities. Further disclosure of amounts reported on this line shall also be reported on line 9. of SF 220-1 (figure 5-1).

1. Line 17.a. Pension plans. Enter the balance in general ledger account 2610, "Retirement Plans." Actuarially determined liabilities for the DoD pension plan administered by DFAS shall be reported on this line.

2. Line 17.b. Insurance and annuity programs. Enter the sum of the following general ledger accounts:

2620	Insurance Plans
2690	Other Actuarial Liabilities

3. Line 17.c. Subtotal. Enter the sum of lines 17.a. and 17.b.

T. Line 18. Other liabilities

1. Lines 18.a. through 18.d. Other liabilities. Enter the sum of the following general ledger accounts:

2910 Prior Liens Outstanding on
Acquired Collateral
2920 Contingent Liabilities
2990 Other Liabilities (Summation of
accounts 2991 - 2993)

2. Line 18.e. Subtotal. Enter the sum of lines 18.a. through 18.d. Identify the nature of any liability that (a) comprises more than 25 percent of the total amount reported for this category, and (b) exceeds \$100,000. Liabilities related to accruals of loss contingencies shall be reported in this category as well as long-term agreements and contracts not reported elsewhere. Refer to the instructions in this chapter for reporting accounts payable.

U. Line 19. Total liabilities. Enter the sum of lines 10. through 18.

V. Lines 20. and 21. Appropriated fund equity. This section shall be completed by all reporting entities for revolving fund and non-revolving fund activities. Fund type 5 (Special Funds, Deposit Funds, and General Funds) activities, shall report only on lines 20., 21., 24., and 25., as applicable. Fund type 1 (Revolving Funds) activities shall report only on lines 22., 24., and 25. Fund types 2, 3, and 4 (Trust Funds) activities shall report only on lines 23., 24., and 25.

1. Line 20. Unexpended financed budget authority. This line is used only by fund type 5 (Special Funds, Deposit Funds, and General Funds) activities.

a. Line 20.a. Unexpended appropriations. Enter the net sum of the following general ledger accounts. (Note: All unliquidated obligation balances of successor "M" accounts shall be included in this line. Also, unexpended appropriations may reflect a negative balance due to the mechanics employed to arrive at the balance. A "negative" balance

shall not be construed as a violation of the Antideficiency Act.):

1010 Fund Balance with Treasury
1100 Cash
1200 Foreign Currency
1300 Receivables, Net
1400 Advances and Prepayments
2000 Liabilities

b. Line 20.b. Less: Unfilled customer orders (Federal). No entries shall be made by DoD Components.

c. Line 20.c. Subtotal.
Enter the net sum of lines 20.a. and 20.b.

2. Line 21. Invested capital.
This line is used only by fund type 5 (Special Funds, Deposit Funds, and General Funds) activities. Enter the sum of the following general ledger accounts:

1500 Inventories, Net
1600 Investments, Net
1700 Fixed Assets, Net
1800 Other Fixed Assets
1900 Other Assets, Net

W. Line 22. Revolving fund equity.
This line is used only by fund type 1 (Business Operations Fund) activities.

1. Line 22.a. Appropriated capital. Enter the balance in general ledger account 3200, "Invested Capital."

2. Line 22.b. Cumulative results. Enter the balance in general ledger account 3300, "Results of Operations."

3. Line 22.c. Donations. No entries shall be made by DoD Components.

4. Line 22.d. Subtotal. Enter the sum of lines 22.a. through 22.c.

X. Lines 23. through 25. Trust fund equity

1. Line 23. Trust fund balance(s). This line is used by fund types 2, 3,

and 4 (Trust Funds) activities. Enter the sum of the applicable 3000 general ledger account series (such as, 3100, 3220, 3230, 3310, 3400 and 3500).

2. Line 24. Total equity. This line is used by all fund type activities. Enter the sum of lines 20., 21., 22., and 23., as applicable.

3. Line 25. Total liabilities and equity. This line is used by all fund type activities. Enter the sum of lines 19. and 24.

Y. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number, and address, along with the supervisor's name and telephone number.

0502 ADDITIONAL FINANCIAL INFORMATION, SF 220-1

050201 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of additional financial information necessary to support the Report on Financial Position (SF 220). Where circumstances warrant additional disclosure, DoD Components are responsible for assuring that all appropriate disclosures considered necessary for fair presentation of their financial position are included in this supporting report. The reporting requirements prescribed in this section are designated as SF 220-1, SF 220.

050202 Applicability and Scope. The provisions of this section apply to all DoD Components and cover the same fund types and appropriations as the SF 220 report on financial position, as identified in paragraph 050102 of this chapter.

050203 Report Form. DoD Components may either reproduce copies from the Treasury original provided in I TFM 2-4100 or use machine produced facsimiles. A copy of the SF 220-1 is provided as figure 5-2.

050204 Frequency and Distribution. The report shall be submitted as of September 30 of each year by the date established by the appropriate departmental-level accounting entity. Negative reports shall be submitted, when appropriate.

050205 Preparation Instructions for the SF 220-1

A. General. The general ledger account balances to be used in preparing this supporting report are the same as those account balances used to prepare related lines in the SF 220 report. The amounts reported shall agree with the balances reported in the SF 220 report.

B. Heading. Enter on the designated lines (1) date of the report, (2) name of the DoD Component submitting the report, (3) reporting entity, (4) OMB identification code, and (5) fund type.

C. Line 1. Fund balances with Treasury

1. Column (a) Treasury account symbols. Enter the appropriation or fund account symbol.

2. Column (b) Fund balance with Treasury. Enter the account balance, including unexpended balances of transfer appropriation accounts from other agencies and a subtotal for all balances.

3. Column (c) Clearing accounts. Enter the total of balances in clearing accounts and a subtotal for all balances. Columns (b) and (c) shall equal the amount reported in the SF 220, line 1.a.

4. Column (d) Foreign currency funds. Enter foreign currency fund balances reported in the SF 220, line 1.c. (except as noted in the instructions for column (e)) and a subtotal for all balances.

5. Column (e) Foreign currency allowances. This column is applicable only to those DoD Components reporting nonpurchased foreign currency that is accounted for in Treasury-assigned FT account symbols. Components should report gross foreign currency funds in column (d), the allowances for foreign currency accounts in column (e) and a subtotal for amounts. The net of columns (d) and (e) shall equal the foreign currency reported in the SF 220, line 1.c.

6. Column (f) Total. Enter the net amount posted for each account symbol in all columns and a grand total on the subtotal line.

D. Line 2. Cash

1. Lines 2.a.1. through 2.a.5. Restricted cash. Enter the amount and describe any cash holdings that have restrictions.

2. Line 2.b. Subtotal. Enter the total of all amounts reported on line 2.a.

3. Line 2.c. Unrestricted cash. Enter the total of all cash holdings having no restrictions.

4. Line 2.d. Total cash. Enter the total of lines 2.b. and 2.c. This total shall equal SF 220, line 1.b.

E. Line 3. Total: Fund balances with Treasury and cash. Enter the total of lines 1. and 2. This total shall equal SF 220, line 1.d.

F. Line 4. Summary of transfer appropriation accounts. Enter in columns (a) through (c) the required transfer appropriation account data. This data should be entered only by the parent (transferor) account. Transfer appropriation accounts are established to receive (and subsequently disburse) allocations that are treated as nonexpenditure transactions at the time the allocation is made, including certain transfers under section 601 of the Economy Act (31 U.S.C. 1535), and similar provisions of law. An example of a transfer appropriation account and parent account is 97-11X8242 and 11X8242. Allocation holders shall not report status of allocations on this line.

G. Line 5. Investments

1. Lines 5.a.1. and 5.a.2. Federal securities. Enter the data required for holdings in securities issued by Federal agencies. Holdings in Federal securities should be reported as marketable or nonmarketable. Marketable Federal securities are bought and sold on the open market. Nonmarketable Federal securities are market-based securities issued by the Bureau of the Public Debt and purchased exclusively through Treasury's Finance and Funding Branch (for example, MK bills, MK notes, MK bonds, par value special issues, and 1-day certificates).

2. Line 5.b. Subtotal. Enter the total of all amounts reported as nonmarketable and marketable securities. The net (columns (1) and (4)) shall equal SF 220, line 5.a.

3. Lines 5.c.1. through 5.c.4. Non-Federal securities. Enter the data required and describe any holdings in securities issued by organizations (such as State and local governments, private corporations, and government-sponsored enterprises) other than the Federal Government. DoD Components should not report values in this section without the prior approval of DFAS.

4. Line 5.d. Subtotal. Enter the total of all amounts reported as Non-Federal securities. The net (columns (1) and (4)) shall equal SF 220, line 5.b.

5. Lines 5.e.1. through 5.e.4. Other investments. Enter the data required and described any holdings in other investments.

6. Line 5.f. Subtotal. Enter the total of all amounts reported as other investments. The net (columns (1) and (4)) shall equal SF 220, line 5.c.

FIGURE 5-2 (Cont)

7. Line 5.g. Total. Enter the total of lines 5.b., 5.d., and 5.f. The net (columns (1) and (4)) shall equal SF 220, line 5.d.

H. Line 6. Inventory

1. Lines 6.a.1. through 6.a.4. Categories. Disclose the inventory amount and cost method used in arriving at the value of inventory reported on line 4. of the SF 220 for each inventory category in accordance with the following code: a-FIFO, b-LIFO, c-moving average, d-weighted average, e-other (describe).

2. Line 6.b. Restrictions on inventory use, sale and disposition. Describe any restrictions on the use, sale, or other disposition of inventory.

I. Line 7. Property, plant, and equipment. For each class of fixed assets (lines 7.a. through 7.i.) provide the information requested in each column on the chart. Use the following instructions as a reference to information that should be reported.

1. Column 1 - Depreciation methods. Depreciation methods for depreciable assets are: (a) Interest (sinking fund), (b) Straight line, (c) Double-declining balance, (d) Sum-of-the-year's digits, (e) Production (activity or use method), and (f) Other. Refer to chapter 6, of Volume 4, of this regulation for additional guidance on depreciation.

2. Column 2 - Range of service life. Service life for depreciable assets are: (a) 1 to 2 years, (b) 3 to 5 years, (c) 6 to 10 years, (d) 11 to 15 years, (e) 16 to 20 years, (f) 21 to 25 years, and (g) over 25 years (describe).

3. Column 3 - Fully Depreciated Assets. Enter the dollar amount and one of the following codes: (a) original purchase price, or (b) market value.

4. Column 4 - Non-Depreciated Assets. Enter the dollar amount and one of the following: (a) not subject to depreciation or (b) other (describe).

5. Column 5. Assets Being Depreciated. Enter the dollar amount of assets being depreciated or amortized.

6. Column 6 - Value Property Not In Use. Enter the dollar amount and one of the following codes: (a) obsolete, (b) storage (lay-away), (c) assets awaiting disposal, or (d) Property held for military contingency. (DoD Components should use (d) unless property is in a PDO yard.) In addition, disclose in the space provided the capitalization policy used by the reporting DoD Component and the basis used in valuing fixed assets. The amounts reported should agree with the balance reported on the SF 220, line 7., less the amount for land and leases.

J. Line 8. Leases

1. Lines 8.a.1. through 8.a.12. Entity as lessee. Enter future lease costs by major category for all noncancelable leases with terms longer than 1 year (for example, buildings, equipment, telecommunications). Normally DoD Components will have no noncancellable leases. Report only to the extent that statute precludes cancellation.

2. Lines 8.b.1. through 8.b.12. Entity as lessor. Enter future lease revenues by major category for all noncancelable leases with terms longer than 1 year (for example, land, oil, gas).

K. Line 9. Actuarial liabilities. Report in this category the actuarial liabilities and the net assets of each pension, insurance, or annuity program administered by the reporting DoD Component. If more than one pension, insurance, or annuity program is administered by the reporting DoD Component, submit separate data on each plan or program.

1. Line 9.a. Federal employee pension plans. Report information derived from the most recent annual pension report under Public Law 95-595).

a. Line 9.a.1. Enter the name of the plan.

b. Line 9.a.2. Enter the amount of the present value of accumulated plan benefits. This amount shall agree with line 17.a. of the SF 220.

c. Line 9.a.3. Enter the assumed interest rate used.

d. Line 9.a.4. Enter the amount of net assets held to pay benefits.

2. Line 9.b. Insurance or annuity programs. Report actuarial liabilities of those programs based on actuarial estimates of future benefits or payments; for example, veterans benefits, black lung disability program, etc., administered by the reporting DoD Component.

a. Line 9.b.1. Enter the name of the program.

b. Line 9.b.2. Enter the amount of the present value of accumulated future benefits. This amount shall agree with line 17.b. of the SF 220,

c. Line 9.b.3. Enter the assumed interest rate used.

d. Line 9.b.4. Enter the amount of net assets held to pay future benefits.

3. Line 9.c. Social security trust funds. DoD Components shall not report amounts on this line. Leave line 9.c.1. through 9.c.3. blank.

L. Line 10. Debt issued under borrowing authority

1. Line 10.a. Gross Federal debt. DoD Components shall not report amounts on this line. Leave lines 10.a.1. through 10.a.5. blank.

2. Line 10.b. Intragovernmental debt. Enter the amounts required relative to any borrowings from Federal agencies. Separately report borrowings from the Treasury on lines 10.b.1.a. through 10.b.1.e., and borrowings from the Federal Financing Bank on lines 10.b.2.a.

through 10.b.2.e. For borrowings from any other Federal agencies, provide the name of the agency and enter the amounts required on lines 10.b.3.a. through 10.b.3.e. Lines for new borrowings and repayments should not include amounts that result from refinancing. The amount of beginning balance borrowings that were refinanced during the period should be entered on the line for refinancing. Total ending balance on line 10.b.4. for all borrowings from Federal agencies shall equal the amount reported on SF 220, line 16.b.

3. Line 10.c. Other. Enter on lines 10.c.1. through 10.c.4. any other debt that is not included in lines 10.a and 10.b. Provide a brief description and amount of the debt. The total of all amounts reported on this line should equal the amount reported on SF 220, line 16.c.

4. Line 10.d. Total. Enter the total of the ending balances on lines 10.a., b., and c. This total shall equal the amount reported on SF 220, line 16.d.

M. Line 11. Unexpended budget authority. This category provides details relating to balances of budget authority that result from the fact that not all budget authority enacted in a fiscal year is obligated and paid out in that same year.

1. Line 11.a. Unobligated. Enter the total unobligated balances of budget authority. This shall agree with column (11) of the TFS Form 2108, "Year-end Closing Statement."

2. Line 11.b. Undelivered orders. Enter the amounts for goods and services that have not yet been received, unperformed contracts, and similar outstanding obligations. The amounts relating to Federal agencies should be reported on line 11.b.1., separately from all others (public), which are to be reported on line 11.b.2. The total amount of public and Federal undelivered orders shall agree with column (9) of the TFS Form 2108, "Year-end Closing Statement."

3. Line 11.c. Total. Enter the total of lines 11.a., 11.b.1., and 11.b.2.

N. Line 12. Unfinanced budget authority (4000 Series-Budgetary Accounts)

1. Line 12.a. Contract authority. Enter the total contract authority that has not been liquidated.

2. Line 12.b. Borrowing authority. Enter the total borrowing authority that has been unused.

3. Line 12.c. Unfilled customer orders (Federal). Enter the amount of unfilled customer orders from other Federal entities.

4. Line 12.d. Total. Enter the total of lines 12.a., 12.b., and 12.c.

O. Line 13. Summary of commitments and contingencies (4000 Series-Budgetary Accounts). Do not report contingent liabilities that were reported as liabilities on the SF 220.

1. Line 13.a. Guaranteed or insured loans. Enter on lines 13.a.1. through 13.a.4. the requested data applicable to guaranteed or insured loans.

2. Line 13.b. Insurance programs. Enter on lines 13.b.1. through 13.b.4. the requested data applicable to insurance programs.

3. Line 13.c. Indemnity agreements. Enter on line 13.c.1. through 13.c.4. the requested data applicable to indemnity agreements.

4. Line 13.d. Unadjudicated claims. Enter on line 13.d.1. through 13.c.3. the requested data applicable to unadjudicated claims.

5. Line 13.e. Commitments to international institutions. Enter on lines 13.e.1. and 2. the name and the amount of programs committing the use of U.S. Government funds in the future such as callable capital of international organizations.

6. Line 13.f. Other commitments or contingencies. Describe and enter on line

13.f.1. through 13.f.3. any other contingent liabilities or commitments (for example, long-term contracts) that are not included in any of the above categories and range of expected future losses.

7. Line 13.g. Accrual for loss contingencies. Enter the amount of any accrual established for loss contingencies. Normally, this amount will be -0- unless approved by the OUSD(C).

P. Line 14. Other disclosures. Examples for other disclosures are changes in the reporting entity, such as acquiring new areas of responsibility. Also report any events that may have an impact upon the reports that occurred after the close of the reporting period. Report any material prior period adjustments.

Q. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number, and address along with the supervisor's name and telephone number.

0503 DIRECT AND GUARANTEED LOANS REPORTED BY AGENCY AND PROGRAM DUE FROM THE PUBLIC, SF 220-8

050301 Purpose and Accounting Report Number. This section provides the report form and instructions for preparation of the supporting report, Direct and Guaranteed Loans Reported by Agency and Program Due From the Public. The supporting report provides an analysis of the outstanding contingent liability for guaranteed loans. The reporting requirements prescribed in this section are designated as SF 220-8, SF 220.

050302 Report Form. The Treasury report format provided in I TFM 2-4100) may be reproduced or a machine-produced facsimile may be used. A copy of the SF 220-8 is provided as figure 5-3.

050303 Frequency and Distribution

A. The SF 220-8 shall be submitted as of September 30 of each year by the due dates established by the appropriate

Standard Form 220-8
January 1992

departmental-level accounting entity. The report shall be attached to the SF 220 and shall be distributed to the addresses provided in the addendum to this chapter.

B. The SF 220-8 shall be prepared and submitted annually by each reporting DoD Component (except for the Defense Security Assistance Agency (DSAA)) that has a loan program, either direct or guaranteed. The DSAA is required to submit an SF 220-8 quarterly.

050304 Preparation Instructions for the SF 220-8

A. PART I STATUS OF GUARANTEED LOANS. Part I of the SF 220-8 addresses the status of guaranteed loans. Outstanding loan balances are captured; guaranteed loans are classified according to collection probability; and delinquent guaranteed loans are aged. Guaranty amounts should be reported on the form in terms of principal only, except for cases in which the agency provides a guaranty of both principal and interest.

1. Section A - Guaranteed Loans Outstanding shows: the beginning fiscal year balance of outstanding guaranteed loans; cumulative activity during the fiscal year as of the end of the reporting period, for new guarantees, collections, terminations due to defaults, and adjustments; and, the outstanding balance at the end of the reporting period. The "Adjustments" line is for reporting changes in guaranteed loan balances that are not the result of new guarantees, collections, or terminations due to defaults. These changes should be footnoted and include:

- o Correction to a previously reported guaranteed loan amount.
- o Refunds of amounts previously reported as paid.
- o Adjustments made in a prior period.

a. Line 1. Outstanding, Beginning of FY. Enter the number and amount of all guaranteed loans outstanding as of the beginning of the fiscal year. These figures must

agree with the ending balance reported on the year-end SF 220-8 for the previous fiscal year. The beginning balance remains unchanged throughout the fiscal year. These figures equal the sum of lines 1.a. and 1.b. of this section.

(1). Line 1.a. Agency Share of Risk. Enter the amount of guaranteed loans outstanding for which the agency has assumed risk (guaranteed).

(2). Line 1.b. Lender Share of Risk. Enter the amount of guaranteed loans outstanding for which the lenders have assumed risk.

b. Line 2. New Guaranteed Loans. Enter the number and amount of all guaranteed loans disbursed by approved lenders during the current fiscal year.

c. Line 3. Collections. Enter the amount of payments made to lenders by borrowers on guaranteed loans during the fiscal year. The dollar amount reported captures all collections, including partial payments. Enter collections with a minus (-) sign before the figures. Non-cash collections (e.g., personal property) are to be footnoted.

d. Line 4. Guaranteed Loans Terminated. Enter the number and amount of accounts for loans that have been terminated for default during the fiscal year. Include only those loans where a default claim has been paid and the guarantee is no longer in effect. Entries on this line are preceded by a minus (-) sign.

e. Line 5. Adjustments. Enter the amount of accounts for guaranteed loans adjusted and transferred either into or out of guaranteed loan balances during the fiscal year. Terminations for reasons other than default and prior period adjustments are also included on this line. All amounts reported on this line are footnoted; these figures may be either positive or negative.

f. Line 6. Outstanding, End of Period. Enter the number and amount of guaranteed loans outstanding at the end of the

reporting period. The amount is equal to the sum of lines 1. through 5. of this section, realizing that lines 3. and 4. are negative figures and line 5. may be either positive or negative. The amount also equals the sum of lines 6.a. and 6.b. of this section. Amounts reported on this line represent principal only.

(1). Line 6.a. Agency Share of Risk. Enter the amount of guaranteed loans outstanding for which the agency has assumed risk (guaranteed).

(2). Line 6.b. Lender Share of Risk. Enter the amount of guaranteed loans outstanding for which the lenders have assumed risk.

2. Section B - Delinquent and Rescheduled Guaranteed Loans contains an aging schedule of guaranteed loan delinquencies. The amounts include delinquent guaranteed loans as of the end of the reporting period. The following criteria must be used when preparing this section:

- o Guaranteed loans are recorded as delinquent if not paid by the payment due date unless terms of the contract or agreement provide otherwise. Loans are aged from the payment due date or the day notification of the debt was mailed.

a. Line 1. Total Delinquencies Over 30 Days. Enter the number and amount of delinquent guaranteed loans as of the end of the quarterly reporting period. The amount to be reported is ordinarily that of the past due payment; however, when the full amount of the account is formally due and declared payable, then the entire amount of the loan is reported as delinquent. The amount is equal to lines 1.a. through 1.f. of this section.

(1). Lines 1.a. through 1.f. Enter on the appropriate line item the amount of guaranteed loans that are delinquent for 31 to 60 days, 61 to 90 days, 91 to 120 days, 121 to 180 days, 181 to 360 days, and over 1 year.

b. Line 2. Loans Rescheduled. Enter the number and amount of delinquent guaranteed loans for which terms and conditions of the original lending agreements were renegotiated during the reporting period to establish new terms or conditions for facilitating debt repayment. Each rescheduling of a loan is individually counted.

3. Section C - Portfolio Status shows the number and amount of guaranteed loans, classified according to their collection probability, as of the reporting period. Agencies classifying guaranteed loans into different categories should, for this report, adapt their information to the five categories identified on lines 1.a. through 1.e. in this section (i.e., Comptroller of the Currency's model risk rating as provided in Appendix 5 to OMB Circular A-129). Also included in this section are loan loss estimates which are the anticipated long-term losses (net of collateral liquidation and other recoveries) from the portfolio based on the analysis of collection probability and other factors.

a. Line 1. Loan classification. Enter the total number and amount of guaranteed loans outstanding at the end of the reporting period. These figures equal the sum of lines 1.a. through 1.e. of this section. The number and amount must agree with Part I, Section A, line 6. of this report. For commercial loans, all classifications (line 1.a. through 1.e.) are applicable. For consumer loans, use only those classifications listed on lines 1.a., 1.c., and 1.e.

(1). Line 1.a. Problemless. Enter the number and amount of loans in which payments are being made consistent with terms of the agreement (i.e., non-delinquent.)

(2). Line 1.b. Program standard (commercial only). Enter the number and amount of loans in which assets are potentially weak, but may meet minimum program standards for creditworthiness. Assets in which actual, not potential, weaknesses are evident and significant should be considered for more serious analyses. This line item is not applicable for consumer loans.

(3). Line 1.c. Substandard. Enter the number and amount of loans in which assets contain actual weaknesses that jeopardize collection of the debt. They are characterized by the distinct possibility that the lender will sustain some loss if the deficiencies are not corrected. For consumer accounts, loans with four (4) missed payments should be classified as "substandard."

(4). Line 1.d. Doubtful (commercial only). Enter the number and amount of loans in which liquidation of an asset for full value is improbable and the possibility of loss at this time is high; however, certain conditions exist that may positively affect the asset. This line item is not applicable for consumer loans.

(5). Line 1.e. Loss. Enter the number and amount of loans in which assets are determined to be uncollectible and of such little value that their continuance as assets is not warranted. For consumer accounts, loans with five (5) or more missed payments should be classified in this category.

b. Line 2. Loan Loss Estimate. Enter the number and amount of estimated future losses as of the reporting period. The total portfolio less any recoveries should be considered when determining a loan loss estimate.

B. PART II PORTFOLIO MANAGEMENT BY AGENCY. Part II of the SF 220-8 reflects the beginning balance, outstanding balance, and activity of claims that were submitted by lenders to the agency during the fiscal year for payment. Balances for defaulted guaranteed loans and real property inventories are also shown.

1. Section A - Claims shows outstanding balances and activity for claims submitted by lenders to the agency during the fiscal year. The amounts in this section include principal, interest, and additional costs due to lenders.

a. Line 1. Outstanding Claims, Beginning of FY. Enter the number and amount of claims outstanding (principal, interest,

etc.) at the beginning of the fiscal year. These figures must agree with the ending balance reported on the year-end SF 220-8 for the previous fiscal year. The beginning balance remains unchanged throughout the fiscal year.

b. Line 2. Claims Filed. Enter the number and amount for all new claims (principal, interest, etc.) filed with the agency during the fiscal year.

c. Line 3. Claim Amounts Denied/Adjusted/Reduced. Enter the number and amount (principal, interest, etc.) for claims that were either denied, adjusted, or reduced by the agency during the fiscal year. The amounts reported represent the full value of the denials, the amount of the adjustments, and the amount of the reductions. Entries on this line are preceded by a minus (-) sign.

d. Line 4. Claims Paid. Enter the number and amount of claims that were paid by the agency during the fiscal year. The amount equals the sum of lines 4.a. and 4.b. of this section. Entries on this line are preceded by a minus (-) sign.

(1). Line 4.a. For full outstanding guarantee. Enter the number and amount of claims that were paid for the full outstanding guarantee (plus any interest and lender costs.) Entries on this line are preceded by a minus (-) sign.

(2). Line 4.b. For balance after lender liquidation. Enter the number and amount of claims that were paid (including any interest and lender costs) after the lender has liquidated all available property. Entries on this line are preceded by a minus (-) sign.

e. Line 5. Outstanding Claims, End of Period. Enter the outstanding number and amount of claims as of the end of the reporting period. The amount equals the sum of lines 1. through 4. of this section, recognizing that lines 3. and 4. are negative figures.

2. Section B - Defaulted Guaranteed Loans shows the balances for defaulted guaranteed loans (principal, interest, etc.) which have been assumed by the agency during the fiscal year and for which claims were paid. Upon payment of reinsurance, defaulted guaranteed loans are to be reported as loans receivable on the SF 220-9, "Report on Accounts and Loans Receivable Due From the Public." Any differences between the totals on line 4., Section A, Part II, and line 1., of this Section must be explained in a footnote.

a. Line 1. New Defaulted Guaranteed Loans Receivable. Enter the number and amount (principal, interest, etc.) of all defaulted guaranteed loans for which reinsurance has been paid and/or claims were paid during the fiscal year. This line item equals the sum of lines 1.a. and 1.b. of this section.

(1). Line 1.a. Assigned in full. Enter the number and amount of defaulted loan claims for the full amount of the guaranty outstanding.

(2). Line 1.b. Deficiency. Enter the number and amount of defaulted collateralized loans whereby the net proceeds from liquidation were insufficient to cover that portion of the default amount which the agency guaranteed.

3. Section C - Real Property Inventory shows the outstanding balances and classifications for real property owned by the agency. The property values are the appraised values of properties at the time of acquisition. If the appraised value was not used, please provide a footnote to explain the method used.

a. Line 1. Outstanding, Beginning of FY. Enter the number and value of real properties outstanding at the agency (i.e., title held by the agency) at the beginning of the fiscal year. These figures must agree with the outstanding balance reported on the year-end SF 220-8 for the previous fiscal year. The beginning balance remains unchanged throughout the fiscal year. This balance should represent the appraised value at the time of acquisition. If the

appraised value at the time of acquisition is not used, please provide a footnote which explains the method used to value the property.

b. Line 2. Property Acquired. Enter the number and value of properties acquired (i.e., title held) by the agency during the fiscal year. The amount reported on this line should represent the appraised value at the time of acquisition. If the appraised value at the time of acquisition is not used, please provide a footnote which explains the method used.

c. Line 3. Property Liquidated. Enter the number and value of properties that were liquidated by the agency during the fiscal year. The amount should be the liquidated value of the property (gross selling price). If this value is not used, please provide a footnote which explains the method used. Figures on this line are preceded by a minus (-) sign.

d. Line 4. Adjustments. Enter the amount for adjustments made to real property during the fiscal year. These changes include prior period adjustments (e.g., mathematical corrections); reappraisals; and the difference between the liquidated value of the property and the appraised value of the property at the time of acquisition. All amounts reported on this line are footnoted; these figures may be either positive or negative.

e. Line 5. Balance, End of Period. Enter the number and amount for the outstanding balance of real property at the end of the reporting period. The amount equals the sum of lines 1. through 4. of this section, recognizing that line 3. is negative and that line 4. may be either positive or negative. This line also equals the sum of lines 5.a. through 5.e. of this section.

(1). Line 5.a. Single family housing. Enter the number and amount of houses for this category.

(2). Line 5.b. Multi-family housing. Enter the number and amount of properties for this category.

(3). Line 5.c. Farms.

Enter the number and amount of farms, including land, dwellings, or other buildings such as barns.

(4). Line 5.d.

Commercial properties. Enter the number and amount of commercial properties. Properties making up a commercial complex (shopping center, etc.) are to be treated as a single property.

(5) Line 5.e. Other.

Enter the number and amount for properties not covered by the above categories. Included in this category is undeveloped and partially developed land. Entries on this line must be footnoted.

C. Part III LENDER MANAGEMENT BY AGENCY. Part III of the SF 220-8 focuses on activities the Federal/guaranty agency conducts to certify, review, and sanction lenders who participate in guaranteed loan programs.

1. Section A - Certification and Reviews shows analysis of current activity involving lender certification and review during the fiscal year.

a. Line 1. Total Number of Lenders Participating. Enter the number of lenders who are participating in guaranteed loan programs at the end of the reporting period.

b. Line 2. Lender Certifications reflect the number of lenders that were either approved or disapproved by the agency for participation in a guaranteed loan program during the fiscal year.

(1). Line 2.a. Approved.
Enter the number of lenders approved by the agency.

(2). Line 2.b. Disapproved. Enter the number of lenders rejected by the agency.

c. Line 3. Lender Recertifications reflect the number of lenders who were either approved or disapproved by the

agency for continued participation in a guaranteed loan program during the fiscal year.

(1). Line 3.a. Approved.
Enter the number of lenders approved by the agency.

(2). Line 3.b. Disapproved. Enter the number of lenders rejected by the agency.

d. Line 4. On-site Reviews.
Enter the number of reviews that were conducted by agency personnel physically visiting lender sites during the fiscal year.

2. Section B - Sanctions capture lender penalty data and the number of lenders who were debarred or suspended during the fiscal year.

a. Line 1. Lender Penalties shows the status on the number and amount of penalties assessed against lenders during the fiscal year for noncompliance with administrative and statutory requirements.

(1). Line 1.a. Assessed.
Enter the number and amount of penalties assessed.

(2). Line 1.b. Collected.
Enter the number and amount of penalties collected.

b. Line 2. Lenders Debarred/Suspended. Enter the number of lenders who were either debarred or suspended during the fiscal year.

D. PART IV FOOTNOTES. Part IV provides additional information and clarification on specific transactions as required per instructions for completing the SF220-8, "Direct and Guaranteed Loans Reported by Agency and Program Due From the Public."

AGENCY CONTACTS: Enter the preparer's name, telephone number, address, and the supervisor's name and telephone number.

0504 REPORT ON ACCOUNTS AND
LOANS RECEIVABLE DUE FROM
THE PUBLIC, SF 220-9

050401 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of the report on Accounts and Loans Receivable Due From The Public required pursuant to I TFM 2-4100. This supporting report provides the Treasury Department with information needed pursuant to OMB Circular A-129, "Managing Federal Credit Programs." It will also advise agency managers on the status of receivables and credit management efforts. The reporting requirements prescribed in this section are designated as SF 220-9, SF 220.

050402 Applicability and Scope. The provisions of this section apply to all DoD Components, including those with no receivable activity.

050403 Report Form. DoD Components may either reproduce copies from the Treasury original provided in I TFM 2-4100, or use machineproduced facsimiles. A copy of the SF 220-9 is provided as figure 5-4.

050404 Frequency and Distribution

A. Departmental-level accounting entities with accounts and loans receivable totaling less than \$50 million must submit SF 220-9 annually. They must complete only part I and the "Agency Contacts" part. Entities with accounts and loans receivable totaling \$50 million or more must submit SF 220-9 quarterly. They must complete parts I and II and the "Agency Contacts" part. Departmental-level accounting entities must advise their reporting components of the accounts and fund types that require quarterly submission of SF 220-9.

B. The report shall be submitted with the basic SF 220 report. However, quarterly reports shall be submitted under a cover transmittal letter signed by the responsible individual and distributed by the departmental-level accounting entity in accordance with the

addresses provided in the addendum to this chapter.

050405 Preparation Instructions for the SF 220-9

A. General

1. A consolidated schedule shall be prepared by each Military Department and by each reporting Defense Agency. The DFAS shall consolidate the reports from the Defense Agencies. The consolidated schedule shall show all receivables, including those due from foreign, State, and local governments, as well as receivables not supported by the SF 220 report. A memorandum SF 220-9 must be prepared to show amounts due the U.S. Government as a result of audits.

2. All amounts due and payable through receipt accounts (including Miscellaneous Receipts) that represent public receivables (including those due from foreign, State and local governments) shall be reported as receivables even if the amount is subject to change through administrative appeal or litigation in order to complete most line entries in part 1 of the SF 220-9, an analysis of the receivable accounts will have to be made. Use the balances of the following general ledger accounts:

Accounts Receivable :

1313	Accounts Receivable-Public-Current
1314	Accounts Receivable-Public-Noncurrent
1316	Refunds Receivable-Public
1319	Allowance for Loss on Accounts Receivable
1320	Claims Receivable-Public

Loans Receivable:

1353	Loans Receivable-Public-Current
1354	Loans Receivable-Public-Noncurrent
1359	Allowance for Loss on Loans Receivable

3. Address	
4. Supervisor's Name	5. Telephone No.

FIGURE 5-4 (Cont)

3. Receivables are to be classified into one of two categories--"Accounts Receivable" or "Loans Receivable." "Loans Receivable" shall include only the principal for all direct loans made as a result of legislatively mandated credit programs, including the direct portions of a participation loan and defaulted guaranteed loans. Interest, penalties, administrative costs and other receivables for these direct loans shall be reported as a single receivable under "Accounts receivable." All amounts originally classified as "Accounts Receivable" (that is, principal, interest, penalties, administrative costs, and other receivables) shall be counted only once and reported as a single amount under "Accounts Receivable." Exceptions to these rules are noted in the appropriate sections.

4. Audit findings are to be recorded as "Accounts Receivable" when management agrees with the auditors that resources should be recovered and the contracting officer has made a final determination regarding the existence, amount, and collectibility of the debt. The memorandum SF 220-9 shall include only that portion of the receivables reported in sections A and B totals that result from audit activity. This requirement does not affect any instructions on the preparation of individual reports for each revolving fund, business-type general and special funds, each transfer appropriation account, and certain trust funds. The memorandum SF 220-9 is merely a subset of the primary schedule. It is referred to the Treasury Credit Management Group for further analysis and subsequent submission to OMB. This

memorandum report will be used by OMB for monitoring agency compliancy with the policies of OMB Circular A-50, "Audit Follow-up."

5. The accounts and loans receivable totals reported quarterly by DSAA shall represent cumulative fiscal year to date (FYTD) activity. Information submitted on the SF 220-9 must be consistent with that required in the debt collection exhibit in OMB Circular A-11, "Preparation and Submission of Budget Estimates." If the report is submitted on paper, any required footnotes are to be prepared on a blank sheet of paper and attached to the report. If submitted by GOALS, footnotes are to be entered in the designated area and referenced to the appropriate line item of the report.

6. Receivables from the foreign military sales trust fund are not transactions with the public. FMS transactions are from the public only if reported by the Security Assistance Accounting Center (SAAC). DoD Components shall report orders from SAAC as within the Department of Defense.

7. Transactions with nonappropriated fund activities resulting in receivables are considered to be transactions with the public and shall be reported on the SF 220-9.

8. Table 5-1 provides a decision table on how certain other debt-like items are treated in the accounting records. It should be understood that this table does not include all debt-like items and that the terms used may not definitively describe the debt.

DECISION TABLE ON RECORDING AND REPORTING DEBT-LIKE ITEMS			
NO.	ITEM	DECISION	REMARKS
1	Progress Payments	Do not record as a receivable.	Procedures for handling Progress Payments are provided in this Regulation.
2	Survivor Benefits	Record/Report	Debts due from overpayments or erroneous payments.
3	General Revenue Receipts (GRR)	Record/Report	Debts due that will be deposited to GRR.

DECISION TABLE ON RECORDING AND REPORTING DEBT-LIKE ITEMS			
NO.	ITEM	DECISION	REMARKS
4	Third Party Liability	Record/Report	Record claim at best estimate.
5	Payroll Overpayments	Record/Report	
6	Fines, Fees, Assessed	Record/Report	Record unless simultaneous collection can be made.
7	Report of Item Discrepancy	Record/Report	
8	Losses of Funds	Record/Report	Record only after disbursing officer has been denied relief.
9	Dishonored/Dup. Checks	Record/Report	
10	Overpayments to Contractors	Record/Report	Record unless disbursing officer can offset within a month.
11	Amounts Owed By Contractors as a Result of Final Decision of Contracting Officer	Record/Report	
12	Collections Due From SBA	Do not record as public.	Record as other Government agency receivable.
13	GPLD and Reports of Survey <u>1/</u>	Record/Report	
14	Transport Carrier Claims	Record/Report	Accrue interest and penalty charges only after expiration of time allowed by ICC Reg. (49 CFR 1005)
15	Unused Tickets From Carriers	Record/Report	Record unless reimbursement is instantaneous
16	Statement of Charges	Record/Report	
17	Check Issue Overdraft	Record/Report	
18	Sales to Foreign Governments	Record/Report	Record unless under FMS Program.
19	All other Contractual claims due to bankruptcy, default, or renegotiation <u>2/</u>	Record/Report	Record claim at best estimate

1/ Government Property Lost or Damaged

2/ For further guidance see Chapter 15, Volume 3 of this Regulation

TABLE 5-1

B. Definitions. The Glossary of Terms, found in Volume 1 of this regulation, provides terms and definitions relative to receivables due from the public. Other definitions applicable to credit management and debt collection can be found in I TFM 4100 and OMB Circular A-129.

C. Heading. Enter on the designated lines (1) date of the report, (2) name of DoD Component submitting report, (3) reporting entity, (4) OMB identification code, and (5) fund type.

D. PART I Section A - Outstanding Receivables

1. Line 1. Current Receivables. Enter the numbers and amounts of all current receivables. This figure will equal the sum of lines 1.a. and 1.b.

a. Line 1.a. Not Delinquent. Enter the numbers and amounts of accounts that are outstanding 1 to 30 days from the date of invoice or date of notice that payment is due. Also include the numbers and amounts that will become due during the next 12 months following the end of the reporting period.

b. Line 1.b. Delinquent. Enter the numbers and amounts determined to be delinquent. The amount to be reported ordinarily will be the payment past due. However, when the full amount of the account is formally due and declared payable, the entire amount of the account or loan and related interest should be reported as delinquent. The full amount should be declared due and payable on all direct loans that are more than 180 days delinquent. Any amount that is under appeal or in litigation should be classified as delinquent and carried in its original status as a current receivable until the government changes its position regarding the amount that is due and payable through either a decision of the courts or an administrative settlement directed by a responsible government official. In those cases where a DoD Component is uncertain of the

amount owed or validity of the debt, the Component should use good judgment in establishing the debt and making the best estimate available. These figures will equal the sum of lines 1.b.(1) through 1.b.(9).

c. Lines 1.b.(1) - b.(9) (1-30 days through over 3 years). Enter the numbers and amounts for accounts and loans receivable that have been delinquent 1 to 30 days, 31 to 60 days, 61 to 90 days, 91 to 120 days, 121 to 180 days, 181 to 360 days, greater than 1 year and equal to or less than 2 years, greater than 2 years and equal to or less than 3 years, and over 3 years on their respective lines.

2. Line 2. Noncurrent Receivables. Enter the numbers and amounts of noncurrent receivables.

3. Line 3. Total Receivables. Enter the sum of lines 1. and 2. for amounts only. The balance reported on this line shall agree with the balance reported on the SF 220, lines 2.b.1. and 2. for accounts receivable and lines 6.b.1. and 2. for loans receivable.

E. PART I Section B - Activity FYTD

1. Line 1. Beginning FY Balance. Enter the numbers and amounts of all accounts and loans receivable outstanding as of the beginning of the fiscal year. This balance remains unchanged throughout the fiscal year.

2. Line 2. New Receivables. Enter the numbers and amounts of all new receivables generated for the fiscal year to date.

3. Line 3. Collections on Receivables. Enter the numbers and amounts for collections on receivables for the fiscal year to date. Included are repayments on prior and current year receivables. Enter repayments in brackets. Non-cash collections must be footnoted.

4. Line 4. Reclassified/Adjusted Amounts. Enter the numbers and amounts not reportable as "New Receivables" (line 2.),

"Collections on Receivables" (line 3.), or "Amounts Written Off" (line 5.), that were transferred either into or out of receivables during the fiscal year or between receivables classifications during the fiscal year. Prior period adjustments must also be included on this line. Enter net receivable amounts transferred out in brackets. Amounts reported on this line must be footnoted.

5. Line 5. Amounts Written off.

Report all numbers and amounts for uncollectible accounts that were actually written off during the fiscal year to date. A minus (-) sign should be placed in front of these figures.

6. Line 6. Ending Balance.

Enter the sum of lines 1. through 5. These figures will indicate the net activity or ending balance for the fiscal year to date and must agree with line 3, section A of part I.

F. PART I Section C - Allowances and Write-offs

1. Line 1. Allowances Beginning of FY. Enter the amounts of allowances for uncollectible accounts as reflected on the agency records at the beginning of the fiscal year.

2. Line 2. Write-offs During FY. Enter the amounts of all uncollectible accounts that were actually written off during the fiscal year to date. These figures shall agree with part I, section B, line 5.

3. Line 3. Adjustment to Allowance Account. Enter the expense adjustment for estimated uncollectibles for the fiscal year to date. The adjustment to the allowance account is the difference between the allowances needed by the DoD Component to accurately reflect potential losses and the existing balance after accounting for write-offs to date. For example:

Tot. Req. Allow. End of Period	\$1,600.00
Existing Balance	<u>485.00</u>
Bad Debt Expense (Adjustment)	\$1,115.00

4. Line 4. Allowances End of Period. Enter the amounts of allowances for uncollectible accounts as shown on the DoD Component's records for the fiscal year to date as of the end of this reporting period. For fiscal year end reporting, enter the amounts of allowances for uncollectible accounts for the next fiscal year.

G. PART I, Section D - Rescheduled Receivables

1. Line 1. Current Rescheduled Receivables. Enter the number and amount of accounts for current receivables that have been rescheduled. These figures are included in part I, section A, line 1., and shall equal the sum of lines 1.a. and 1.b. of this section.

a. Line 1.a. Not Delinquent. Enter the number and amount of accounts for rescheduled receivables due and payable during the 12 months following the end of the reporting period.

b. Line 1.b. Delinquent. Enter the number and amount of accounts for delinquent rescheduled receivables. The amounts reported will ordinarily be the rescheduled payments past due. However, when the full amount of the account has formally been declared due and payable, the entire amount of the rescheduled account or loan and related interest is reported as delinquent.

2. Line 2. Noncurrent Rescheduled Receivables. Enter the number and amount of accounts for noncurrent receivables that have been rescheduled. These figures are included in part I, section A, line 1.

3. Line 3. Total Rescheduled Receivables. Enter the sum of lines 1. and 2. for amounts only.

H. PART II, Section A - Loan Applications. Show analysis of the current activity in credit extension, including the number and amount of new loan applications and the

number and amount of rescheduled debts that have been approved, rejected, or are pending during the fiscal year. The number of credit reports purchased is also captured in this section. Note: This information cannot be extracted from general ledger account balances.

1. Line 1. New Applications.

Enter the number and amount of new loan applications received during the fiscal year. These figures shall equal the sum of lines 1.a. through 1.c. of this section for the number of accounts.

a. Line 1.a. Approved.

Enter the number and amount of approved loan applications.

b. Line 1.b. Rejected. Enter the number and amount of rejected loan applications.

c. Line 1.c. Pending. Enter the number and amount of pending loan applications.

2. Line 2. Credit Reports Purchased. Enter the number of credit reports purchased for new loan applications received.

3. Line 3. Rescheduled Debt. Enter the number and amount of debts for which rescheduling has been requested during the fiscal year. These figures shall equal the sum of lines 3.a. through 3.c. of this section for the number of accounts:

a. Line 3.a. Approved. Enter the number and amount of debts approved for rescheduling.

b. Line 3.b. Rejected. Enter the number and amount of debts not approved for rescheduling.

c. Line 3.c. Pending. Enter the number and amount of debts pending rescheduling.

4. Line 4. Credit Reports Purchased. Enter the number of credit reports purchased for those rescheduled debts that were approved, rejected, or pending.

I. PART II, Section B - Credit Bureau Reporting

1. Line 1. Accounts Eligible for Referral. Enter the number and amount of accounts not statutorily exempted from being reported to credit bureaus. All commercial and delinquent consumer accounts, except for debts arising under the IRS Code of 1954, the Social Security Act, the tariff laws of the United States, or debts owed by State and local or foreign governments, are entered on this line. These figures shall equal the sum of lines 1.a. and 1.b. of this section.

a. Line 1.a. Commercial. Enter the number and amount of all commercial accounts eligible for referral to credit reporting bureaus.

b. Line 1.b. Delinquent Consumer. Enter the number and amount of all delinquent consumer accounts eligible for referral to credit reporting bureaus.

2. Line 2. Accounts Referred. Enter the number and amount of accounts referred to credit reporting bureaus during the fiscal year. These figures equal the sum of lines 2.a. and 2.b. of this section.

a. Line 2.a. Commercial. Enter the number and amount of all commercial accounts referred to credit reporting bureaus.

b. Line 2.b. Delinquent Consumer. Enter the number and amount of delinquent consumer accounts referred to credit reporting bureaus.

J. PART II, Section C - Account Servicing. Show the number and amount of loans receivable, classified according to their collection probability during the fiscal year. DoD Components classifying loans into different categories should, for this report only, adapt their information to the 5 categories identified on lines l.a. through l.e. in this section.

1. Line 1. Loan Classification. Enter the total number and amount of balances outstanding at the end of the reporting period, classified according to collection probability this fiscal year for loans receivable. These figures should equal the sum of lines l.a. through l.e. of this section. The dollar amount must agree with part I, section A, line 3. of this report.

a. Line l.a. Problemless. Enter the number and amount of loans receivable in which loan payments are made consistent with terms of the agreement.

b. Line l.b. Program Standard. Enter the number and amount of loans receivable in which assets are potentially weak, but may meet minimum program standards for credit worthiness.

c. Line l.c. Substandard. Enter the number and amount of loans receivable in which assets contain actual weaknesses that jeopardize the collection of the debt.

d. Line l.d. Doubtful. Enter the number and amount of loans receivable in which liquidation of an asset for full value is improbable and the possibility of loss at this time is high; however, certain conditions exist that may positively affect the asset.

e. line l.e. Loss. Enter the number and amount of loans receivable in which assets are determined to be uncollectible and of such little value that their continuance as assets is not warranted.

K. PART II, Section D - Financing Interest

1. Line 1. Financing Interest. Enter the number and amount of interest receivables generated from interest charged as a cost of extending credit on legislatively mandated credit programs during the fiscal year. For the purpose of this section, financing interest should be reported as "Accounts Receivable."

L. PART II Section E - Delinquent Debt Allocation

1. Line 1. Total Delinquent Receivables. Enter the number and amount of accounts for all delinquent receivables. These figures are the sum of lines l.a. and l.b. only of this section. These figures should also agree with part I, section A, line l.b.

a. Line l.a. At Dept. of Justice. Enter the number and amount of accounts for all delinquent receivables outstanding at the Department of Justice, including those being worked on by special attorneys.

b. Line l.b. Not at Dept. of Justice. Enter the number and amount of accounts for all outstanding delinquent receivables under DoD Component control. Identify on lines l.b.(1) through l.b.(8) those receivables: with collection contractors; at workout groups; at Component counsel; referred for salary offset; referred for tax refund offset; referred for administrative offset; collection action suspended or other status.

2. Line 2. Collection Contractors Activity. Enter the number and amount of delinquent accounts turned over to collection contractors (DoD Component collection contractors and GSA debt collection contractors) during the fiscal year.

a. Line 2.a. Referred. Enter on line 2.a. the number and amount of

delinquent accounts turned over to collection contractors.

b. Line 2.b. Collected.

Enter the number and gross amount of accounts recovered by collection contractors. Enter collections with a minus (-) sign before the figures. Do not deduct agency reimbursements to collection agencies for services provided.

c. Line 2.c. Otherwise Resolved. Enter the number and amount of accounts returned to the agency. These figures should also be preceded with a minus (-) sign.

d. Line 2.d. Outstanding. Enter the number and amount of all accounts outstanding with collection contractors.

3. Line 3. Workout Group Activity. Show the number and amount of delinquent accounts referred, collected, or otherwise resolved by DoD Component workout groups during the fiscal year.

a. Line 3.a. Referred. Enter the number and amount of delinquent accounts, including accounts written off, referred to DoD Component internal workout groups.

b. Line 3.b. Collected. Enter the number and amount of accounts collected by DoD Component workout groups. Enter collections with a minus (-) sign before the figures.

c. Line 3.c. Otherwise Resolved. Enter the number and amount of accounts returned by the workout groups to the DoD Component or some other entity, such as the Department of Justice, for disposition. These figures are also preceded with a minus (-) sign.

d. Line 3.d. Outstanding. Enter the number and amount of accounts that remain outstanding with DoD Component internal workout groups.

4. Line 4. Administrative Offset. Show the number and amount of delinquent

accounts referred, collected, and/or otherwise resolved by administrative offset during the fiscal year. As indicated for line 3 above, enter on lines 4.a. through 4.d. the numbers and amounts of delinquent accounts referred for offset, collected, otherwise resolved, or outstanding.

M. PART II, Section F - Litigation. Show the beginning fiscal year balance of seriously delinquent accounts held by DoD Component counsels and/or the Department of Justice. Activity is also captured during the fiscal year for new referrals, collections on receivables, receivables otherwise resolved, and the outstanding (ending) balance of accounts in litigation. This section covers debts not likely to be fully or partially recovered without the aid of legal action. For further guidance see Chapter 15 of Volume 3 of this Regulation.

1. Line 1. Agency Counsel Activity. Show the number and amount of all delinquent accounts and loans receivable outstanding at agency counsel as of the beginning of the fiscal year. These figures must agree with the outstanding balance reported on the year-end SF 220-9 the previous fiscal year. The beginning balance remains unchanged throughout the fiscal year.

a. Line 1.a. Beginning Balance. Enter the number and amount of all delinquent accounts and loans receivable outstanding at DoD Component counsel as of the beginning of the fiscal year.

b. Line 1.b. New Referrals. Enter the number and amount of delinquent accounts referred to agency counsel for resolution during the fiscal year.

c. Line 1.c. Collections. Enter the number and amount of collections received during the fiscal year on delinquent accounts held by agency counsel. Place a minus (-) sign in front of these figures.

d. Line 1.d. Otherwise Resolved. Enter the number and amount of

delinquent accounts returned during the fiscal year to the originating DoD Component for disposition. Place a minus (-) sign in front of these figures.

e. Line 1.e. Outstanding Balance. Enter the sum of lines 1.a. and 1.b. minus 1.c. and 1.d. of this section. These figures also agree with part II, section E, line 1.b. (3).

2. Line 2. Department of Justice Activity. Show the status on the number and amount of delinquent accounts, as of the end of the reporting period, submitted to the Department of Justice for litigation. Enter on lines 2.a. through 2.e. respectively, the information requested for the beginning balance, new referrals, collections, accounts otherwise resolved, and compute the outstanding balance.

N. PART II, Section G - Interest/Penalties/Administrative Cost. Show the number and amount of interest, penalties, and administrative costs collected during the fiscal year plus the range of interest rates assessed on delinquent accounts. The amounts reported in this section include only the additional interest, penalties, and administrative costs collected because a debt is delinquent. For this section, interest, penalties, and administrative costs are reported as "Accounts Receivable" or "Loans Receivable," depending on the nature of the transaction generating the charge. For example: Interest, penalties, and administrative costs collected in the amount of \$2,000 on a \$10,000 loan, are recorded as "loans receivable" for \$2,000. Likewise, interest, penalties, and administrative costs collected in the amount of \$1,000 on accounts receivable of \$8,000 are recorded as "accounts receivable" for \$1,000.

1. Line 1. Interest Collected in FY. Enter the number and amount of accounts for which additional interest on delinquent accounts was collected during the fiscal year.

2. Line 2. Penalties Collected in FY. Enter the number and amount of accounts for which penalties were collected during the fiscal year.

3. Line 3. Admin. Costs Collected in FY. Enter the number and amount of accounts for which administrative costs were collected during the fiscal year.

4. Line 4. Range of Interest Rates on Delinquent Debts. Enter the lowest and highest interest rates assessed on outstanding delinquent accounts. These rates are entered in the number column for "Accounts Receivable."

O. PART II, Section H - Write-Offs. Show the number and amount of accounts either pending disposition by the Department of Justice or written off during the fiscal year. Actions concerning the reporting of written off amounts to IRS are also reflected in this section. The sum of lines 2., 3., and 4. in this section must agree with part I, section B, line 5.

1. Line 1. Pending Justice Concurrence. Enter the number and amount of delinquent accounts pending concurrence by the Department of Justice for write-off during the fiscal year.

2. Line 2. Reported to IRS. Enter the number and amount of delinquent accounts written off and subsequently reported to IRS as income on IRS Form 1099G.

3. Line 3. Not Yet Reported to IRS. Enter the number and amount of delinquent accounts written off, but not yet reported to IRS as required.

4. Line 4. Ineligible for Reporting to IRS. Enter the number and amount of delinquent accounts written off, but not required to be reported to IRS.

P. PART II, Section I - Loan Asset Sales. Show the number and face value of loans offered for sale during the fiscal year and the actual proceeds of the sales.

1. Line 1. Portfolio Value Sold. Enter the number of loans and their face value sold during the fiscal year.

2. Line 2. Gross Proceeds.

Enter the gross amount realized during the fiscal year from the sale of these loans. These proceeds are amounts paid by purchasers less any transaction costs paid on the day of the sale. Examples include underwriting, rating agency, and legal fees. Gross proceeds do not include transaction costs such as financial advisors' fees paid as direct obligations by a DoD Component. The difference between line 1., "Portfolio Value Sold", and line 2., "Gross Proceeds," should be reported as reclassified and must be included in part I, section B, line 4.

3. Line 3. Net Proceeds.

Enter the amount equivalent to "gross proceeds" less all other cost associated with each sale, such as financial advisors' fees.

Q. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number, and address along with the supervisor's name and telephone number.

0505 REPORT ON OPERATIONS, SF 221

050501 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of the annual Report on Operations required pursuant to I TFM 2-4100. The report on operations discloses the financial results of activities, including revenues and other financing sources, and operating expenses. The reporting requirements, financing sources and operating expenses, prescribed in this section are designated as SF 221 (IAR 1180-TD-AN).

050502 Applicability and Scope. The provisions of this section apply only to those revolving funds and trust funds managed by DoD Components (type 1 and type 2 funds). (See table 5-2.) Negative reports are not required for other than type 1 and type 2 funds.

050503 Report Form. The Treasury report format provided in I TFM 2-4100 may be reproduced, or a machine-produced facsimile may be used. A copy of SF 221 is provided as figure 5-5.

050504 Frequency and Distribution

A. The report shall be submitted as of September 30 of each year by the date established by the appropriate departmental-level accounting entity.

B. The report shall be submitted under the cover transmittal letter provided for the SF 220 report and signed by the responsible official. Departmental-level accounting entities will make distribution in accordance with the addresses provided in the addendum to this chapter.

050505 Preparation Instructions for the SF 221

A. The report shall be prepared by each revolving fund and trust fund activity (fund types 1 and 2).

DoD Components shall analyze figure 5-5 and report fund balances on the applicable report lines.

B. Heading. Enter on the designated lines (1) date of the report, (2) name of the DoD Component submitting report, (3) reporting entity, (4) OMB identification code, and (5) fund type. The reporting entity shall also indicate the basis used in preparing the report (accrual/cash).

C. Financing Sources

1. Line 1. Accrued expenditures. Enter the amount of accrued expenditures. This amount should also include amounts related to appropriations expended for inventory, property, plant, and equipment that are recorded as assets and an increase in invested capital, and should be net of revenues or gains for which amounts were not returned to the Treasury. This treatment is necessary to preclude double counting of financing sources. Enter the sum of budgetary accounts 4910 and 4930.

2. Line 2. Revenue. Enter amounts earned resulting from services performed or goods and other tangible property delivered to purchasers.

a. Line 2.a. Federal sources. Enter the amount received from Federal sources.

b. Line 2.b. Public sources. Enter the amount received from public sources.

c. Line 2.c. Subtotal. Enter the total of lines 2.a. and 2.b.

NOTE: DoD Components shall establish subsidiary accounts to distinguish revenue received from Federal sources and public sources. Revenue should also be tracked in subaccounts by appropriation or fund. Enter the sum of the following general ledger accounts:

5100	Revenue from Goods Sold
5200	Revenue From Services Provided
5300	Interest and Penalties Revenue

5400	Benefit Program Revenue
5500	Insurance and Guarantee Premium Revenue
5600	Donated Revenue
5900	Other Revenue

3. Line 3. Governmental receipts. Enter the amount of governmental receipts collected. Governmental receipts are collections from the public that result from the exercise of the government's sovereign powers, excluding receipts offset against outlays. These collections consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. DoD Components shall not report amounts on this line. Leave line 3. blank.

FIGURE 5-5 (Cont)

4. Line 4. Other

a. Lines 4.a. through 4.d. - Other. Enter all other financing sources not included in other categories. Identify the nature of any types of financing sources (1) comprising more than 25 percent of the total amount reported for this category, and (2) exceeding \$100,000. Other financing sources should be tracked by funded/unfunded. Enter on this line the sum of the following general ledger accounts:

7110 Gains on Disposition of Assets
7190 Other Gains

b. Line 4.e. Subtotal. Enter the total of other financing sources shown on lines 4.a. through 4.d.

5. Line 5. Less: Receipts returned to Treasury. Enter the amounts returned to the Treasury that have been reported as a financing source in one of the above line items. Enter on this line the balance of general ledger account 3620, "Funds Returned to General Fund - Miscellaneous Receipts."

6. Line 6. Total financing sources. Enter the net sum of lines 1. through 5.

D. Operating Expenses

1. Line 7. Cost of goods sold. Enter all costs applying to goods and services sold, including the inventory value of commodities sold from stock, and all labor, material, and other expenses. Enter on this line the funded amounts in general ledger account 6500, "Cost of Goods Sold." Subaccounts should be maintained to track costs by funded/unfunded.

2. Line 8. Operating/program expenses, funded. Enter the total expenses or losses incurred in conducting all activities and program costs of the organizational unit. Exclude capital expenditures, unfunded expenses, interest expenses, and direct and indirect costs associated with cost of goods sold (line 7.) for businesslike activities. Subaccounts are required to track expenses by direct/reimbursable and funded/unfunded. The

unfunded amounts shall be included in line 11. Enter the sum of the following general ledger accounts:

6100 Operating/Program Expenses
6400 Benefit Program Expenses
6600 Applied Overhead

3. Line 9. Interest expense, funded. Report the interest expense on the lines provided including the amortization of any premium or discount on securities issued.

a. Line 9.a. Federal Financing Bank/Treasury borrowings. DoD Components shall not report on this line.

b. Line 9.b. Federal Securities. DoD Components shall not report on this line.

c. Lines 9.c.1. through 9.c.4. Other. Enter all other interest expenses identifying the interest expense that exceeds 25 percent of the amount reported in this category and is in excess of \$100,000. Enter on this line the balance in the general ledger account 6330, "Other Interest Expenses."

d. Line 9.d. Subtotal. Enter the total interest expense reported on lines 9.a. through 9.c.4.

4. Line 10. Other funded expenses. Enter on lines 10.a. through d. amounts of other expenses or losses. Identify the nature of any amount that exceeds 25 percent of the amount reported in this category and exceeds \$100,000. Enter on line 10.e.(Subtotal) the sum of the following general ledger accounts:

7210 Losses on Disposition of Assets
7290 Other Losses
6125.1 Equipment Replacement Surcharge-Business Operations Fund

E. Net Results

1. Line 11. Unfunded expenses. Enter all expenses that (a) were funded in prior years; (for example, depreciation and amortization); (b) will be funded in future years;

(for example, annual leave); and (c) are funded by other than the reporting account; (for example, military labor in Business Operations Fund). Enter the sum of the following general ledger accounts:

6100	Operating/Program Expenses
6330	Other Interest Expenses
6400	Benefit Program Expenses
6500	Cost of Goods Sold
6600	Applied Overhead
6900	Other Expenses

2. Line 12. Total operating expenses. Enter the sum of lines 7. through 11.

3. Line 13. Net results before adjustments. Enter the net of lines 6. and 12.

4. Line 14. Less: Capital expenditures. Enter the amount of capital expenditures expended from appropriated funds for inventory, property, plant, and equipment, and other nonmonetary assets during the reporting period. Enter the sum of the following general ledger accounts used to acquire these assets:

4910	Accrued Expenditures - Unpaid - Direct Program
4930	Accrued Expenditures - Paid - Direct Program

5. Line 15. Less: Extraordinary items. Enter any material expense or loss resulting from an event or transaction that is unusual and occurs infrequently. Do not include amounts entered on this line with amounts reported in the "Operating Expenses" section. Describe any transaction entered on this line on SF 220-1, "Additional Financial Information." Report on this line the balance of general ledger account 7300, "Extraordinary Items."

6. Line 16. Net results. Enter the net sum of lines 13. through 15.

F. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number and address, along with the supervisor's name, and telephone number.

0506 REPORT ON CASH FLOW, SF 222

050601 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of the annual report on appropriations and funds required pursuant to I TFM 2-4100. The SF 222, "Report on Cash Flow," reconciles the beginning and ending fund balances with Treasury and cash by presenting all significant sources and application of resources during the fiscal year. The reporting requirements prescribed in this section are designated as SF 222 (IAR 0341-TD-AN).

050602 Applicability and Scope. The provisions of this section apply to all DoD Components, appropriations, and funds.

050603 Report Form. DoD Components may reproduce the copy provided in I TFM 2-4100 or use machine-produced facsimiles. A copy of the SF 222, with the applicable source general ledger accounts, is provided as figure 5-6.

050604 Frequency and Distribution

A. The report shall be submitted as of September 30 of each year by the date established by the appropriate departmental-level accounting entity.

B. The report shall be submitted under the cover transmittal letter provided for the SF 220 report and signed by the responsible official. Departmental-level accounting entities will make distribution in accordance with the addresses provided in the addendum to this chapter.

050605 Preparation Instructions for the SF 222

A. DoD Components shall analyze figure 5-6 and report balances on the appropriate report.

B. Heading. Enter on the designated lines (1) date of the report, (2) name of DoD Component submitting the report, (3) reporting entity, (4) OMB identification code, and (5) fund type.

1. Preparer's Name	2. Telephone No.
3. Address	
4. Supervisor's Name	5. Telephone No.

FIGURE 5-6

C. Line 1. Fund balance with Treasury and cash, beginning of period. Enter the beginning sum of the following general ledger accounts:

1010	Fund Balance with Treasury
1100	Cash
1200	Foreign Currency

D. Line 2. Sources of funds. The balances of the general ledger accounts listed below summarize the resources made available to the reporting entity.

1. Line 2.a. Increase in debt. Enter the differences between the beginning and the ending balances of the following general ledger accounts:

2510	Borrowing From Treasury
2520	Borrowing From Federal Financing Bank
2530	Securities Issued by Federal Agencies Under Special Financing Authority
2540	Participation Certificates
2590	Other Debt

2. Line 2.b. Appropriations. Enter the amount of the original appropriations received for the current period (not including offsetting collections credited or offsetting receipts appropriated). Enter the amount from general ledger account 3100, "Appropriated Capital."

3. Line 2.c. Revenue. Enter the amounts of revenue and gains that were not returned to Treasury. Report the sum of general ledger accounts:

5100	Revenue From Goods Sold
5200	Revenue From Services Provided
5300	Interest and Penalties Revenue
5400	Benefit Program Revenue
5500	Insurance and Guarantee Premium Revenue
5600	Donated Revenue
5900	Other Revenue
7190	Other gains

4. Line 2.d. Sale of assets. Enter the proceeds from the sale of assets by

analyzing general ledger account 1011, "Funds Collected."

5. Line 2.e. Increase in payables. Enter the increase in total liabilities less debt between the current period and the beginning balance. Any decrease in liabilities should be shown as a negative entry (-). Enter the net sum of the following general ledger accounts:

2110	Accounts Payable
2120	Disbursements in Transit
2130	Contract Holdbacks
2140	Accrued Interest Payable
2190	Other Accrued Liabilities
2210	Accrued Funded Payroll and Benefits
2220	Accrued Unfunded Annual Leave
2310	Advances from Others
2320	Deferred Credits
2400	Liability for Deposit Funds and Suspense Accounts
2610	Retirement Plans
2620	Insurance Plans
2690	Other Actuarial Liabilities
2910	Prior Liens Outstanding on Acquired Collateral
2920	Contingent Liabilities
2990	Other Liabilities

6. Line 2.f. Decrease in receivables and advances. Enter any decrease in total receivables and advances between the beginning and ending account balances. An increase in receivables and advances would be shown as a negative entry. Enter the net sum of the following general ledger accounts:

1310	Accounts Receivable
1320	Claims Receivable-Public
1350	Loans Receivable
1410	Advances to Others
1450	Prepayments

7. Lines 2.g.1. through 2.g.4. Other. Enter the amount of other sources of funds and describe any types of sources that comprise more than 25 percent of the total amount reported in this category in excess of \$100,000. Enter the sum of the following general ledger accounts:

7110 Gains on Disposition of Assets
 7190 Other Gains
 7300 Extraordinary Items
 7400 Prior Period Adjustments
 7600 Changes in Actuarial Liability

8. Line 2.h. Total. Enter the total for lines 2.a. through 2.g.

E. Line 3. Application of funds

1. Line 3.a. Operating expenses.

Enter the amount of total operating expenses from the SF 221, line 12. If no SF 221 is prepared, enter the sum of the following general ledger accounts:

6100 Operating/Program Expenses
 6310 Interest Expenses on Borrowing
 From Treasury
 6320 Interest Expenses on Federal
 Securities
 6330 Other Interest Expenses
 6400 Benefit Program Expenses
 6500 Cost of Goods Sold
 6600 Applied Overhead
 6900 Other Expenses
 7210 Losses on Disposition of Assets
 7290 Other Losses

2. Line 3.b. Less: Expenses not requiring outlays. Analyze the above general ledger accounts and enter the amount of any operating expenses not requiring outlays. Typically, these expenses include such items as depreciation and allowances for uncollectible receivables, which are reported on SF 221, line 10.

3. Line 3.c. Increase in investments. Analyze the following general ledger accounts and enter any increase (difference between current and prior balances) in investments between the current and prior period as reported on SF 220, line 5:

1610 Federal Securities (At Par)
 1611 Federal Securities-Unamortized
 Premium or Discount
 1690 Other Investments

4. Line 3.d. Increase in inventory. Enter any increase in inventory (difference between current and prior balances) between the current period and the prior period as reported on the SF 220, line 4. Exclude transactions directly affecting equity accounts. After analysis, enter the appropriate net sum from the following general ledger accounts:

1510 Inventory for Agency Operations
 1530 Inventory-Raw Material and Supplies
 1540 Inventory-Work in Process
 1550 Inventory-Finished Goods
 1560 Other Inventory
 1570 Stockpiled Materials and Supplies
 1580 Inventory in Transit

5. Line 3.e. Purchase of property, plant, and equipment. Enter the amount expended for property and equipment capitalized in the current reporting period. Exclude transactions directly affecting equity accounts. This amount is also reported as increases on the SF 220, line 7. Compute and enter the appropriate net sum from the following general ledger accounts:

1710 Land
 1720 Construction in Progress
 1730 Buildings
 1740 Other Structures and Facilities
 1760 Military Equipment
 1770 Equipment in Transit
 1810 Assets Under Capital Lease
 1820 Leasehold Improvements
 1830 Automated Data Processing Software
 1840 Other Natural Resources
 1890 Other Fixed Assets

6. Lines 3.f.1. through 3.f.4. Other. Enter on line 3.f. any applications of funds not otherwise identified in the previous lines. Describe any types of applications that comprise more than 25 percent of the total amount reported in this category and that exceed \$100,000. Include on this line expired appropriations and offsetting receipts returned to Treasury. Compute and enter the sum of the following general ledger accounts:

1910 Acquired Collateral
 1990 Other Assets

7300 Extraordinary Items
 7400 Prior Period Adjustments
 7500 Distribution of Income-Dividend

7. Line 3.g. Total. Report the total for lines 3.a. through 3.f.4.

F. Line 4. Fund balance with Treasury and cash, end of period. Add lines 1. and 2.h. and subtract line 3.g. This amount shall agree with line 1.d. of the SF 220 for the current reporting period and can be computed by adding the sum of the following general ledger accounts:

1010 Fund Balance with Treasury
 1110 Undeposited Collections
 1120 Imprest Funds
 1190 Other Cash
 1200 Foreign Currency

G. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number, and address, along with the supervisor's name and telephone number.

0507 REPORT ON RECONCILIATION, SF 223

050701 Purpose and Accounting Report Number. This section prescribes the report form and instructions for preparation of the annual Report on Reconciliation pursuant to I TFM 2-4100. The SF 223 reconciles operating expenses and cash outlays for the fiscal year. The reporting requirements prescribed in this section are designated as SF 223 (IAR 0342-TD-AN).

050702 Applicability and Scope. The provisions of this section apply to all DoD Components, appropriations, and funds. Negative reports shall be submitted when there were no transactions during the fiscal year.

050703 Report Form. DoD Components may reproduce the copy provided in I TFM 2-4100 or use machine-produced facsimiles. A copy of the SF 223 is provided as figure 5-7.

050704 Frequency and Distribution

A. The report shall be submitted as of September 30 of each year by the date established by the appropriate departmental-level accounting entity.

B. The report shall be submitted under the cover transmittal letter provided for the SF 220 report, signed by the responsible official and distributed in accordance with the addresses provided in the addendum to this chapter.

050705 Preparation Instructions for the SF 223

A. DoD Components shall analyze the appropriate general ledger accounts identified in figure 5-7 and report balances on the appropriate report lines.

B. Heading. Enter on the designated lines (1) date of the report, (2) name of DoD Component submitting the report, (3) reporting entity, (4) OMB identification code, and (5) fund type.

C. Line 1 Total operating expenses. Enter the total operating expenses as disclosed on SF 221, line 12. for type 1 and 2 reporting entities. Other reporting entities enter the sum of the following general ledger accounts:

6100 Operating/Program Expenses
 6310 Interest Expenses on Borrowing
 From Treasury
 6320 Interest Expenses on Federal Securities
 6330 Other Interest Expenses
 6400 Benefit Program Expenses
 6500 Cost of Goods Sold
 6600 Applied Overhead
 6900 Other Expenses
 7210 Losses on Disposition of Assets
 7290 Other Losses

D. Line 2. Adjustments. Add the net amount of capital expenditures as disclosed on the SF 221, line 14. and deduct any increase in

accounts payable, or inventories and accrued expenses not requiring outlays that are not captured as accounts payable (for example, depreciation). Otherwise, determine the amounts for this line by use of the appropriate general ledger accounts.

Add:

1. Line 2.a. Capital expenditures: Enter the current year increase in the balances of the following general ledger accounts:

6100	Operating/Program Expense
6320	Interest Expense on Federal Securities
6330	Other Interest Expense
6500	Cost of Goods Sold
6600	Applied Overhead

Deduct:

2. Line 2.b. Increase (decrease) in accounts payable. Enter all increases and/or decreases in accounts payable netted against receivables, (such as, general ledger accounts 1310 and 1350). Use the accounts payable amount determined for line 2.e. of SF 222, or use appropriate amounts extracted from the following general ledger accounts:

2110	Accounts Payable
2140	Accrued Interest Payable

Deduct:

3. Line 2.c. Increase (decrease) in inventories. Enter all increases and/or decreases in inventories. Use appropriate amounts extracted from the following general ledger accounts:

1510	Inventory for Agency Operations
1520	Inventory for Sale
1530	Inventory-Raw Material and Supplies
1540	Inventory-Work in Process
1550	Inventory-Finished Goods
1560	Other Inventory
1570	Stockpiled Materials and Supplies

Deduct:

4. Line 2.d. Accrued expenses not requiring outlays. Enter the balance determined for line 3.b. of SF 222, or analyze the general ledger accounts used in line 1., above, and report the amount of any operating expenses not requiring outlays.

E. Line 3. Total gross disbursements. Enter the net sum of lines 1. and 2.a. less lines 2.b., 2.c. and 2.d.

F. Line 4. Less: Offsetting collections credited. Enter the amount of agency collections not reported to receipt accounts.

G. Line 5. Net disbursements. Enter the net sum of lines 3. and 4. This amount should agree with "Net Disbursements" reported in column 4 of the TFS Form 6653, "Undisbursed Appropriation Account."

H. Agency Contacts. Enter in the blocks provided the preparer's name, telephone number, and address, along with the supervisor's name and telephone number.

0508 FEDERAL AGENCIES' CENTRALIZED TRIAL-BALANCE SYSTEM REPORTING

Upon implementation of agency reporting via the Federal Agencies' Centralized Trial-balance System (FACTS), the above reports will become obsolete and this chapter will be revised accordingly. FACTS replaces the SF 220: Statement of Financial Position, SF 221: Statement of Operations, SF 222 Cash Flow Statement, and SF 223: Statement of Reconciliation. The NOTES report replaces the SF 220-1: Additional Financial Information.

The Report on Obligations (SF 225), SF 220-8: Report on Guaranteed Loans, and the Report on Receivables Due From the Public (Receivables Report), will continue to be reported as prescribed above.

Under FACTS, agencies must electronically transmit a pre-closing adjusted trial balance(s) (ATB) at the Treasury appropriation/fund group level, using the U.S. Government Standard General Ledger (SGL) accounts. Agencies must also electronically transmit the NOTES report(s). The pre-closing ATB should include balances for all revenues earned and all expenses incurred during the reporting period.

The preparation and submission of timely and reliable ATBs that fully disclose the financial results of all programs and activities and the consolidation of this information are the responsibilities of the head the Department of Defense and each Federal agency. Amounts should be reported in whole dollars. Amounts from 1 to 49 cents should be rounded down to the nearest dollar and amounts of 50 to 99 should be rounded up to the next dollar.

This chapter will be revised with the next issue of this publication. Additional information on FACTS is contained in Treasury Financial Manual, Volume 1, Transmittal Letter No. 559.

0509 CIVIL MONETARY PENALTY REPORT

The Federal Civil Penalties Inflation Adjustment Act of 1990, Public Law 101-104, established annual reporting requirements for civil monetary penalties (CMPs) assessed and collected by Federal agencies. Additionally, agencies are required to submit a separate report every 5 years identifying all applicable penalties and providing inflation adjustments for those that have not been adjusted by law in the last 5 years. CMPs include any non-criminal penalty, fine, or other sanction for which a given dollar amount (or maximum amount) is specified by Federal law, and which is assessed or enforced by an agency as a result of an administrative proceeding or civil action in the Federal courts.

The CPM information is due to Defense Finance and Accounting Service Headquarters by November 1st of each fiscal year for preceding fiscal year. The information should be sent to the General Accounting Deputate, Financial Statements Directorate.

TABLE 5-2

ADDENDUM
ADDITIONAL REPORTING AND DISTRIBUTION INSTRUCTIONS

1. **Fund Types.** Table 5-2 identifies the DoD reporting entities and the specific reporting packages required. Annually, DoD Components shall prepare a separate SF 220 with supporting reports for the fund types listed below. In addition, an SF 221, 222, and 223 shall be prepared for type 1 and type 2 funds. The fund types and reporting packages are as follows:

- Type 1: Each revolving fund
- Type 2: Each trust revolving fund
- Type 3: Each of the applicable major trust funds
- Type 4: All other trust funds
- Type 5: All other activity combined
- Type 6: Consolidated report

NOTE: SF 220-1, 220-8 and 220-9 shall not be submitted for fund type 6 reports.

2. **Report Distribution.** Reports shall be distributed by the departmental-level accounting entities as follows:

- a. Original reports shall be submitted to:

Department of the Treasury
Financial Management Service
Financial Reports Branch
Liberty Center
Attn: GAO Bldg, Rm 3021
Washington, D.C. 20227

- b. One copy of each annual and quarterly report shall be submitted to:

Directorate for Program and Financial Control, ODC(P/B)
Office of the Under Secretary of Defense (Comptroller)
The Pentagon, Room 3B872
Washington, D.C. 20301-1100

Defense Finance and Accounting Service
ATTN: Deputy Director for General Accounting
Arlington, VA 22240-5291

- c. One copy of the Services SF220 and SF221 for Business Operations Fund, and one copy of the SF220-8 and SF220-9 shall be submitted to:

Defense Finance and Accounting Service
ATTN: Deputy Director for Business Funds
Arlington, VA 22240-5291

CHAPTER 7

FOREIGN CURRENCY REPORTS0701 GENERAL

070101 Purpose. This chapter establishes reporting requirements for tracking all transactions that increase or decrease the foreign currency fluctuations accounts. It provides guidance to DoD Components on the recording of obligations for expenses payable in certain foreign currencies.

070102 Overview

A. The provisions of this chapter apply to all DoD Components unless specific exceptions have been granted in writing by the Under Secretary of Defense (Comptroller) (USD(C)).

B. The reports discussed in this chapter are as follows:

1. DD-COMP(M)1506
Foreign Currency Fluctuations, Defense.

2. DD-COMP(M)1761
Foreign Currency Fluctuations, Construction, Defense

070103 Foreign Currency Fluctuation, Operation and Maintenance

A. Beginning in Fiscal Year 1979, the Congress authorized the transfer of funds to Department of Defense operating appropriations to cover significant losses from foreign exchange rate fluctuations. Significant net gains from foreign currency exchange rate fluctuations must also be transferred to this new account. The operations and maintenance appropriations are the only appropriations affected. The purpose of the new appropriation is to alleviate the adverse effect of significant fluctuations in the specified currency exchange rates on authorized DoD programs subsequent to September 30, 1978. The title of the appropriation is the "Foreign Currency Fluctuations, Defense Appropriation (FCF,D)," Symbol 97X0801.

B. The OUSD(C) will manage the appropriation for Foreign Currency Fluctuations, Defense (FCF,D). Amounts will be transferred by OUSD(C) to the operating appropriations by means of a Nonexpenditure Transfer Authorization (SF 1151). These transferred funds will be available only for funding a centrally managed allotment (CMA) that each Component's operating appropriation has established to cover net losses in direct programs due to unfavorable fluctuations in foreign exchange rates in the selected currencies. These transfers may not fully fund such losses, but will be based on need, on the funds available to cover such losses DoD-wide, and on other budgetary considerations.

C. Since the FCF,D appropriation is only available to fund net losses, gains and losses will be accumulated in the CMA in each affected operating appropriation, and if a net gain results, the balance must be returned to FCF,D prior to the funds lapsing. Prior to passage of the 1979 appropriation act, the CMA had to be funded entirely by the operating appropriation. However, now that the appropriation is available, prompt action will be taken to provide funding based on justified requests received by USD(C).

D. The following statutes provide authority for the FCF,D appropriation:

1. Public Law 96-38, "Supplemental Appropriation, 1979" allows previously transferred FCF,D funds to be transferred back to the FCF,D appropriation from the appropriation to which they were transferred if the funds are not needed to finance increased obligations due to fluctuations in currency exchange rates because of subsequent favorable fluctuations in currency exchange rates or because other funds are, or become, available to finance these cost increases.

2. Section 767A of Public Law 96-527, "DoD Appropriations Act, 1981,"

prohibits the transfer of funds from the FCF,D appropriation to Military Personnel appropriations for obligations incurred after September 30, 1980.

3. Section 791 of Public Law 97-377, "DoD Appropriations Act, 1983," permits FY 1982 and subsequent O&M unobligated balances to be transferred to the FCF,D appropriation provided the transfers are made prior to the funds lapsing. The general provision limits the use of this authority so that the amount in the FCF,D appropriation does not exceed \$970.0 million at the time the unobligated balance transfer is made.

4. Section 774 of Public Law 98-212, "DoD Appropriations Act, 1984," requires that for FY 1984 and all subsequent fiscal years for the FCF,D appropriation the foreign currency exchange rates in preparing the budget submissions shall be the foreign currency exchanges rates as adjusted or modified by the congressional committee reports.

5. Section 9092 of Public Law 99-591, "DoD Appropriations Act, 1987," allows the Department to transfer unobligated FY 1983 Procurement funds, except for Shipbuilding and Conversion, Navy funds, to the FCF,D appropriation provided that the transfers are made by September 30, 1987 and provided that at the time the transfer is made using this authority, the balance in the FCF,D appropriation does not exceed \$970.0 million.

070104 Foreign Currency Fluctuation, Military Construction, Family Housing and NATO Infrastructure

A. Beginning in Fiscal Year 1987, Congress established a foreign currency fluctuation account to protect DoD Military Construction, Family Housing and North Atlantic Treaty Organization infrastructure programs from substantial gains or losses resulting from foreign currency fluctuations. The title of this appropriation is the "Foreign Currency Fluctuation, Construction, Defense Appropriation (FCF,C,D)," Symbol 97X0803.

B. The OUSD(C) will centrally administer the FCF,C,D appropriation. Initial capitalization for the account is to be accomplished by transferring unobligated balances from the family housing and military construction appropriations to the FCF,C,D account. Unobligated balances may be transferred up to 5 fiscal years after they have expired for original obligation purposes. The capitalized amount is available for obligation or expenditure during FY 1987, or thereafter, for military construction, expenses of family housing, or NATO Infrastructure programs for the Military Departments and Defense Agencies resulting from foreign currency fluctuations. Military Departments should retain sufficient balances in each account as required to cover contingencies.

C. All amounts to be transferred from this appropriation to other appropriations available for construction will require the specific approval of the USD(C). Upon determination of amounts to be transferred from the FCF,C,D accounts, the OUSD(C) will request the DFAS Indianapolis Center to initiate action for transfer of funds to applicable appropriations by means of Nonexpenditure Transfer Authorization (SF 1151).

070105 Definitions

A. Foreign Currency Unliquidated or Liquidated Obligations. These are obligations payable either in a specified foreign currency or in U.S. dollars, the amount of which is determined by the budget rate in effect at the time of the transaction.

B. Accrued Variance. The accrued variance is the difference between unliquidated obligations at the budget rate and the current foreign currency exchange rate.

C. Realized Variance. The realized variance is the difference between liquidated obligations at the budget rate and the foreign currency exchange rate at the time of payment. The variance is equal to the amount disbursed from the applicable centrally managed allotments.

070106 Standards

A. The foreign currency fluctuation legislation limits the use of funds provided the two appropriations (FCF,D and FCF,C,D) solely to losses sustained owing to unfavorable foreign currency fluctuations. The appropriations are not available to finance cost increases resulting from changes in the scope of programs, inflation increases, or other such changes. Other important features of the foreign currency fluctuations appropriations language are the following provisions relating to obligation/expenditure limitations and financial accounting procedures, relative to foreign currency exchange fluctuations:

1. Authorizations or limitations now or hereafter contained within appropriations or other provisions of law limiting the amounts that may be obligated or expended are hereby increased to the extent necessary to reflect fluctuations in foreign currency exchange rates from those used in preparing the applicable budget submission.

2. Contracts or other obligations entered into payable in foreign currencies may be recorded as obligations based on currency exchange rates used in preparing budget submissions, as amended by the Congress, and adjustments to reflect fluctuations in such rates shall be recorded as disbursements are made.

B. Funds transferred from the foreign currency fluctuation appropriations will be available only for funding centrally managed allotments (CMAs) that are to be established in the applicable operations and maintenance, construction, family housing, or NATO Infrastructure appropriations to cover losses/gains in direct programs due to fluctuations in foreign exchange rates.

C. DoD Components shall record foreign currency obligations at the installation level in dollars at the budgeted rate or at the congressionally established budget exchange rate for direct programs of affected appropriations as reflected in applicable committee reports or the appropriate appropriation acts. These rates shall be provided to the DoD Components by the

OUSD(C). Foreign currency obligations are those obligations that are either payable in specified foreign currency or payable in dollars, the amount of which is determined by the rate of exchange. When payment is made, the disbursing officer will charge the variance between the budget rate and the current rate directly to the applicable CMA. Other obligation adjustments, such as a change in scope of the contract, will necessitate an adjustment, at the budget rate, in the obligation on the installation's books prior to any adjustment for the currency rate variance.

D. The Component's central accounting activity will determine the total foreign currency unliquidated obligations at the budget exchange rate for each appropriation. An "accrued variance," will be determined at the end of each month based on the difference between unliquidated obligations at the budget rate and unliquidated obligations at the current rate, using the exchange rate on the last day of the month. The accrued variance will never be obligated in the official accounting documents. The exchange rate will be provided by the OUSD(C). Appropriate favorable variances must be identified and accumulated as well as unfavorable variances.

E. It is the responsibility of the component holding the CMA to establish controls and carefully monitor fund availability at all times. Antideficiency Act provisions will apply to each CMA. Controls established must ensure that a sufficient amount of funds within the appropriation's availability are reserved for the CMA to finance projected disbursement requirements. For family housing and construction, this is recommended to be a six month requirement. Should CMA funding availability drop below this level, immediate action must be taken to avoid overobligation. Such action shall include providing additional funds from current accounts and, if necessary, advising all disbursing officers to cease payments from the CMA without prior certification until funding is obtained. In no case should any action be taken which presumes relief through a transfer of funds from the foreign currency fluctuations appropriations,

owing to the limited capitalization available in these accounts.

F. Currently, there are 14 specified currencies included in the foreign currency fluctuation program. Additional currencies may be added and some deleted by the OUSD(C) as conditions warrant. Specific currencies and exchange rates are published by OUSD(C).

070107 General Reporting Guidance

A. Other than including the variance between the budget rate and current foreign currency exchange rate in the month end accrual at the Component headquarters, as described in subsection 070106.D., above, no further adjustment is necessary until disbursement is made or until the appropriation lapses.

B. Only direct programs are affected by this procedure. The performing activity shall continue to accept reimbursable orders, incur obligations and bill for reimbursement at the current foreign currency exchange rate using the procedures prescribed in Volume 3, chapters 9 and 16, and Volume 11A, Chapter 1 of this Regulation. However, when the performing activity and the benefiting activity are within DoD, the performing activity shall notify the benefiting activity of the amounts obligated that are to be paid in foreign currency. The benefiting activity shall record that portion of its obligation for direct programs at the budget rate in the manner prescribed in subparagraph 070106.C., above. The variance for the unliquidated obligation and disbursement shall be recorded in the CMA at the headquarters level of the benefiting activity.

C. Normal operating budgets or other funding documents issued for the affected appropriations by DoD Components shall not be adjusted for foreign currency exchange rate fluctuations.

D. Prior to the close of the books at year-end, each Component shall review the status of its CMA. Net gains in a CMA will be promptly transferred back to the applicable Foreign Currency Fluctuations appropriation. Components shall also determine the portion of

the losses that can be absorbed by the CMA and transfer back to the appropriation account any balances that are not required.

0702 REPORTING PROCEDURES

070201 Transfers Made to and from the Foreign Currency Fluctuations, Defense Appropriation Report

DFAS is responsible for providing to the House and Senate Appropriations Committees the annual report on all transfers made to or from the Foreign Currency Fluctuations, Defense Appropriations.

070202 Foreign Currency Fluctuations, Defense (DD-Comp(M)1506)

A. The DFAS is responsible for providing the consolidated monthly DD-Comp(M)1506 report to OUSD(C)P/B.

B. Each DoD Component participating in the program shall submit a monthly report to the DFAS using the format in figure 7-1.

C. The report is due no later than 22 work days after the end of each month.

D. The report shall include the following:

1. Column 1 - Country. The specified countries shall be listed alphabetically.

2. Column 2 - Monetary Unit. Enter the monetary unit of the country.

3. Column 3 - Foreign Currency Unliquidated Obligations. Enter the dollar amount of unliquidated obligations at the budget rate. This is derived by taking the obligations incurred at the budget rate less the disbursements at the budget rate.

4. Column 4 - Accrued Variance. Enter the accrued variance for the unliquidated obligations in column 3. Note: This amount may change from month to month as the current foreign currency exchange rate changes and/or

as the amount of unliquidated obligations changes.

5. Column 5 - Realized Variance.

Enter the actual dollar amount of the variance resulting from liquidated obligations to date. This amount represents the variance (difference) between obligations at the budget rate and the amount actually disbursed.

6. Column 6 - Foreign Currency Obligations Incurred. Enter the dollar amount of total obligations incurred to date at the budget rate. This will be based on actual accounting data of obligations incurred at the budget rate. It will not be a derived number.

7. Column 7 - Planned Overseas Program. The planned overseas program for execution at the budget rate should agree with the current year (CY) column of the PB-18 exhibit, required by Volume 2B, Chapter 19, of this Regulation, supporting the budget year's President's budget request. Any increases/decreases to the planned overseas program during the execution of the CY must be explained by country in the monthly report.

E. The report also shall include footnotes showing:

1. The total funding provided to the centrally managed allotment by source.

a. Transfers from the FCF,D appropriation

b. Transfers from the Component's O&M availability

c. Total CMA funding

2. The anticipated gains or losses for the remainder of the fiscal year. The anticipated gains or losses on projected disbursements to the end of the year shall be estimated by computing the variance that would occur if the current foreign currency exchange rates were to remain in effect during the remainder of the year.

3. Transfers to FCF,D due to Favorable Realized Variances.

4. Projected Liquidations (budget rate) for the FY. Provide an estimate of the obligations (budget rate) that will be disbursed during the FY.

5. Explanation of deviations from planned overseas program by country is required when significant variances from the "obligations incurred" column exist. This explanation can occur any time prior to the lapsing of funds.

F. Based on the reports received, DFAS shall prepare a monthly consolidated report for the OUSD(C), Office of the Deputy Comptroller (Program/Budget) (ODC (P/B)), ATTN: Directorate for Operations. The Reports Control Number under which this report is to be made is RCS DD-COMP(M)1506.

070203 Foreign Currency Fluctuations, Construction, Defense Appropriation Report.

DFAS is responsible for providing to the House and Senate Appropriations Committees the semi-annual report on the Foreign Currency Fluctuations, Construction, Defense Appropriations.

070204 Foreign Currency Fluctuations, Construction, Defense (DD-Comp(M) 1761)

A. The DFAS is responsible for providing the consolidated monthly DD-Comp(M)1761 report to OUSD(C)P/B.

B. DoD Components shall prepare monthly reports on Foreign Currency Fluctuations, Construction, Defense, appropriations obligations using the format in Figure 7-2.

C. The report is due no later than 22 work days after the end of each month.

D. The report shall include the following:

1. Column 1 - Country. The specified country shall be listed alphabetically.

2. Column 2 - Monetary Unit. Enter the monetary unit of the country.

3. Column 3 - Foreign Currency Unliquidated Obligations. Enter the dollar amount of unliquidated obligations at the budget rate. Report unliquidated obligations by fiscal year.

4. Column 4 - Accrued Variance. Enter the accrued variance for the unliquidated obligations in column 3. Note: This amount may change from month to month as the current foreign currency exchange rate changes. Report accrued variances by fiscal year.

5. Column 5 - Foreign Currency Liquidated Obligations. Enter the dollar amount of total obligations liquidated for the report month at the budget rate.

6. Column 6 - Realized Variance. Enter the actual dollar amount of the variance resulting from liquidated obligations for the month. This amount represents the variance (difference) between obligations at the budget rate and the amount actually disbursed. All realized variances will be charged against the current year CMAs for construction, military family housing operations and maintenance and military family housing construction.

7. Column 7 - CMA Projected Six Month Disbursements. Enter the projected 6-month disbursements from the centrally managed allotment based on historical outlay data, contract requirements, and payment schedules.

E. The report also shall include footnotes showing:

1. The anticipated gains or losses for the rest of the fiscal year (estimate this by computing the variance that would occur if the present currency exchange rates were to remain unchanged during the remainder of the fiscal year).

2. The total funding provided to the Centrally Managed Allotments from the FCF,C,D appropriation.

F. Based on the reports received, the DFAS shall prepare a monthly consolidated report for OUSD(C), ODC (P/B), ATTN: Directorate for Military Construction. The fiscal year reports submitted by DoD Components shall be used by DFAS as the basis for preparing and submitting the required biannual and annual reports to the Congress. The Reports Control Number under which this report is to be made is RCS DD-COMP(M)1761.

CHAPTER 8

SPECIAL REPORTS0801 CASH FLOW REPORT

080101 Purpose. The Cash Flow Report is the result of conducting periodic cash management reviews as required by the Deficit Reduction Act of 1984. The review is conducted to identify potential improvements in the Agency's cash management practices, with the general goal of accelerating the collection process, the proper timing of disbursements, and the minimizing of cash balances held outside the U.S. Treasury. The cash management review shall:

A. Determine if the DoD Component is appropriately billing, collecting, depositing, disbursing, and holding funds in compliance with I TFM 5-2000, I TFM 6-2000, and I TFM 6-8000.

B. Document DoD Component cash flows to include collections, disbursements, and cash holdings.

C. Determine if an opportunity exists to implement a better mechanism or process, upgrade an existing mechanism or process, or adopt changing technology.

080102 Applicability and Scope. The provisions of this section apply to all DoD Components. Comprehensive cash management (flow) reviews shall be conducted every 5 years. The DoD Components shall complete the cash flow reviews over a 2-year period. During interim years between cash flow reviews, each DoD Component shall certify annually that its cash management practices are in compliance with appropriate standards for its collection and disbursement cash flows and imprest funds.

A. The Military Services and Defense Agencies shall review and document incoming (collection) and outgoing (disbursement) cash flows that exceed an aggregate of \$1 million per annum, and imprest funds. Before the start of the reviews, DoD Components shall prepare implementation plans which stratify by

milestones and dates the cash flows that shall be reviewed. These plans are subject to approval by the Defense Finance and Accounting Service (DFAS).

B. Cash flows, common to the DoD Components are described at paragraphs 080106 and 080107, below and, as a minimum, shall be reviewed as appropriately meet the threshold level.

C. Use of existing systems is encouraged to monitor cash flows for subsequent year reviews. Failure to perform a cash management review or implement initiatives timely without adequate reason may result in assessment by the Treasury Department of charges for noncompliance in the amount of savings which would have otherwise been realized. Further information on the assessment of charges and appeal procedures are in I TFM 6-8080. The Treasury Department may elect to identify cash management initiatives with corresponding implementation dates based on available information. The DoD Component will be responsible for reporting on such initiatives.

080103 Report Format

A. Cash Flow Reports shall be prepared, as prescribed in paragraph 080105, below, in the format illustrated as figure 8-1.

B. Cash Management Agency Certifications (Certifications) shall be prepared, as prescribed in paragraph 080105, below, in the format illustrated as figure 8-2.

080104 Frequency and Distribution

A. Cash Flow Reports and implementation plans, as required by paragraph 080102, above, shall be submitted by the DoD Components as follows:

1. The Military Departments, shall submit implementation plans to be received by

DFAS by August 15 in the FY preceding the start of the 2-year cash flow review cycle. As cash flows are documented, they shall be submitted to DFAS in accordance with the dates established by the implementation plan.

2. Defense Agencies and DoD Field Activities shall submit implementation plans to be received by the DFAS by August 5 in the FY preceding the start of the 2-year cash flow review cycle. As cash flows are documented, they shall be submitted to the DFAS in accordance with the dates established by the implementation plan.

B. DoD Component cash flow implementation plans shall be approved by the DFAS and consolidated for transmittal to the Treasury Department, by September 1, in the FY preceding the start of the 2-year cash flow review cycle. Cash Flow Reports shall be approved and submitted to Treasury by the DFAS in accordance with the agreed upon implementation schedule for each flow.

C. Cash Management Agency Certifications, as required by paragraph 080105, above, shall be submitted by the DoD Components as follows:

1. The Military Departments shall submit Cash Management Certifications to be received by the DFAS by August 31 during each FY in which a cash flow review is not required.

2. Defense Agencies and DoD Field Activities shall submit Cash Management Certifications, as appropriate, to be received by the DFAS, by August 20 in the FYs in which a cash flow review is not completed.

D. The results of DoD Component Cash Management Certifications shall be approved and consolidated by the DFAS for transmittal, by September 15 each year, to the Treasury Department.

080105 Preparation Instructions

A. A Cash Flow Report must be accomplished for each individual cash flow that meets the criteria of paragraph 080102, above. Minimum review requirements, described at paragraph 080106 and 080107, below, have been prepared to assist DoD Components in preparing their cash flow reports.

B. Cash flow identification numbers shall be assigned by the DoD Component as prescribed by the following criteria:

1. Army

Receipt	DA 1001 - 1999
Disbursement	DA 2001 - 2999

2. Air Force

Receipt	DF 1001 - 1999
Disbursement	DF 2001 - 2999

3. Navy

Receipt	DN 1001 - 1999
Disbursement	DN 2001 - 2999

4. Defense Agencies and OSD

Field Activities

Receipt	D 1001 - 1999
Disbursement	D 2001 - 2999

080106 Minimum Receipt and/or Collection Cash Flow Review Requirements:

A. Individuals

1. Collections from Military Personnel

a. Refund of Pay and Allotments. Refunds from military personnel for overpayments of pay or allotments.

b. Transportation. Collections from military personnel related to "space available" military airlift command flights.

c. Veterans Education Assistance Program. Contributions from service members towards education benefits.

d. Debt. Collections on outstanding military debt.

e. Servicemen Group Life Insurance Premiums (SGLI). Payments received for SGLI premiums.

f. Other Overpayments. Collections for other overpayments.

g. Tuition Reimbursement. Repayment of tuition fees by military personnel who dropped a college course paid for by the Government.

h. Commissary. Receipts of daily deposits from service commissaries.

i. Service Academies. Collections from the operation of stores at the respective service academies.

2. Collections from Civilian Personnel

a. Refund of Pay and Allotments. All collections from civilian personnel for the maintenance of health and life insurance benefits, jury duty pay, returned checks for duplicate payments, overpayments, or withdrawn Civil Service Retirement Funds.

b. Debt. Collections from repayment of outstanding civilian debt.

3. Collections from Military or Civilian Personnel

a. Excess Shipping Allowance. Refunds from military and civilian personnel who shipped more weight than authorized by the Joint Federal Travel Regulation or the Joint Travel Regulation.

b. Government Property Lost or Damaged. Collections from military and civilian personnel for Government-owned items that were lost or damaged.

c. Hospital and/or Medical. Collections made at service hospitals, clinics, and medical facilities.

d. Dining Facilities. Collections made at dining and mess facilities for meals served to military and civilian personnel.

e. Travel Advance Overpayments. Repayment of retained advances for travel.

f. Judge Advocate General (JAG) Claims. Claims processed through the JAG office from individuals for recovery of disputed medical charges, traffic fines on installations, and other amounts.

g. Other. Other collections from military and/or civilian personnel, that do not fit into the above categories and cannot be allocated separately to collections from either military or civilian personnel.

4. Collections from Individuals Outside of Government

a. Refund of Pay and Allotments - Retired. Refunds collected from retirees for overpayments of pay and allotments.

b. Out-of-Service Debt. Collections of outstanding debts by former Service members.

c. Retired Debt. Collections of outstanding debts by retired Service members.

d. Tuition Payments. Collections of tuition from U.S. citizens, or other students (not employed by Department of Defense) attending DoD-operated schools.

e. Survivor Benefit Plan and Retired Servicemen Family Protection Plan. Collections from the Survivor Benefit Program, the Retired Servicemen Family Protection Plan, and/or other similar type plans.

B. Business

1. Transportation Request Refunds. Collections from carriers for unused airline tickets; or refunds arising from a difference between the ticket cost at the time of payment and the cost when the travel was completed.

2. Loss and Damage Refunds. Payment received from commercial carriers for settlement of claims for loss or damage of government shipments.

3. JAG Claims. Recoveries processed through the JAG office from carriers for goods damaged during shipments.

4. Bill of Lading Refund - Reweigh. Remittances from carriers for shipping weight variances and reweighs.

5. Duplicate Pay Refunds. Collections from companies for duplicate payments.

6. Coupon Reimbursement. Collections from contractors used as clearinghouses to process manufacturer's coupons accepted at commissaries.

7. Contractor Refunds, Debt and/or Default. Repayments by contractors for incorrect charges and overpayments due to contract modifications or final audits, collections from contractors on debt outstanding, and/or receipts from claims against contractors for damages and defaults on contracts.

8. Sales and Services. Collections exclusively from business entities for sales and services performed and provided by a Government activity, or a byproduct of such activity, including, but not limited to, items such as plans, specifications, parts, materials, and airlift services.

C. Other: Individuals and/or Business and/or Government

1. Rent and/or Lease and/or Utilities. Collections received from the use and tenancy of government property, both real and personal, including land, buildings, housing facilities, and equipment; and from the provision of utility services by the government to non-government activities such as banks, restaurants, and contractor offices.

2. NSF Checks. Collections from nonsufficient funds checks and canceled checks.

3. Freedom of Information Act (FOIA) (reference (cc)). Receipts from fees and other charges for services under the FOIA.

4. Disposal. Sale of obsolete and surplus Government property and equipment.

5. Reimbursable Orders. Receipts for services and work performed for other Federal agencies, state or local governments, and nonappropriated fund instrumentalities.

6. Tax Refunds. Receipts from State and local governments for taxes incurred in government purchases for which the Federal Government is not liable.

7. Interest Receipts. Interest collected on loans, investments, and other equities, in addition to interest collected on advances, deposits, duplicate payments, and default claims.

8. Foreign Currency. Funds received for foreign currency conversion and gains made on foreign currency exchange.

9. Sales. Proceeds from the sale of any article or commodity produced by, or that

results from, the effort of a government activity, or the byproduct of any activity, as well as the proceeds from services performed by such activities. Excludes foreign military sales.

10. Foreign Military Sales.
Proceeds from foreign military sales.

11. Miscellaneous. Other receipts and collections which do not fit into any of the categories and cannot be allocated separately to individuals or companies.

080107 Minimum Disbursement Cash Flow Review Requirements:

A. Individuals

1. Disbursements to Military Personnel

a. Net Pay. Net pay disbursed to Active Duty, Reserve, or National Guard personnel.

b. Military Pay - Casual. Casual and advance payments made to Active Duty, Reserve, or National Guard personnel.

c. Military Pay Allotment. Disbursements made to active duty military personnel for insurance, dependents, savings, loans, or mortgages.

d. Permanent Change of Station (PCS) Travel. Payments made to military personnel when they are making a PCS move (advances and settlements).

e. Miscellaneous Pay. Disbursements for separation payments, replacement payments, and nonpayroll payments.

2. Disbursements to Civilian Personnel.

a. Civilian Payroll. All pay disbursed to civilian personnel.

b. Civilian Allotment. Disbursements made for insurance, dependents, savings, loans, or mortgages.

c. Change of Station. Payments made to civilian employees who are making a PCS move (advances and settlements).

3. Disbursements to Military or Civilian Personnel

a. Travel Advance. Payments made to both military and civilian personnel performing travel.

b. Travel Payments. Payments for accrued per diem and full reimbursement for travel.

c. Other Advances. Other advances that are issued to personnel, both military and civilian, that are not categorized elsewhere.

d. Payroll Taxes. Tax payments made to the Federal, State, and local government taxing authorities.

e. Stipends. Payments made to students attending DoD-operated schools.

4. Disbursements to Individuals Outside of Government

a. Military Net Pay - Retired. Military pay disbursed to retirees.

b. Monthly Allotment - Retired. Disbursements made to retirees for insurance, dependents, home mortgages, garnishments, loans, or savings.

c. Travel Settlements. Disbursements made to retirees for travel claims and unsettled travel claims.

d. Miscellaneous. Other disbursements which do not fit into any of the categories and cannot be allocated separately.

B. Business1. PPA Vendor Payments.

Disbursements, covered under the Prompt Payment Act, made to vendors in fulfillment of contracts with commercial freight and passenger carriers for transportation charges and utility services.

2. Other Vendor Payments.

Disbursements made to vendors with contracts for financing arrangements or contracts with advance or partial payments, and disbursements made to contractors for overhead and interim fees and costs.

C. Other: Individuals and/or Business and/or Government

1. Payments made for the purchase of foreign currency.

2. Payments made to other Government Agencies.

3. Payments that do not fit into any of the specified categories and which cannot be allocated separately to either individuals or business.

080108 Minimum Imprest Fund Cash Flow Review Requirements: Reviews of imprest funds must be accomplished during the two-year cash flow review process to determine compliance with cash holding authority.

080109 Review Closeout. Treasury Department recommendations from the Cash Flow Review shall be discussed during a DoD closeout meeting. The recommendations that are agreed to by the Treasury Department and the DoD Component shall be summarized in writing. This correspondence shall be sent by the Treasury Department to the DFAS. These recommendations shall be transmitted by the DFAS to the respective DoD Components. Within 60 days, DoD Components shall respond to DFAS with:

A. Cash management initiatives for those Treasury Department recommendations with which DoD concurs. These initiatives shall

include documented cash flows, estimated savings, and implementation milestones. They shall be completed in accordance with paragraph 080204 below. Initiatives shall be reported as part of the Department's annual Cash Management Plan.

B. Reasons why the recommendations are not feasible, or suggestions for alternative changes. The DFAS shall provide the Treasury Department with the DoD response.

0802 CASH MANAGEMENT INITIATIVE REPORT

080201 Purpose. Each DoD Component is responsible for continually reviewing its operations and ensuring that effective cash management practices are in place, and initiating new action items when the need for improvement is indicated. The Treasury Department has developed and implemented a tracking system for all cash management initiatives. The system is used to monitor progress toward initiative completion. Each initiative is assigned milestone completion dates. Progress is reported quarterly to the Treasury Department. The Cash Management Initiative Report identifies new initiatives, reports progress on current initiatives and provides input for the annual Cash Management Plan. Specifically, there are three types of Cash Management Initiative Reports:

A. New Initiative Request. To request approval of a new initiative identified either separately through normal operations or through performance of the Cash Flow Review/Certification process.

B. Quarterly Initiative Status Report. To report on:

1. Interim Actions and/or Changes. To report completion of interim action milestones or changes in the scope, estimated cash flow, estimated savings, and estimated completion date of an initiative.

2. Initiative Completion. To report completion of an initiative.

3. Cash Flow and Savings Results.

To report the actual cash flow and savings results for the quarter.

C. Annual Cash Management Plan. To update all initiatives for the following fiscal year by providing the expected cash flow and savings goals by quarter, to report changes in the scope, interim milestones, and estimated completion dates of incomplete initiatives; and to request approval for new initiatives.

080202 Applicability. This section applies to all DoD Components.

080203 Frequency and Distribution.

A. Cash Management Initiative Reports shall be submitted to the DFAS by the DoD Components at least 5 calendar days before the due dates below. The results of each DoD Component Cash Management Initiative Report shall be consolidated by the DFAS for transmittal to the Treasury Department.

B. The following reports shall be submitted in the frequency stated:

1. New Initiative Request.

Reports requesting approval of new initiatives shall be received during the update cycle for the following year's Cash Management Plan, normally by August 31 each year, or whenever a new initiative is deemed appropriate, either through the Cash Flow Review/Certification process or as circumstances dictate throughout the year.

2. Quarterly Initiative Status Report. Quarterly updating and reporting is required for all initiatives. Reports shall be received by the end of the month following the close of each fiscal quarter.

3. Annual Cash Management Plan. Reports citing the cash flows and savings goals of each initiative for the following fiscal year shall be received by the DFAS during the update cycle for the following year's Cash Management Plan, normally by August 31 each year.

080204 Preparation Instructions. The reporting format, as prescribed in figure 8-3, shall be prepared for the New Initiatives Report, the quarterly Cash Management Initiative Report and the annual Cash Management Plan.

A. Purpose of Report

1. New Initiative Request. Figure 8-3 report format shall be followed for the identification of new initiatives. Specific elements of the report include.

a. Type of Initiative. State whether the initiative is mechanized or other.

b. DoD Component. State the name of the DoD Component providing the report.

c. Def No. Leave this space blank for new initiatives. This number will be assigned by the DFAS.

d. Initiative Title. Provide the name of the cash management action.

e. Purpose of Report. Indicate that the submission is for a new initiative.

f. Description of Initiative. Describe the DoD Component improvement effort. Include a statement which contains a brief summary of the program, the cash management deficiency, the revised procedure, and the time phased steps necessary to correct the deficiency. State the related cash flow name and number, if applicable.

g. Current Status. This section shall be left blank for new initiatives.

h. Schedule of Tasks. State the major actions that must be completed, along with their estimated completion dates. Milestones should include the major decision points of effort, be few in number, but frequent enough to provide tracking of results. If initiative has been completed, provide a statement indicating this.

i. Reason for Variance Between Savings Goal and Actual. This section shall be left blank for new initiatives.

j. Project Officer. Provide the name and telephone number of the action officer assigned to the project. This individual should have a sound working knowledge of the initiative scope, current status of work effort, cash flows and interest saving calculations.

k. Completion Date. Provide the estimated completion date of the cash management improvement. Revisions to this date shall be justified.

l. Number of Benefit Days. State the number of benefit days that will be gained by the cash management improvement. The prescribed number of benefit days are provided in paragraph 080204.B below. Actual days may be used. However, the DoD Component shall submit an explanation justifying how actual days were computed.

m. Savings Goals. State, by quarter, the cash flow and interest savings to be achieved. Prior year experience should be used, if appropriate, to project realistic dollar flows and/or savings for each quarter.

n. Actual Cash Flow and Savings Results. This section shall be left blank for new initiatives.

o. Computation of Savings. The formulas and prescribed benefit days, as provided in paragraph 080204.B below, shall be used for interest savings calculations. If a cash management improvement is not covered by one of the established formulas, the DoD Component must provide an explanation of the calculation and a justification.

2. Quarterly Initiative Status Report. Figure 8-3 report format shall be followed for preparing quarterly reports. Specific items shall include:

a. Type of Initiative. State whether the initiative is mechanized or other.

b. DoD Component. State the name of the DoD Component providing the report.

c. Def No. Maintain the same assigned number for ongoing and completed initiatives. Leave this space blank for new initiatives. This number will be assigned by the DFAS.

d. Initiative Title. Provide the name of the cash management action.

e. Purpose of Report. Indicate whether the submission is for a new initiative or a quarterly status report on an ongoing or completed initiative.

f. Description of Initiative. Describe the DoD Component improvement effort. Include a statement which contains a brief summary of the program, the cash management deficiency, the revised procedure, and the time phased steps necessary to correct the deficiency. State the related cash flow name and number, if applicable.

g. Current Status. Provide a summary of efforts to date since the last reporting period. Efforts shall include a statement on the degree of success that was realized in implementing a specific improvement, what actions were taken, and what, if any, new initiatives were established in the process of implementation. This section will not be left blank. If an initiative was completed, then a statement will be provided on the result of the improvement. For example, if the initiative focuses on efforts to implement DD/EFT for military pay, then this section might state "The Army maintains a 98.3 percent participation rate for active duty officers. It now requires all new recruits to be paid by DD/EFT." This section shall be left blank for new initiatives.

h. Schedule of Tasks. State the major actions that must be completed, along with their estimated completion dates. Milestones should include the major decision points of effort, be few in number, but frequent enough to provide tracking of results. If

initiative has been completed, provide a statement indicating this.

i. Reason for Variance Between Savings Goal and Actual. Provide an explanation for all variances 10% above/below projected goals. This section shall be left blank for new initiatives.

j. Project Officer. Provide the name and telephone number of the action officer assigned to the project. This individual should have a sound working knowledge of the initiative scope, current status of work effort, cash flows and interest saving calculations.

k. Completion Date. Provide the estimated completion date of the cash management improvement. The actual completion date shall be entered for those initiatives completed within the reporting period. Where a planned completion date falls within the reporting period and the initiative has not been completed, that date shall be revised and an explanation given as to why the target date was not met.

l. Number of Benefit Days. State the number of benefit days that will be gained by the cash management improvement. The prescribed number of benefit days are provided in paragraph 080204.B below. Actual days may be used. However, the DoD Component shall submit an explanation justifying how actual days were computed.

m. Saving Goals. State, by quarter, the cash flow and interest savings to be achieved.

n. Actual Cash Flow and Savings Results. State, by quarter, the actual cash flow and interest savings achieved. This section shall be left blank for new initiatives.

o. Computation of Savings. The formulas and prescribed benefit days, as provided in paragraph 080204.B below, shall be used for interest savings calculations. If a cash management improvement is not covered by one of the established formulas, the DoD Component must provide an explanation of the calculation and a justification.

3. Annual Cash Management Plan. DoD Component submissions shall include: (1) all completed initiatives with estimated savings greater than \$5,000; (2) required initiatives in specified collection and disbursement areas as directed annually by DFAS; (3) recommendations made by Treasury, as contained in the Cash Management Agency Certification package, or justification provided otherwise, and (4) new initiatives as deemed appropriate, either through the Cash Flow Review process or as circumstances dictate throughout the year. Figure 8-3 report format shall be followed for preparing submissions for the Cash Management Plan. Specific items shall include:

a. Type of Initiative. State whether the initiative is mechanized or other.

b. DoD Component. State the name of the DoD Component providing the report.

c. Def No. Maintain the same assigned number for ongoing and completed initiatives. Leave this space blank for new initiatives. This number will be assigned by DFAS.

d. Initiative Title. Provide the name of the cash management action.

e. Purpose of Report. Indicate that the submission is for the Cash Management Plan.

f. Description of Initiative. Describe the DoD Component improvement effort. Include a statement which contains a brief summary of the program, the cash management deficiency, the revised procedure, and the time phased steps necessary to correct the deficiency. State the related cash flow name and number, if applicable.

g. Current Status. This section shall be left blank.

h. Schedule of Tasks. State the major actions that must be completed, along with their estimated completion dates.

Milestones should include the major decision points of effort, be few in number, but frequent enough to provide tracking of results. If initiative has been completed, provide a statement indicating this.

i. Reason for Variance Between Savings Goal and Actual. This section shall be left blank.

j. Project Officer. Provide the name and telephone number of the action officer assigned to the project. This individual should have a sound working knowledge of the initiative scope, current status of work effort, cash flows and interest saving calculations.

k. Completion Date. Provide the estimated or actual, as applicable, completion date of the cash management improvement. Revisions to this date, as specified from the last quarterly report, shall be justified.

l. Number of Benefit Days. State the number of benefit days that will be gained by the cash management improvement. The prescribed number of benefit days are provided in paragraph 080204.B below. Actual days may be used. However, the DoD Component shall submit an explanation justifying how actual days were computed.

m. Savings Goals. State, by quarter, the cash flow and interest savings to be achieved. Prior year experience should be used, if appropriate, to project realistic dollar flows and/or savings for each quarter.

n. Actual Cash Flow and Savings Results. This section shall be left blank.

o. Computation of Savings. The formulas and prescribed benefit days, as provided in paragraph 080204.B below, shall be used for interest savings calculations. If a cash management improvement is not covered by one of the established formulas, the DoD Component must provide an explanation of the calculation and a justification.

B. Type of Initiative

1. Mechanized Initiatives. This category encompasses those improvements that are measured by a standard formula in which benefit days are a factor. Interest savings are measured using benefit days (the average number of days by which a collection flow is accelerated or a disbursement flow is deferred). Examples of mechanized initiatives include: lockbox, wire collections and payments, Governmentwide credit or charge cards, and third party drafts.

a. Formulas. DoD Components shall use the following formulas to calculate savings:

$$\text{Annual Mechanism Flow} / 250 \text{ Business Days} = \text{Daily Flow}$$

$$\text{Daily Flow} \times \text{Benefit Days} \times \text{Current Value of Funds Rate} = \text{Interest Savings}$$

$$\text{Interest Savings} / 360 \times 90 = \text{Quarterly Interest Savings}$$

b. Benefit Days. To report cash flows and savings, DoD Components shall use the following benefit days in their calculations unless supporting documentation is received showing actual computations of benefit days:

(1) Collections

a. Lockbox	3 days
b. Federal Deposit System	3.5 days
c. TGA and/or CCS	3 days
d. CCCN (Electronic Only)	1 day
e. ACH and/or PAD or CIE	3.3 days

(2) Disbursements

a. LOC and/or TFCS	4.7 days
b. American Express Cards (GCA)	45 days
c. American Express Government Travel Account (GTA)	30 days
d. Third Party Drafts	20 days

NOTE:

TGA = Treasury General Account
 CCS = Cash Concentration System
 CCCN = Credit Card Collection Network
 ACH = Automated Clearing House
 PAD = Pre Authorized Debit
 CIE = Customer Initiated Debit
 LOC = Letter of Credit
 TFCS = Treasury Financial Communications System

2. Other Initiatives. This category encompasses those improvements that are measured by a standard cost saving formula or a formula unique to the DoD Component. Interest savings are measured using a standard cost saving per item method or by formulas devised by a DoD Component and approved by DFAS. Where the following formulas are not used, DoD Components shall provide the calculations and the justifications used to determine cash flows and savings. Examples of other initiatives are direct deposit and/or electronic funds transfer (DD/EFT), automated clearing house (ACH) and/or vendor express, Governmentwide credit card for small purchases, and reductions in imprest funds.

3. Formulas. DoD Components shall use the following formulas to calculate savings, unless greater savings can be justified:

a. DD/EFT (Civilian).

(1) Number of DD/EFT salary payments in last pay period of quarter x 6.5 (pay periods) x \$1.10.

(2) Number of DD/EFT allotment payments in last pay period of quarter x 6.5 (pay periods) x \$.40.

b. DD/EFT (Military).

(1) Number of DD/EFT salary payments in last pay period of quarter x 6 (pay periods) x \$1.10

(2) Number of DD/EFT allotment payments in last pay period of quarter x 6 (pay periods) x \$.40

(3) Number of DD/EFT monthly pension payments in last month of quarter x 3 (pay periods) x \$.26.

c. Vendor Payments (ACH).

Number of vendor or miscellaneous ACH payments in quarter x \$.26.

d. Change in Cash Position

(CP). If the improvement is a one time change in the cash position of the Treasury (i.e., reduction in imprest funds, overseas custody accounts, grant advances/advance payments, and outstanding travel advances or improvement in billing procedures), then the following formula shall be used:

CP Improvement x Current Value of Funds Rate
 = Interest Savings

Interest Savings / 360 x 90
 = Quarterly Interest Savings

0803 PROMPT PAYMENT REPORT080301 Purpose and Report Control Number.

This section prescribes quarterly and annual reports on prompt payment practices of appropriated and non-appropriated activities. These reports are designed to notify the Office of the Secretary of Defense (OSD), the Treasury Department, and the Congress of the DoD performance in achieving the goals of zero early payments and zero interest penalty payments. The DoD Component reports are consolidated into DoD-wide reports for the USD(C). The DoD Prompt Payment Report is transmitted to The Treasury Department by November 30 each year, and reported by the Treasury Department to Congress. Accounting Report Control Numbers: Acct Rpt(Q)1619, Prompt Payment Report, and Acct Rpt(A)1607, Prompt Payment, have been assigned to these two reporting requirements.

080302 Applicability and Scope

A. This section applies to all DoD Components with disbursing authority. It is the paying office's responsibility to pay and report all payments for which they are responsible, regardless of the Agency being serviced.

B. The Defense Agencies and DoD Field Activities, receiving disbursing support from another DoD Component shall ensure that the prompt payment data of its Agency or field activity are accurately reflected in the quarterly and annual Prompt Payment Report of the supporting disbursing office.

C. Subject to the "Prompt Payment Act", reports are required on total early (8 days or earlier, before due dates, except where cash discounts are justifiably taken or a management decision is made), late (with interest penalty), and grace period payments (if applicable).

080303 Report Format. Quarterly and annual Prompt Payment Reports and the Prompt Payment Quality Control System Initiative Reports shall be prepared in the formats illustrated as figures 8-4 and 8-5.

080304 Frequency and Distribution

A. Quarterly Status Report. The quarterly Prompt Payment Report shall be submitted by the DoD Components, as follows:

1. Military Departments shall submit reports directly to DFAS to arrive by the end of the month following the close of each fiscal quarter.

2. Defense Agencies and DoD Field Activities shall submit reports to be received by the DFAS by the 25th calendar day following the close of each fiscal quarter.

B. Annual Status Report. The annual FY Prompt Payment Report shall be submitted by the DoD Components, as follows:

1. Military Departments shall submit reports directly to the DFAS to arrive by November 15, each year.

2. Defense Agencies and OSD Field Activities shall submit reports to be received by the DFAS by November 10, each year.

C. Quality Control System Initiative Report. The annual Quality Control System Initiative Report shall be submitted by the DoD Components, as follows:

1. Military Departments shall submit reports directly to the DFAS to arrive by November 15, each year.

2. Defense Agencies and DoD Field Activities shall submit reports to be received by the DFAS by November 10, each year.

D. The results of DoD Component FY prompt payment data shall be consolidated by the DFAS into the annual DoD Prompt Payment Report for transmittal annually, by November 30, to the Treasury Department.

080305 Preparation Instructions

A. Quarterly Prompt Payment Report. With respect to figure 8-4, DoD Components shall submit report elements A through H, including year-to-date totals, for the quarterly status report.

B. Annual Prompt Payment Report. When supplemented with sections IX through XII report elements I through L (see figure 8-4) and the Quality Control Initiatives Report (paragraph 080305.C, below), the fourth quarter report will satisfy the annual requirement. DoD Component reports shall be certified by an Agency senior official with line authority over the procurement, logistics, and payment processes.

C. Quality Control Initiatives Report. Initiatives to establish, improve, or maintain a quality control program to assess performance of payment systems and provide a reliable way to improve payment performance shall be reported in the format provided at figure 8-5.

0804 DIRECT DEPOSIT/ELECTRONIC FUNDS TRANSFER (DD/EFT) STATUS REPORT

080401 Purpose. DoD is required to provide data to the Treasury Department's Financial Management Service that reflect payment volumes stratified by payment mechanism; e.g., cash, Treasury Department check, direct deposit of salary payments and EFT of vendor payments. The DD/EFT Status Report has been designed to provide data for consolidation and transmission

to fulfill this Treasury Department requirement. The report also serves as a gauge for compliance with the DoD policy that travel vouchers must be paid within 15 days after receipt in the disbursing office.

080402 Applicability and Scope. Each DoD Component with disbursing authority shall submit DD/EFT Status Reports, as specified herein. Data for the U. S. Marine Corps shall be identified separately in Department of the Navy submissions.

080403 Report Format. DD/EFT Status Reports shall be prepared, as prescribed in paragraph 080405, below, in the format illustrated as figure 8-6.

080404 Frequency and Distribution

A. DD/EFT Status Reports, as required by paragraph 080402, above, shall be submitted by the DoD Components, as follows:

1. Military Departments submit reports to be received by DFAS within 30 days following the close of each fiscal quarter.

2. Defense Agencies submit reports to be received by DFAS within 20 days following the close of each fiscal quarter.

B. DoD Component data shall be consolidated by DFAS for transmittal quarterly to the Treasury Department's Financial Management Service.

080405 Preparation Instructions

A. The DD/EFT Status Report Encompasses the Following Types of Payments:

1. Centralized military pay.
2. Centralized military retiree pay.
3. Centralized annuitant pay.
4. Centralized Reserve Component pay.
5. Centralized allotments.

6. U.S. civilian pay (i.e., Executive Level, Senior Executive Service (SES), General Manager and/or General Schedule (GM/GS), Wage Grade, and Wage Board), both for employees in the 50 States and overseas.

7. Travel settlement payments.

8. Vendor payments.

B. Part I - Direct Deposit. Personnel strength and participation, rounded to the nearest 100, shall be as of the last pay period of the fiscal quarter. Dollar amount shall be total payments for the fiscal quarter. The participation rate shall be obtained by dividing the number of participants by personnel strength and rounding to the nearest tenth of one percent. Any categories of personnel excluded due to training or operational considerations shall be so footnoted.

C. Part II - Allotments. Number (of payments) and dollar amount both shall be totals for all pay periods in the fiscal quarter. Any categories of personnel excluded due to training or operational considerations shall be so footnoted.

D. Part III - Travel Payments. To provide for necessary local reporting and consolidation, the number (of payments) and dollar amount, both shall be totals for the 3-month period ending at the close of the second month of each fiscal quarter. Average settlement time shall be the average (mean) of days taken by all reporting disbursing stations to process and pay travel vouchers once submitted by serviced personnel. The range shall be the low and high number of days reported by disbursing offices for the period.

E. Part IV - Vendor Payments. To provide for necessary local reporting and consolidation, the number (of payments) and dollar amount both shall be totals for the 3-month period ending at the close of the second month of each fiscal quarter.

0805 MUTUAL LOGISTICS REPORTS

080501 Purpose and Report Control Number. This section prescribes the annual reports required by 10 U.S.C., Chapter 138, Sections 2341 through 2350, "North Atlantic Treaty Organization (NATO) Mutual Support Act of 1979," as amended. These reports are designed to advise the Congress of the various DoD Components' performance in reimbursable and exchange transactions related to the sale to or exchange of mutual logistics support, supplies, and services with a foreign country. This report has been assigned Report Control Number, Acct Rpt(A)1570 for both reimbursable and exchange transactions. These transactions are to be reported as either "reimbursable purchases and sales" or "reimbursable purchases and sales exchanges."

080502 Applicability and Scope

A. The reporting requirements apply to the Office of the Secretary of Defense (OSD); Military Departments, the Chairman, Joint Chiefs of Staff, Joint Staff; and the Unified Combatant Commands; and the Defense Agencies (DoD Components).

B. Amounts reported as reimbursable or exchange transactions are to be supported by country-to-country or multinational agreements for mutual logistics support between the United States and Governments of other NATO countries, NATO subsidiary bodies, and other eligible foreign countries.

080503 Report Format. Annual reports shall be prepared in the format illustrated in figures 8-7 and 8-8.

080504 Frequency and Distribution. Annual reports shall be submitted as follows:

A. The Secretaries of the Military Departments or designees shall submit to the Director, Washington Headquarters Service (WHS), not later than December 1 of each year, the following:

1. A detailed report for each country-to-country or multinational agreement

entered into under the authority of 10 U.S.C., Chapter 138, sections 2341 through 2350, "NATO Mutual Support Act of 1979," as amended, that was in effect during the prior fiscal year, itemized by reimbursable or exchange transactions.

2. A detailed report for each agreement expected to be effective in the current year, itemized by reimbursable or exchange transactions.

B. WHS shall consolidate the Military Department reports for the annual report. The annual report is to be coordinated with the Office of the Under Secretary of Defense (Acquisition and Technology), Office of the Assistant Secretary of Defense (Legislative Affairs), and the OUSD(C). WHS is to submit the annual report, no later than February 1 of each year, to the Congress.

080505 Preparation Instructions. The information prescribed in paragraph 080505.A through 080505.D, below, is to be included in the Acct Rpt(A)1570.

A. Agreement Identification. Each basic source document used to report a transaction shall be cross referenced to the applicable country-to-country or multinational agreement. The agreement subject, date and number shall be identified.

B. Appropriation or Fund Account Symbol. Each DoD appropriation is assigned an appropriation code by the Treasury Department. The appropriation code should be reflected in each basic source document.

C. Transaction Types. The following types of reimbursable and/or exchange transactions are to be reported:

1. Purchase of petroleum, oil, and lubricants (POL) and services.

2. Purchase of supplies (material) other than POL.

3. Purchases when an exchange of POL and services is converted to a reimbursable

transaction (purchase) due to nonissue of replacement POL or services.

4. Purchases when an exchange of supplies (material), other than POL, is converted to a reimbursable transaction (purchase) due to nonissue of replacement material.

5. Sale of materials, POL, or services.

6. Sale when an exchange is converted to a reimbursable transaction (sale) due to nonreceipt of replacement material, POL, or service.

7. Exchanges when a DoD activity requests the transfer subject to future replacement of material, POL, or services from a military component of a foreign country.

8. Exchanges when a military component of a foreign country requests the transfer subject to future replacement of material, POL, or services from a DoD activity.

9. Exchanges when a DoD activity receives replacement material, POL, or service.

10. Exchanges when a DoD activity issues replacement material, POL, or service.

D. Other Information. The following information is provided to assist the performing DoD Component in processing reimbursable and exchange transactions:

1. Source Document Control Number. Efforts should be made to establish a control number similar to a DoD requisition number; e.g., a number containing a code for Military Service, a code for requisitioner, a date, and a document serial number.

2. Unit of Issue. Unit of issue refers to the quantity of an item such as each

number, dozen, gallon, pair, pound, ream, set, or yard.

3. Quantity. Amount either issued or received depending on transaction type.

4. Unit Price. This is a price based on unit of issue.

5. Extended Dollar Value. This is the dollar value resulting from a combination of items in paragraphs 080505.D.2 through 080505.D4, above.

6. Name and mailing address of the organization to be billed. This should be included in the country-to-country or multinational agreement.

7. Name and mailing address of receiving organization. This should be included in the country-to-country or multinational agreement.

8. Signature of receiver. Self-explanatory.

9. Name and mailing address of issuing organization. This should be in the country-to-country or multinational agreement.

10. Date (year, month, day) (YYMMDD). The date services were performed or material delivered.

11. National Stock Number (NSN) of material or abbreviated description of services provided. The NSN is a number assigned under the Federal Cataloging System and/or North Atlantic Treaty Organization Codification of Equipment System to each approved item identification. This number provides a unique identification of an item of supply within a specified Federal supply classification.

- 2/ The types of information to be included is addressed in paragraph 080505.C, of this chapter.
- 3/ When services which are difficult to cost, such as range target details, are exchanged within the same accounting period, the DoD activity providing or receiving the service may process transactions at an estimated dollar value. Under this type of transaction, the DoD activity shall process separate transaction reports for transaction type in paragraph 080505.C.9 of this chapter ("exchanges, when a DoD activity receives replacement material, POL, or services") and transaction type, in paragraph 080505.C.10 of this chapter ("exchanges when a DoD activity issues replacement material, POL, or service").

FIGURE 8-8

CHAPTER 9

ACCOUNTING AND REPORTING FOR OPERATION AND MAINTENANCE
OF THE FAMILY HOUSING PROGRAM0901 GENERAL

090101 Purpose. The Congress established the family housing operation and maintenance (O&M) appropriation to separate the funding of family housing O&M from other O&M programs. All obligations incurred for O&M to support the military family housing program shall be charged to the family housing O&M appropriation. This chapter provides accounting support for O&M requirements set forth in Volume 2B, Chapter 6, of this Regulation. This chapter prescribes an accounting structure that accumulates O&M costs consistent with guidance in Volume 2B, Chapter 6, Section 060106, of this Regulation. The purpose of the account structure is to provide DoD Components with uniform procedures for consistently identifying, accumulating, and reporting family housing program costs. Costs for operating and maintaining family housing facilities shall be identified as prescribed in this chapter and shall be the basis for reports referenced herein.

090102 Overview

A. This chapter strengthens compliance with related DoD policy requirements involving program administration, reporting, internal management and fund control, management analysis and decision-making by directly linking the financial accounting to budget accounts and reporting requirements.

B. It is important that methods for computing costs for the family housing program are as uniform as practicable among the DoD Components. Such uniformity is essential to permit intra-DoD and inter-DoD Component program, budget, and cost comparison, irrespective of the management service, the agency, or the accounting system used at the installation. Also, cost identification and computation methods specified herein should minimize the accounting effort and detail

required to compute costs. Section 0903 provides the account structure and content for identifying costs for work and services performed for the family housing program. Guidelines are also provided for computing labor, materials and supplies, equipment usage, and support service charges.

C. Compliance with the requirements in this chapter will provide management reasonable assurance that program cost information is developed and maintained on a consistent basis throughout the Department.

0902 ACCOUNTING REQUIREMENTS. A series of accounts shall be established and maintained for accumulating family housing O&M costs and reimbursements. Costs and reimbursements shall be computed and identified to the accounts in accordance with the guidance herein. The accumulated costs and reimbursements in the accounts shall be used to support budget exhibits and budget execution reports.

0903 ACCOUNT STRUCTURE AND
CONTENT

090301 DoD Components receiving obligation authority for family housing O&M shall establish and maintain the uniform accounts specified in this chapter. The accounts shall be used to accumulate the obligations incurred for the family housing O&M program.

090302 The following summary and subordinate accounts are required:

Operations

Management

Services

Furnishings

Miscellaneous

Utility Operations

Maintenance of Real Property Facilities

- Dwellings
- Exterior Utilities
- Other Real Property
- Alteration and Additions
- Leased Housing
- Lease Cost - Foreign

- Other O&M Cost - Section 801

Interest Payments On Debt

Servicemen's Mortgage Insurance Program

Foreign Currency Fluctuations

- Gains
- Losses

Reimbursements

- Foreign Military Sales (FMS)
- Other

090303 The following guidance defines the basic scope and content of the accounts:

A. Operations Account. This is a summary account for consolidating costs accumulated in the following subordinate accounts:

1. Management Account. Accumulates costs of management, administrative, and support type services at installation level involving:

a. Administration costs for installation housing offices including management office personnel, supplies, equipment, and utilities pertaining to the functions of a family housing office. Costs for administrative support services provided in supply, comptroller, maintenance, and other installation offices when the costs for such services are attributable to family housing.

b. Costs for housing referral administration costs pertaining to private housing, including rental guarantee projects and the provision of referral services. Assistance in locating and inspecting privately owned family housing for DoD personnel.

c. Requirements surveys and preliminary family housing studies or engineering construction plans made before Secretary of Defense project approval. Also includes planning for improvement and rental guarantee projects and inspection of construction of rental guarantee housing.

d. Other identifiable management costs that directly support the family housing program.

2. Services Account. Accumulates costs for the following types of authorized services:

a. Refuse collection and disposal - Include costs of family housing for collecting garbage, trash, ashes and debris, and for refuse disposal, such as the operation and maintenance of incinerators, sanitary fill, and regulated dumps. Also included are costs for acquisition, maintenance and repair of garbage and trash containers, and operation of can washing facilities.

b. Fire protection - Include costs for protection and prevention of family housing facilities.

c. Police protection - Include costs for law enforcement, traffic control, and protection of family housing facilities.

d. Entomological services - Include costs of all control measures against fungi, insects, and rodents within family housing dwellings, facilities, and areas.

e. Custodial services - Include costs of janitorial and custodial services performed in common service areas and the cost of elevator operation in family housing facilities.

f. Snow removal - Include costs of removing, hauling, and disposal of snow, the cost of ice alleviation, and erection, maintenance, repairs and removal of snow fences for family housing areas.

g. Street cleaning - Include costs of cleaning streets comprised of sweeping, flushing, and picking up litter.

h. Municipal type services - Include costs of miscellaneous municipal type services not identifiable to other listed accounts.

i. Other services - Include costs of all other authorized services for family housing.

3. Furnishings Account. Accumulates costs for initial acquisition, maintenance, repair, and replacement of furnishings, furniture, movable household equipment, and authorized miscellaneous items. Also includes control, handling, record keeping, moving of Government-owned furnishings into and out of dwelling units and charges for connecting and disconnecting equipment, as well as handling costs incident to storage.

4. Miscellaneous Account. Accumulates costs for:

a. Lease rents and permit payments for housing and trailer spaces leased by the Government from private sources or provided by the Federal Housing Administration (FHA) or the Department of Veterans Affairs (VA). Also included are the reimbursement costs for dwellings provided by State, municipal, or foreign governments or by Federal Agencies other than the FHA or VA.

b. German land taxes paid to the Federal Republic of Germany under the North Atlantic Treaty Organization Status of Forces Agreement for local taxes on land and improvements of family housing property.

c. Fire insurance charges paid to the Federal Republic of Germany to cover fire damage to family housing dwelling units.

d. United Kingdom accommodation charges paid in accordance with the country-to-country agreement for housing provided to U.S. Forces.

e. Other miscellaneous operations costs not covered elsewhere.

B. Utility Operations Account. This is a summary account for accumulating costs for utilities consumed in family housing. This account excludes the costs of maintenance and repair of utility systems identified to the family housing property covered under the Maintenance of Real Property Facilities Account. Electricity, water, sewage, gas fuel oil or other heating fuels are the types of utilities reported in this account. Other services reported under paragraph 090303.A.2 above are excluded from the utility operations account.

C. Maintenance of Real Property Facilities Account. This is a summary account for consolidating costs accumulated in the following subordinate accounts:

1. Dwellings Account. Accumulates costs of maintenance and repair of all family housing buildings in real property category codes 711, 712, and 714 as defined in DoD Instruction 4165.3 including all interior utilities and installed equipment. Typically this involves:

a. Service calls for minor work including emergency and temporary repairs normally not in excess of 16 workhours.

b. Routine maintenance for occupancy work and other maintenance usually scheduled annually or more frequently.

c. Repairs and replacements for rehabilitations and replacement of major components and installed equipment.

d. Interior and exterior painting and the necessary preparation.

e. Contract cleaning between occupancy, where authorized.

2. Exterior Utilities Account.

Accumulates costs of maintenance and repair of electric, gas, water, sewage and other utility distribution, collection, or service systems assigned to family housing. Street and area lighting systems are included in exterior utilities beginning at a point 5 feet from the house line and ending at a point where the utility system joins a common use main or terminates.

3. Other Real Property Account.

Accumulates costs for the following:

a. Maintenance, care, and repair of improved and unimproved grounds, storm sewerage, and drainage structures and costs of acquisition, maintenance, and repair of Government-owned minor equipment, such as hand-operated lawn mowers used for grounds maintenance by occupants.

b. Maintenance and repair of paved or stabilized streets, roads, walks, driveways, utility, service, and parking areas, as well as curbs, gutters, signs, and other road appurtenances.

c. Maintenance and repair of facilities other than dwellings, such as fences when the facility is dedicated to housing, athletic and recreation facilities, community buildings, and service facilities. Also included are the costs of maintenance of trailer sites including outlets.

4. Alterations and Additions Account. Accumulates costs for incidental additions, expansions, extensions, and alterations to the existing real property. Also includes the payments made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed nonpermanent change of station moves and charges resulting from improvement or repair projects funded in part from the family housing construction account.

D. Leased Housing Account. This is a summary account for consolidating costs accumulated in the following subordinate accounts:

1. Lease Cost - Foreign Account.

Accumulates costs for charges and other payments specified in the lease agreement for housing in foreign countries.

2. Lease Cost - Foreign Account Government Rental Guarantee Program (GRGP). Accumulates costs for charges and other payments specified in the lease agreement for housing in Europe under the Army GRGP program.

3. Lease Cost - Domestic Account. Accumulates costs for charges and other payments specified in the lease agreement for housing in the United States including U.S. possessions and territories.

4. Lease Cost - Section 801 Account. Accumulates costs for charges and other payments specified in the lease agreement for Section 801-type housing.

5. Other Operation and Maintenance Cost - Foreign Account. Accumulates costs for maintenance, utilities, and contracted services not provided by the lessor for housing in foreign countries. Also includes initial make-ready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs such as assignment, travel, and inspection by installation personnel, and reimbursements to the Department of State for foreign affairs administrative support costs.

6. Other Operation and Maintenance Cost - Foreign Account Government Rental Guarantee Program (GRGP). Accumulates costs for maintenance, utilities, and contracted services not provided by the lessor for housing in foreign countries. Also includes initial make-ready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs such as assignment, travel, and inspection by installation personnel, and reimbursements to the Department of State for foreign affairs administrative support costs.

7. Other Operation and Maintenance Cost - Domestic Account. Accumulates costs for maintenance, utilities, and contracted services not provided by the lessor for housing in the United States. Also includes initial makeready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs such as assignment, travel, and inspection by installation personnel.

8. Other Operation and Maintenance Cost - Section 801 Account. Accumulates the costs for maintenance, utilities, and contracted services not provided by the lessor for Section 801-type housing. Also includes initial makeready costs, costs of Government-owned furnishings, any pro rata share of the costs of installation services, and administrative costs such as assignment, travel, and inspection by installation personnel.

E. Interest Payment On Debt Account. This is a summary account for accumulating the costs for interest payments on Capehart and Wherry mortgages or related notes.

F. Servicemen's Mortgage Insurance Premiums Account. This is a summary account for accumulating the costs for servicemen's mortgage insurance premium payments pursuant to Section 222 of the National Housing Act.

G. Foreign Currency Fluctuations Account. This is a summary account for accumulating the gains or losses arising from foreign currency exchange rate fluctuations in accordance with Volume 6, Chapter 7 requirements. The OUSD(C) manages the appropriation and transfers amounts to the operating appropriations. The transferred funds are only available for funding a Component's centrally managed allotment that is used to cover foreign currency fluctuations. Gains and losses shall be separately identified within the account.

H. Reimbursements Account. This is a summary account for accumulating reimbursements collected during the current fiscal year for O&M rental and service charges billed to occupants and for proceeds from

handling or disposing of excess housing property. Foreign Military Sales (FMS) funded and non-FMS funded reimbursements shall be separately identified as follows:

1. Foreign Military Sales-Funded Account. Accumulates all reimbursements from FMS-funded activities or sources. The amounts shall be identified within the account as to the nature of the reimbursements; for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

2. Non-Foreign Military Sales Funded Account. Accumulates reimbursements from other than FMS-funded activities or sources. The amounts shall be identified within the account as to the nature of the reimbursements; for example, recovery of the costs of operations, utility operation, maintenance of real property facilities, or proceeds from property handling or disposal.

0904 COST IDENTIFICATION PROCEDURES

090401 DoD Components shall identify the obligations incurred both in-house and by contract to operate and maintain the family housing program. All costs of providing program support will be computed and costed to the program on a full absorption basis; that is, full cost for dedicated support and pro rata cost for other support.

A. Defense Business Operations Fund real property maintenance activities such as Navy Public Works Centers, which have a primary mission of facility maintenance, shall apply the normal business fund overhead rates to family housing support.

B. Other-funded real property maintenance activities having established shop or productive expense rates shall apply the applicable rate to direct work or service in support of family housing.

090402 Costs shall be charged to the applicable family housing account to the extent that they are practically identifiable and measurable to the

housing program. This does not prevent the use of engineered standards or estimates in charging utilities when metering devices are not used.

090403 To the extent that obligations are incurred for administrative support and supervision efforts, they shall be limited to those incurred at installation level and will not include those which may be incurred at echelons of command above the installation. An exception is made, however, when amounts for administrative support and supervision are included in charges assessed by a field office of a construction agent.

090404 The costs charged to the program shall be in proportion to the efforts, the use or consumption of goods, or the services received by the family housing program. Dedicated efforts or responsibilities for the program shall be fully charged. For example, total costs for full-time management and staff shall be charged to the family housing program.

090405 Other efforts, goods or services that are provided to the family housing and to other programs shall be assigned to appropriate family housing accounts based on the relative workload, benefit, or other measurement. The following general criteria shall be used in assigning support costs to the family housing program:

A. When the support being provided is predominantly personnel intensive, costs should be allocated based on a pro rata basis of workload. This would include collateral duty management assignments involving command or policy determinations related to personnel, financial management, legal, procurement, or similar areas.

B. When the support being provided has a mix of personnel, equipment, materials or supplies, costs should be allocated based on workload. For example, printing or reproduction services or computer support involve a mix of resources. When such support services are provided, the proportion of workload for the family housing program to the total workload would be used to compute the

portion of the total costs identified to the family housing program.

C. When the support being provided predominantly involves specific goods or services (for example, electricity, gas, water, sewer, etc.), costs should be allocated based on the relative amount consumed or quantity used. For example, the costs of heat or air-conditioning for an occupied area can be allocated based on the assigned space.

090406 When a set of quarters is intended for, or occupied by, officers of General or Flag rank, the costs accumulated for the operation and maintenance of each set of quarters shall be identified within the accounts specified in Section 0903 above, and reported in accordance with the requirements prescribed by the Deputy Under Secretary of Defense (Logistics).

090407 When identifying O&M costs to the program, the general premise is that all applicable costs shall be assigned. When an incidental level of effort, supplies, or services are provided on a nonrecurring basis, costs need not be identified to the program if they are insignificant and it is not cost-effective to measure and assign the costs. As a general rule, cost identification is necessary when the support is more than incidental.

090408 Installation management officials such as the installation commander, public works officer, housing director, or comptroller are responsible for identifying the O&M costs for the family housing program whether funded by the family housing O&M or some other appropriation. Installation managers shall periodically review manning standards, workload and consumption methods, and other factors used to identify efforts in support of the program. The basis of allocating such costs to the program shall be reset when variances occur in efforts, workload, or other resources consumed. Management shall also review charges to the accounts specified herein to ensure that none have been inadvertently omitted or erroneously included.

0905 C O S T E L E M E N T S A N D
COMPUTATION OF CHARGES

090501 The program cost elements and the basis for charging the accounts of the family housing program for O&M costs are provided in this section.

090502 The labor effort of military or civilian personnel assigned and identified to family housing shall be computed for pay and benefits using a labor distribution system, if available, or the guidance in Volume 11A of this regulation. Personnel efforts shall be reviewed and validated annually to support a charge to family housing. Military labor shall be accumulated and classified as an unfunded cost within the account structure since the cost is not a reimbursable charge to the program.

090503 The costs for material and supplies shall be computed based upon consumption; that is, the relative amount consumed or the quantity used. Material and supplies shall be computed at acquisition price if directly (locally) purchased or at standard inventory price if issued through the supply system.

090504 Services such as refuse collection and disposal, entomological, custodial, etc., may be provided by government forces or by a contractor and shall be computed and charged when received. When family housing is the sole customer, the full cost shall be borne by family housing. When the family housing portion of such services is readily separable and distinct, that portion will be charged to family housing. When the service operation is too intertwined or complex to enable ready identification of proper family housing costs, the costs charged to family housing funds shall be based on the proportionate amount of service received on a unit of service basis; for example, number of refuse pick-ups and locations, and square feet of floor area receiving custodial service.

090505 Utility costs shall be computed based upon the quantity used or consumption. DoD business operations fund activities providing utilities shall compute the charges consistent with their normal procedures. All other activities shall compute the charge to family

housing at the rate the utility is purchased from the supplier. If not metered, consumption should be based on documented engineering estimates.

090506 Equipment usage costs for rented property shall be computed at the lease or rental rate. In the case of Government-owned equipment, the cost computation is limited to the expenses of operating and maintaining the equipment and a charge for the operator's time when provided by other than family housing. Neither acquisition costs nor periodic depreciation charges shall be computed.

090507 Two cost items shall be treated as unfunded costs in computing the family housing O&M costs. Military labor is one and the headquarters costs, included in construction agent administrative support and supervision effort above the installation level, is the other.

0906 REIMBURSEMENTS

090601 The reimbursement accounts specified in section 0903 above, shall be used to accumulate reimbursements for charges initially financed by the O&M appropriation for the family housing program or proceeds from handling or disposing of family housing property. All reimbursements shall be recorded in the family housing reimbursement accounts.

090602 Ordinarily, these reimbursements are for rental and service charges paid by occupants or users of family housing facilities. Some collections may be refunds that include the costs of repairing damages to family housing facilities, caused by occupants, including the replacement of items.

090603 Other reimbursements involve the recovery of expenses for handling and disposing of excess family housing property as well as the proceeds from sales of such property. Collections may be used for various purposes such as defraying O&M expenses or the payment of debt. Policy guidance governing such collections, use and reporting is provided in Volume 2B, Chapter 6, Section 060106, of this Regulation.

0907 REPORTING. Data derived from the uniform account structure, to be established and maintained consistent with this chapter, shall be used by DoD Components required to prepare and submit the following reports:

090701 Appropriation Status By Fiscal Year Program and Subaccounts Report - Acct Rpt(M)1002. DoD Components shall prepare and distribute the report in accordance with the guidance contained in chapter 4 of this Volume.

090702 Family Housing - Operation and Maintenance Summary, DD Form 2456. In accordance with guidance in Volume 2B, Chapter 6, of this Regulation, DoD Components shall prepare separate reports for the total program as well as for each of the following groupings:

- Conterminous U.S. areas
- U.S. Overseas and Possessions
- Foreign areas

090703 Report on Budget Execution, DD Form 1176 - RCS: Acct Rpt(M)1176. DoD Components shall prepare and distribute the monthly report for the annual portion of the O&M category of the family housing appropriation in accordance with the guidance prescribed in chapter 4 of this Volume.

0908 INTERNAL CONTROL. Management shall develop and implement internal control techniques to ensure effective control over and accountability for the resources charged to this program and for the full and prompt receipt of all proceeds from reimbursements for rents, service charges, and disposal or handling of excess family housing property. Volume 4, Chapter 3, of this Regulation provides specific internal control guidance.

CHAPTER 10

INFORMATION RETURNS - FORM 1099

1001 GENERAL. Requirements established by the Internal Revenue Service (IRS) are normally not addressed in this Regulation. However, the requirements for Information Returns are included because of difficulties encountered in their implementation.

1002 PURPOSE

100201 Statutory requirements for Information Returns are contained in 26 U.S.C. 6001. Detailed guidance for using the multipurpose Forms 1099 is contained in IRS publication "Instructions for Forms 1099, 1098, 5498, 1096, and W-2G." For instance, Form 1099-MISC, "Miscellaneous Income," is used to report by recipient those payments for services accumulating to \$600 or more for the calendar year. Recipients include individuals (other than employees), sole proprietorships, partnerships, and all providers of medical or health care services, or engaged in the billing and collection for such services. The latter category includes physicians and physicians' corporations. The Department is not required to report payments to any corporation other than those providing medical or health care services, or engaged in the billing and collection for such services.

100202 Forms 1099 are also used to report discharges of indebtedness, payments of interest, and total distributions of survivor benefits. Figure 10-1 summarizes the use of Forms 1099 applicable to the Department of Defense.

1003 APPLICABILITY AND SCOPE.

100301 The Information Return requirements of this chapter apply to all DoD disbursing offices performing those functions referred to in paragraphs 100201 and 100202 above.

100302 It is the responsibility of the office administering the action that gives rise to the entitlement to collect the Taxpayer Identification

Number (TIN) and provide it to the disbursing office. For example, it is the responsibility of the contracting office to obtain the TIN from applicable contractor at the time a contract is awarded. The contracting office must provide the TIN and identify whether or not the contractor is subject to Form 1099 reporting requirements.

100303 It is the responsibility of each functional manager with responsibility for an entitlement determinations process or system to ensure that Form 1099 applicable payments and the associated TINs are specifically identified to the disbursing office. This included the identification of payments subject to withholding because a required TIN has not been provided.

100304 Detailed guidance for applicability of Forms 1099 reporting are found in the following in this Regulation:

A. Form 1099-C, "Canceled debt" Volume 5, Chapter 31.

B. Form 1099-INT, "Statements for Recipient of Interest Income". Volume 5, Chapter 23.

C. Form 1099-MISC, "Statement of Receipts of Miscellaneous Income," Volume 8 Chapters 1, 3, and 7; Volume 10, Chapter 6; and Volume 13, Chapter 7.

D. Form 1099-R, "Statement of Receipts of Total Distributions from Profit Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, etc." Volume 7B, Part Nine, Chapter 11.

E. Withholding requirements associated with the failure of an applicable contractor to provide the require TIN Volume 10, Chapter 6.

1004 REPORT FORMAT

100401 Forms 1099 shall be prepared and reported electronically on magnetic tape, diskette, cassette or minidisk, when such reporting capability exists. The detailed formats and procedures for electronic media reporting are obtainable directly from IRS centers and district offices.

100402 When the capability for electronic media reporting does not exist, or the number of reports to be filed is so small that using electronic media cannot be justified, paper Forms 1099 shall be used. IRS will accept paper Forms 1099 for the noncomputerized portion of a disbursement operation along with electronic media records for the computerized portion.

100403 Form 1096, "Annual Summary and Transmittal of U.S. Information Returns," shall be prepared and submitted to IRS as the transmittal document for Forms 1099.

1005 FREQUENCY AND DISTRIBUTION.

Form 1099 shall be furnished when the contract or order for service is completed, unless contract disbursements extend over a calendar year. In this case, a Form 1099 shall be furnished for payments made in the calendar year. See the IRS publication "Instructions for Forms 1099, 1098, 5498, 1096, and W-2G" for detailed instructions for the distribution of Forms 1099.

1006 PREPARATION INSTRUCTIONS.

100601 Preparation guidelines for Forms 1099 are prescribed in the IRS publication entitled "Instructions for Forms 1099, 1098, 5498, 1096, and W-2G."

100602 The taxpayer identification number TIN is required to be shown on Forms 1099. For an individual, or an individual operating a business as a sole proprietorship, the TIN is the taxpayer's social security number. For all others, it is the taxpayer's employer identification number. If a TIN is not furnished, IRS Circular E, "Employer's Tax Guide," requires the Department of Defense to withhold 31 percent of payment for services.

FORM NUMBER	TITLE	WHAT TO REPORT (EXAMPLES)	AMOUNT TO REPORT (CAL YEAR)	DUE DATE TO RECIPIENT	DUE DATE TO IRS
1099-C	Statement for Recipients of Canceled Debts	Discharge of indebtedness.	Total	January 31	February 28
1099-INT	Statement for Recipients of Interest Income	Payment of interest.	\$10 or more	January 31	February 28
1099-MISC	Statement for Recipients of Miscellaneous Income	<p>Payment to other than employees (e.g. suppliers or vendors) for services rendered. This includes payment to a physician, a physicians' corporation or other supplier of health and medical services.</p> <p>Amount of backup withholding.</p> <p>Payment of Rent.</p> <p>Payment of royalty.</p> <p>Payment of prizes and awards that are not for services rendered.</p>	\$600 or more	January 31	February 28
1099-R	Statement for Recipients of Total Distributions From Profit Sharing, Retirement Plans, Individual Retirement Arrangements, Insurance Contracts, Etc.		Total distribution regardless of amount	January 31	February 28

CHAPTER 11

FINANCING AND REPORTING COSTS OF MILITARY RESOURCES
USED IN CIVIL DISTURBANCES1101 PURPOSE

This chapter implements the requirements for financing and reporting costs associated with civil disturbance operations.

1102 APPLICABILITY AND SCOPE

The provisions of this chapter apply to all DoD Components responsible for the military resources which may be employed in civil disturbances under DoD Directive 3025.12, "Employment of Military Resources in the Event of Civil Disturbances."

1103 PROCEDURES

110301 Financing. The costs of DoD resources employed or provided in connection with civil disturbance operations will be financed in accordance with the following guidance.

A. Resources Employed Under a Presidential Directive. Under an Executive Order or other Presidential directive authorizing and directing the Secretary of Defense to provide for the restoration of law and order in a specific state or locality, expenses will be financed as follows:

1. Employment of Active DoD Military Forces. When the Presidential directive specifies the fund or appropriation for financing the expenses incurred, reimbursement to DoD appropriations will be in accordance with the provisions of that directive. This includes expenses incurred in prepositioning resources prior to the issuance of the Presidential directive. When the Presidential directive does not specify the fund or appropriation, expenses incurred will be financed as follows:

a. Costs for travel and transportation (except commercial or Air Mobility Command (AMC) airlift), communications, supplies, and other operating costs will be financed from the appropriations of

the military service sponsoring the movement of troops, and/or providing the government-owned transportation.

b. Costs for commercial or AMC airlift will be financed from Army appropriations under the Secretary of the Army's responsibilities as DoD Executive Agent pursuant to subsection VII.A. of DoD Directive 3025.12.

c. Costs of military pay, allowances, subsistence and other costs to military personnel appropriations of military personnel on active duty will be financed by the respective parent military department.

2. Employment of Reserve Component Forces Called to Active Duty. The policies set forth in 110301.A.1.a. and b., above, apply. Reserve forces called to active duty will be financed by the respective parent Military Department. In the event that the President determines that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in the current DoD Appropriation Act, the cost of such increased military personnel is authorized as an excepted expense in accordance with 41 U.S.C. 11.

B. Resources Employed Without Presidential Directive. When the immediate employment of military resources is required in cases of sudden and unexpected civil disturbances or other emergencies endangering life or Federal property or disrupting the normal processes of government, or in protecting life or Federal property or preventing the disruption of Federal activities, expenses incurred will be financed as a mission responsibility of the DoD Component employing the military resources. The policies set forth in subparagraph 110301.A.1., above, apply except that the use of commercial or Military Airlift Command will be financed from the appropriations of the military service sponsoring the movement of troops.

C. Resources Provided to Other Federal Agencies. Supplies, equipment, and services provided to other Federal agencies will be on a reimbursable basis.

D. Resources Provided to Civil Authorities. Loan or sale of military equipment to civil authorities under the provisions of section X of DoD Directive 3025.12, will be handled as follows:

1. Loan or Sale of Equipment Other than Sale of Surplus Military Equipment. Policies established by the DoD Executive Agent will apply. Generally, these policies will follow the guidance contained in DoD Directive 3025.1.

2. Sale of Surplus Military Equipment. Policies set forth in DoD Instruction 4160.23 apply.

110302 Reporting

A. The "Report of Civil Disturbance Costs" (Figure 11-1), will be prepared by the Secretary of the Army as DoD Executive Agent and submitted in duplicate to the Deputy Comptroller (Program/Budget), OUSD(C). The initial report, showing estimated data by DoD Component, shall be submitted within 72 hours of the time designated by the DoD Executive Agent. A complete accurate report detailing the data required will be provided within 20 working days. This reporting requirement has been assigned Report Control Symbol DDComp(AR)991.

B. DoD Components involved shall submit timely information to the DoD Executive Agent as requested.

C. Where the payment of costs in accordance with the foregoing presents serious reprogramming or budgetary problems, the responsible DoD Component promptly shall advise the Deputy Comptroller (Program/Budget), OUSD(C).

1104 INSTRUCTIONS FOR PREPARATION OF REPORT OF CIVIL DISTURBANCE COSTS

The Department of the Army, as the DoD Executive Agent, will prepare a separate report, by location for each disturbance, in accordance with the sample format shown in Figure 11-1. The Executive Agent will accumulate costs incurred by DoD Components separately for each location (city or town) at which an incident occurs, from the time the first action is taken to provide DoD resources until such resources are withdrawn.

110401 Estimated Costs. Costs will be identified and reported as: (1) normal operating costs and (2) incremental costs. Normal operating costs will be those costs which would have been incurred in the absence of a civil disturbance. Examples are the salaries and meals of military personnel assigned to civil disturbance operations. Incremental costs are those costs which would not have been incurred in the absence of a disturbance. Costs reported for each DoD Component will reflect the ultimate net costs of the resources used by that component. Therefore, the DoD Executive Agent will report for each Component the costs incurred for others which will be reimbursed.

110402 Reimbursement Between DoD and Other Government Agencies or Activities. As memorandum information, show by government agency or activity outside the DoD, all plus and minus reimbursement adjustments between the agency or activity and the DoD, as well as the amount of reimbursement due to/from the Department.

110403 Number of Forces Employed. As memorandum information, show by Military Service the numbers of forces -- Active, Reserve, Federalized National Guard, and total -- employed as of the end of the month, unless the period is less than a month. If less than a month, the beginning and ending strengths should be reported.

110404 Record Information. The DoD Executive will maintain detailed cost information on each disturbance by appropriation and budget activity to be made available on call to the Deputy Comptroller (Program/Budget), OUSD(C).

CHAPTER 12

**COLLECTING AND REPORTING OF FOREIGN INDEBTEDNESS
WITHIN THE DEPARTMENT OF DEFENSE (DOD)**1201 POLICY

120101 Purpose. This chapter establishes standard procedures to be used for the collecting, billing, and reporting of foreign indebtedness. Such indebtedness may arise through the (a) sale of Defense articles and services pursuant to the Arms Export Control Act, as amended, (b) operation of military missions, (c) logistical support provided under country-to-country agreements, and (d) other programs which are contained in Table 12-1.

120102 Applicability. The provisions of this chapter apply to the Office of the Secretary of Defense, the Military Departments, the Unified Combatant Commands, the Defense Agencies, and the DoD Field Activities (hereafter referred to as "DoD Components").

120103 DoD Policy for Collections. It is the policy of the Department of Defense that timely and aggressive collection efforts will be conducted to assure that foreign arrearages to DoD Components are held to the absolute minimum. Foreign indebtedness will be uniformly and accurately reported to the Department of the Treasury on forms prescribed in the Treasury Financial Manual.

120104 Responsibilities

A. The Under Secretary of Defense (Comptroller) (USD(C)) is the DoD point of contact for matters concerning foreign indebtedness requirements imposed on DoD from outside the Department, such as by the Congress and Treasury Department.

B. The Defense Finance and Accounting Service-Denver Center (DFAS-DE)

has been delegated overall responsibility by the OUSD(C) for billing, collecting, follow-up, and consolidation of all arrearage reports and submissions except for those made under security assistance programs.

C. The DFAS-DE is responsible for collecting, follow-up, and consolidation of arrearage reports for all security assistance programs and submits them to the Defense Security Assistance Agency (DSAA) for review and approval.

D. Unless otherwise directed, the DoD Component which makes the sale, or is otherwise assigned responsibility, is responsible for taking initial collection action, accounting for indebtedness, preparation of feeder arrearage reports, and providing copies of arrearage reports to appropriate offices.

1202 COLLECTION AND FOLLOW-UP
PROCEDURES

120201 General. Each DoD Component is responsible for taking timely and aggressive billing and follow-up collection actions for each category of indebtedness incurred by official and private organization pursuant to authorized programs.

120202 Foreign Military Sales (FMS) Indebtedness. Initial billings for debts incurred under the FMS program will be initiated by using the DD Form 645 (Foreign Military Sales Billing Statement) on the basis of billing procedures prescribed in Volume 15 of this Regulation. Follow-up action will be taken for any nonpayment by the due date or corresponding date specified in the DSAA supplementary billing statement.

TABLE 12-1

120203 Non-FMS Foreign Indebtedness. Initial billings and subsequent follow-up actions for all non-FMS foreign indebtedness will be initiated by the DFAS-DE in conjunction with the DoD component concerned. All follow-up actions for non-payment will be initiated by the DFAS-DE in accordance with established debt follow-up procedures cited in paragraph 120204.

120204 Follow-up Actions. All foreign debts require written follow-up by the applicable billing office should payment for billings not be received by the required date. The initial written follow-up actions will be taken 30 days after the payment due date established for the debt. If no response is received, additional written follow-up action will be made 60, 90, and 120 days after the payment due date. All billing/follow-up letters for the non-FMS foreign indebtedness program are prepared by the DFAS-DE. The first two follow-up letters are prepared by the DFAS-DE for the FMS program. A sample format for follow-up actions will be maintained by the billing office until final disposition of each bill has been made. Copies of follow-up letters prepared by the DFAS (non-FMS) or the DSAA (FMS) will be sent to the DoD components referring the debt. For FMS cases, the DFAS-DE also performs case-level follow-up action.

120205 Referral of Arrearages. All foreign indebtedness (arrearages) not collected within 90 days after the due date will be reported to the Treasury (see Section 1203 of this Volume). DoD activities reporting arrearages for the first time will include copies of the previous follow-up letters along with any responses received. The DoD activity which refers the debt will assure that the DoD reporting focal point is immediately notified of any payment received after referral. This is essential to preclude unnecessary and possibly embarrassing diplomatic collection actions being continued after payment has been received. Detailed directions for reporting these arrearages are prescribed in Sections 1203 and 1204 of this Volume.

120206 Collection of Arrearages.

A. DSAA (FMS) will prepare a fourth follow-up letter on arrearages referred from the

DoD components and will use all available means to effect collection of the foreign arrearages within 60 days of referral of the report from the DoD component concerned.

B. After the 60 days have elapsed, all arrearages from foreign countries and international organizations which cannot be collected through DoD efforts and are not compromised, terminated, or suspended in accordance with paragraph 120207 of this Volume, shall be referred to the Department of State via the Assistant Secretary of Defense (International Security Affairs) (ASD(ISA)), with a request for diplomatic assistance to effect settlement. Data provided to the State Department will include a listing of delinquent billings to the country. The State Department will provide appropriate listings to the American Embassies, whose personnel will contact the appropriate officials in their respective countries to assist in any follow-up action. Any additional supporting documentation should be requested from the DoD Component from which the bill was originated.

C. Arrearages from foreign private parties will be referred to the Department of Justice by DFAS-DE.

120207 Compromise, Termination, or Suspension of Collection Actions

A. Pursuant to the Federal Claims Collection Act of 1966, the Secretary of Defense is authorized under certain circumstances, in accordance with Title 4, Chapter II of the Code of Federal Regulations (CFR), to compromise or cause collection action to be terminated or suspended for claims of \$100,000 or less. This dollar threshold will be computed on a contract or transaction basis (in FMS the DD Form 1513 represents a transaction). The actions permitted by references (f) and (g) shall be implemented in accordance with DoD Directive 7045.13. However, DoD Component proposals to reduce a claim by over \$100,000 through compromise or termination, or to suspend collection actions on such amounts will require the concurrence of the Director, DSAA (FMS only), and the OUSD(C). For claims of \$100,000 or less the concurrence of the Director, DSAA (FMS only) and the Director,

DFAS are required. For FMS, see paragraph 030207.B. of Volume 15 of this Regulation for bad debts.

B. Each DoD Component that compromises or terminates a foreign arrearage shall maintain sufficient records to respond to inquiries on the amounts written off. The records shall be maintained on a transaction basis and documented in compliance with the provisions of this chapter. The documentation shall show adherence to the specific steps required by reference (g) and that required coordination has been obtained.

120208 Accounting for Arrearages. Each foreign arrearage will be maintained as a receivable on the books of the DoD Component which established the debt, until disposition instructions are received from the OUSD(C) or there is a justified and documented compromise, termination, or suspension of collection actions pursuant to DoD Directive 7045.13.

1203 REPORTING OF ACCOUNTS RECEIVABLE AND SALES UNDER 120-DAY DELAYED PAYMENT TERMS (SHORT-TERM CREDIT)

120301 Reporting of Accounts Receivable. Foreign indebtedness to DoD Components for logistical support, mission support costs, and other programs is payable upon presentation of the appropriate billing documents. Amounts payable to DoD components for sales of Defense articles and services on terms that require payment of cash in advance of delivery/ performance or within 60 days thereof will be classified as accounts receivable. The DFAS-DE shall submit reports to the DFAS-HQ of foreign indebtedness related to non-FMS sales on TFS Form 4503. Reports on FMS indebtedness will be submitted by the DFAS-DE to the DSAA for review and evaluation prior to consolidation by DFAS on Forms TFS 4503 sent to the Department of Treasury.

120302 Reporting of Sales Under 120-day Delayed Payment Terms. Sales made by the DoD Components under existing FMS cases which provide for 120-day payment terms shall be classified as short-term credit sales. Similarly,

those sales made after September 30, 1976, under special emergency appropriations which provide for payments 120 days after delivery of articles or services will also be classified as short-term credit sales. The DFAS-DE shall submit reports to the DSAA Comptroller of these short-term credit sales on TFS Forms 4502 and 4502B. The DSAA will submit a description of each of these credit sales, or short-term loans, to the Treasury Department on TFS Forms 4501.

120303 Basis for Reporting. Amounts to be reported for FMS will be determined by analyzing unpaid bills using the criteria shown for conditions 3 and 4 in Table 12-3 and the following supplementary guidance:

A. Foreign Military Sales. The "total amount outstanding" and the "amount due and unpaid 90 days or more" will be determined as follows:

1. Countries will be reported as having a "total amount outstanding" (arrearage) in column 3 of the TFS Form 4503, based upon DSAA review of reports submitted by The DFAS-DE. The DFAS-DE will report using the following criteria:

a. The accrued expenditures recorded in column 10 exceeds (1) the total in column 13 of the DD Form 645 on a net country basis (adjusted for over-collected cases) plus the country's cash resources (including holding accounts, interest-bearing accounts, and undisbursed FMF); or (2) the total of the amount paid on the DSAA supplementary bill plus the country's cash resources (including holding accounts, interest bearing accounts, and undisbursed FMF).

b. When column 13 exceeds the accrued expenditures in column 10 and/or the cash resources exceed a six months' supply, no accounts receivable exists; therefore, the DFAS-DE will not report the country.

c. The DSAA will review the DFAS-DE reports to determine the values to be reported in column 3 of the TFS Form 4503.

2. Entries to column 5 of the TFS Form 4503 will be the amounts reported for the previous quarter less collections received during the current period.

B. Other Programs. For other programs, the amount of outstanding bills and any amount in arrears will be reported as "accounts receivable" unless specific credit terms have been authorized in a country-to-country agreement or similar document.

120304 Report Preparation. Instructions for the preparation of TFS Forms 4501, 4502, 4502B, and 4503 are contained in the following paragraphs. To facilitate preparation of the Department of Defense report, pre-punched cards or tape submission for each line entry on the TFS Forms 4502B will accompany the reports to the DSAA Comptroller. Card punching instructions are provided in Table 12-4. Country codes currently published in the Security Assistance Management Manual will be cited on the TFS Form 4503 prepared by the DoD Components. Conversion of the data to the Treasury

FOLLOW-UP SAMPLE LETTER

[Country/Organization Address]

Dear [Mr/Ms Addressee]:

Records of this activity reflect that payment has not been received to date for statement _____ covering [purchases/services] furnished in accordance with the [reference agreement] between the U.S. [Military Service] and the Government of _____. Interest will be charged for all disbursements not covered by cash deposits. In addition, we are required to report to the Department of Treasury indicating an arrearage for your [country/organization] 90 days after the due date for payment of these funds.

A copy of the original bill [or for FMS, a list of cases] is attached.

It is requested that an immediate response be made in order to preclude alternative actions which might result from further delay in payment.

Sincerely,

Signature

This accounts receivable will be aged and the country will be reported to the Treasury on TFS Form 4503.</p>				

TABLE 12-3

Country Codes as contained in Appendix 8 of the Treasury Financial Manual will be made prior to final submission to Treasury. Instructions for the preparation of TFS Form 4501 are contained in Appendix 1 to the Treasury Financial Manual.

120305 Instructions for Preparation of TFS Forms 4502, Current Status of Active Credits.

A. General Instructions. TFS Form 4502 (Table 12-5) will be used to report the current status at the end of the quarter of each separate official long-term or short-term loan or credit agreement involving foreigners. TFS Forms 4502 also will be used to report the status of individual sales agreements. All amounts reported on TFS Forms 4502 should be stated to the nearest whole dollar or dollar equivalent. Separate TFS Form 4502 should be submitted for each program. TFS Forms 4502 should be stated to the nearest whole dollar or dollar equivalent. Separate TFS Form 4502 should be submitted for each program. TFS Form 4502 should be reported as follows: (a) all entries should be listed primarily by country name in alphabetical order, (b) entries within each country should be listed by classification (e.g., short-term obligations), (c) within each classification, entries should be listed in order of Treasury transaction number. All totals should be listed as one entry representing the combined total of U.S. dollar and dollar equivalent amounts reported.

B. Specific Instructions. The following instructions should be observed in filling out the TFS Form 4502:

1. Report Identification. The following information should be entered in the space provided at the top of the TFS Form 4502:

a. Reporting Agency. Enter the code and name of the reporting agency as follows:

9700	DSAA
9702	DSAA, TFS Form 4502
9705	DSAA, TFS Form 4505
9710	USAF
9720	Army
9730	Navy

b. Program. Enter code "141 FMSA" as indicated in Table 12-1. Enter also Section 22a or b of FMSA, as applicable.

c. Current Status as of. Enter the terminal date of the calendar quarter for which the report is required.

d. Date of Submission. Enter the date on which the report is transmitted to the Department of the Treasury. Under the Date of Submission add "page -- of -- pages."

e. Agreements Reported. Enter "Sale Agreements" in the space provided.

2. Agreement Identification - (Columns 1-3).

a. Country. Enter on the first available line the name of the first applicable country.

b. Classification. Agreements should be reported by classification as follows:

(1) Short-Term Obligations. Enter the words "Short-Term Obligations." List on subsequent lines the short-term obligations as follows:

(a) Treasury Transaction Number. Enter in column 1 the number assigned to the agreement by the Department of the Treasury for reporting purposes. If the number is not known, contact the DSAA. An alphameric suffix, other than "S" or "X," must be added to the agency assigned six digit Treasury transaction number of those credits where the agency has more than one case number, i.e., a sub-repayment schedule different and separate from the underlying basic credit agreement. The following are given as examples of the use of the alphameric suffix:

CHINA, Republic of

///// LONG-TERM OBLIGATIONS	/////
711506	TW712
711506A	TW713
711506B	TW714
711506C	TW715

```

//////// SHORT-TERM OBLIGATIONS //////////
711506S TW???
711506SA TW???
711506SB TW???
711506SC TW???

//GOVERNMENT CREDIT INTERMEDIARY//
711506 TW???
711506XA TW???
711506XB TW???
711506XC TW???

```

(b) Agency Agreement Number. Enter in column 2 the number assigned to the agreement by the reporting agency for agency purposes.

(c) Currency Indicator. Enter in column 3 the code describing the amounts to be reported on that line. Right justified; e.g., CCs 33-35, enter "S" in CC35. Loans payable in foreign currencies without maintenance of dollar value should be reported in the given currency units (FC). The following codes are used for identification of amounts:

\$ - Repayable in U.S. dollars,

MOS - U.S. dollar equivalents of obligations to pay foreign currency amounts equivalent to a stated amount of U.S. dollars calculated at the reporting rate existing for that country at the time of payment (with maintenance of dollar value),

FC\$ - U.S. dollar equivalents of obligations, obligations, the liquidation of which requires repayment of a stated amount of foreign currency units (without maintenance of dollar value), and

FC - Foreign currency units.

(d) Classification Subtotals. Subtotals for each classification shall be reported by currency indicator where more than one agreement has been reported within the classification. A separate classification subtotal line should be provided for each currency indicator which has been designated in column 3. On the line(s) following the last agreement listed in steps (1)-(3), above, enter the words "Classification Subtotals" in columns 1-2 and the

currency indicator for those subtotals in column 3. Where only one currency indicator has been reported within the classification, the classification subtotals shall also serve as the classification totals and the entry should be labeled "Classification Totals" in columns 1-2 and column 3 should be left blank.

(e) Classification Totals. Totals of combined U.S. dollar and dollar equivalent amounts reported for each classification shall be provided where more than one currency indicator subtotal has been reported within the classification. On the line following the last classification subtotals, enter the words "Classification Totals" in column 1-2 and leave column 3 blank.

c. Country Subtotals. Country subtotals shall be reported by currency indicator where more than one classification has been reported within the country. A separate country subtotal line shall be provided for each currency indicator which has been listed in column 3 for the classification subtotals. On the line(s) following the last classification subtotals for the designated country, enter the words "Country Subtotals" in column 3. Where only one currency indicator has been reported within the country designation, the country subtotals shall also serve as the country totals and the entry should be labeled "Country Totals" in columns 1-2 and column 3 should be left blank.

d. Country Totals. Totals of combined U.S. dollar and dollar equivalent amounts reported for each country shall be provided where more than one currency indicator subtotal has been reported within the country. On the line following the last country subtotals, enter the words "Country Totals" in columns 1-2 and leave column 3 blank.

e. Repeat steps in subparagraphs 2a-d above until all applicable countries and the related agreements have been listed on the form.

3. Loan and Credit Data

a. Commitments. Enter in column 4 the gross amount of commitments as

of the end of the reporting quarter. For the purpose of loan or credit data, a "commitment" represents the dollar amount which is subject to delayed payment terms of the sales agreement. This figure must equal the total amount reported for each case agreement. (Column 7 of DD Form 645).

b. Cancellations. (Not applicable to FMS 120-day delayed payment cases. There, show "-0-" in this column.)

c. Undisbursed. Enter in column 6 the total amount undisbursed at the close of the reporting quarter for each loan or credit. This amount is equal to column 7 (Disbursed) less column 12 of the DD Form 645 and may be verified by subtracting Disbursed, column 7, from Commitments, column 4, of TFS Form 4502.

d. Disbursed. Enter in column 7 the total amount of disbursements (or noncash transfers) made under each agreement. (Column 10, Cumulative Deliveries/Work-In-Process, of the DD Form 645).

e. Disbursed and Still Outstanding. Enter in column 8 the total amount disbursed and still outstanding as of the close of the reporting quarter. This figure may be obtained from column 14 of DD Form 645 and should equal Disbursed (column 7), less Amortization (column 9).

f. Service Payment - Amortization. Enter in column 9 the total amounts of principal repayments received on each agreement. Obtain this amount from column 13 of the DD Form 645.

g. Service Payments - Interest. (Not applicable to FMS 120-day delayed payment cases.)

h. Fees Collected. (Not applicable to FMS 120-day delayed payment cases.)

120306 Instruction for Preparation of TFS Form 4502B - Current Status of Active Credits and Statement of Arrearages

A. General Instructions. TFS Forms 4502B (Table 12-6) will be used to report the status at the end of the quarter of accounts receivable from foreign obligors consisting of short-term obligations (sales financed under 120-day delayed payment terms) and long-term obligations (sales financed from loans or credits). All amounts reported on TFS Forms 4502B will be stated to the nearest dollar or dollar equivalent. The amounts reported on TFS Forms 4502B will be based on records maintained by the military components and DSAA as of the report dates. Accounts receivable from foreign obligors (under 120-day delayed payment terms and FMS credit programs) must be reported on TFS Forms 4502B as follows: (a) all entries will be listed by country name in alphabetical order, (b) all entries listed will represent the combined total of U.S. dollar and dollar equivalents, where applicable. For FMS, see instructions in paragraph 120302 for determining the reportable amounts.

B. Specific Instructions. The following instructions will be observed in filling out TFS Forms 4502B.

1. Report Identification. The following information must be entered in the space provided at the top of TFS Forms 4502B:

a. Reporting Agency. Enter the name of the reporting agency. Enter applicable agency codes as follows:

9700	DSAA
9710	USAF
9720	Army
9730	Navy

b. Program. Enter code "741 FMSA" as indicated in Table 12-1. Enter also Section 22 a or b of FMSA, as applicable.

c. Current Status as of. Enter the terminal date of the calendar quarter for which the report is required.

d. First Line of Report. Military components must enter the words "Short-Term Obligations," for amounts reported under 120-day delayed payment terms. The

DSAA will enter words "Long-Term Obligations" when reporting on the normal credit program

e. Columns 1 & 2. Enter country name, extending into column 2, if necessary. Then list "Treasury Transaction Numbers" and "Agency Agreement Numbers" which are applicable to that country.

f. Currency Indicator. Enter the code describing the code describing the amount reported on that line for that country. Foreign currency obligations shall be reported in dollar equivalents (FCS) computed at the appropriate reporting rate. The following codes are used for identification of amounts:

\$ - Repayable in U.S. dollars,

MO\$ - U.S. dollar equivalents of obligations to pay foreign currency amounts equivalent to a stated amount of U.S. dollars calculated at the reporting rate existing for that country at the time of payment (with maintenance of dollar value), and

FCS - U.S. dollar equivalents of obligations, the liquidation of which requires repayment of a stated amount of foreign currency units (without maintenance of dollar value).

g. Amount Due and Unpaid 90 Days or More. Enter in columns 4 and 5 the amounts of the principal and interest recorded in columns 6 and 7 which are due and unpaid 90 days or more. Note: For "short-term obligations" reported by military components, only the "principal" column will be used.

h. Due Date of Oldest Arrearage. This is not applicable to "short-term obligations," therefore, military components will make no entry. The DSAA will enter the due date of oldest arrearage applicable to each loan or credit program reported.

i. Footnote Codes. To be used only by the DSAA which will enter the applicable code listed in Appendix No. 3 of reference (a) for each loan or credit program being reported.

j. Agency Totals. On the line following the last country listed on the report, enter in columns 1-2 the words "Agency Totals" and enter the totals of all columns contained dollar amounts (and/or U.S. dollar equivalents where applicable).

120307 Instructions for preparation of TFS Form 4503 - Current Status of Accounts Receivable (Original Maturity of Less than 90 days) from Foreign Obligors

A. General Instructions. TFS Forms 4503 (Table 12-7) will be used to report the status at the end of the quarter of accounts receivable from foreign obligors. All amounts reported on TFS Forms 4503 will be stated to the nearest dollar or dollar equivalent. Accounts receivable from foreign obligors must be reported on TFS Forms 4503 as follows: (a) all entries will be listed primarily by country name in alphabetical order; (b) entries within each country are to be reported by program or legislative authorization (Table 12-1) applicable to the accounts receivable outstanding; (c) country totals are to be provided for each country for which accounts receivable are reported for more than one program; (d) program totals must be provided where more than one country is listed on the schedule; (e) Agency/Service totals will be provided where more than one program total is reported. All totals will be provided where more than one program total is reported. All totals are to be listed as one entry representing the combined total of U.S. dollar and dollar equivalent amounts reported. For continuing operations involving periodic settlement of accounts on a net settlement basis, the net balances representing receivables are to be reported. For FMS, see instructions in paragraph 120302 for determining reportable amounts.

B. Specific Instructions. The following instructions will be observed in filling out TFS Form 4503.

1. Report Identification. The following information must be entered in the space provided at the top of TFS Forms 4503:

a. Reporting Agency. Enter the name of the reporting agency. Enter applicable agency codes and titles as follows:

9700	DSAA
9710	USAF
9720	Army
9730	Navy

b. Current Status as of. Enter the terminal date of the calendar quarter for which the report is required. For example, the first and second quarter of calendar year 1994 will be identified as 941 and 942, respectively. In the open space show also the actual date of the quarter ending.

2. Report Data. In the space provided, enter the data for accounts receivable from foreign obligors as follows:

a. Country. Enter in column 1 on the first available line the name of the first applicable country from the alphabetical list of country names and codes provided in the SAMM and/or Table 12-8. Enter in column 7 the identification code assigned to the country.

b. Program. On the line(s) following the country designation, enter in column 1 each program applicable to the accounts receivable outstanding. Enter in column 8 the identification code assigned to the program.

c. Currency Indicator. Enter in column 2 the code describing the amounts to be reported on that line. Foreign currency obligations shall be reported in dollar equivalents (FC\$) computed at the appropriate reporting rate. The following codes are used for identification of amounts:

\$ - Repayable in U.S. dollars,

MO\$ - U.S. dollar equivalents of obligations to pay foreign currency amounts equivalent to a stated amount of U.S. dollars calculated at the reporting rate existing for that country at the time of payment (with maintenance of dollar value), and FC\$ - U.S. dollar equivalents of obligations, the liquidation of which requires

repayment of a stated amount of foreign currency units (without maintenance of dollar value).

d. Total Amount Outstanding - Official. Enter in column 3 the total amount of outstanding accounts receivable from foreign official obligors as of the end of the reporting period. Include foreign private obligations guaranteed by official foreigners.

e. Total Amount Outstanding - Private. Enter in column 4 the total amount of outstanding accounts receivable from foreign private obligors as of the end of the reporting period. Exclude foreign private obligations guaranteed by official foreigners (see step 4 above).

f. Amount Due and Unpaid 90 Days or More - Official. Enter in column 5 the portion of the amount recorded in column 3 which is due and unpaid 90 days or more.

g. Amount Due and Unpaid 90 Days or More - Private. Enter in column 6 the portion of the amount recorded in column 4 which is due and unpaid 90 days or more.

h. Country Totals. On the line following the data for the last program reported: (a) enter in column 1 the words "Country Totals;" (b) leave column 2 blank; (c) enter in columns 3-6 the totals of amount (U.S. dollars plus dollar equivalents) reported for the programs within that country. A separate entry for country totals will not be necessary where only one program has been reported.

i. Enter the next applicable country name and repeat steps 2a-h above until all countries and the related data have been reported.

j. Program Totals. On the line following the last country totals, enter the words "Program Totals" in column 1. On subsequent lines (a) enter in columns 1 and 8 the name and identification code, respectively, for each program listed on the schedule; (b) leave

column 2 blank; (c) enter in columns 3-6 the totals of amounts (U.S. dollars plus dollar equivalents) reported by country for each program. Separate entries for program totals will not be necessary where only one country has been listed.

k. Agency Totals. On the line following the last program totals (a) enter in column 1 the words "Agency Totals;" (b) leave column 2 blank; (c) enter in columns 3-6 the totals of all agency programs. A separate entry for agency totals will not be necessary where only one program total has been reported.

120308 Guaranteed Loans. The Treasury Department requires TFS Forms 4504, 4505, 4505A, and 4506 to be submitted on Guaranteed Loan programs. Currently these programs are managed by the DSAA. Instructions for the completion of these forms are found in the Treasury Financial Manual, Volume 1, Part 2, Chapter 4500, "Grants, Loans, Credits, and Contingent Liabilities Involving Foreigners," Appendix 1.

120309 Submission. The Treasury Department requires the submission of indebtedness reports within 30 days after the end of the quarter. DoD Components shall submit the original to DFAS with a copy to DSAA Comptroller (TFS Form 4503, TFS 4502 and 4502B) within 20 days after the end of the quarter; one copy of the report will also be provided to the OUSD(C) and the ASD(ISA). Copies of the reports may be distributed within the Military Departments as desired.

120310 Flash Report of Major Foreign Debt Arrearages. Major foreign debt arrearages are monitored by the NAC. Therefore, periodically, flash reports will be requested from the DoD Components to satisfy NAC requirements for information on major foreign debt arrearages. For this purpose, a "major" foreign debt arrearage is any country program arrearage which involves the sum of \$250,000 or more. Flash reports will be submitted directly to DFAS-DE by the local command in message form with information copies to the next higher command. The report will reflect any significant changes in major foreign debt arrearages from the quarterly

foreign indebtedness reports submitted in accordance with this section. Collections, information or increased indebtedness, problems encountered in unsuccessful collection attempts, or country circumstances which may adversely affect collections are examples of the information which should be included in the flash reports.

120311 Information Requirements. The reporting requirements prescribed in this Chapter are assigned to control numbers as given in the following subparagraphs.

A. TFS Form 4501. "Description of Foreign Loan or Credit." The DSAA is the focal point for submitting this report to the Department of the Treasury.

B. TFS Form 4502. "Current Status of Active Credits," cumulative amount at end of quarter, Interagency Report Control Number 0102-TD-QU. The DSAA is the focal point for submitting this report to the Department of the Treasury.

C. TFS Form 4502B. "Current Status of Active Credits Statement of Arrearages," Interagency Report Control Number 0104-TD-QU. The DSAA is the focal point for submitting this report to the Department of the Treasury.

D. TFS Form 4503. "Current Status Accounts Receivable (Original Maturity of Less than 90 Days) from Foreign Obligors," Interagency Report Control Number 0105-TD-QU. The DFAS is the focal point for submitting this report to the Department of the Treasury.

E. TFS Form 4504. "Description of Guaranteed (Insured) Foreign Loan, Credit, or Other Payment Scheduling Agreement and U.S. Government Contingent Liability."

F. TFS Form 4505. "Current Status of Active Credits Foreign Loans, Credits or other Payment Scheduling Agreements." The DSAA is the focal point for submitting this report to the Department of the Treasury.

G. TFS Form 4505A. "Current Status of Guaranteed (Insured) Foreign Loans, Credits or Other Payment Scheduling Agreements

Statement of Claims." The DSAA is the focal point for submitting this report to the Department of the Treasury.

1204 COLLECTING AND REPORTING OF
FOREIGN DEBTS UNDER LONG-
TERM LOANS AND DEBTS

120401 General. The DSAA is responsible for administering FMS long-term loans and credit programs authorized by Section 23 of the Arms

Export Control Act, as amended, and likewise is responsible for determining foreign indebtedness against these programs. Debts remaining uncollected 90 days after the due date must be reported to Congress via data submitted on the quarterly TFS Form 4502B (see Section 1203 of this Volume for instructions on completing the form). Debts remaining uncollected one calendar year after the due date subject the indebted country to Brooke-Alexander Amendment sanctions.

CHAPTER 14

DEPOT MAINTENANCE REPORTING1401 GENERAL

140101 This chapter prescribes requirements that the DoD Components must satisfy with regard to reporting the accomplishment and status of depot maintenance workloads in:

- DoD depot maintenance activities;
- other DoD activities; and
- private sector activities,

whether accomplished by DoD military or civilian employees or by non-Federal government employees. Further, these requirements apply to all depot maintenance workloads regardless of DoD funding source, e.g., Defense Business Operations Fund (DBOF), Research and Development, Procurement, General Purpose Forces, Special Operations Forces, Operations and Maintenance, or other appropriations; or non-DoD funding source such as for work done on a reimbursable basis for other Federal, state, local, foreign government and private sector customers. DoD depot maintenance activities that are funded by the DBOF are required to follow the formal cost accounting requirements specified in Chapter 63, "Cost Accounting Requirements for Depot Maintenance," of Volume 11B, "Reimbursable Operations, Policy and Procedures," of this Regulation. Other DoD activities performing depot maintenance workloads may use other cost finding procedures to satisfy the reporting requirements specified in section 1402, below. DoD activities that contract with private sector activities for depot maintenance will report as prescribed in section 1403 below.

140102 The uniform recordation, accumulation, and reporting of costs incurred in depot maintenance operations is required to document the use of scarce DoD resources and to assist management in the: measurement of productivity and efficiency; the development and use of performance measurement and cost standards; and to highlight areas in need of increased management emphasis. Also, the data will assist in the identification of total DoD maintenance capability, duplication of capacity,

and areas of interservice support for maintenance workloads.

140103 Specifically, management should have depot maintenance information available from the cost accounting and reporting module to assist in the:

A. Comparison of historical unit cost trends with replacement cost trends.

B. Oversight of the utilization of depot maintenance resources.

C. Evaluation of budgets for depot maintenance work programs.

D. Comparison of cost trends among organic DoD depots or between organic and contract (private sector) sources.

E. Managerial direction and guidance for depot maintenance programs.

F. Evaluation of depot maintenance activities for efficient use of resources.

G. Estimation of depot maintenance requirements.

H. Monitoring of DoD Component compliance with various Congressionally mandated reporting requirements, including contract/organic shares.

I. Examination of the behavior of cost drivers over time.

140104 To ensure that all workloads are accounted for and reported on, regardless of funding source, reporting requirements have been stratified to allow reporting of "Funded" and "Unfunded" costs:

A. Funded costs are costs included within the budget of and financed by an operation and maintenance appropriation or

revolving fund available, either currently or in the past, to the performing activity. Funded costs include items, such as operating materials and supplies, for which an outlay was made in a prior period or year but which are recognized in the current period in which the asset is used or consumed.

B. Unfunded costs are costs financed by an appropriation other than one available, either currently or in the past, to the performing activity. Within the DBOF, there are few unfunded costs. The predominant example is depreciation or real property assets (buildings, etc.) used by the DBOF activity but financed by a military construction appropriation.

1402 REPORTING REQUIREMENTS

140201 The reporting requirements contained herein and in the addendums to this chapter, including any subsequent data and format revisions, are the responsibility of the Assistant Deputy Under Secretary of Defense for Maintenance Policy, Programs and Resources (ADUSD[MPP&R]), Office of the Under Secretary of Defense (Acquisition & Technology). The ADUSD(MPP&R) shall provide the data revisions and report format changes to the Director for Accounting Policy, OUSD(C), for publication in subsequent revisions of this chapter. The senior official with responsibility for logistics in each DoD Component is responsible for timely reporting. The Assistant Secretary responsible for financial management in the Military Departments (or equivalent in other DoD Components) is responsible for providing complete and accurate financial data to the report preparer in sufficient time for report finalization. Included with automated data submissions will be, as a minimum, those hard copy reports described in Addendum 5 below. Further, results of the reconciliation required in paragraph 140207, below, will be included with each annual submission. Additionally, each annual submission will identify points of contact for that DoD Component for queries regarding the content or status of any reports that are required.

140202 The depot maintenance cost report required by this chapter applies to all Military

Services and other DoD activities that accomplish depot maintenance workloads or have depot maintenance workloads accomplished by contract. A list of DoD activities that historically have accomplished depot maintenance workloads is at Addendum 1 to this chapter. Depot maintenance activities not operated as DBOF activities shall report only depot maintenance efforts in the depot maintenance cost report. Other work efforts shall not be reported by these activities. However, depot maintenance activities funded by the DBOF shall report all operating costs incurred by the Fund. If lower echelons of maintenance normally performed below a depot maintenance facility are performed at a depot maintenance facility that is funded by DBOF, the cost incurred by the depot for these functions shall be reported under the appropriate work performance category described in Addendum 2 to this chapter.

140203 The Work Performance Categories (WPCs) at Addendum 2 to this chapter identify, for reporting purposes, the work performed at a government or commercial depot maintenance facility. The definition of primary depot maintenance work includes the following categories: overhaul (code A), progressive maintenance (code B), renovation (code F), analytical rework (code G), repair (code I), inspection and test (code J), scheduled maintenance (code S), and software support (code U). Modernization includes the categories of conversion (code C) and modification (code H). Other costs required to be included in the depot maintenance cost report include the following WPCs: activation (code D), inactivation (code E), manufacture (code K), reclamation (code L), storage (code M), technical assistance (code N), calibration (code P), depot level portion of contractor logistics support (CLS)(code R), and Other Work (code T). When depot maintenance employees are temporarily assigned to non-depot maintenance activities, their payroll cost shall be recorded as other work, WPC "T."

140204 Each DoD Component shall maintain, in a central location, a file of the data required under the provisions of this chapter in the defined format. The file shall be updated quarterly on a cumulative fiscal year-to-date

basis for closed, completed work and active work in process. Final fiscal year end hard copy reports in the format prescribed in Addendum 5 to this chapter and a magnetic tape of the data in the file shall be submitted to the ADUSD(MPP&R), within 90 days of the end of the fiscal year. The DoD Component data file shall be available for processing inquiries for the most recent 5 years. This information is necessary to plot weapon system maintenance cost trends. Copies of the quarterly data update tapes shall be available for review for a minimum of 2 years. Reporting requirement symbol AP-MP(A)1397 is assigned to this reporting requirement.

140205 Cost and production reporting systems shall be designed to provide an audit trail from the quarterly data file back to the individual job order cost records if needed to support the reported data.

140206 A report line (data record) is required for each type of depot maintenance work (field 14) performed for each different weapon system or item identification number as indicated by different data entries in any of fields 7, 9, 10, 12, or 13 at each activity (field 5). Special attention should be paid to any consolidation of job orders that may be consistent with this schema to ensure that the integrity of other fields (e.g. shop flow days) is maintained.

A. Detailed reporting requirements are specified in Addendum 3 to this chapter. All quantities and amounts shall be right-justified and the unused high order positions shall be zero filled. Submitted data shall be edited by the DoD Components prior to submission to ensure that the edit requirements outlined in Addendum 3 are met.

B. The ADUSD(MPP&R) will maintain a cross-reference file of pertinent data elements and codes for use by the Military Departments in compiling the AP-MP(A)1397 report. A complete listing of applicable data elements and codes will be forwarded to the DoD Components designated points of contact during the third quarter of each fiscal year for AP-MP(A)1397 report usage. These codes will include as a minimum Weapon or Support

System Codes (WSSC), Performance Activity CAGE Codes, Reporting Facility CAGE Codes, and Work Performance Category Codes. Each Military Department will ensure that any codes or elements used in the subsequent AP-MP(A)1397 report other than those so provided is fully defined in the annual report submission.

C. The Defense Manpower Data Center (DMDC) will process each DoD Component APMP(A)1397 report data submissions for the ADUSD(MPP&R). The DMDC will edit annual data submissions and conduct necessary integrity checks. The ADUSD(MPP&R) will provide the Military Departments the results of data edits and checks within 30 days of the annual report submission. The DMDC will produce a defined set of standard reports for the ADUSD(MPP&R), which will also be made available to the Military Departments and DoD activities. The ADUSD(MPP&R) will review the DMDC-prepared standard reports and the Component-prepared reports (outlined in Addendum 5) to support final reconciliation of fiscal year reporting and data base establishment. The DMDC also will support ad hoc queries and data base extracts as may be requested and authorized by the ADUSD(MPP&R). Authorized Military Department data queries and other requirements will be supported as resources permit.

D. The Defense Finance and Accounting Service (DFAS) shall be responsible for the following:

1. DFAS Defense Accounting Offices (DAOs) and Operating Locations (OPLOCs) supporting depot maintenance activities will provide accurate and timely financial data (in accordance with paragraph 140201) needed to produce the AP-MP(A)1397 report. Report preparation shall be the responsibility of the depot maintenance commander.

2. Supporting DAOs and OPLOCs will be responsible for the accuracy of the job order costs provided above-and the inclusion of all DBOF operating and capital costs in accordance with current policies.

3. Supporting DAOs and OPLOCs shall be responsible for the consistency of the reported costs; i.e., job order costs must be consistent with - and reconcilable to - the managerial financial reports and the DBOF Accounting Report 1307 for the depot maintenance business area.

140207 The data submission report shall consist of two types of report records.

A. The first type is cumulative completed work. All report transaction records for customer orders that have been financially completed and recorded as cost of goods sold shall be identified with a "C" in field 51. The total of all reported amounts of completed work in the current reporting fiscal year shall be reconciled to the amount recorded in general ledger account 6500, "Cost of Goods Sold." The reported amount for completed work shall equal the total amount of cost incurred on that item. The amount of variance in applied overhead should be considered an element in the cost of goods sold for reconciliation purposes. Reporting entities other than DBOF activities shall reconcile their completed job orders to the amount recorded in account 6120, "Other Services," for repair expenses.

B. The second type of report record is cumulative work in process. All work in process shall be reported in order to currently report all costs incurred by a depot maintenance activity. All report transaction records for work in process shall be identified with a "W" in field 51. The total of all reported amounts of job orders in process and contractor costs shall be reconciled to general ledger account series 1580, "Work in Process," including progress payments to contractors. Non-DBOF reporting entities shall reconcile their work in process job orders to the amount recorded in account 6120, "Other Services," for repair expenses.

C. Large job orders that have revenue recognized periodically shall be reported with a "W" but included in the reconciliation to account 6500, "Cost of Goods Sold," to the degree that revenue may have been recognized during that fiscal year. The costs reported on such job orders shall be cumulative since inception until

the job is finally completed even though the revenue may have been recognized on a percentage of completion or other basis. Progress payments are not considered under the guidance in this paragraph.

140208 Each DoD Component shall submit a magnetic tape in "Extended Binary Coded Decimal Interchange Code (EBCDIC)," unblocked or block 10, 9 track, and with a tape density of 1600 or 6250 characters per inch. Do not include header records on the tape, only data records as described in paragraph 140206., above, followed by a tape mark. Each report record shall have a unique record identified code in field 46 to facilitate the identification of individual report transaction records.

140209 Tape reels must have an attached label identifying the contents; that is, Depot Maintenance Cost and Production Report, fiscal year of the report, submitting component name and office name and mailing address to which the reels are to be returned, and tape characteristics. Also, the letter of transmittal for the hard copy report shall include the same information as contained on the tape label.

140210 The AP-MP(A)1397 report serves as a principal data base in support of ADUSD(MPP&R) weapon systems depot maintenance cost and production analyses and external reporting, as well as the principal joint-Service data base on depot maintenance production operations. As an integral part of the Component edit process on the data submission report, a review shall be performed by maintenance or logistics experts to determine the accuracy, completeness, and reasonableness of the data being submitted. The hard copy report formats described in Addendum 5 provide summary information at the activity, commodity and weapon system levels and are consistent with and fully supported by the depot maintenance cost accounting practices of the Military Departments as required by this regulation. The hard copy reports shall be accompanied by a narrative analysis of significant developments, information, or trends portrayed in the data submission report. The report formats are direct derivatives from the annual data submission report. In reviewing

these minimal hard copy report formats, the reporting official and reviewing experts in each Military Department will be able to gain a general overview of the depot maintenance program for which detailed data is being submitted. The transmittal memorandum for the report shall identify a logistics point of contact for issues and questions relating to the data being reported.

140211 In addition to the above reports, depot maintenance activities are subject to reporting requirements specified in other chapters of this Regulation.

1403 DEPOT MAINTENANCE WORKLOAD PERFORMED BY ACTIVITIES OTHER THAN DBOF DEPOT MAINTENANCE ACTIVITIES

140301 Depot Maintenance may also be performed on a reimbursable basis at the DBOF-funded maintenance depots and at various other DoD in-house facilities, such as arsenals, ordnance stations, public works centers, and by private sector commercial contractors. A list of DoD organic activities that accomplish depot maintenance type workloads is at Addendum 1, below, to this chapter. In order for the entire DoD depot maintenance program to be visible in required reports, the depot maintenance workload performed in all DoD and contractor facilities, including the depot portion of Contractor Logistics Support (CLS), shall be included in the report required by section 1402 of this chapter.

140302 The identification of maintenance work effort as depot maintenance must be made in connection with requests for funds to maintain the equipment end-items or components. Depot maintenance budgetary requirements should be identified by equipment end-item.

140303 The reporting requirements specified in section 1402, above, apply to all contracted out depot maintenance work. Depot Maintenance

workloads may be performed by private sector commercial contractors under contract at their facilities or at U.S. Government-owned, contractor-operated (GOCO) facilities. Specifically, the AP-MP(A)1397 report must identify reporting activities in field 8 (see Addendum 3 to this chapter) that contract for depot maintenance work. For example, depot maintenance activities, systems program offices, program managers, major commands, major subordinate commands, supervisors of shipbuilding, the Navy Aviation Supply Office, the Navy Ships Parts Control Center, and all other activities that use DoD funds, regardless of source, to contract for depot maintenance functions shall take steps to ensure the cost of the effort is reported in field 36 of the report. Further, they shall ensure that data submissions are complete and accurate as required by this chapter.

140304 The activity requiring and funding the work shall report the amount paid in field 36, "Contract and/or Other Maintenance Activity Cost," as specified in Addendum 3, below, to this chapter. The report shall identify the item worked on, the work performance category, and work breakdown structure classification to the extent economically feasible. The report shall include work performed by other DoD depot maintenance activities on behalf of the reporting activity. Any depot maintenance work, performed by an in-house DoD facility that is not listed in Addendum 1, below, to this chapter shall be reported by the requiring activity with a "2" in field 7, "Owner/Operator Code."

1404 SPECIAL REPORTS

Any one time or additional reports required shall be prescribed by the Office of the Deputy Chief Financial Officer in coordination with the ADUSD(MPP&R).

ADDENDUM 2
WORK PERFORMANCE CATEGORIES (WPC)

Code A – Overhaul. The disassembly, test, and inspection of the operating components and the basic structure to determine and accomplish the necessary repair, rebuild, replacement and servicing required to achieve the desired level of performance. Overhaul is synonymous with "rework" and "rebuild."

Code B – Progressive Maintenance. A predetermined amount of work that represents a partial overhaul under a program that permits the complete overhaul to be accomplished by means of two or more scheduled work efforts in the maintenance process. Progressive maintenance is synonymous with "cycle maintenance," "restricted availability," "preventive servicing," "recondition," and "phased" or "incremental maintenance."

Code C – Conversion. The alteration of the basic characteristics of an item to such an extent as to change its mission, performance, or capability.

Code D – Activation. The process of returning an item from preservation, storage, or inactive status to an active, serviceable status by means of removal from storage and containers, stripping, inspection, servicing, testing, and repair, replacement of components, assemblies, or subassemblies as required.

Code E – Inactivation. The servicing and preservation of an item prior to placement in storage or an inactive status.

Code F – Renovation. The proof and test evaluation, rework of ammunition or ordnance items as required for retaining their desired capability.

Code G – Analytical Rework. The disassembly, test and inspection of end-items, assemblies or subassemblies to determine and accomplish the necessary rework, rebuild, replacement, or modification required. It includes the technical analysis of the findings and determination of maintenance criteria. Includes prototype teardown, analysis and rework of an item to determine job and material specifications for a subsequent maintenance requirement.

Code H – Modifications and Upgrades. Modifications and upgrades are changes to systems and equipment for safety reasons, to correct a deficiency, or to improve program performance. A "modification" is a change to a system that is still being produced; an "upgrade" is a change to a system that is out of production.

Code I – Repair. Action to restore an item to a serviceable condition from an unserviceable condition, correcting principally those defects that rendered the item unserviceable.

Code J – Inspection and Test/Engineering Investigations. The examination and confirmation of the condition or operational status of an item relative to its applicable specifications; includes First Article Test. Engineering investigations are used to determine the cause of reported equipment failure or malfunction and are accomplished through the application of a disassembly and inspection investigation, material analysis inspection, and/or an engineering assistance investigation.

Code K – Manufacture. The fabrication of an item from raw materials or components.

ADDENDUM 2 (CONTINUED)
WORK PERFORMANCE CATEGORIES (WPC)

Code L – Reclamation. The authorized processing of end-items, assemblies or subassemblies to obtain parts or components that are to be retained in operating materials and supplies prior to taking disposal action on the end-item, assembly or subassembly. Covers demilitarization actions on items prior to disposal when the demilitarization is incidental to the reclamation.

Code M – Storage. The inspection, represervation, and maintenance in a storage status of weapons and equipment items as well as their subsystems and components in the supply system.

Code N – Technical Assistance. The use of qualified depot maintenance personnel to provide technical information, instructions, or guidance, or to perform specific work requiring special skills for operational activities or other maintenance organizations. Includes all demilitarization other than that incidental to reclamation when required to be reported.

Code O, P, Q, R, and S – Not Used.

Code T – Other Work. Used to complete the reporting of all maintenance work force costs incurred. Any costs incurred at a depot maintenance activity funded by the Defense Business Operations Fund that do not meet the criteria for reporting under the other work performance categories shall be reported in this category. This includes any maintenance support costs funded by a Defense Business Operations Fund activity. Maintenance support includes centralized programming and planning support, technical and engineering services, preparation of maintenance publications and engineering data, and technical and administrative training.

Code U – Software Support. The sum of all amounts for efforts required to correct software deficiencies to ensure that, during the post-deployment phase of a mission-critical computer system's life, the implemented and fielded software continues to support the system mission. Depot maintenance software support excludes efforts required to update software to operate the new hardware configurations or required to support new missions. Depot maintenance software support addresses both embedded software systems and support equipment software (e.g., automated test equipment).

Code V – Calibration. The comparison of a measurement system or device of unknown accuracy to a system or device of known and greater accuracy. The system or device of greater accuracy is a measurement standard.

Code W – Contractor Logistics Support (CLS). CLS is commercial support for those weapon systems and equipment that do not have an organic support base established. Contractors provide total support including depot maintenance for the equipment, end-item, and components. Only those maintenance functions that would be classified as depot level, if the equipment was maintained organically, will be included.

Code X – Not Used.

Code Y – Scheduled Maintenance. The application of certain maintenance procedures to ensure that aeronautical equipment is maintained by controlling degradation resulting from time, operational cycles, use, and climatic exposure. Scheduled maintenance requirements are the minimum necessary under all conditions and are mandatory to ensure timely discovery and correction of defects. Includes Standard Depot Level Maintenance (SDLM) and Programmed Depot Maintenance (PDM).

Code Z – Not Used.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD

1. Field 1 - Record Type

Use record type "F" to identify this record.

2. Field 2 - Report Period Quarter Code

Use reference No. QU-JB.

3. Field 3 - Fiscal Year

Use reference No. YE-NA.

4. Field 4 - Customer Program Element

Use primary program element codes for customers as specified in DoD 7045.7-H. Zero fill for customers not funded with DoD funds. In position 10, enter A, F, M, N, or D to designate a DoD Component being supported. Otherwise, enter a zero.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

5. Field 5 - Performing Activity CAGE Code

- a. Organic Activity CAGE Code. If the activity is Government-Operated (Code 1 or 2 in field 7), enter the CAGE code in positions 11 through 15 for the activity identified in addendum 1.
- b. Contractor CAGE Code. If the maintenance activity is contractor-operated (Code 3 in field 7), enter the contractor CAGE code as specified in the DoD Supplement to the Federal Acquisition Regulation (FAR) and assigned in the Federal Supply Catalog, CAGE (H4/H8 Series). Start in position 11 and leave positions 16 through 24 blank. If a CAGE code has not been established for a contractor, a number should be requested through appropriate channels.

6. Field 6 - Inside or Outside U. S. Code

Enter one of the following codes to indicate whether the organic or contractor activity performing the depot maintenance is located within or outside the contiguous United States. Code 1 shall be used to indicate within the United States. Code 2 is for outside the United States including Alaska and Hawaii.

7. Field 7 - Owner and/or Operator Code

Enter one of the following to indicate the type of activity performing the maintenance:

Code 1 - DoD Component-In-House-Depot Maintenance Activity (Listed in addendum 1, above, to this chapter).

Code 2 - DoD Component-In-House-Depot Maintenance Activity (Not listed in addendum 1, above, to this chapter).

Code 3 - Contractor-Owned, Contractor-Operated.

Code 4 - Not Used

Code 5 - Not Used

Code 6 - Jointly (Contractor and Government)-Owned, Contractor-Operated; or Government-Owned, Contractor-Operated, or other arrangements, e.g., teaming.

When Code 1 is entered in this field, fields 36 through 42 shall be zero filled. When Codes 2 or 3 are entered in this field, fields 17 through 35 shall be zero filled.

When Code 2 is entered, field 36 shall be the cost of DoD In-House maintenance performed by a DoD non-depot maintenance activity. When Code 3 is entered, field 36 shall be contract cost. When Code 4 is entered in this field, every effort should be made to complete fields 17-35.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

8. Field 8 - Reporting Facility CAGE Code

A code identifying the reporting activity, including activities contracting for depot maintenance work with commercial contractors and with other in-house DoD maintenance facilities. Depot maintenance activities performing in-house work for all other DoD activities including other depot maintenance activities shall report their work by using their own CAGE code in this field.

9. Field 9 - Item Identification Number

A code to identify the specific item on which depot maintenance was or is being performed. Do not use punctuation such as dashes or slashes, or blank spaces between characters. Start in position 32 and enter left-justified up to 13 characters; zero fill unused positions. Sample entries for this field are as follows:

- a. If the item is an aerospace vehicle (aircraft, guided missile, rocket, or probe), show the mission design series (MDS) according to DoD Directive 4120.15 (i.e., DoD 4120.15-L, "Model Designation of Military Aerospace Vehicles"). See examples below:

<u>ITEMS</u>	<u>TAPE POSITIONS</u>												
	32	33	34	35	36	37	38	39	40	41	42	43	44
Basic (Standard) Mission Aircraft	F	1	6	C									
Modified (Special) Mission Aircraft	M	H	5	3	E								
Special Test (Permanent) Aircraft	N	K	C	1	3	5	E						
Basic (Standard) Missile	U	G	M	1	3	3	A						
Basic (Standard) Rocket	R	U	R	5	A								
Basic (Standard) Probe	P	W	N	1	2	A							

- b. If the item is an aerospace vehicle propulsion engine, equipment or aeronautical support equipment, or photographic item, show the type designation according to Military Standard (MIL-STD) 1812, "Type Designation, Assignment and Method for Obtaining." See examples below:

<u>ITEMS</u>	<u>TAPE POSITIONS</u>												
	32	33	34	35	36	37	38	39	40	41	42	43	44
Turbofan Engine	F	1	1	8	G	E	1	Ø	Ø	A			
Turboshaft, Turboprop Engine	T	F	3	4	G	E	1	Ø	Ø	B			
Solid Propellant Rocket Motor	S	R	1	1	Ø	A	D	1	A				

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

<u>ITEMS</u>	<u>TAPE POSITIONS</u>												
	32	33	34	35	36	37	38	39	40	41	42	43	44
Manufacturer's Model Engine	C	F	M	5	6	2	A	2					
Reconnaissance Camera	K	A	7	A									
Crash/Fire Truck	A	S	3	2	P	2	6						
Chemical Alarm Unit	A	E	2	3	D	3							

NOTE: Ø means numeric; O is alphabetic

- c. If the item is a vessel, show ship type and hull number in the first eight (8) positions and zero fill the remaining five (5) positions.
- d. If ammunition rework or renovation is performed by a depot level maintenance activity, total cost shall be recorded by work breakdown structure code H3 (field 13) only and this field shall be zero filled.
- e. If none of the above is applicable and the job order criterion in Volume 11B, Chapter 63, Section G. requires national stock number identification, enter that national stock number; such as, 6730001161618 in positions 32 through 44.
- f. If none of the above are applicable, enter the letters or numbers used for the identification of the job order as required by Volume 11B, Chapter 63, Section G. of this Regulation. The first four digits should identify Federal Supply Class and of the remaining 9 positions, one must be alphabetic. Zero fill when Work Performance Category (field 14) is "Other Work, (T)."

10. Field 10 - Item Nomenclature

A 20-digit field describing the specific item on which maintenance was performed, or the support service that was performed. Use common abbreviations if more than 20 positions would otherwise be required. Start in position 45 and leave blank, unused positions to the right (left justify).

- a. For aircraft and missiles, use popular names, if assigned; such as, PATRIOT, COBRA, PHOENIX, FALCON, MINUTEMAN, HARRIER, etc. If a popular name has not been assigned, or is unknown, use the basic mission of the aircraft or missile; such as, FIGHTER AIRCRAFT, TRAINER AIRCRAFT, CARGO TRANS AIRCRAFT, UTIL HELICOPTER, SURFACE ATTACK MISSILE. DoD 4120.15-L, "Model Designation of Military Aerospace Vehicles," includes a current complete listing.
- b. For aircraft and rocket engines, use the name of the engine type. Examples are: TURBOFAN ENG, ROCKET MOTOR, etc.
- c. For vessels, use the name of the ship. Examples are USS GEORGIA, etc.
- d. For conventional ammunition, use "Ammunition."

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

e. For items with a national stock number, use the standard description generally carried in the Federal Supply Catalog.

f. For all other items, use the noun and modifiers that adequately describe the item.

11. Field 11 - Not Used

12. Field 12 - Weapon or Support System Code

A code identifying a specific weapon or support system. Use existing coding systems now used by DoD Components for depot maintenance reporting. Code 997 shall be used if an item cannot be identified to a specific weapon or support system, but can be identified in field 13 to a major commodity group (such as, aircraft, missiles) and to a category (such as, fighters, bombers, etc.) within the major commodity group. Code 998 shall be used if identification is possible only to the major commodity group and not to a category. Code 999 shall be used if identification cannot be made to a major commodity group and the Work Breakdown Structure Code L11 is used in field 13.

13. Field 13 - Work Breakdown Structure Code

Each report line (data record on the magnetic tape) shall carry in Positions 79-81 a code to identify the weapon or support system work breakdown structure applicable to the item described by the Item Identification Number (field 9) and Item Nomenclature (field 10). Use the Work Breakdown Structure Code established in addendum 4, below, to this chapter. Code L11 shall be used if the item, service, or investment cannot be identified with a specifically listed Work Breakdown Structure Code and Code 999 is used in field 12.

14. Field 14 - Work Performance Category (WPC)

This is a code to indicate the type of maintenance work provided on the item identified in field 9 or the type of maintenance service provided. Use the Codes in addendum 2, above, to this chapter. Basic alpha codes should be subdivided with a numerical designation by each Component as required for internal management and analysis, budget review, and justification. If the report record is "N" (Technical Assistance), then fields 17, 18, 21, and 22 must be zero. If the report record is "N" or "T" (Other Work), then fields 45, 47, 48, 49, and 50 must be zero.

15. Field 15 - Customer Code

A two digit code identifying the DoD Program and Department or Agency billed for the maintenance cost (that is, "Sales code"). Position 85 shall identify the DoD program by a numeric from 1 through 0. If no DoD program is involved; such as, work performed for other Federal agencies, leave blank. Position 86 shall use Reference No. DE-NM for DoD Component. Use "Y" for Other Federal agencies and "Z" for Non-Federal agencies.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

16. Field 16 - Not Used

17. Fields 17 - 42 - Labor Hour and Cost Data

a. General. The direct labor hours and summary elements of cost to be reported are set forth below. The various elements of cost are explained in detail in the basic chapter. Some clarifying notations are included below for certain fields. The terms "Funded" and "Unfunded" costs are defined in paragraph 140104.

b. Field 17 - Direct Civilian Labor (Production) Cost-Funded Costs

This field shall be completed for all WPCs except "N" in field 14.

c. Field 18 - Direct Civilian Labor (Production) Hours

This field shall be completed for all WPCs except "N" in field 14.

d. Field 19 - Direct Civilian Labor (Other) Cost-Funded Costs

This field shall be completed for all WPCs in field 14.

e. Field 20 - Direct Civilian Labor (Other) Hours

This field shall be completed for all WPCs in field 14.

f. Field 21 - Direct Military Labor (Production) Cost

This field shall be completed for all WPCs except "N" in field 14.

g. Field 22 - Direct Military Labor (Production) Hours

This field shall be completed for all WPCs except "N" in field 14.

h. Field 23 - Direct Military Labor (Other) Cost

This field shall be completed for all WPCs in field 14.

i. Field 24 - Direct Military Labor (Other) Hours

This field shall be completed for all WPCs in field 14.

j. Field 25 - Direct Material Cost-Funded Costs

k. Field 26 - Direct Material Cost (Investment Items at Full Price)-Unfunded Costs

l. Field 27 - Direct Material Cost (Exchanges)-Unfunded Costs

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

m. Field 28 - Direct Material Cost (Modification Kits)-Unfunded Costs

n. Field 29 - Direct Material Cost (Expenses)-Unfunded Costs

Customer furnished expense items shall be included in this cost element.

o. Field 30 - Other Direct Costs-Funded Costs

For example, contracted services.

p. Field 31 - Other Direct Costs-Unfunded Costs

For example, customer provided services.

q. Field 32 - Operations Overhead-Funded Costs

r. Field 33 - Operations Overhead-Unfunded Costs

Military personnel costs for indirect effort is a primary example.

s. Field 34 - General and Administrative Expense-Funded Costs

t. Field 35 - General and Administrative Expense-Unfunded Costs

u. Field 36 - Contract and/or Other Maintenance Activity Cost-Funded or Unfunded Costs

When code 1 or Code 4 is entered in field 7, this field shall be zero filled. When code 2 is entered in field 7, this field shall be the non-depot maintenance activity cost. When code 3 is entered in field 7, this field shall be the cost of the contract.

v. Field 37 - Government Furnished Material (Investment Items at Full Price)

w. Field 38 - Government Furnished Material (Exchanges)

x. Field 39 - Government Furnished Material (Modification Kits)-Non-DBOF

y. Field 40 - Government Furnished Material (Expense)-DBOF

z. Field 41 - Government Furnished Services-DBOF

aa. Field 42 - Government Furnished Services-Non-DBOF

For example, customer provided services.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

18. Field 43 - End Item.

Enter "Y" if the item being repaired is an end-item. Enter "N" if the item being repaired is not an end-item.

19. Field 44 - Not Used (leave Blank)

20. Field 45 - Total Production Quantity

a. If field 51 is a "C," enter the total quantity of items for which work was completed that is being reported by this transaction record. This field must be zero filled for WPCs "N" and "T." See instructions for field 11 for special reporting of quantities in hundreds or thousands to avoid distortion of data.

b. If field 51 is a "W," enter the total quantity of items covered by job orders financially in process at the end of the period covered by the report record. This field must be zero filled for WPCs "N" and "T." See instructions for field 11 for special reporting of quantities in hundreds or thousands to avoid distortion of data.

21. Field 46 - Report Data Record Identifier.

A unique DoD Component alpha and/or numeric code used to identify each individual report transaction record. The field is used to permit the unique identification of each report record. It is recommended that the first two digits be the FY of the report submission followed by a unique record serial number.

22. Field 47 - Quantity of Items Inducted During Reporting Year

23. Field 48 - Quantity of Items Inducted During Year Preceding Reporting Year

24. Field 49 - Quantity of Items Inducted During All Other Previous Years

25. Field 50 - Shop Flow Days

a. If field 51 is a "C," report average number of days that items were in process; that is, from date of physical induction to date when items are completed, passed final inspection, and are ready for delivery to the customer. Not applicable for contract work or for work performed at another depot maintenance activity.

b. If field 51 is a "W," report the average number of days that items have been in process; that is, since the date of physical induction.

ADDENDUM 3
SECTION B
EXPLANATION OF ENTRIES REQUIRED FOR DATA RECORD
(CONTINUED)

26. Field 51 - Work Status Code

A single digit alpha code that indicates if the transaction being reported has been completed or is still in process at the time of the report. Enter a "C" if the transaction being reported has been financially completed and recorded as cost of goods sold. If the transaction being reported is still in work in process as of the report date, enter a "W."

27. Field 52 - Exception Code

Used as needed for an exception data.

28. Field 53 - NIMSC Code

The Joint Service Regulation AMC-R700-99/NAVSUPINST 4790.7/AFLCR 400-21/MCO P4410.22C, "Wholesale Inventory Management and Logistics Support of Multiservice Used Nonconsumable Items," prescribes policies and procedures relative to the assignment of Nonconsumable Item Materiel Support Codes (NIMSCs). One digit numeric NIMSCs are assigned to items used by two or more Military Services to indicate the wholesale logistics functions performed by the Primary Inventory Control Activities (PICAs) in support of Secondary Inventory Control Activities (SICAs). For NIMSCs 3, 4, and 8 items, the depot maintenance is provided under a Depot Maintenance Interservice Support Agreement (DMISA). For NIMSC 5 items, the PICA is responsible for all logistics functions to include depot maintenance.

29. Field 54 – Not Used (leave blank)

<u>ADDENDUM 3</u> <u>SECTION C</u> <u>EDIT REQUIREMENTS</u>			
FIELD	DESCRIPTION	TAPE POS.	EDIT INSTRUCTIONS
1	Record Type	1	Must be F.
2	Report Period Quarter Code	2	Must be 1-4 for fiscal quarter of the report date.
3	Fiscal Year	3-4	Must be the two terminal digits of current fiscal year being reported.
4	Customer Program Element	5-10	Position 10 (low order position) must contain code A, F, M, N, or D for Military Service reporting.
5	Performing Activity CAGE Code	11-24	Must be valid CAGE code.
6	Inside or Outside U.S. Code	25	Must be 1 or 2.
7	Owner and/or Operator Code	26	Must be 1,2,3, or 6. See Note 1.
8	Reporting Facility CAGE Code	27-31	Must be valid CAGE code.
9	Item Identification Number	32-44	Must have an entry or zeroes.
10	Item Nomenclature	45-64	Must have an entry.
11	Not Used	65-74	Must be blank.
12	Weapon or Support System Code	75-78	Must have a code entry. Also, see note 2.
13	Work Breakdown Structure Code	79-81	Must have a valid code from Addendum 4, below. See note 2.
14	Work Performance Category	82-84	Position 82 must be A-N, T-W, or Y. Positions 83-84 must be numeric or blank. See note 3.
15	Customer Code	85-86	Must have an entry.
16	Not Used		
17-42	Labor Hours & Cost Data	87-294	Must be numeric or zero filled. See notes 1, 3, and 4.
43	End-item Code	295	Must be "N" or "Y".
44	Not Used	296-310	Must be blank.
45	Production Data	311-318	Must be numeric or zero filled. See note 3

<u>ADDENDUM 3</u> <u>SECTION C</u> <u>EDIT REQUIREMENTS</u>			
FIELD	DESCRIPTION	TAPE POS.	EDIT INSTRUCTIONS
46	Report Data Record Identifier	319-326	Must be alpha and/or numeric or blank.
47-49	Quantities Inducted	327-350	Must be numeric. See note 3.
50	Shop Flow Days	351-354	Must be numeric.
51	Work Status Code	355	Must be "C" or "W".
52	Exception Code	356	Must be A/N or blank.
53	NIMSC Code	357	Must be numeric.
54	Leave Blank	358-360	

Note 1. If field 7 is "2," or "3," then fields 17-35 must be zero. If field 7 is "1" then fields 36-42 must be zero.

Note 2. If field 12 is 999, then field 13 must be "L11". If field 12 is 998, then field 13 positions 80 and 81 must be blank. If field 12 is 997, then field 13 position 81 must be blank.

Note 3. If field 14 is "N", then fields 17, 18, 21, and 22 must be zero. If field 14 is "N" or "T", then fields 45 and 47 through 50 must be zero.

Note 4. If cost data in fields 17, 19, 21, or 23 have zeros; then the accompanying Hours Data in fields 18, 20, 22, or 24 must also have zeros. The reverse conditions are also edited in the same manner.

ADDENDUM 5
HARDCOPY REPORTS
NOTES

HARD COPY REPORT #1 – COST BY FACILITY TYPE AND COMMODITY GROUP
(Figure 14–1)

Costs will identify completed work only. Costs that cannot be identified to a specific depot, activity or commercial contractor should be reflected in a line entry as unknown costs. Costs that cannot be identified to a specific commodity category should be reflected as other items or as unknown. The "Total All Facility Types" row should reflect the total costs being reported by the Military Department for the AP–MP(A)1397 report.

HARD COPY REPORT #2 – ORGANIC FACILITY PRODUCTION AND COSTS
(Figure 14–2)

The "Total Production Costs" should reconcile with the "Facility Type - Organic Depot Maintenance Activity" total costs from Report #1.

HARD COPY REPORT #3 - DEPOT MAINTENANCE PRODUCTION COSTS BY WEAPON SYSTEM OR
SUPPORT SYSTEM (Figure 14–3)

Costs that cannot be identified to a specific WSSC should be reflected as unknown in the "Other Items" commodity group. The "Grand Total – All Commodities" should reconcile with the "Total: All Facility Types" from Report #1.

ADDENDUM 5

FOREWORD

This volume of the "DoD Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 6B, describes policies, procedures, and responsibilities for the preparation of the Department's annual financial statements.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

This volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Recommended changes to and requests for deviations from or exceptions to the provisions of this Volume of the Regulation should be forwarded through appropriate chain of command channels along with specific justification, to:

Office of the Under Secretary of Defense (Comptroller)
Office of the Deputy Chief Financial Officer
1100 Defense Pentagon
Washington, DC 20301-1100

Volumes of the "DoD Financial Management Regulation" are available on the Internet (<http://www.dtic.mil/comptroller/fmr/>). Printed or CD-Rom copies of the Regulation may be ordered through the Internet Homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

William J. Lynn

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The “DoD Financial Management Regulation” provides all Department Of Defense (DoD) components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation and Presentation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations Policy and Procedures
12. Special Accounts, Funds and Programs
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Funds and Antideficiency Act Violations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of DoD Instruction 7000.14, “DoD Financial Management Policy and Procedures,” dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

CHAPTER 1**INTRODUCTION AND SUMMARY****★0101 GENERAL**

Under the provisions of 31 U.S.C. 3515, beginning with FY 1996, the Department is required to have audited financial statements covering all accounts and associated activities of the Department. As implemented by the Office of Management and Budget (OMB), the Department, as well as preparing the required Agency-wide financial statements, prepares separate audited financial statements for several individual reporting entities, e.g., Army, Navy, and the Air Force general and working capital funds within the Department. Those financial statements are expected to provide information to Department of Defense (DoD) program managers, the Congress, and the public, thereby facilitating both effective allocation of resources and assessment of management performance and stewardship. The objective is to produce statements that are accurate, consistent, and meaningful--statements that can and will be used to improve the management of the Department. Additionally, consistent with the objectives of the Statements of Federal Financial Accounting Concepts (SFFACs) and Statements of Federal Financial Accounting Standards (SFFASs), the Department continues to work toward the integration of budget and financial information in order to provide for more effective program management at all levels.

★0102 BACKGROUND

Federal agencies have traditionally prepared financial reports to monitor and control the obligation and expenditure of budgetary resources. With the enactment of the Chief Financial Officers' (CFO) Act, the Government Management Results Act (GMRA) and subsequent accountability laws, the Congress called for the production of financial statements that fully disclose a federal entity's financial position and results of operations, and provide information not only for the effective allocation of resources, but also with which the Congress, agency managers, the public, and others can assess management performance and stewardship. Hence, the OMB, in consultation with the CFO Council, the President's Council on Integrity and Efficiency, and other interested parties, developed the formats and instructions for financial statements described and illustrated in this Volume.

★0103 POLICY

The provisions herein constitute guidance on the form and content of financial statements to be prepared implementing the SFFAS and the guidance issued by the OMB. These guidelines set out the reporting format and disclosure requirements for financial statements. Where, through additional disclosure, the value of a financial statement to its users is enhanced, that information also should be presented. This guidance is intended to provide a framework for financial statement preparation within which each DoD Component has the flexibility to develop and include information useful both to its financial managers and program managers in making decisions. The hierarchy of accounting standards to be followed when recording accounting transactions is found in Volume 1 Chapter 8 of this regulation.

★0104 COVERAGE

A financial statement shall be prepared for each reporting entity identified in paragraph 0106 of this Chapter. This Volume specifies the entities that should be reported upon; identifies the level at which functions and/or funds should be reported on a consolidated basis; notes the basis of accounting to be utilized; prescribes the specific authoritative guidance on financial statement format and disclosures that should be applied by personnel (financial, logisticians, etc.) preparing the statements; and provides other instructions necessary for preparation of annual financial statements.

★0105 EFFECTIVE DATE

The provisions of this Volume are effective for the preparation of financial statements for fiscal years ending on and after September 30, 1999.

0106 DEPARTMENT OF DEFENSE REPORTING ENTITIES

★010601. Formal Reporting Entities. The OMB requires the DoD and 23 other agencies to prepare agency-wide financial statements in accordance with the GMRA of 1994 (Public Law 103-356) covering all accounts and associated activities of each office, bureau, and activity of the agency. The DoD Agency-wide financial statements provide the financial status of the entire DoD. In addition, there are eight reporting entities within the Department that, while included in the DoD Agency-wide statements, also are required to prepare stand alone audited financial statements. Those eight reporting entities are:

- A. The Army General Funds
- B. The Army Working Capital Funds (WCF)
- C. The Navy General Funds
- D. The Navy WCF
- E. The Air Force General Funds
- F. The Air Force WCF
- G. The Military Retirement Trust Fund
- H. The Army Corps of Engineers Civil Works Program

★010602. Other Defense Organizations. In addition to the eight reporting entities identified in paragraph 010601, the remaining accounts of the Department are reported in two columns of the consolidating balance sheet for the DoD Agency-wide financial statements. The Other Defense Organizations-WCF column will include the financial activity of the WCF organizations that are not identified in paragraph 010601. The Other Defense Organization-General Funds column will include the financial activity of the non-WCF organizations that are not identified in paragraph 010601.

★010603. Consolidation of Other Defense Organization Financial Statements. The consolidation of reporting entity financial statements for Treasury Index “97” funds, “Other Defense Organizations-General Funds,” will follow the flow of funds from the apportionment of an appropriation, to allocation, suballocation, and allotment. The primary advantage of this

consolidation method is that program managers and auditors can follow the flow of funds upward and downward and validate the receipt and execution of funds at all levels. For financial statement reporting, accounting activities will consolidate allotment and suballotment information consistent with the flow (distribution) of funds. All principal staff assistant (PSA) offices for the Office of the Secretary of Defense (OSD) and other organizations with Treasury Symbol "97" funds, identified in Table 2-3, will receive a copy (hardcopy or computer file) of their combining financial statements. The combining statements for each PSA/other organizations identified will have a column for each of their organization subentities identified in Table 2-3. All Defense organization subentities identified in Table 2-3 will also receive a copy (hardcopy or computer file) of the combining financial statements which includes their financial information.

★010604. Defense Logistics Agency (DLA) and Defense Finance and Accounting Service (DFAS). Although excluded from the list of DoD reporting entities required by the OMB to prepare financial statements and have those statements audited, the DLA and the DFAS will prepare financial statements annually and have those statements audited by Certified Public Accounting firms.

★010605. Distribution of Appropriation and Fund Symbols by Reporting Entity. Appendix A identifies the Appropriation and Fund Symbols that are included in the financial statements of each of the Department's reporting entities.

0107 CONTENT OF AUDITED FINANCIAL STATEMENTS

010701. The audited annual financial statements shall be comprised of five major sections. Specific instructions for the preparation of the contents of each section are provided in individual chapters of this Volume. The five major sections and the sequence of their presentation are as follows:

- A. Overview of the Reporting Entity
- B. Principal Statements and Related Notes
- C. Required Supplemental Stewardship Information
- D. Required Supplemental Information
- E. Other Accompanying Information

★010702. Overview of the Reporting Entity. The Overview of the Reporting Entity is the first part of the annual financial statement. The Overview must provide readers with a clear and concise understanding of the reporting entity's activities, accomplishments, financial condition and results, problems and needs. It should tell the reader whether and how well the mission of the reporting entity is being accomplished and what, if anything, needs to be done to improve either program performance or financial performance. The overview includes a formal introductory transmittal letter from the head of the reporting entity. Guidance for the preparation of the Overview is provided in Chapter 3 of this Volume.

★010703. Principal Statements and Related Notes. Principal Statements and Related Notes summarize financial information for individual funds and accounts within

reporting entities and subentities. The amounts reported on the principal statements are based on specific general ledger account balances. General ledger crosswalks of accounts normally used to derive and report line item information are provided in each of the chapters that contain instructions for the principal statements. Instructions for the preparation of the principal statements are contained in Chapters 4 through 9.

A. Principal Statements. The principal statements shall include:

1. Balance Sheet
2. Statement of Net Cost
3. Statement of Changes in Net Position
4. Statement of Budgetary Resources
5. Statement of Financing
6. Statement of Custodial Activity

★B. Related Notes. The notes related to principal statements summarize the accounting principles and methods of applying those principles that management has concluded are the most appropriate for presenting the entity's significant assets, liabilities, equity, revenues, expenses, and budgetary information. The notes also provide further detail of the amounts reported on the statements. In addition, when warranted, the notes identify departures from the federal accounting or reporting requirements. In cases where individual line items of the financial statements cannot be obtained or a substitution is made from the requirements herein, the deficiencies will be explained and the reason for noncompliance annotated in the footnotes. The related notes also contain disclosures required by the SFFASs. Instructions for the preparation of the required footnotes are contained in Chapter 10 of this Volume.

010704. Required Supplementary Stewardship Information. Stewardship resources are investments by the Federal Government for the benefit of the Nation. The Required Supplementary Stewardship Information Section provides information on resources entrusted to federal agencies, highlights their long-term benefit nature, and demonstrates accountability over these resources. Specific guidance for reporting DoD stewardship assets is provided in Chapter 11 of this Volume.

010705. Required Supplemental Information (RSI).

★A. Statement of Budgetary Resources. Monitoring of budget execution is at the individual account level. Accordingly, budgetary information aggregated to the entity level of the Statement of Budgetary Resources should be disaggregated to the level of the entity's major account groupings and presented as supplementary information. Guidance for the preparation of this information is provided in Chapter 12 of this Volume.

★B. Deferred Maintenance. The DoD is required to disclose in the RSI section of annual financial statements material amounts of deferred maintenance on property, plant, and equipment (PP&E). This reporting requirement is prescribed in the SFFAS No. 6, "Accounting for Property, Plant, and Equipment" and in the Statement of Recommended

Accounting Standard No. 14, “Amendments to Deferred Maintenance Reporting.” Guidance for the preparation of this information is provided in Chapter 12 of this Volume.

C. Segment Information. Additional supplementary information is required for each franchise fund and other intragovernmental support revolving funds that are not separately reported on the entity’s principal statements. Guidance for the preparation of this information is provided in Chapter 12 of this Volume.

★010706. Other Accompanying Information. The other accompanying information section of the DoD financial statements shall contain the information identified in Table 1-1, Section 10 and any other information that the entity management wishes to provide. Also see Chapter 3, section 0304.

★010707. Financial Statement Organization. The financial statements should be organized as shown in Table 1-1 as follows:

DETAILED OUTLINE OF DOD ANNUAL FINANCIAL STATEMENTS

Section Sequence	Major Components of Annual Financial Statements (Hard copy and files for Internet)	DoD Entity Reports	DoD Agency-Wide
1	Cover	Required	Required
2	Table of Contents	Required	Required
3	Message(s) from the Secretary of the Military Department, Commander of the U.S. Army Corps of Engineers or Director of Defense Agency as applicable for the reporting entity.	Required	Required
4	Overview	Required	Required
5	Principal Statements		
5.1	Balance Sheet, Consolidated	Required	Required
5.2	Statement of Net Cost, Consolidated	Required	Required

7.5	Statement of Financing, Combining	Not Required	Required
8	Required Supplementary Stewardship Information Section		
8.1	National Defense PP&E	Required ¹	Required
8.2	Stewardship Land	Required ¹	Required
8.3	Heritage Assets	Required ¹	Required
8.4	Non-Federal Physical Property	Required ¹	Required

Table 1-1

Section Sequence	Major Components of Annual Financial Statements (Hard copy and files for Internet)	DoD Entity Reports	DoD Agency-Wide
8.5	Research and Development	Required ¹	Required
9	Required Supplementary Information		
9.1	Disaggregated Statement of Budgetary Resources, Combining (By appropriation group, see Chapter 12, Table 12-1)	Required ¹	Required
9.2	Deferred Maintenance	As Applicable	Required
9.3	Segment Information (See Chapter 12, Section 1202)	As Applicable	Required
10	Other Accompanying Information (See Chapter 3, Section 0304)		
10.1	Any Additional Performance Information Not Provided in the Overview	As Applicable	As Applicable
10.2	Detailed List of Appropriations, Funds, and Account Included in Financial Statements	Required	Required
10.3	Reporting of Foreign Military Sales Activity (See Chapter 2, Paragraph 020104)	Not Applicable	Required
10.4	Other Information Which The Entity Management Wishes to Provide	As Applicable	As Applicable
11	Audit Opinion(s)		
11.1	Inspector General, DoD Audit Opinion or Endorsement	Required	Required
11.2	Audit Opinion of the U.S. Army Audit Agency, Naval Audit Service, Air Force Audit Agency or CPA Firm (e.g. for the Military Retirement Trust Fund)	Required	Not Applicable
Footnotes:			
1. Not Applicable to the Military Retirement Trust Fund.			

Table 1-1 (Cont.)

★0108 FINANCIAL STATEMENT AUDITS

★010801. DoD Reporting Entities. The Office of the Inspector General (OIG) will render an audit opinion letter for the DoD Agency-wide financial statements. The OIG opinion will be based, in part, on the opinions issued by the Military Department audit agencies or Certified Public Accounting firms for each of the reporting entities identified in paragraph 010601, above.

★010802. Other Defense Organizations. While the OIG will not issue separate audit opinions on the statements of the other defense organizations, the financial statements and records of the other defense organizations will be included in the audits performed to support the opinion issued on the DoD Agency-wide financial statements. The subentities within the “Other Defense Organizations” will be aligned by cognizant OSD PSA, as well as by the Military Departments for “97” funds managed by the Military Departments.

CHAPTER 2

GENERAL INSTRUCTIONS FOR THE FINANCIAL STATEMENTS0201 RESPONSIBILITY FOR PREPARING FINANCIAL STATEMENTS

★020101. Responsibility for Audited Financial Statements. Primary responsibility for the content and submission of the audited financial statements rests with the head of the reporting entity for which the statements are prepared. The actual preparation of the financial statements is the joint responsibility both of the Department of Defense (DoD) accounting activity maintaining the official departmental accounting records and the DoD Component for which those official accounting records are maintained. It is important to recognize that, while the accounting organization is responsible for assembling the principal statements, much of the data needed to prepare the principal statements originates in nonfinancial systems. Entity management is responsible for ensuring that the data originating outside of the official accounting systems is provided to the accounting organization in a timely manner, that it is complete, and that there are adequate internal controls and audit trails to ensure the data is accurate. The officials responsible for the content and submission of audited financial statements are identified in Table 2-1.

Officials Responsible for Audited Financial Statements

Reporting Entities	Responsible DoD Official
Department of Defense	Chief Financial Officer, DoD
Department of the Army	The Secretary of the Army
Department of the Navy	The Secretary of the Navy
Department of the Air Force	The Secretary of the Air Force
Army Working Capital Fund (WCF)	The Secretary of the Army
Navy (WCF)	The Secretary of the Navy
Air Force (WCF)	The Secretary of the Air Force
Department of Defense Military Retirement Trust Fund	Under Secretary of Defense (Personnel & Readiness)
U.S. Army Corps of Engineers Civil Works Program	The Secretary of the Army

Table 2-1

★020102. Responsibility for Preparation of the Financial Statements. The primary responsibility for the financial statements rests with the reporting entity management. However, responsibility for preparation of individual sections of the statements is shared with the accounting organization responsible for maintaining the financial records of the reporting entity. Table 2-2 identifies the office that is primarily responsible for preparation of each section of the financial statements.

Official Responsible for Sections of the Audited Financial Statements

Responsibility for Preparation and Submission of Audited Financial Statements	CFO DOD	DFAS/ Accounting Activity	Reporting Entity Management

Submission of Entity-level Audited Financial Statements to the Chief Financial Officer, DoD			★
Submission of Audited Financial Statements to the Office of Management and Budget (OMB)	★		

¹Primary responsibility rests with the reporting entity. However, DFAS assists by providing accounting report information and additional support as agreed.

Table 2-2

★020103. Responsibility For Other Defense Organization Subentities. In order for the Department to prepare the DoD Agency-wide audited financial statements, supporting financial statements must be prepared for the remaining DoD organizations that are not required to submit stand alone audited financial statements. The assigned accounting activities shall prepare the required supporting statements for the subentities identified in Table 2-3 and submit the statements to the responsible official designated in Table 2-3. The responsible official shall be responsible for providing all necessary data that originates in nonfinancial processes and systems (such as inventory and property data), reviewing combining statements and providing

feedback to the Defense Finance and Accounting Service (DFAS) for consolidation with other combining statements.

★020104. Reporting of Foreign Military Sales (FMS) Activity in the DoD Financial Statements. The Defense Security Cooperation Agency administers the FMS programs on behalf of the Executive Office of the President. The OMB, in coordination with the General Accounting Office (GAO), has approved the following provisions regarding the specific information on the financial activity of FMS programs, that is to be included in the DoD financial statements.

★A. Amounts for FMS procurement by contract will not be reported in the DoD Agency-wide Statement of Net Costs but will be disclosed in a footnote. Management's estimate of the amount of FMS program procurements by contractors during the period will be included only in Note 16 F. of the DoD Agency-wide consolidated financial statements.

B. A Statement of Custodial Activity will be prepared for cash receipts and disbursements of the FMS Trust Fund and included in the DoD Agency-wide consolidated financial statements.

C. Revenue and expense amounts pertaining to FMS goods or services provided from the stocks of the DoD Components on a reimbursable basis will continue to be reported in the financial statements of the applicable selling DoD Component and in the

DoD Agency-wide consolidated statements. Guidance concerning the identification of interagency transactions is contained in Chapter 13 of this Volume.

D. Revenue and expense amounts pertaining to the FMS administrative expenses will be included in the DoD Agency-wide consolidated financial statements as a portion of “Other Defense Organizations, General Funds.” Guidance concerning the identification of interagency transactions is contained in Chapter 13 of this Volume.

★E. Principal statements for the following accounts will not be required. However, information will be provided in the “Other Accompanying Information” section of the DoD Agency-wide report, on the allocations and authorities received from the Executive Office of the President for appropriated funds (i.e., 11*1081, 11*1082, 1151084, 11X1088, and 11*1085) and revolving funds (11X4116, 11X4121, 11X4122). See Chapter 3, Section 0304 of this Volume.

0202 REPORTING SCHEDULE

020201. Audited Financial Statements. The OMB requires agencies to submit audited financial statements by March 1st following the end of the fiscal year for each of the reporting entities identified in the current OMB Bulletin titled “Audits of Agency Financial Statements.” The DoD reporting entities that must meet this requirement are those identified in Chapter 1, paragraph 010601 of this volume.

★020202. Key Statements Preparation Due Dates. The development and publication of the audited financial statements requires coordinated actions by entity management, the supporting accounting organization, and the audit community. Table 2-4 provides a list of the key milestones in the development of the audited financial statements. The schedule contained in Table 2-4 applies to all reporting entities identified in paragraph 010601 and to all Other Defense Organizations subentities identified in Table 2-3. The dates identified in Table 2-4 represent the month and day immediately following the end of the fiscal year for which the financial statements are being prepared. If an identified date falls on a Saturday, Sunday, or holiday, then the due date becomes the last workday preceding the weekend or holiday.

Key Statements Preparation Due Dates

Required Action	Responsible Office	FY 1999 DATES	
		Start	End
Identify trading partners	DFAS and the United States Army Corps of Engineers (USACE) Finance Center (FC)	08/01	09/30
Request legal and management representation letters from reporting entity management.	Auditors		10/15
Provide auditors preliminary year-end budgetary reports and trial balances	DFAS and the USACE-FC		10/30
DoD provide seller-side account balances to DoD and Other federal agency buyers	DFAS and the USACE-FC		10/30
DFAS and USACE-FC receive seller-side account balances from other DoD and other federal agencies	Other Federal Agencies and DoD		10/30
Provide data from feeder systems (required to complete statements and notes) to the DFAS or USACE-FC	DoD Components	09/30	11/05
Complete adjustments of DoD buyer-side data to reflect seller-side intragovernmental balances	DFAS and USACE-FC		11/05
Provide initial Required Supplementary Stewardship Information to the Office of the Deputy Chief Financial Officer Accounting Policy Directorate (ODCFO(AP)) for Stewardship Assets, Stewardship Investments and Deferred Maintenance	Department of Defense (DoD) Components		11/15
Provide Statements and Notes to DoD Components (Informal copy to OIG, DoD)	DFAS and USACE-FC		11/19
Jointly review Statements and Notes	DFAS, DoD Components	11/22	12/08
Provide revised Statements and Notes to DoD Components	DFAS and USACE Finance Center		12/10
Provide DoD Agency-wide Statements and Notes to the DCFO	DFAS		12/14
Provide Legal Representation interim response letters to auditors	DoD Components	12/01	12/15*
Provide stand alone entity complete unaudited annual financial reports concurrently to the DCFO and to the OIG, DoD	DoD Components		12/22
DCFO provide the complete unaudited DoD Agency-wide annual financial report to the OIG, DoD	DCFO		12/23
Provide final audit adjustments to DoD Components and the DFAS	Auditors		01/14

Table 2-4

Required Action	Responsible Office	FY 1999 DATES	
		Start	End
Provide Final Required Supplementary Stewardship Information to the ODCFO (AP)for Stewardship Assets, Stewardship Investments and Deferred Maintenance	DoD Components		01/14
Provide audit-adjusted DoD Agency-wide Statements and Notes to the DCFO	DFAS		01/27
Provide final, complete Financial Statements and Notes to the DCFO and OIG	DoD Components		02/02
Provide final, complete DoD Agency-wide Financial Statements to the OIG	DCFO		02/04
Provide Management Representation letters to auditors	DoD Components		02/09
Provide Legal Representation updated response letters to auditors	DoD Components		02/09
Provide audit opinion letter on reporting entity annual financial statements to the OIG, DoD	Component Audit Agency/Service or Certified Public Accountant firm		02/09
Provide Management Representation letters on the DoD Agency-wide to the OIG, DoD	DoD Comptroller		02/14*
Provide Legal Representation updated response letters on DoD Agency-wide to the OIG, DoD	DoD Comptroller		02/14*
Provide audit opinion letter on the DoD Agency-wide reporting entity annual financial statements to the DCFO	OIG, DoD		02/14
Provide printed and electronic copies of Financial Statements to the DCFO	DoD Components		02/24
Provide audited Financial Statements to the OMB	DCFO		03/01
Post audited Financial Statements on the Under Secretary of Defense Comptroller (USD(C)) website	DCFO		03/02

*The required dates for the Legal Representation Letters are included in the current OMB Audit Bulletin on "Audits of Agency Financial Statements." The FY 1999 revised bulletin was not issued as of the completion of this schedule. Please refer to the current bulletin that may have revised dates for the Legal Representation Letters and other related requirements.

Table 2-4 (Cont.)

0203 MANAGEMENT REPRESENTATION LETTERS

★Auditors request that management prepare and submit a management representation letter, for each reporting entity audited, prior to the conclusion of an audit. During the audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries and through the financial statements. In the management representation letter, management confirms the representations explicitly or implicitly given to the auditor, indicates and documents the continuing appropriateness of such representations, and reduces the possibility of misunderstanding concerning the matters that are the subject of the representations.

Representations by management generally relate to the: (a) the financial statements, (b) completeness of the information, (c) recognition, measurement, and disclosure, and (d) subsequent events. Specifically, management will represent that the financial statements do, or do not, present fairly in accordance with federal generally accepted accounting principles and OMB form and content guidance the financial status of the reporting entity. The OMB Bulletin 99-XXX “Audits of Agency Financial Statements” provides an illustrative management representation letter. Management representation letters are due to the office performing the entity’s audit by due date specified in Table 2-4, above.

020301. Signature levels for management representation letters are indicated below:

★A. The Secretary or Under Secretary of the Military Department concerned must sign a management representation letter in support of a financial statement for a Military Department’s general funds and WCF.

★B. The Director or Deputy Director of the Defense Agency concerned must sign a management representation letter in support of financial statements for a Defense Agency WCF.

★C. The fund manager of the trust or revolving fund concerned must sign a management representation letter in support of financial statements for a trust or revolving fund managed by the OSD or Defense Agency.

★D. The USD(C) must sign a management representation letter for the DoD Agency-wide financial statements.

★E. The Director or Principal Deputy Director of the DFAS, or the Director of the applicable DFAS Center, will provide a certification to the USD(C), respective Military Department Secretary, Defense Agency Director or trust fund manager as supporting documentation for their management representation letter. However, the Director, DFAS will not sign, or cosign, management representation letters (except for the management representation letter for the DFAS WCF financial statements). When an office other than the DFAS provides accounting support, the accounting office must provide the same type of certification. A sample of the certification to be provided by the DFAS or other accounting office is provided in Volume 6, Chapter 2, paragraph 020210.

020302. Requests for management representation letters below the above levels should be referred to the ODCFO for resolution.

0204 LEGAL REPRESENTATION LETTERS

★Legal representation letters are the auditors’ primary means of corroborating the information furnished by management concerning litigation, claims, and assessments. Legal representation letters are required for each of the reporting entities identified in paragraph

010601 of this Volume. Legal representation letters are intended to identify pending or threatened litigation and unasserted claims or assessments having a materiality threshold of \$100 million or more. Upon receipt of the audit agency request, it is the responsibility of the senior management official of each reporting entity to request the legal representation letter from those lawyers with whom management consulted during the year. Requests for legal representation letters will be forwarded to the General Counsel (GC) of the applicable Military Service. Requests for legal representation letters for Defense accounts will be forwarded to the GC, DoD. Requests for legal representation letters below the Service or fund level should be referred to the ODCFO, for resolution. Legal representation letters must be provided to GC, DoD, ATTN: Deputy General Counsel (Fiscal) and to the office performing the audit--the IG, DoD or the Military Service audit agency--of the entity's financial statements by the dates specified in the schedule provided in Table 2-4 of this volume. The OMB Bulletin 99-XX "Audits of Agency Financial Statements" provides an illustrative legal representation letter.

0205 GENERAL PREPARATION INSTRUCTIONS

020501. The principal statements and notes embody the financial accounting concepts and recognition and measurement requirements contained in the Statements of Federal Financial Accounting Concepts (SFFACs) and Statements of Federal Financial Accounting Standards (SFFASs) recommended by the Federal Accounting Standards Advisory Board (FASAB) and approved by the Secretary of the Treasury, the Director of the OMB, and the Comptroller General. The SFFACs and SFFASs have been or will be incorporated into the accounting policy and guidance contained in the "DoD Financial Management Regulation" ("DoDFMR"). Preparers of financial statements seeking detailed guidance on matters involving the recognition and measurement requirements for transactions and information covered by the SFFASs should refer to the "DoDFMR." If sufficient guidance is not found in this Regulation, preparers shall follow the hierarchy of accounting principals and standards contained in Volume 1 Chapter 8 of this Regulation.

★020502. Preparers of financial statements and notes will crosswalk their unique general ledger accounts to the U.S. Government Standard General Ledger (USGSGL) chart of accounts and at a further lower level of detail to include Treasury Financial Management Service, Federal Agencies' Centralized Trial-Balance System (FACTS) attributes. The USGSGL, with FACTS attributes, will be used to prepare FY 1999 financial statements. Preparers of financial statements must provide the following computer files with each version of financial statements and notes: financial statements, notes, the trial balance used to prepare the statements, and the eliminations worksheets (as required in Chapter 13 of this Volume). The computer files shall be submitted via e-mail to the DFAS-Headquarters Accounting Directorate (DFAS-HQ/A) and that office will provide the ODCFO(AP) the same computer files and information for each version of the financial statements.

★020503. Prior year comparative data is required by the OMB for FY 2000 annual financial statements. The DoD reporting entities (with the exception of the Military Retirement Trust Fund) will not include comparative data for FY 1999. Effective with the FY 2000 statements, comparative data will be required for each of the principal statements. Prior year

data, when reported, must be consistent with the amounts reported on the financial statements of the prior year. In addition, significant variances in the values reported from one year to the next on a report line should be explained in the footnotes.

★020504. Statement line items, footnotes, and lines or columns in footnotes that do not apply to the reporting entity may be excluded from the published version of the statements and notes. However, in order to ensure consistent and accurate aggregation of amounts from suborganizations, such lines may not be excluded prior to the submission of the final version to entity management. Due to the short timeframes available for statement consolidation at the agency level, preparers are not authorized to combine lines for which the referenced account balances are immaterial.

★020505. Do not designate in footnotes as “other” any discrete balances of a material amount. Material balances should be separately reported and designated by name. Material is defined as any component of a line item that represents more than 10 percent of the value of the line in the principal statements.

★020506. The footnote numbering sequence contained in Chapter 10 of this Volume must be maintained in order to ensure consistent and accurate aggregation to the DoD agency level. If a note is not applicable for the reporting entity, so state after the note number and title. If additional footnotes are necessary to provide required disclosures, number them sequentially beginning with the number following the last footnote identified in Chapter 10 of this Volume.

020507. The accounting policies and procedures will be applied consistently throughout the financial statements. As a result, the amounts reported throughout the financial statements, footnotes and supplemental information will be reported consistently. Ensure that schedules presented in the footnotes, in support of amounts presented on financial statements, have total figures that agree with the amounts presented in the body of the financial statements. Financial information reported in multiple footnotes or other sections shall be reported in a consistent manner.

★020508. The principal statements provided for the DoD reporting entities must be prepared as consolidated/consolidating statements net of intraentity transactions except as noted below. However, the OMB has deferred the requirement for consolidated/consolidating statements for the Statement of Budgetary Resources and the Statement of Financing. For FY 1999, the Department will prepare combined/combining statements for the Statement of Budgetary Resources and a combined Statement of Financing. These statements will not be net of intraentity transactions.

★020509. Round dollar amounts to the nearest whole thousand on the final published principal statements and in the tables contained in the notes to the principal statements. To avoid excessive workload associated with the resolution of rounding errors, accounting activities should report amounts as dollars and cents on all versions of the principal statements and notes prior to submission by the reporting entity of the final annual financial statements to the ODCFO(AP).

★020510. Reporting entities that choose to present additional financial statements or information should include these in the Other Accompanying Information section.

★020511. The financial statements of the reporting entities identified in paragraph 0106 should be organized as displayed in Chapter 1, Table 1-1 of this Volume.

★020512. Entity managers are responsible for the preparation and printing of the final complete version of their financial statements. Fifteen bound copies of the printed financial statements and one set of portable document format files (Adobe Acrobat pdf files) must be submitted to the Office of the Under Secretary of Defense (Comptroller), Office of Deputy Chief Financial Officer, Directorate for Accounting Policy (ODCFO(AP)), 1100 Defense Pentagon, Room 3A882, Washington, DC 20301-1100, no later than February 24.

★020513. The Department's financial statements will be posted electronically to the USD(C) web site. Entity managers will provide ODCFO(AP) with files of their financial statements for posting to the USD(C) web site by March 1. The files will be in the portable document format.

0206 DEPARTMENTAL ADJUSTMENTS RESULTING FROM FINANCIAL STATEMENTS AUDITS

★020601. Material errors in financial statements discovered after installation-level records are closed but before departmental-level records are closed shall be corrected upon the approval of the reporting entity management. Material errors result from mathematical mistakes, mistakes in the application of accounting principles, or oversight or misuse of facts that existed at the time the installation-level financial statements were prepared. Corrections to departmental-level financial statements will be made only after their application to specific installations, appropriations and/or accounts, and general ledger accounts has been documented. The DFAS, in conjunction with the DoD Component, will establish and document procedures to ensure that corrections made at the departmental level (after installation-level accounting records have been closed for the reporting year) are transmitted to subordinate installations for input into current year accounting records. Procedures also will be established to monitor and ensure that each installation's respective corrections and prior year adjustments are input into installation accounting systems and that such information is transmitted to the departmental level for control and reporting purposes.

020602. Departmental-level adjustments must be reversed in their entirety during the current fiscal year (i.e., as early as feasible in the fiscal year following the fiscal year for which the financial statements were prepared). The DFAS shall have on file documentation supporting the prior period adjustments along with an audit trail of the approval and recording of transactions and reports on the recording of the associated installation-level adjustments. These records will include the agreement between the DoD Component, the auditors, and the DFAS that resulted in the adjustment.

020603. Sample Entries.

A. A January 1999 audit of the FY 1998 financial statements reveals that a revenue item for \$100,000 for services provided was not posted to installation records. The installation records supporting the FY 1998 records have been closed but the departmental records supporting the FY 1998 financial statements are still open. Review of the transaction also reveals that an accounts receivable entry and related budgetary accounts were not posted. The installation accounting officer should determine the reasons for not posting the transaction and for not collecting the receivable. Documentation supporting the need for the adjustment is available. The posting of revenue, when closed, would have had an effect on equity; therefore, the following actions shall be taken.

1. Departmental-level Action.

★a. Increase both accounts receivable and revenue and related budgetary account balances in the FY 1999 financial statements by \$100,000.

Dr 1310 Accounts Receivable	100,000	
(Additional Information Required: Government-Current)		
Cr 5200 Revenue from Services Provided		100,000
Dr 4251 Reimbursements and Other Income Earned - Receivable	100,000	
Cr 4220 Unfilled Customer Orders		100,000
(Additional Information Required: No advance)		

b. Closing Entries for FY 1999.

Dr 5200 Revenue from Services Provided	100,000	
Cr 3310 Cumulative Results of Operations		100,000

c. Reversing Entries in FY 1999.

Dr 7400 Prior Period Adjustments	100,000	
Cr 1310 Accounts Receivable		100,000
(Additional Information Required: Government-Current)		
Dr 4220 Unfilled Customer Orders	100,000	
(Additional Information Required: No advance)		
Cr 4251 Reimbursements and Other Income Earned - Receivable		100,000

2. Installation-level Action. The installation should be requested to make the following journal entries to its FY 1999 accounting records.

Dr 1310 Accounts Receivable	100,000	
(Additional Information Required: Government-Current)		
Cr 7400 Prior Period Adjustments		100,000
Dr 4251 Reimbursements and Other Income Earned - Receivable	100,000	
Cr 4220 Unfilled Customer Orders		100,000

(Additional Information Required: No advance)

B. During the same audit of the FY 1998 financial statements, a revenue item for \$200,000 for services provided was discovered to not have been posted to the FY 1997 (prior year) installation accounting records. The Departmental records supporting the FY 1998 financial statements have not been closed; however, the records for FY 1997 have been closed for over a year. Review of the transaction also revealed that an accounts receivable entry and related budgetary accounts were not posted. The installation accounting officer should determine the reasons for not posting the transaction and for not collecting the receivable. Documentation supporting the need for the adjustment is available. The posting of revenue, when closed, would have had an effect on equity; therefore, the following actions shall be taken:

1. Departmental-level Action.

★a. Increase departmental accounts receivable and Prior Period Adjustments and related budgetary accounts by \$200,000. Disclose in the footnotes to the financial statements the adjustment for \$200,000 and its correction during FY 1999.

Dr 1310	Accounts Receivable	200,000	
(Additional Information Required: Government-Noncurrent)			
Cr 7400	Prior Period Adjustments		200,000
Dr 4251	Reimbursements and Other Income Earned -	200,000	
	Receivable		
Cr 4220	Unfilled Customer Orders		200,000
(Additional Information Required: No advance)			

★b. Closing Entries for FY 1999.

Dr 7400	Prior Period Adjustments	200,000	
Cr 3310	Cumulative Results of Operations		200,000

c. Reversing Entries in FY 1999.

Dr 7400	Prior Period Adjustments	200,000	
Cr 1310	Accounts Receivable -		200,000
(Additional Information Required: Government-Current)			
Dr 4220	Unfilled Customer Orders	200,000	
(Additional Information Required: No advance)			
Cr 4251	Reimbursements and Other Income Earned -		200,000
	Receivable		

2. Installation-level Action. The installation should be requested to make the following journal entries to its FY 1999 accounting records.

Dr 1310	Accounts Receivable	200,000	
(Additional Information Required: Government-Noncurrent)			
Cr 7400	Prior Period Adjustments		200,000
Dr 4251	Reimbursements and Other Income Earned -	200,000	

Receivable	
Cr 4220 Unfilled Customer Orders	200,000
(Additional Information Required: No advance)	

C. During January 1999, audit of the FY 1998 financial statements revealed that an expense for \$50,000, related to a reimbursable program, was not posted to installation records. The departmental records supporting the FY 1998 financial statements have not been closed. Review of the transaction also revealed that an accounts payable and related budgetary accounts were not posted and that payment was never made. The installation accounting officer shall determine the reason for not posting the transaction and for not making a payment to liquidate the payable. Documentation supporting the need for the adjustment is available. The posting of expense, when closed, will have had an effect on equity; therefore, the following actions shall be taken:

1. Departmental-level Action.

a. Increase both accounts payable and expense, as well as, the related budgetary account balances in the financial statements by \$50,000.

Dr 6100 Operating Expenses/Program Costs	50,000	
Cr 2110 Accounts Payable		50,000
(Addition Information Required: Government-Current)		
Dr 4801 Undelivered Orders - Unpaid	50,000	
Cr 4901 Expended Authority - Unpaid		50,000

★b. Closing Entries for FY 1999.

Dr 3310 Cumulative Results of Operations	50,000	
Cr 6100 Operating Expenses/Program Costs		50,000

c. Reversing Entries in FY 1999.

Dr 2110 Accounts Payable	50,000	
(Addition Information Required: Government-Current)		
Cr 7400 Prior Period Adjustments		50,000
Dr 4901 Expended Authority - Unpaid	50,000	
Cr 4801 Undelivered Orders - Unpaid		50,000

2. Installation-level Action. The installation should be requested to make the following journal entry to its FY 1999 accounting records.

Dr 7400 Prior Period Adjustments	50,000	
Cr 2110 Accounts Payable		50,000
(Addition Information Required: Government-Current)		
Dr 4801 Undelivered Orders - Unpaid	50,000	
Cr 4901 Expended Authority - Unpaid		50,000

D. During the same audit of FY 1998 installation accounts, an expense for \$210,000, related to a reimbursable program, was mistakenly posted as \$120,000 to installation FY 1998 records. The \$90,000 error was not detected. The departmental records supporting the FY 1998 financial statements had not been closed. Review of the transaction also revealed that the \$90,000 difference has caused the payment to remain unmatched and the accounts payable and related budgetary accounts unliquidated. The installation accounting officer shall determine the reasons for not correcting the initial posting and for not liquidating the payable. Documentation supporting the need for the adjustment was available. The posting of expense, when closed, will have had an effect on equity; therefore, the following actions shall be taken:

1. Departmental-level Action.

★a. Increase both accounts payable and expense and related budgetary account balances in the FY 1999 financial statements by \$90,000.

Dr 6100	Operating Expenses/Program Costs	90,000	
Cr 2110	Accounts Payable		90,000
(Addition Information Required: Government-Current)			
Dr 4801	Undelivered Orders - Unpaid	90,000	
Cr 4901	Expended Authority - Unpaid		90,000

★b. Closing Entries for FY 1999.

Dr 3310	Cumulative Results of Operations	90,000	
Cr 6100	Operating Expenses/Program Costs		90,000

c. Reversing Entries in FY 1999.

Dr 2110	Accounts Payable	90,000	
(Addition Information Required: Government-Current)			
Cr 7400	Prior Period Adjustments		90,000
Dr 4901	Expended Authority - Unpaid	90,000	
Cr 4801	Undelivered Orders - Unpaid		90,000

2. Installation-level Action. The installation shall be requested to make the following journal entry to its FY 1999 accounting records.

Dr 7400	Prior Period Adjustments	90,000	
Cr 2110	Accounts Payable		90,000
(Addition Information Required: Government-Current)			
Dr 4801	Undelivered Orders - Unpaid	90,000	
Cr 4901	Expended Authority - Unpaid		90,000

★E. During January 1999, audit of the FY 1998 financial statements revealed that general equipment for \$160,000 was not posted to installation records. The departmental records supporting the FY 1998 financial statements have not been closed. Further review of the

transaction revealed that the item of equipment was free issue from a procurement appropriation as of September 29 of the reporting fiscal year. Documentation supporting the need for the adjustment is available. The installation accounting officer shall review accounting procedures to determine why the property was not posted to official accounting reports. The posting of financing sources, when closed, will have an effect on equity; therefore, the following actions shall be taken:

1. Departmental-level Action.

★a. Increase the asset account for general equipment and financing accounts for \$160,000 in the FY 1999 financial statements. There are no budgetary entries required.

Dr 1750 Equipment	160,000	
Cr 5720 Financing Sources Transferred In Without Reimbursement		160,000

★b. Closing Entries for FY 1999.

Dr 5720 Financing Sources Transferred In Without Reimbursement	160,000	
Cr 3310 Cumulative Results of Operations		160,000

c. Reversing Entries in FY 1999.

Dr 7400 Prior Period Adjustments	160,000	
Cr 1750 Equipment		160,000

2. Installation-level Action. The installation should be requested to make the following journal entry to its FY 1999 accounting records.

Dr 1750 Equipment	160,000	
Cr 7400 Prior Period Adjustments		160,000

F. During January 1999, audit of the FY 1998 financial statements revealed that numerous equipment items totaling \$120,000 were capitalized on installation accounting records. No depreciation had been recorded against the equipment. Departmental records supporting the FY 1998 financial statements have not been closed. Further review of the transactions revealed that the items were purchased from operation and maintenance funds and were not expensed. Budgetary entries to obligate and disburse funds related to these items were correctly posted. Each item acquisition cost was less than the \$100,000 capitalization criteria. Documentation supporting the need for the adjustment is available. The installation accounting officer should be reviewing accounting procedures to determine why the property was not expensed in the official accounting records. (Note: That property records must be maintained in some specific cases.) The posting of expense, versus capital, when closed, will have had an effect on equity (Unexpended Appropriations); therefore, the following actions are required. In

this case, the proper posting would have effected expense; therefore, the installation shall record a prior period adjustment as follows:

1. Departmental-level Action.

★a. Decrease equipment and equity accounts for \$120,000 in the FY 1999 financial statements. There are no budgetary entries required.

Dr 6100	Operating Expenses/Program Costs	120,000	
Cr 1750	Equipment		120,000

★b. Closing Entries for FY 1999.

Dr 3310	Cumulative Results of Operations	120,000	
Cr 6100	Operating Expenses/Program Costs		120,000

c. Reversing Entries in FY 1999.

Dr 1750	Equipment	120,000	
Cr 7400	Prior Period Adjustments		120,000

2. Installation-level Action. The installation should be requested to make the following journal entry to its FY 1999 accounting records.

Dr 7400	Prior Period Adjustments	120,000	
Cr 1750	Equipment		120,000

G. During January 1999, audit of the FY 1998 financial statements revealed that a \$150,000 error was made in consolidating the FY 1998 line item for “Property, Plant and Equipment, Net” of the balance sheet at an installation. The departmental records supporting the FY 1998 financial statements had not been closed. The installation accounting officer should determine the reason the error was made in consolidating the FY 1998 line item to preclude it happening in FY 1999. Documentation supporting the need for the correction was available.

1. Departmental-level Action. Make the correction to the “Property, Plant and Equipment, Net” line at the departmental level and ensure that an offsetting entry is made to equity at the Departmental level. Reprint the balance sheet after correction.

2. Installation-level Action. No corrections are made to the FY 1998 financial statements; however, installation-level property records must be corrected so the same mistake is not made next year.

CHAPTER 3**OVERVIEW AND OTHER ACCOMPANYING INFORMATION****0301 OVERVIEW OF THE REPORTING ENTITY**

★030101. The Overview of the Reporting Entity is the first part of the annual financial statement. For many readers (e.g., nonaccountants), it serves as the only opportunity to make the technical presentations lucid and useful. For many high-level decision makers, it must convey substantive information and conclusions when time does not permit those individuals to make an in-depth analysis of the technical information. The Overview must provide readers with a clear and concise description of the entity, an understanding of its activities, accomplishments, financial condition and results, problems, and needs. It should tell the reader what the mission of the entity is, and how well that mission is being accomplished and what, if anything, needs to be done to improve either program performance or financial performance. The Overview should be a joint effort of both the financial management offices and the program offices.

★030102. To accomplish this purpose, the Overview must be more than simply a summary of the information contained in the Principal Statements. The preparer of the Overview must consider and select performance measures and data relevant to the reporting entity's mission and activities; analyze the data and discern what they disclose about the entity's accomplishments or lack thereof; determine whether and why the results might vary from prior years, established standards or similar entities' results; display this information in creative ways; and write succinct, candid narratives. Moreover, in preparing the Overview, the preparer must consider not only program performance, but also financial performance and the relationship of program performance to the reporting entities financial condition and results. The preparer must develop and retain adequate documentation supporting the financial, statistical, and other information presented in this Overview section.

030103. The Overview should incorporate the strategic initiatives of the Department of Defense (DoD) as provided in the Secretary's "Annual Report to the President and the Congress." The presentation should relate to the general goals and objectives for the agency's major functions; the resources, systems, and processes that are critical to achieving these goals; how the general goals and objectives will be achieved; and a description of key external factors that could affect achievement of these general goals.

030104. At a minimum, the Overview should contain sections that address mission and organizational structure; performance goals and results; and, the limitations of the financial statements.

030105. The Overview also may identify critical areas in need of financial and management improvement. The Overview should include a narrative discussion and analysis of the financial condition of the reporting entity. This discussion should present information based on the results of an analytical review of relevant financial and performance data of the programs, activities and funds that make up the reporting entity.

★030106. Include the following information in the overview section, verbatim, for all DoD reporting entities that have National Defense PP&E Stewardship information to report for FY 1999:

As of the date these statements were prepared, the Federal Accounting Standards Advisory Board (FASAB) had not determined the final reporting requirements for National Defense property, plant and equipment (ND PP&E). Therefore, the Department of Defense (DoD) elected to report ND PP&E in fiscal year (FY) 1999 in the same manner as ND PP&E was reported in FY 1998. For FY 1998, the DoD implemented early, as encouraged by the FASAB, then proposed amendments to the Statement of Federal Financial Accounting Standards (SFFAS) No. 6, "Accounting for Property, Plant and Equipment," and No. 8, "Supplementary Stewardship Reporting." Those amendments required ND PP&E quantities, condition and investment trends to be reported for major types of ND PP&E. Since the FASAB did not adopt the proposed amendments to SFFAS No. 6 and No. 8, in electing to report in accordance with the proposed amendments to the standards, the DoD is not in full compliance with the existing reporting requirements contained in SFFAS No. 8 (SFFAS No.8 requires the Department to report acquisition costs). The DoD cannot fully comply with the SFFAS No. 8 reporting requirement because many of the Department's ND PP&E accountability and logistics systems do not contain a value for all or a portion of the ND PP&E assets. These systems were designed for purposes of maintaining accountability and other logistics requirements of ND PP&E, and not for reporting on the value of ND PP&E. Consequently, many of these systems do not accumulate costs or otherwise report values for individual items of ND PP&E.

The ND PP&E cost information is captured in the DoD accounting systems and reported in the Department's "Statement of Net Costs." However, the Department's accounting systems were designed to provide appropriated fund accounting reports required by the Congress, the Department and other applicable federal agencies. In addition, the Department's accounting systems were not designed to accumulate and retain costs for individual items of ND PP&E. Further, in many instances, even where values were recorded for some ND PP&E in some of the Department's systems, documentation (such as copies of purchase receipts) no longer is available to support such amounts. In part, such documentation is not available, because until recently, the Department was not required to maintain such documents for audit purposes. According to Title 36, Code of Federal Regulations, Chapter XII, "National Archives and Records Administration," receipts for the purchase of items such as ND PP&E are required to be retained for only 6 years and 3 months. Therefore, much of the supporting documentation that would be required to validate the reported values of ND PP&E for audit purposes no longer is available.

Due to the difficulties noted above, implementing the reporting requirements of the SFFAS No. 8 would be an enormous undertaking involving significant cost (requiring the expenditure of perhaps hundreds of millions of dollars). Given the complexity of the reporting requirements contained in the SFFAS No. 6 and SFFAS No. 8, the enormous cost of implementing those reporting requirements and the interim nature of the current reporting requirements, the Department is continuing its FY 1998 reporting display until such time as the Department has a better indication of the more permanent reporting requirements expected to be recommended by the FASAB. In the meantime, the Department believes that the most reasonable and responsible course of action is to report quantity information for the DoD's weapons systems until such time as the FASAB adopts permanent reporting requirements for ND PP&E.

0302 ORGANIZATION AND PRESENTATION OF THE OVERVIEW

The following is a recommended way to organize and present the Overview.

★030201. Message from the Component Head. Include a message from the component head or designated individual that discusses, at a high level, the organizations mission, performance results, and financial condition. An additional message from the entity financial manager or comptroller is an option.

030202. Description of the Reporting Entity. This section should:

A. Name the reporting entity in a clear manner that leaves no doubt as to whether the reporting entity is an entire organization or an activity or group of activities within an organization. Identify the commercial functions and the revolving, trust, and other fund accounts covered by the financial statement. Also, this section should identify any fund accounts that have been excluded that one might expect to be covered by the statement.

B. State the mission and major goals of the reporting entity, including reference to the entity's legislative mandate, if appropriate.

★C. Identify the type and provide information on the numbers of individuals and/or groups served by or benefiting from the entity's major program(s).

D. Provide indicators of the size of the major program(s), e.g., dollars expended, population served, and the numbers of military and civilian personnel employed in carrying out these program(s).

E. Describe the manner in which the reporting entity is organized to provide the major program(s), including information related to the geographic locations of the organization (e.g., numbers of local, district, state, and regional offices).

030203. Performance Goals and Results. Government-wide implementation of Government Performance and Results Act (GPRA) occurs with the plans and reports for FY 1999. Performance measures in the Overview section of the financial statements should be consistent with the DoD GPRA Performance Plan as published in the Annual Defense Report, Appendix J.

★030204. Reporting Year 2000 (Y2K) Issues. Report the following information in the Overview and Analysis concerning Y2K preparedness: (1) a discussion of the Department's state of readiness (including the status of efforts/current phase, estimated timetable for completing remaining phases, impact of nonreadiness of third parties with which the agency has a material relationship); (2) the costs to address the Department's Y2K issues, both historical and estimated future costs. Include both the costs to fix and replace systems; (3) the risks of Y2K issues to the Department, including any anticipated effects on agency operations. Include a description of the most likely worst case scenario; and (4) the Department's contingency plan(s), including how the agency is preparing to handle most likely worst case scenarios. If the agency

does not have a contingency plan, disclose this fact, whether the agency intends to create one, and the timetable for doing so.

★030205 Limitations of the Financial Statements. The Overview should contain the following language:

A. The financial statements have been prepared to report the financial position and results of operations for the entity, pursuant to the requirements of the 31 U.S.C. 3515(b).

B. While the statements have been prepared from the books and records of the entity, in accordance with the formats prescribed by the Office of Management and Budget, the statements are in addition to the financial reports used to monitor and control budgetary resources which are prepared from the same books and records.

C. To the extent possible, the financial statements have been prepared in accordance with accounting standards recommended by the Federal Accounting Standards Advisory Board (FASAB) and revised by OMB. At times, the Department is unable to implement all elements of the standards due to financial management systems limitations. The Department continues to implement system improvements to address these limitations. There are other instances when the Department's application of the accounting standards is different from the auditor's application of the standards. In those situations, the Department has reviewed the intent of the standard and applied it in a manner that management believes fulfills that intent.

D. The statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity. One implication of this is that the liabilities cannot be liquidated without legislation that provides resources to do so.

0303 PERFORMANCE GOALS AND RESULTS

030301. The entity's program and financial results should be expressed in terms of objectives, relevant measures that disclose the extent to which its programs are achieving their intended objectives. The entity's financial results should be summarized in a manner that would illustrate significant indicators of its financial operations for the reporting period and changes in financial condition during the period.

030302. Measuring costs is an integral part of measuring the efficiency and effectiveness of programs. Efficiency is measured by relating outputs (the quantity of services provided) to inputs (the cost incurred to provide the services). Effectiveness is measured by the outcome or the degree to which a predetermined objective is met, and it is commonly combined with the cost information to show "cost effectiveness." Entities should strive to develop and report objective measures that, to the extent possible, provide information about the cost effectiveness of programs.

030303. The reported measures of program and financial performance should be consistent with information on major goals and objectives from the agency's strategic plan and should be linked to the programs featured in the Statement of Net Cost.

030304. To be useful, performance measures should: be clearly set forth, be objective and quantifiable, be meaningful and relevant, relate to measures developed in the entity's strategic planning processes, and present the outputs and outcomes of the program, not just the inputs or processes of the program.

030305. The presentation of the measures should: include both positive and negative results, present historical and future trends (if possible), be illustrated with charts and graphs (whenever possible) for easy identification of trends, explain the significance of the trends, provide comparison of actual results to goals or benchmarks, show variations from goals and plans and provide other explanatory information that would help readers understand the significance of the measures, results, and any variations from the goals or plans.

030306. To further enhance the usefulness of the information, agencies should include an explanation of what needs to be done and what is planned to be done to improve financial program performance.

030307. The performance measures presented in the overview should relate to the programs' purpose and goals, be consistent with measures previously included in budget documents and other materials related to implementation of GPRA, and linked to the programs presented in the Statement of Net Cost. The measures in the overview should be limited to the entity's most significant program and financial measures. Additional measures should be presented as "Other Accompanying Information." Management has broad discretion in the manner in which performance information is displayed. Among the options available to management is a statement format similar to the Statement of Program Performance Measures illustrated in Statements of Federal Financial Accounting Concepts No. 2. Management's display of performance information should include sufficient explanatory information that should help the readers understand the significance of the measures, the results, and any deviations from goals or plans.

0304 OTHER ACCOMPANYING INFORMATION

Each financial statement should contain, when appropriate, supplemental financial and management information that supports information presented in the Overview or which otherwise would enhance an understanding of the financial condition and operations of the reporting entity. At a minimum, this information should include a detailed list of appropriations, funds, and accounts included in the financial statements. Additional performance information not provided in the overview and Foreign Military Sales activity could also be reported as "Other Accompanying Information." This information may be placed in the "Other Accompanying Information" Section of the financial statements

The accompanying notes are an integral part of these statements.						

Figure 4-2

0402 INSTRUCTIONS FOR THE PREPARATION OF THE BALANCE SHEET

★040201. General Instructions. The balance sheet presents, as of a specific time, amounts of future economic benefits owned or managed by the reporting entity exclusive of items subject to stewardship reporting (assets), amounts owed by the entity (liabilities), and amounts which comprise the difference (net position). The balance sheet presents assets available for use by the reporting entity (entity assets) separately from those managed by the reporting entity but not available for use in its operations (nonentity assets). The balance sheet also separately presents liabilities covered by budgetary resources and liabilities not covered by budgetary resources. Formats are displayed using notional data to assist the user. The balance sheet requires that post-closing balances be used for all amounts.

★A. Consolidated/Consolidating. The balance sheet displayed on the previous pages (Figure 4-1) illustrates a consolidated single column noncomparative statement. The principal balance sheet prepared by Department of Defense (DoD) reporting entities shall be a consolidated statement. The DoD agency-wide report will also include a consolidating balance sheet (Figure 4-2). The consolidating balance sheet will contain columns for each of the reporting entities identified in Table 2-1, plus columns for Other Defense Organizations (ODO) General Funds and for ODO Working Capital Funds (WCF). Other DoD reporting entities shall prepare a consolidating balance sheet statement with a breakout determined beneficial to the reporting entity.

★B. Comparative Statements. Comparative statements are not required until the fiscal year (FY) 2000 reporting period. Starting with FY 2000, reporting entities shall present comparative totals for the entity as a whole to allow the reader to make appropriate comparisons with prior periods. The Military Retirement Trust Fund annual financial statement, which received an unqualified audit opinion for FY 1998, will implement comparative statements for FY 1999.

★040202. Definition of Terms Used on the Assets Section of the Balance Sheet. Assets are tangible or intangible items owned by the federal government which would have probable economic benefits that can be obtained or controlled by a federal government entity. The assets of federal agencies are classified as entity assets and nonentity assets. In addition, intragovernmental assets are separately identified in the asset section of the balance sheet. These terms are defined below.

A. Entity Assets. These are assets which the reporting entity has authority to use. For example, an entity's assets may be used in entity operations (equipment), be sold/exchanged for other assets (inventory for cash), or be used to liquidate (pay) entity liabilities.

★B. Nonentity Assets. These are assets that are held by an entity (as manager, custodian, or fiduciary) but are not available to the entity for its own operational use. An example of nonentity assets is income tax receivables, which the Internal Revenue Service

collects for the U.S. Government but has no authority to spend. In DoD, the cash held by the Disbursing Officer, as an agent of the Treasury, is an example of a nonentity asset.

★C. Intragovernmental Assets. These assets arise from transactions among federal entities. These assets are claims of a federal entity against other federal entities. For example accounts receivable from another federal entity.

D. The nature of the assets described below shall determine within which of the categories the assets should be classified. As illustrated in the model balance sheet, many of these assets have amounts that fall into more than one category and should be classified accordingly.

040203. Line Instructions for the Preparation of the Entity Asset Section of the Balance Sheet. These are assets which the reporting entity has authority to use. For example, an entity's assets may be used in entity operations (equipment), be sold/exchanged for other assets (inventory for cash), or be used to liquidate (pay) entity liabilities. In addition to the narrative below, see the general ledger crosswalk in paragraph 0403 for a description of the accounts and attributes applicable to each line item.

A. Intragovernmental Assets. These assets arise from transactions among federal entities. Federal (intragovernmental) entity assets are claims of a federal entity against other federal entities which, when collected, can be used in the reporting entity's operations.

★1. Fund Balance With Treasury (FBWT)- Line 1.A.1. This amount will reflect the DoD general ledger value (to include all collections and disbursements as reported under DD Form 1329, Statement of Transactions and DD Form 1400, Statement of Inter-Fund Transactions). The DoD entities should explain any differences between the fund balance with the U.S. Treasury in their general ledger accounts and the balance in the Treasury's accounts in Note 2. The FBWT represents the aggregate amount of the entity's accounts with Treasury for which the entity is authorized to make expenditures and pay liabilities. This account includes clearing account balances and the dollar equivalent of foreign currency account balances. Foreign currency account balances reported on the balance sheet shall be translated into U.S. dollars at exchange rates determined by the Treasury and effective at the financial reporting date. A federal entity's fund balance with the U.S. Treasury also includes balances for direct loan and loan guarantee activities held in the credit reform program, financing and liquidating accounts. To the extent that the reporting entity maintains fund balances in deposit, suspense, and clearing accounts that are not available to finance the entity's activities, those balances should be reported as nonentity assets. The FBWT does not include any amounts for which the Department of the Treasury is willing to accept corrections to cancelled appropriation accounts, in accordance with Statement Federal Financial Accounting Standard (SFFAS) No. 1. The amount reported shall include extended obligation authority for obligations incurred in closing and closed accounts (e.g., Shipbuilding and Conversion).

★2. Investments, Net - Line 1.A.2. This line identifies investments in federal securities. Investments in federal securities includes nonmarketable par value Treasury

securities, market-based Treasury securities, marketable Treasury securities, and securities issued by other federal entities. Investments are normally reported at their acquisition cost, adjusted for the amortization of the premium or discount recorded at the time of acquisition. The components of intragovernmental investments including the market value of market-based and marketable Treasury securities shall be disclosed in Note 3.

★3. Accounts Receivable - Line 1.A.3. Federal entity claims for payment from other federal entities are recorded as accounts receivable. Entity intragovernment receivables are included, by law, in an entity's obligation authority and therefore should be reported separately from nonentity intragovernmental receivables. Refunds receivable are included in U.S. Government Standard General Ledger (USGSGL) Account 1310 Accounts Receivable. The Code of Federal Regulations (4 CFR 101) prohibits a write-off of receivables from another government agency. Therefore, there should be no allowance for estimated uncollectable amounts recognized for these receivables. Accounts receivable are adjusted by cumulative from inception undistributed collections. See Chapter 13 of this Volume for elimination requirements. See Appendix B of this Volume for the reconciliation requirements. Additional information regarding accounts receivable shall be disclosed in Note 4.

★4. Other Assets - Line 1.A.4. Report other entity intragovernmental assets; and report advances and prepayments to other federal entities on this line. Disclose in the notes advances and prepayments and the amount and nature of other major categories of "Other" assets. Material disclosures for this line should be provided in Note 5. If any component of the "Other Intragovernmental Entity Asset" line represents more than 10 percent of the value of the line, those components shall be separately disclosed in Note 5. Advances are cash outlays made by a federal entity to cover a part or all of the recipients' anticipated expenses or as advance payments for the costs of goods and services the entity receives. Prepayments are payments made by a federal entity to cover certain periodic expenses before those expenses are incurred. See Chapter 13 of this Volume for elimination requirements. See Appendix B of this Volume for the reconciliation requirements.

B. Total Intragovernmental – Line 1.A.5. The sum of lines 1.A.1. through 1.A.4.

★C. Accounts Receivable, Net – Line 1.B. This item represents amounts due from nonfederal entities, net of an allowance for estimated uncollectable amounts that the reporting entity has authority to use in its operations once collected. For example, include on this line amounts due from former service members who must refund amounts issued as reenlistment bonuses. Additional information regarding accounts receivable shall be disclosed in Note 4. Accounts receivable are adjusted by cumulative from inception undistributed collections. See Appendix B of this Volume for reconciliation requirements.

This line also includes interest receivable from nonfederal entities that the reporting entity has authority to use in its operations once collected. No interest should be recognized as revenue on accounts receivable or investments that are determined to be uncollectible unless the interest is actually collected. However, until the interest payment requirement is officially waived by the

government entity or the related debt is written off, interest accrued on uncollectible accounts receivable and an offsetting allowance for loss on accounts receivable should be disclosed. Interest receivable related to pre-1992 and post-1991 direct loans and acquired defaulted guaranteed loans should be reported as a component of credit program receivables and related foreclosed property on line 1.C.

D. Loans Receivable and Related Foreclosed Property, Net - Line 1.C. This item represents the net value of assets related to pre-1992 and post-1991 direct loans receivable and acquired defaulted guaranteed loans receivable. Credit program receivables are considered an entity asset if the entity has the authority to determine the use of the funds collected or if the entity is legally obligated to use the funds to meet entity obligations, e.g., loans payable to the U.S. Treasury. See SFFAS No. 2 for detailed requirements if the reporting entity administers a loan guarantee program. It is sufficient to report the undelivered order which must be recorded to obligate the funds and which must be disclosed as part of the total undelivered orders. Note 6 provides information relating to the components of this item.

★E. Cash and Other Monetary Assets – Line 1.D. This line includes the total of all cash resources and all other monetary assets available to the entity. Cash consists of: (1) coins, paper currency and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit; (2) amounts on demand deposit with banks or other financial institutions; and (3) foreign currencies, which, for accounting purposes, should be translated into U.S. dollars at the exchange rate on the financial statement date. “Other Monetary Assets” include gold, special drawing rights, and U.S. Reserves in the International Monetary Fund. The amount of Cash and Other Monetary Assets that the reporting entity holds and is authorized to spend is entity cash. The assets under this category that a federal entity collects and holds on behalf of the U.S. Government or other entities is nonentity cash and other monetary assets and should be reported on line 2.C. The DoD disbursing officer cash reported on Standard Form (SF) 1219, Statement of Accountability is reported on line 2.C. nonentity “Cash and Other Monetary Assets.” The components of cash and other monetary assets shall be disclosed in Note 7.

F. Inventory and Related Property, Net – Line 1.E. Include inventory, Operating Material and Supplies (OM&S), stockpile materials, seized property, forfeited property, and goods held under price support and stabilization programs. Additional disclosure requirements will be identified in Note 8, as prescribed in Chapter 10 of this Volume.

1. Inventory. Inventory is tangible personal property that is: (1) held for resale, including raw materials, (2) in the process of production for sale, (3) to be consumed in the production of goods for sale or in the provision of services for a fee, or (4) to be transferred to entities within the federal government or outside the federal government. The amount reported on this line should be disclosed in Note 8A in the following categories (1) inventory held for sale; (2) inventory held in reserve for future sale; (3) excess, obsolete, and unserviceable inventory; (4) inventory held for repair; (5) raw materials; (6) work in process; and (7) finished goods.

★2. OM&S. OM&S are included on this line. OM&S consist of tangible personal property to be consumed in normal operations. Include in this category, material traditionally held by Depot Maintenance activities that will be consumed in or become part of the repair or production of secondary or end items. Ammunition, munitions, and other war reserves not classified as equipment and not held for sale are to be treated as OM&S. OM&S to be consumed within the next fiscal year are to be classified as held for use. The remainder is held for future use. Using the criteria in SFFAS No. 3, management must determine whether the consumption method or the purchase method of accounting shall be applied for the recognition of OM&S expenses. If the purchase method of accounting for OM&S is used, there should be no amount reported on this line. Material portions of the amount reported on this line should be disclosed in Note 8.B. Material is defined as any component of OM&S that represents more than 10 percent of the value of OM&S.

★3. Stockpile Materials. Stockpile materials (only applicable to and reported by the Defense Logistics Agency (DLA)) are strategic and critical materials held pursuant to the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98) of 1979. Within the DoD, management of the Stockpile was assigned to the DLA, Defense National Stockpile Center. Only the DLA National Defense Stockpile Transaction Fund is authorized to use this inventory category and accounts. Included are critical materials held as reserves and/or stockpiles. They are not held with the intent of selling in the ordinary course of business. Material portions of the amount reported on this line should be disclosed in Note 8.C. Material is defined as any component of stockpile materials that represents more than 10 percent of the value of stockpile materials.

★4. Seized Property. Seized property (normally not applicable for DoD reporting entities) includes monetary instruments, real property and tangible personal property of others seized by authorized law enforcement agencies as a consequence of various laws and in the actual or constructive possession of a custodial agency. Only seized monetary instruments shall be recognized as such when seized. A liability also shall be reported in an amount equal to the seized asset value. Seized property other than monetary instruments and additional information regarding seized property shall be disclosed in Note 8.D. If the seized monetary assets will not be available to the entity to support its operations, the amounts should be classified as a nonentity asset. Material portions of the amount reported on this line should be disclosed in Note 8D. Material is defines as any component of seized property that represents more than 10 percent of the total value of seized property.

★5. Forfeited Property. Forfeited property (normally not applicable for DoD reporting entities) consists of: (1) monetary instruments, intangible property, real property, and tangible personal property acquired through forfeiture proceedings; (2) property acquired by the government to satisfy a tax liability; and, (3) unclaimed and abandoned merchandise. If the forfeited assets will not be available to the entity to support its operations the amounts should be classified as a nonentity asset. Material portions of the amount reported on this line should be disclosed in Note 8E. Material is defines as any component of forfeited property that represents more than 10 percent of the total value of forfeited property.

★6. Goods Held Under Price Support and Stabilization Programs (not applicable for DoD reporting entities). These goods are referred to as commodities. Commodities are items of commerce or trade having an exchange value. They are acquired, held, sold, or otherwise disposed of to satisfy or help satisfy economic goals.

★7. Other Inventory and Related Property Required Information. In addition to the end of year inventory balances, reporting entities must provide the following supplemental information to the appropriate Defense Finance Accounting Service (DFAS) Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning balance. The beginning balance is the FY 1998 ending balance for inventory, net.

b. Acquisitions. The dollar value of inventory purchases received during the reporting period.

c. Transfers in. The dollar value of inventory transfers in (without reimbursement) during the reporting period.

d. Sales. The dollar value of inventory sold during the reporting period.

e. Disposals. The dollar value of inventory disposals during the reporting period.

f. Transfers out. The dollar value of inventory transfers out (without reimbursement) during the reporting period.

g. Inventory revaluation. The dollar value of changes in inventory due to revaluation during the current period.

h. Prior period adjustment. The dollar value of changes in inventory due to revaluation to correct error(s) in prior year reporting.

i. Ending balance. The end of year inventory balance reported for the current period. This must agree with the total inventory net amount reported in Note 8A.

★8. OM&S Other Required Information. The reporting entity must provide the following OM&S additional information as supplemental schedules to the DFAS Center or the U.S. Army Corps of Engineers - Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

- a. Beginning balance. The beginning balance is the FY 1998 ending balance for OM&S, net.
- b. Acquisitions. The dollar value of OM&S purchases received during the reporting period.
- c. Transfers in. The dollar value of OM&S transferred in (without reimbursement) during the reporting period.
- d. Issuances. The dollar value of OM&S issued during the reporting period.
- e. Disposals. The dollar value of OM&S disposals during the reporting period.
- f. Transfers out. The dollar value of OM&S transfers out (without reimbursement) during the reporting period.
- g. OM&S revaluation. The dollar value of changes in OM&S due to revaluation during the current period.
- h. Prior period adjustment. The dollar value of changes in OM&S due to revaluation to correct error(s) in prior year reporting.
- i. Ending balance. The end of year OM&S balance reported for the current period. This ending balance must agree with the amount reported in Note 8.B.

★9. Stockpile Material and Other Required Information. The reporting entity must provide the following stockpile material data as supplemental information to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

- a. Beginning balance. The beginning balance is the FY 1998 ending balance for stockpile, net.
- b. Acquisitions. The dollar value of stockpile purchases received during the reporting period.
- c. Transfers in. The dollar value of stockpile transfers in (without reimbursement) during the reporting period.
- d. Sales. The dollar value of stockpile sales during the reporting period.

e. Disposals. The dollar value of stockpile disposals during the reporting period.

f. Transfers out. The dollar value of stockpile transfers out (without reimbursement) during the reporting period.

g. Stockpile revaluation. The dollar value of changes in stockpile due to revaluation during the current period.

h. Prior period adjustment. The dollar value of changes in stockpile due to revaluation to correct error(s) in prior year reporting.

i. Ending balance. The end of year stockpile balance reported for the current period. This ending balance must agree with Note 8C.

G. General Property, Plant, and Equipment (PP&E), Net – Line 1.F. General PP&E is defined as any capitalizable PP&E used in providing goods and services; or in support of entity mission.

1. General PP&E Characteristics. General PP&E has one or more of the following characteristics:

a. It could be used for alternative purposes (e.g., by other federal programs, state or local governments, or nongovernmental entities) but is used to produce goods or services, or to support the mission of the entity, or

b. It is used in a significantly self-sustaining activity which finances its continuing cycle of operations through the collection of revenue (business-type activities), or

c. It is used by entities in activities whose costs can be compared to other entities performing similar activities.

2. WCF PP&E. For entities operating as business-type activities (WCF Activities), all PP&E used in the performance of their mission shall be categorized as general PP&E whether or not it meets the definition of other PP&E categories. This does not preclude WCF activities from reporting Heritage assets they own and that are not used in the performance of their mission. Land and land rights acquired for or in connection with general PP&E shall be included in general PP&E. The costs of software, whether developed by employees of the entity, off the shelf, or contractors, are considered internally-developed software costs and are capitalized if they meet DoD capitalization criteria. The expense associated with the use of general PP&E is calculated through the systematic and rational allocation of the cost, less its estimated salvage/residual value, over the estimated useful life of the general PP&E. This expense, known as depreciation, shall be recognized on all general PP&E, except land and land rights of unlimited duration.

★3. Real and Personal Property. General PP&E includes the amount of real and personal property, e.g., land, buildings, structures and facilities, construction in progress, software, equipment and related improvements that has been capitalized, net of accumulated depreciation, if any. Also, this line includes the value of all assets that meet the requirement for capital leases as described in SFFAS No. 6 and property owned by the reporting entity in the hands of the reporting entity or contractors. For example, include in this line the value of real and personal property used by the Defense WCF in its operations but under the jurisdiction of the Military Departments. The elements of PP&E, as well as information regarding depreciation practices, if any, shall be disclosed in Note 9. Do not include the value of property held but not in use; these assets are to be included in line 1.G., “Other Assets.” Examples of property held but not in use are Base Realignment and Closure (BRAC) sites once identified and assets awaiting disposal.

★4. Multi-Use Heritage Assets. National Defense PP&E, heritage assets, and stewardship land are categories of PP&E which are not reported on the balance sheet, with one exception. As recommended by Statement of Recommended Accounting Standards (SRAS) No. 16, the cost of acquiring, bettering, and reconstructing all multi-use heritage assets, those heritage assets used predominately in general government operations, shall be capitalized as General PP&E. As such, these costs will be included in the appropriate major class of General PP&E for accounting and reporting purposes and depreciated over their useful lives. In addition, an explanation will be made in Note 9 that physical quantity information for multi-use heritage assets is included in supplemental stewardship reporting for heritage assets.

★5. General PP&E and Other Required Information. The reporting entity must provide the following General PP&E data as supplemental information to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning balance. The beginning balance is the FY 1998 ending balance for General PP&E.

b. Acquisitions. The dollar value of General PP&E purchases received during the reporting period.

c. Transfers in. The dollar value of General PP&E transfers in (without reimbursement) during the reporting period.

d. Sales. The dollar value of General PP&E sold during the reporting period.

e. Disposals. The dollar value of General PP&E disposals during the reporting period.

f. Transfers out. The dollar value of General PP&E transfers out (without reimbursement) during the reporting period.

g. General PP&E revaluation. The dollar value of changes in General PP&E due to revaluation during the current period.

h. Prior period adjustment. The dollar value of changes in General PP&E due to revaluation to correct error(s) in prior year reporting.

i. Ending balance. The end of year General PP&E balance reported for the current period. The ending balance for each major asset class must agree with Note 9 information.

★6. General PP&E Depreciation and Other Required Information. The reporting entity must provide the following General PP&E depreciation data as supplemental information to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning balance. The beginning balance is the FY 1998 ending balance for depreciation of General PP&E.

b. Addition of current year depreciation. The dollar value of depreciation expense for General PP&E for the reporting period.

c. Reductions to Accumulated Depreciation. The amount of accumulated depreciation removed due to sales, disposals, or transfers out of General PP&E.

d. Revaluation. The dollar value of changes to General PP&E depreciation due to revaluation and depreciation policy changes during the current period.

e. Prior period adjustment. The dollar value of changes in General PP&E depreciation due to revaluation to correct error(s) in prior year reporting.

f. Ending balance. The end of year General PP&E depreciation balance reported for the current period. The ending balance for each major asset class must agree with Note 9 information.

★H. Other Assets – Line 1.G. Include on this line those entity assets that are not classified as intragovernmental and are not included on the lines above. If any of the components of other entity assets represent more than 10 percent of the value of the line, those components should be separately disclosed in Note 5 Section A or C. Include advances and prepayments in this line. This represents the values of all advances and prepayments made to nonfederal entities. Include on this line the value of outstanding civilian and military pay and travel advances. Also, include on this line the value of outstanding progress payments made to contractors under fixed price contracts. The only exception is for progress payments based on the percentage of completion (normally limited to military construction). The value of outstanding progress payments based on the percentage of completion is to be reported on the

PP&E line and disclosed in the PP&E Note 9. Advances are cash outlays made by a federal entity to cover certain periodic expenses before those expenses are incurred.

I. Total Entity Assets – Line 1.H. The sum of lines 1.A.5. through 1.G.

040204. Line Instructions for the Preparation of the Nonentity Asset Section of the Balance Sheet. These are assets that are held by an entity but are not available to the entity. In addition to the narrative below see the general ledger crosswalk in paragraph 0403 for a description of the accounts and attributes applicable to each line item.

A. Intragovernmental. Intragovernmental nonentity assets are claims of a federal entity against other federal entities. These are amounts which, when collected cannot be spent by the reporting entity.

★1. FBWT – Line 2.A.1. To the extent that the reporting entity maintains balances in deposit, receipt, suspense, and clearing accounts, that are not available to finance the entity's activities, those balances should be reported on line 2.A.1. as nonentity assets. Additional information regarding FBWT shall be disclosed in Note 2.

★2. Accounts Receivable, Net – Line 2.A.2. This item represents amounts due from other federal entities. Include on this line any amounts of accounts receivable that were established under accounts that are cancelled, including cancelled accounts for which Treasury is accepting adjustments. These receivables are not available to the reporting activity. Additional information regarding accounts receivable, including those in cancelled accounts, shall be disclosed in Note 4. Intragovernmental accounts receivable are impacted by eliminations, see Chapter 13 of this Volume.

3. Other Assets – Line 2.A.3. Include on this line those nonentity intragovernmental assets not included on above lines. The components shall be disclosed in Note 5. If any component of this line represents more than 10 percent of the value of the line those components should be separately disclosed.

B. Total Intragovernmental Line 2.A.4. The sum of lines 2.A.1. through 2.A.3.

★C. Accounts Receivable, Net – Line 2.B. This item represents amounts due from nonfederal entities, net of an allowance for estimated uncollectible amounts. Additional information regarding accounts receivable shall be disclosed in Note 4. Include on this line any amounts of accounts receivable that were established under accounts that are cancelled, including cancelled accounts for which Treasury is accepting adjustments. Also, include on line 2.B. interest receivable from nonfederal entities which, when collected, cannot be used by the reporting entity in its operations. No interest should be recognized as revenue on accounts receivable or investments that are determined to be uncollectible unless the interest is actually collected. However, until the interest payment requirement is officially waived by the government entity or the related debt is written off, interest accrued on uncollectible accounts

receivable and an offsetting allowance for uncollectible interest receivable should be disclosed. See Appendix B of this Volume for the reconciliation requirements.

★D. Cash and Other Monetary Assets – Line 2.C. This line includes the total of all cash resources and all other monetary assets not available to the entity. Cash consists of: (1) coins, paper currency and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit; (2) amounts on demand deposit with banks or other financial institutions; and (3) foreign currencies, which, for accounting purposes, should be translated into U.S. dollars at the exchange rate on the financial statement date. “Other Monetary Assets” include gold, special drawing rights, and U.S. Reserves in the International Monetary Fund. The amount of Cash and Other Monetary Assets that the reporting entity holds and is authorized to spend is entity cash. The assets under this category that a federal entity collects and holds on behalf of the U.S. Government or other entities is nonentity cash and other monetary assets and is not available to the collecting entity. Include on this line the DoD disbursing officer cash reported on SF 1219, Statement of Accountability. Also, include the liability to Treasury for pecuniary liability in other liabilities covered by budgetary resources (line 4.A.4. Other Liabilities). The components of Cash and Other Monetary Assets shall be disclosed in Note 7.

★E. Other Assets – Line 2.D. Include on this line those Other Nonentity Assets that are classified as non-federal that are not included on the lines above. An example of a non-entity other asset (with the public) is advance pool agreements made with nonprofit educational or research institutions. These are reported on the SF 1219, Statement of Accountability. If any component of other nonentity assets represents more than 10 percent of the value of the line, those components should be separately disclosed in Note 5C Section A or C.

F. Total Nonentity Assets – Line 2.E. Sum of lines 2.A.4. through 2.D.

G. Total Assets – Line 3. Sum of lines 1.H. and 2.E.

040205. General Instructions for the Preparation of the Liabilities Section of the Balance Sheet. In addition to the narrative below see the general ledger crosswalk in paragraph No. 0403 for a description of the accounts and attributes applicable to each line item.

★A. Definition. A liability is a probable future outflow or other sacrifice of resources as a result of past transactions or events. Financial statements shall report probable and measurable future outflows or other sacrifices of resources arising from: (1) past exchange transactions, (2) government-related events, (3) government-acknowledged events, or (4) nonexchange transactions that, according to current law and applicable policy, are unpaid amounts due as of the reporting date. The concept of a liability includes not only those liabilities routinely recurring in normal operations, such as accounts payable, but also includes contingent liabilities, those liabilities resulting from an existing condition that involves uncertainty as to possible loss.

★B. Liability Recognition. Liabilities resulting from normal operation are to be recognized (included on one of the liability lines in the balance sheet) when they are incurred. Contingent liabilities should be recognized when a past event or exchange transaction has occurred that results in a probable, measurable future outflow of resources. If a specific amount of the contingent liability can not be reasonably estimated, but a range of amounts can, the contingent liability should still be recognized. If some amount within the range is a better estimate than any other amount within the range, then that amount should be recognized. If no amount within the range is a better estimate than any other amount, then the minimum amount of the range should be recognized and the range disclosed in Note 13. A contingent liability that results from a past event or exchange transaction that results in a reasonably possible, measurable future outflow of resources should be disclosed in Note 13.

★C. Covered vs. Not Covered By Budgetary Resources. Liabilities are to be recognized regardless of whether they are covered by available budgetary resources. This includes liabilities related to canceled appropriations. Include liabilities as covered by budgetary resources to the extent of (1) realized budgetary resources existing at the balance sheet date, and (2) unrealized resources available in the future, such as permanent indefinite appropriations or borrowing authority, which have been enacted and signed into law as of the balance sheet date, provided that the unrealized resources may be apportioned by Office of Management and Budget (OMB) without further action by the Congress or without a contingency having to be met first. Disclose the nature of unrealized future resources used as the basis for classifying liabilities as covered by budgetary resources. Liabilities of federal agencies are classified as liabilities covered or not covered by budgetary resources. Intragovernmental liabilities are separately identified within each classification. The nature of the liabilities described below shall determine within which of the categories the liabilities should be classified. As illustrated in the model balance sheet, many of these liabilities have amounts that fall into more than one category and should be classified accordingly.

★D. Other Liabilities. This item covers liabilities that are not identified as separate lines on the balance sheet. This includes (but is not limited to): advances and prepayments for goods to be delivered or services to be performed, deposit fund amounts held in escrow, liabilities related to ongoing continuous expenses such as employees' salary and benefits, accrued entitlement benefits, and accrued employee annual leave. Also included are amounts payable by the federal entity for benefits, goods or services provided under the terms of a program, as of the federal entity's reporting date, whether or not such amounts have been reported to the federal entity (e.g., estimated payments due to health providers for services that have been rendered and that will be financed by the federal entity but have not yet been reported to the federal entity). This item also covers estimated losses for claims or other contingencies if: (1) a past event or exchange transaction has occurred (e.g., a federal entity has breached a contract with a nonfederal entity) as of the date of the statements, (2) a future outflow or other sacrifice of resources is probable, and (3) the future outflow or sacrifice of resources is measurable (i.e., the amount can be reasonably estimated). Material portions of the amount reported on this line should be disclosed in Note 13. Material is defined as any component of other liabilities that represents more than 10 percent of the total value of the line.

★040206. Instructions for the Preparation of the Liabilities Covered by Budgetary Resources Section of the Balance Sheet. Include on this line liabilities incurred which are covered by available budgetary resources as of the reporting date. Budgetary resources encompass not only new budget authority but also other resources available to cover liabilities for specified purposes in a given year. Available budgetary resources include: (1) new budget authority; (2) spending authority from offsetting collections (credited to an appropriation or fund account); (3) recoveries of unexpired budget authority through downward adjustments of prior year obligations; (4) unobligated balances of budgetary resources at the beginning of the year or net transfers of prior year balances during the year; (5) permanent indefinite appropriations or borrowing authority, which have been enacted and signed into law as of the balance sheet date, provided that the resources may be apportioned by the OMB without further action by the Congress or without a contingency having to be met first; and (6) liabilities supported by offsetting nonentity assets, such as Disbursing Officer cash.

A. Intragovernmental. These liabilities arise from transactions among federal entities. Intragovernmental liabilities are claims against the entity by other federal entities.

★1. Accounts Payable – Line 4.A.1. The amounts owed by a federal entity for goods and services received from, progress in contract performance made by, and rents due to other federal entities. Report interest payable as a component of the appropriate liability. Interest payable under the Prompt Payment Act must also be reported on this line. See Appendix B of this Volume for the reconciliation requirements. Intragovernmental accounts payable are impacted by eliminations, see Chapter 13 of this Volume.

2. Debt – Line 4.A.2. This item represents the amounts of borrowings from the U.S. Treasury, the Federal Financing Bank, or other federal agencies. The elements of debt shall be disclosed in Note 11.

★3. Environmental Liabilities – Line 4.A.3. Record cleanup costs as the costs of removing, containing, and/or disposing of (1) hazardous waste from property, or (2) material and/or property that consists of hazardous waste at a permanent or temporary closure or shutdown of associated PP&E as intragovernmental if it is known that the reporting entity will be billed by another federal entity for the cost of the clean up. The elements of environmental liabilities shall be disclosed in Note 12. In addition, reporting entities must provide the following supplemental information for environmental liabilities to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning balance. The beginning balance is the FY 1998 ending balance for environmental liabilities, net.

b. Additions. The dollar value of increases to the estimate of environmental liabilities during the reporting period.

c. Deletions. The dollar value of payments for environmental liabilities during the reporting period.

d. Revaluation. The dollar value of changes in environmental liabilities due to revaluation, including policy changes, during the current period.

e. Prior period adjustment. The dollar value of changes in environmental liabilities due to revaluation to correct error(s) in prior year reporting.

f. Ending balance. The end of year environmental liabilities balance reported for the current period. This must agree with the total environmental liabilities, net amount reported in Note 12.

g. Current liability. Identify amount to be paid in next fiscal year.

★4. Other Liabilities – Line 4.A.4. This item represents other liabilities that are not recognized in specific categories. Include on this line the total amount due the federal entities for other liabilities covered by budgetary authority that are not included on other lines above. This includes (but not limited to): deferred credits, advances and prepayments received from other federal entities for goods to be delivered or services to be performed, deposit fund amounts held in escrow, and capital leases. Note 13 should be used to separately report the current portion of other intragovernmental liabilities. Current liabilities represent amounts owed by a federal entity which need to be paid within the fiscal year following the reporting date. Further disclosure may be appropriate for separate categories within other intragovernmental liabilities and other current intragovernmental liabilities if the amounts are material. Include on this line the pecuniary liability to Treasury for the DoD disbursing officer cash reported on SF 1219, Statement of Accountability. The cash accountability asset is reported on line 2.C. Material amounts are defined as any component of the other liabilities line that represents more than 10 percent of the value of the line.

B. Total Intragovernmental – Line 4.A.5. The sum of lines 4.A.1. through 4.A.4.

★C. Accounts Payable – Line 4.B. The amounts owed by the reporting entity for goods and services received from, progress in contract performance made by, and rents due to nonfederal entities. Report interest payable as a component of the appropriate liability. Include accrued interest payable under the Prompt Payment Act. See Appendix B of this Volume for the reconciliation requirements.

★D. Military Retirement Benefits and Other Employment Related Actuarial Liabilities – Line 4.C. Entities that are responsible for the administration for pensions, other retirement benefits, and other postemployment benefits should calculate and report these liabilities and related expenses. The major assumptions used to derive the present value calculations for the actuarial liabilities not covered by budgetary resources (including the related net assets, if any) shall be disclosed in Note 14. Disclose the liabilities, assumptions used, and

the components of expense for the period for pensions, other retirement benefits, and other postemployment benefits. This line is applicable in the DoD to the Military Retirement Trust Fund, retired military health benefits, and other employment related actuarial liabilities for civilian and military personnel.

★1. Military Retirement Benefits. This line is used to report the estimated present value projected for agency administered pension, health insurance and similar plan costs requiring actuarial determinations of the projected plan benefits (less net assets, if any) based on: (a) service to date, (b) occurrences to date, and/or (c) amounts earned or accrued to date.

★2. Other Retirement Benefits (ORB). The ORB liabilities for post employment health and life insurance benefits must also be recognized. The health care ORB projection for military retirees will be reported on Other Defense Agency balance sheet. ORB includes:

★a. Voluntary Separation Incentive Program. The Voluntary Separation Incentive Program is used to accumulate funds to finance, on an actuarially sound basis, the liabilities of DoD incurred under this program. This program covers costs, including the salary and benefits, for qualified military personnel who opt for early retirement.

★b. DoD Education Benefits Fund. The DoD Education Benefits Fund is designed to accumulate funds for the Educational Assistance program. This program promotes the recruitment and retention of members for the All-Volunteer Forces program and the Total Force Concept of the Armed Forces and aids in the readjustment of members of the Armed Forces to civilian life after separation from military service.

★E. Environmental Liabilities – Line 4.D. Report cleanup costs--costs of removing, containing, and/or disposing of (1) hazardous waste from property, or (2) material and/or property that consists of hazardous waste at permanent or temporary closure or shutdown of associated PP&E as nonfederal if at the balance sheet date it is not known who will conduct the clean up or if the reporting entity will be billed by a contractor for the cost of the cleanup. The SFFAS No. 5 provides criteria for recognizing a contingent liability and shall be applied to determine if cleanup costs should be recognized as liabilities and/or disclosed in the notes. The SFFAS No. 6 supplements the liability standard by providing guidance for recording cleanup costs related to general PP&E and stewardship assets used in Federal operations. The guidance applies to cleanup costs from Federal operations known to result in hazardous waste which the federal government is required by Federal, State and/or local statutes and/or regulations to cleanup. The elements of environmental cleanup shall be disclosed in Note 12. In addition, reporting entities must provide the following supplemental information for environmental liabilities to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

1. Beginning balance. The beginning balance is the FY 1998 ending balance for environmental liabilities, net.
2. Additions. The dollar value of increases to the estimate of environmental liabilities during the reporting period.
3. Deletions. The dollar value of payments for environmental liabilities during the reporting period.
4. Revaluation. The dollar value of changes in environmental liabilities due to revaluation, including policy changes, during the current period.
5. Prior period adjustment. The dollar value of changes in environmental liabilities due to revaluation to correct error(s) in prior year reporting.
6. Ending balance. The end of year environmental liabilities balance reported for the current period. This must agree with the total environmental liabilities net amount reported in Note 12.
7. Current liability. Identify amount to be paid in next fiscal year.

F. Other Liabilities – Line 4.E. Include in this line the total amount due to the public for other liabilities covered by budgetary authority that are not included on other lines above. This includes (but not limited to): deferred credits, accrued entitlement benefits, capital leases advances and prepayments received from other nonfederal entities for goods to be delivered or services to be performed, deposit fund amounts held in escrow, estimated losses for commitments and contingencies if (a) information available before the statements are issued indicates an asset probably has been impaired or a liability incurred as of the date of the statements and (b) the amount can be reasonably estimated as a specific amount or range of amounts. Any component of this line that represents more than 10 percent of the value of the line shall be separately disclosed in Note 13.

1. Accrued Entitlement Benefits. Accrued entitlements include: (1) salaries and wages which represents the estimated liability for salaries and wages of civilian personnel that have been earned, but are unpaid, and the estimated military personnel funded compensation earned, but unpaid, as of the end of the current accounting month; (2) annual accrued leave which represents the funded accrued leave for civilians and military personnel that has been earned and are expected to be paid in the future; (3) severance pay and separation allowance which represents the funded severance pay and separation allowances for civilians and military personnel that has been earned and are expected to be paid in the future and (4) include in the Military Retirement Trust Fund the accrued entitlement benefits for military retirees and survivors.
2. Estimated Losses for Commitments and Contingencies. Examples of commitments and contingencies for which the estimated losses, if funded, would be reported

on this line are: (1) indemnity agreements, i.e., reimbursements due to licensees or contractors for losses incurred in support of government activities; (2) nonadjudicated claims, i.e., claims against the government that are in the process of judicial proceedings; and (3) commitments to international institutions, i.e., payments due to international financial institutions.

★3. Current vs. Noncurrent Portion. Note 13 should be used to separately report the current portion of other intragovernmental liabilities and the noncurrent portion. Further disclosure may be appropriate for separate categories within other liabilities, if the amounts are material. Material is defined as any component of the line that represents more than 10 percent of the value of the line.

4. Loan Guarantees. Include liabilities for loan guarantees. For post-1991 loan guarantees, the present value of the estimated net cash flows to be paid as a result of loan guarantees. For pre-1992 loan guarantees, the amount of known and estimated losses to be payable.

5. Capital Leases. The liability for capital leases which is covered by budgetary authority. (Capital leases entered into prior to FY 1992 and lease purchases prior to FY 1991 were funded on a fiscal year basis; capital leases and lease purchases entered into during FY 1992 and thereafter must be fully funded in the first year of the lease, see Appendix B OMB Circular A-11.) The components of and other information about the capital lease liability shall be disclosed in Note 13.

★6. Other Required Information for Other Liabilities. Reporting entities must provide the following supplemental information for Temporary Early Retirement Authority (TERA) to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning balance. The beginning balance is the FY 1998 ending balance for TERA liabilities.

b. Additions. The dollar value of increases to the estimate of TERA liabilities during the reporting period.

c. Reductions. The dollar value of payments for TERA liabilities during the reporting period.

d. Revaluation. The dollar value of changes in TERA liabilities due to revaluation, including policy changes, during the current period.

e. Prior period adjustment. The dollar value of changes in TERA liabilities due to revaluation to correct error(s) in prior year reporting.

f. Ending balance. The end of year TERA liabilities balance reported for the current period. This must agree with the total TERA liabilities net amount reported in Note 13 (TERA line).

g. Current liability. Identify the amount to be paid in next fiscal year.

G. Total Liabilities Covered by Budgetary Resources – Line 4.F. Sum of line items 4.A.5. through 4.E.

040207. Instructions for the Preparation of the Liabilities Not Covered by Budgetary Resources Reported on the Balance Sheet. This category is for liabilities which are not considered to be covered by budgetary resources, as provided in the previous paragraphs.

A. Intragovernmental. These liabilities arise from transactions among federal entities. Intragovernmental liabilities are claims against the entity by other federal entities.

★1. Accounts Payable – Line 5.A.1. The amounts owed by a federal entity for goods and services received from, progress in contract performance made by, and rents due to other federal entities. These amounts are not covered by available appropriations. Include on this line any amounts of accounts payable that were established under accounts that are now cancelled, including cancelled accounts for which Treasury is accepting adjustments, and are expected to be paid during the fiscal year immediately following the reporting period. See Appendix B for the required reconciliation for this line. Intragovernmental accounts payable are impacted by eliminations, see Chapter 13 of this Volume.

2. Debt – Line 5.A.2. This line is used to report debt issued to other federal agencies under general or special financing authority. The components of debt shall be disclosed in Note 11.

★3. Environmental Liabilities – Line 5.A.3. Report cleanup costs as the costs of removing, containing, and/or disposing of (1) hazardous waste from property, or (2) material and/or property that consists of hazardous waste at permanent or temporary closure or shutdown of associated PP&E as intragovernmental if it is known that the reporting entity will be billed by another federal entity for the cost of the clean up. The elements of environmental cleanup shall be disclosed in Note 12. In addition, reporting entities must provide the following supplemental information for environmental liabilities to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

a. Beginning Balance. The beginning balance is the FY 1998 ending balance for environmental liabilities, net.

b. Additions. The dollar value of increases to the estimate of environmental liabilities during the period.

c. Deletions. The dollar value of payments for environmental liabilities during the reporting period.

d. Revaluation. The dollar value of changes in environmental liabilities, due to revaluation, including policy changes, during the current period.

e. Prior Period Adjustment. The dollar value of changes in environmental liabilities due to revaluation to correct error(s) in prior year reporting.

f. Ending Balance. The end of the year environmental liabilities balance reported for the current period. This must agree with the total environmental liabilities net amount reported in Note 12.

g. Current Liability. Identify amount to be paid in the next fiscal year.

4. Other Intragovernmental Liabilities – Line 5.A.4. This item represents other liabilities that are not recognized in specific categories. Include in this line the total amount due federal agencies for other liabilities not covered by budgetary authority that are not included on other lines above. This also includes appropriations available for definite periods which have been closed under provisions of 31 U.S.C. 1552 and appropriations available for indefinite periods which have been closed under provisions of 31 U.S.C. 1555, and are not expected to be paid during the fiscal year immediately following cancellation. Note 13 should be used to separately report the current portion of other intragovernmental liabilities. Current liabilities represent amounts owed by a federal entity which need to be paid within the fiscal year following the reporting date. Further disclosure may be appropriate for separate categories within other intragovernmental liabilities and other current intragovernmental liabilities if the amounts are material. Material is defined as any component of the line that represents more than 10 percent of the value of the line.

B. Total Intragovernmental – Line 5.A.5. The sum of lines 5.A.1. through 5.A.4.

★C. Accounts Payable – Line 5.B. The amounts owed by a federal entity for goods and services received from, progress in contract performance made by, and rents due to the public. These amounts due are not covered by available budgetary resources. Include on this line any amounts of accounts payable that were established under accounts that are now cancelled, including cancelled accounts for which Treasury is accepting adjustments, and are expected to be paid during the fiscal year immediately following the reporting period. See Appendix B of this Volume for the reconciliation requirements.

★D. Military Retirement Benefits and Other Employment Related Actuarial Liabilities – Line 5.C. Entities that are responsible for the administration for pensions, other retirement benefits, and other postemployment benefits should calculate and report these liabilities and related expenses. The major assumptions used to derive the present value

calculations for the actuarial liabilities not covered by budgetary resources (including the related net assets, if any) shall be disclosed in Note 14. Disclose the liabilities, assumptions used, and the components of expense for the period for pensions, other retirement benefits, and other postemployment benefits.

★1. Military Retirement Benefits. This line is applicable in the DoD to the Military Retirement Trust Fund, retired military health benefits, and other employment related actuarial liabilities for civilian and military personnel. This line is used to report the estimated present value projected for agency administered pension, health insurance and similar plan costs requiring actuarial determinations of the projected plan benefits (less net assets, if any) based on: (a) service to date, (b) occurrences to date, and/or (c) amounts earned or accrued to date.

★2. Workman's Compensation (FECA) Liability Entries. Workman's compensation is a benefit coverage for death, disability, medical, and miscellaneous cost for approved cases of on the job incidents. Workman's compensation claims are submitted to and approved by the Department of Labor (DoL). DoL pays the claim holders. DoL then prepares a chargeback billing to the responsible Agencies. DFAS-KC Agency Reconciliation Branch receives a summary DoD chargeback bill. P.L. 93-416, Section 8147 (the FECA law) essentially gives Agencies two years to pay this chargeback bill, allowing time for the amount for the amount to be included in their budgets. Therefore, there should be an unfunded liability in the CFO Statements for these two years, which may be split into current for the portion to be paid in the following year. Under the FECA law once funding is received, it should be paid within 30 days. If DoD still has some amounts outstanding, these amounts should be reflected as a funded liability and an explanation is required.

★3. Other Retirement Benefits. The ORB liabilities for post employment health and life insurance benefits must also be recognized. The health care ORB projection for military retirees will be reported on Other Defense Agency balance sheet. ORB includes:

★a. Voluntary Separation Incentive Program. The Voluntary Separation Incentive Program is used to accumulate funds to finance, on an actuarially sound basis, the liabilities of DoD incurred under this program. This program covers costs, including the salary and benefits, for qualified military personnel who opt for early retirement.

★b. DoD Education Benefits Fund. The Education Benefits Fund is designed to accumulate funds for the Educational Assistance program. This program promotes the recruitment and retention of members for the All-Volunteer Forces program and the Total Force Concept of the Armed Forces and aids in the readjustment of members of the Armed Forces to civilian life after separation from military service.

★E. Environmental Liabilities – Line 5.D. Report cleanup costs--costs of removing, containing, and/or disposing of (1) hazardous waste from property, or (2) material and/or property that consists of hazardous waste at permanent or temporary closure or shutdown of associated PP&E as nonfederal if at the balance sheet date it is not know who will conduct the

clean up or if the reporting entity will be billed by a contractor for the cost of the cleanup. The elements of environmental cleanup shall be disclosed in Note 12. In addition, reporting entities must provide the following supplemental information for environmental liabilities to the appropriate DFAS Center or the U.S. Army Corps of Engineers – Finance Center. These are supporting schedules used by the finance centers when they prepare the financial statements.

1. Beginning balance. The beginning balance is the FY 1998 ending balance for environmental liabilities, net.

2. Additions. The dollar value of increases to the estimate of environmental liabilities during the reporting period.

3. Deletions. The dollar value of payments for environmental liabilities during the reporting period.

4. Revaluation. The dollar value of changes in environmental liabilities due to revaluation, including policy changes, during the current period.

5. Prior period adjustment. The dollar value of changes in environmental liabilities due to revaluation to correct error(s) in prior year reporting.

6. Ending balance. The end of year environmental liabilities balance reported for the current period. This must agree with the total environmental liabilities net amount reported in Note 12.

7. Current liability. Identify amount to be paid in next fiscal year.

★F. Other Liabilities – Line 5.E. Include in this line the total amount due the public for other liabilities not covered and not included on other lines above. This includes (but not limited to): (1) deferred credits, (2) deposit funds held in escrow, (3) advances and prepayments received from the public, (4) other liabilities originally chargeable to appropriations cancelled under Public Law 101-510, “National Defense Authorization Act for Fiscal Year 1991,” and (5) the amount of employee accrued annual leave, i.e., earned but not used, that would be funded and paid from future years’ appropriations. Also included here are estimated losses for commitments and contingencies if (a) information available before the statements are issued indicates an asset probably has been impaired or a liability incurred as of the date of the statements, and (b) the amount can be reasonably estimated as a specific amount or range of amounts. Any component of this line that represents more than 10 percent of the value of this line shall be separately disclosed in Note 13.

★1. Estimated Losses for Commitments and Contingencies. Examples of commitments and contingencies for which the estimated losses would be reported on this line are: (1) insurance payments due for losses resulting from bank failures, crop failures, floods, expropriations, loss of life, and similar unplanned events; (2) indemnity agreements, i.e., reimbursements due to licensees or contractors for losses incurred in support of government

activities; (3) nonadjudicated claims, i.e., claims against the Government that are in the process of judicial proceedings.

★2. Current Portion. Note 13 should be used to separately report the current portion of other governmental liabilities.

★3. Capital Leases. The portion of the liability for capital leases for which budgetary resources may be provided over the future years of the lease. This principally applies to capital leases entered into before FY 1992, and lease purchases prior to FY 1991. (Capital leases entered into prior to FY 1992 and lease purchases prior to FY 1991 were funded on a fiscal year basis; capital leases and lease purchases entered into during FY 1992 and thereafter must be fully funded in the first year of the lease, see Appendix B of OMB Circular A-11.) The elements of, and other information about, the capital lease liability shall be disclosed in Note 13.

★4. Disclosure Requirements. Further disclosure may be appropriate for separate categories within other liabilities, if the amounts of the components represent more than 10 percent of the Other Liabilities line item on the financial statements.

★5. Other Required Information for Other Liabilities. The following represent examples of the types of liabilities included in this line:

a. Annual Accrued Leave. Represents the unfunded accrued leave for civilians and military personnel that has been earned and are expected to be paid in the future.

b. Commitments to International Institutions. Represents the unfunded payments due to international financial institutions.

G. Total Liabilities Not Covered by Budgetary Resources – Line 5.F. Sum of lines 5.A.5. through 5.E.

H. Total Liabilities – Line 6. Sum of lines 4.F. and 5.F., above.

040208. Instructions for the Preparation of the Net Position Section of the Balance Sheet. The components of net position are classified as follows:

A. Unexpended Appropriations – Line 7. This amount includes the portion of the entity's appropriations represented by undelivered orders (net of unfilled orders) and unobligated balances. The amounts of undelivered orders, unobligated balances available, and unobligated balances unavailable shall be disclosed in Note 15.

B. Cumulative Results of Operations – Line 8. The net results of operations since inception plus the cumulative amount of prior period adjustments. Beginning in FY 1998, this will include the cumulative amount of donations and transfers of assets in and out without

reimbursement. In addition, there will no longer be a segregation of cumulative amounts related to investments in capitalized assets, such as PP&E, or precredit reform loans, or a separate negative amount shown for future funding requirements. These amounts shall be included in cumulative results of operations. Additional information and disclosures relating to Cumulative Results of Operations shall be disclosed in Note 15.

- C. Total Net Position – Line 9. Sum of lines 7 and 8.
- D. Total Liabilities and Net Position – Line 10. Sum of lines 6 and 9, above.

0403 GENERAL LEDGER CROSSWALK FOR THE BALANCE SHEET

★040301. Consolidated statements must eliminate the effect of intra entity transactions. A procedure used to standardize the approach is the use of Treasury Index (TI) and the DoD elimination attribute (TI+D) codes listed in Tables 4-2 and 4-3. Each general ledger account with intra DoD and intra-federal government transactions must be identified and therefore disaggregated. For example: If the Army Working Capital Fund has \$200 million in intragovernmental account receivable (A/R), then 100 percent of the \$200 million of A/R must be disaggregated by the codes in Tables 4-2 and 4-3. An example of the disaggregation follows: a \$50 million A/R with a TI attribute of 80, a \$50 million A/R with a TI+D of 97-4930.003, and a \$100 million A/R with a TI of 21.

★040302. Table 4-1, below, provides the U. S. Government Standard General Ledger (USGSGL) crosswalk for each report line. The following provides an explanation of the information included in the columns of the crosswalk (all ending balances are postclosing balances):

- A. Column (1) represents the line number on the balance sheet.
- B. Column (2) identifies the title of the line number on the balance sheet.
- C. Column (3) reflects the USGSGL account numbers included on each line of the balance sheet.
- D. Column (4) identifies the title of the general ledger account.
- E. Column (5) uses the Treasury Financial Management Service (FMS) coding to identify entity assets and liabilities (E = Entity, O = Nonentity).
- F. Column (6) uses the Treasury Financial Manual (TFM) coding to identify the breakout of assets and liabilities depending upon whether or not they relate to other federal entities. Governmental (G) indicates assets and liabilities arising from transactions with other federal entities. Non-Governmental (N) indicates assets and liabilities arising from transactions with the public.
- G. Column (7) uses the Treasury Financial Management Service coding to identify the breakout of funded or unfunded accounts (F = Funded, U = Unfunded).

H. Column (8) is used to identify additional requirements for breakout of accounts to the line, for Federal Agencies' Centralized Trial Balance System reporting and reconciliation requirements, and for other instructions specific to the General Ledger Account Code.

040302. DoD Eliminating Entries Breakout Codes For Use by Treasury, Financial Management Services, and Reported in the Federal Agencies Centralized Trial Balance Attributes.

The elimination codes in Tables 4-2 and 4-3 are used in conjunction with the general ledger accounts to identify amounts that must be eliminated when preparing financial statements. Table 4-2 elimination codes are used by the Department of the Treasury in the preparation of the government-wide financial reports. Table 4-3 are used in the preparation of the DoD Agency-wide financial statements. See Chapter 13 of this Volume for additional guidance on elimination reporting requirements.

Figure 5-2 (Cont.)

0502 INSTRUCTIONS FOR THE PREPARATION OF THE STATEMENTS OF NET COST050201. General Instructions.

★A. Statement of Net Cost Format. The Statement of Net Cost is designed to show separately the components of the net cost of the reporting entity's operations for the period. Formats are displayed using notional data to assist the user. All figures used on this financial statement should be preclosing trial balances.

★B. Total Program Costs. Net cost of operations is the gross cost incurred by the reporting entity less any exchange revenue earned from its activities. The gross cost of a program consists of the full cost of the outputs produced by that program plus any nonproduction costs that can be assigned to the program. Nonproduction costs are costs linked to events other than the production of goods and services. The net cost of a program consists of gross cost less related exchange revenues. By disclosing the gross and net cost of the entity's programs, the Statement of Net Cost provides information that can be related to the outputs and outcomes of the programs and activities.

C. Complex Entities. The organizational structure and operations of some entities are so complex that to fully display their suborganizations' major programs and activities may require supporting schedules to supplement the information in the Statement of Net Cost. The Department breaks out Components into the reporting entities described in Chapter 1, Section 0106. The Components further break out the consolidating statement as appropriate. Additional supporting schedules may be included in Note 16.A. if necessary.

★D. GPRA Programs. The Department is in the process of identifying the Government Performance and Results Act (GPRA) performance measures based on missions and outputs. However, the Department does not accumulate costs for major programs based on GPRA performance measures, in part because it's financial processes and systems do not collect costs in line with newly established measures. Accordingly, the Department plans to break out programs by the nine major appropriation groupings addressed in paragraph 050302 and Table 5-1 of this Volume. Present programs vertically down one column. The Department of Defense (DoD) Agency-wide consolidating net cost statement should present program appropriation groupings vertically down and suborganizations horizontally (see figure 5-2).

★E. FY 1999 Programs. Ultimately, preparers of the Statement of Net Cost will decide the exact classification of suborganizations and major programs based on the missions and outputs described in its GPRA strategic and annual plans, the entity's budget structure, and the guidance for defining and structuring responsibility segments presented in Statements of Federal Financial Accounting Standards (SFFAS) No. 4, "Managerial Cost Accounting Standards." However, if data is currently available, at the program level, the reporting entities may provide such information as a supplemental schedule.

F. Reportable Costs. The Statement of Net Cost and related supporting schedules should show the net cost of operations for the reporting entity as a whole and its suborganizations and programs. This can be accomplished by reporting by program: (1) the gross cost of goods; services provided to the public and government agencies (intragovernmental) at a price, (2) related exchange revenues, (3) the excess of costs over exchange revenues (net program costs), and (4) the gross cost of goods, services, transfers and grants provided to the public and government agencies without charge, and by reporting for the suborganization or entity as a whole the costs that cannot be assigned to specific outputs or programs and the exchange revenues that cannot be attributed to specific outputs or programs.

G. Illustrated Format. The Statement of Net Cost illustrated in this document provides an example of how information can be displayed for an entity with a complex organizational and program structure, a limited number of programs carried out by more than one suborganization, and the majority of its programs carried out within a specific suborganization or responsibility segment.

★H. Imputed Costs. Costs displayed on the Statement of Net Cost must include imputed costs. Imputed costs represent costs that are paid in total or in part by other entities. Imputed costs are to be recognized to the extent that the SFFAS No. 4. requires them to be recognized in financial statements. For example, reporting entities shall recognize the cost of pensions and other retirement benefit expenses in their financial statements. The amount recognized shall equal the service costs of their employees for the accounting period, less amounts contributed by the employees. However, for FY 1999, the Office of Management and Budget (OMB) memorandum, dated April 2, 1998, specifically limits the recognition of imputed costs to four categories. The four categories are: (1) employees' pension benefits; (2) the health, life insurance, and other benefits for retired employees; (3) other post-employment benefits for retired, terminated, and inactive employees, which include severance payments, training and counseling, and continued health care; and (4) losses in litigation proceedings related to the Judgement Fund not reimbursed by the Department. See Federal Accounting Standards Advisory Board interpretation No. 2., "Accounting for Treasury Judgement Fund Transactions" for additional information.

1. Imputed Costs for Pension Expense. Each of the DoD Components shall recognize an imputed cost that is equal to the reported employer entity pension expense for the accounting period (as computed using factors provided by the Office of the Under Secretary of Defense (Personnel and Readiness) (OUSD(P&R))), less any accounting period contributions by the Military Departments to the Military Retirement Trust Fund. Imputed revenue and imputed expense for military pension reported in the Military Department financial statements audited reports shall be eliminated in the DoD Agency-wide financial report. The administrative entity expenses shall be reported only in the Military Retirement Trust Fund financial statements audited report.

2. Imputed Costs for Military Health Benefits. Each Military Department shall recognize imputed costs that are equal to the employer entity expense for the military health benefits that is attributable to the Military Department (as computed using factors

provided by the USD(P&R)) for the accounting period. Imputed revenue and imputed expense for military health benefits reported in the Military Department financial statements audited reports shall be eliminated in the DoD Agency-wide financial report. The administrative entity for the military health benefits is the USD(P&R). The administrative entity actual expenses shall only be reported in the DoD Agency-wide (Other Defense Organizations, General Funds) financial statements audited report.

050202. Line Item Instructions. In addition to the narrative below see the general ledger crosswalk in paragraph 0504 for a description of the accounts and attributes applicable to each line item.

★A. Program Costs – Line 1. This line contains costs that include the full costs of the program outputs and consist of the direct costs and all other costs that can be directly traced, assigned on a cause and effect basis, or reasonably allocated to the program outputs. Program costs also include any nonproduction costs that can be assigned to the program but not to its outputs. The costs of program outputs shall include the costs of services provided by other entities whether or not the providing entity is fully reimbursed. See SFFAS No. 4., “Managerial Cost Accounting Concepts and Standards,” for a detailed discussion of full costs and interentity costs. The DoD has elected not to apply the full costing concept to selected programs (e.g., Base Realignment and Closure, environmental cleanup). The costs for these items are included with the reporting entities that receive the funding.

★1. Nonproduction Costs. OMB guidance requires nonproduction costs associated with programs to be separately reported. Therefore, for each, program the total nonproduction cost should be identified in Note 16 J. In addition, the costs listed below shall be disclosed separately from other nonproduction costs, in Note 16, if incurred:

a. National Defense PP&E. The cost of acquiring, constructing, improving, reconstructing, or renovating National Defense property, plant, and equipment.

b. Heritage Assets. The cost of acquiring, constructing, improving, reconstructing, or renovating heritage assets.

★c. Stewardship Land. The full acquisition cost of acquiring stewardship land.

★d. Imputed Expense. The expenses imputed to the entity.

★e. Other Nonproduction Costs. Agencies should consider differentiating other significant costs if by doing so the usefulness of the statements would be improved either because the amount of a particular cost is large or because of its special nature. For example, when reporting on a program that makes transfer payments, it may be useful to differentiate between the transfer payments and administrative costs. Components of Other

Nonproduction costs are considered significant if the component represents more than 10 percent of the value of the line.

★2. Intragovernmental – Line 1.A. This line contains costs that arise from the purchase of goods or services from other federal reporting entities. The effects of intraentity business transactions are eliminated in the reporting entity statements; and the effects of inter-federal agency business transactions must be identified and reported to the Department of the Treasury, Financial Management Service via the Federal Agencies' Centralized Trial-Balance System (FACTS). See Chapter 13 of this Volume for elimination reporting requirements.

★3. With the Public – Line 1.B. This line contains costs that arise from payments made for goods and services provided by the public, such as contracted services, military/civilian pay and benefits, and purchases.

4. Total Program Cost – Line 1.C. Sum of lines 1.A. and 1.B.

★5. Less: Earned Revenues – Line 1.D. This line contains revenues that are exchange revenues, which arise when a federal entity provides goods and services to the public or to another government entity for a price. The full amount of exchange revenues is to be reported on the Statement of Net Cost or supplementary schedule, regardless of whether the entity is permitted to retain the revenues in whole or in part. Any portion of exchange revenues of the entity that cannot be retained by the entity is reported as a transfer-out on the Statement of Changes in Net Position. An example is interest earned collected on delinquent receivables transferred out to Treasury upon collection. See Chapter 13 of this Volume for elimination reporting requirements.

a. Earned revenue should be deducted from the full cost of outputs or outcomes to determine their net cost unless it is not practical or reasonably possible to do so. If that cannot be done, earned revenue should be deducted from the gross cost of programs to determine the net program costs or, if that is not practical or reasonably possible, from the costs of suborganizations to determine the suborganization's net cost of operations.

b. There are no precise guidelines to determine the degree to which earned revenue can reasonably be attributed to outputs, outcomes, programs, or suborganizations. The attribution of earned revenues requires the exercise of managerial judgment. In exercising this judgment, it is important to provide readers of the Statement of Net Cost with the ability to ascertain whether exchange revenues are sufficient to cover the costs incurred to produce the goods or services involved.

★6. Net Program Costs – Line 1.E. Line 1.C. plus line 1.D. This line is the difference between a program's gross costs and its related exchange revenues. If a program does not earn any exchange revenue, there is no netting and the term used might be "total program costs."

★B. Costs Not Assigned to Programs – Line 2. A reporting entity and its suborganizations may incur (1) high level general management and administrative support costs that cannot be directly traced, assigned on a cause-and-effect basis, or reasonably allocated to segments and their outputs, and (2) nonproduction costs that cannot be assigned to a particular program. These costs are part of the entity and suborganization costs and should be reported on the Statement of Net Cost as “costs not assigned to programs.” Also, include extraordinary items (gains/losses) on this line and if material disclose in Note 16. A material component is any component that represents more than 10 percent of the value of the line.

C. Less: Earned Revenues Not Attributable to Programs – Line 3. Earned revenue that cannot be attributable to particular outputs or programs should be reported separately as a deduction in arriving at net cost of operations of the suborganization or reporting entity as a whole.

D. Net Cost of Operations – Line 4. This line is the gross cost incurred by the reporting entity less any exchange revenue earned from its activities. This amount represents the net cost of a suborganization or entity that is funded by sources other than exchange revenues. The financing sources for net cost of operations are reported on the Statement of Changes in Net Position. See Appendix B for required reconciliation.

E. Deferred Maintenance – Line 5. Deferred maintenance is maintenance that was not performed when it should have been or was scheduled to be performed and is delayed until a future period. Maintenance includes preventative maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve the asset so that it continues to provide acceptable services and achieves its expected life. No amount shall be recognized on the Statement of Net Cost for deferred maintenance. However, the statement will refer the reader to required supplemental information related to deferred maintenance. For FY 1999, the reference for deferred maintenance is shown below the computation of the net cost of operations, due to programming problems, even though the cost of deferred maintenance would impact net cost of operations if recorded. For FY 2000, the reference to the deferred maintenance Required Supplementary Information will be shown above the net cost of operations calculation.

★0503 PROGRAM PRESENTATION

★050301. Government-wide Implementation of Public Law 103-62. GPRA performance measures are required for FY 1999. However, the Department does not accumulate costs for major programs based on GPRA performance measures, in part because its financial processes and systems do not collect costs in line with newly established GPRA performance measures.

★050302. The DoD Agency-wide Program Presentation. The program data provided on the Statement of Net Costs for the consolidated DoD Agency-wide financial statements will be reported by major appropriation grouping until its financial processes and systems are upgraded. The appropriation groups to be reported are: (1) Military Personnel; (2) Operation

and Maintenance; (3) Procurement; (4) Research, Development, Test and Evaluation; (5) Military Construction/Family Housing; (6) Military Retirement Trust Fund; (7) Civil Works; (8) Working Capital Funds (WCF); and (9) Other Programs. The appropriations to be included in each group are identified in Table 5-1.

★050303. Department of Defense Reporting Entities. Management of the DoD reporting entities identified in paragraphs 010601 may report the program distribution of net costs by existing entity program units or by appropriation grouping as specified in paragraph 050302. However, if management chooses a program distribution other than by the appropriation group as in paragraph 050302, a supplemental Statement of Net Costs by appropriation grouping must be provided. This supplemental schedule is required in order to prepare the consolidated DoD Agency-wide Statement of Net Costs. The appropriation groupings in the supplemental schedule must conform to the grouping identified in Table 5-1.

0504 GENERAL LEDGER CROSSWALK FOR THE STATEMENT OF NET COST

The following provides an explanation of the information included in the columns of the crosswalk (all balances are preclosing balances):

050401. Column (1) represents the line number on the statement.

050402. Column (2) identifies the title of the line number on the statement.

050403. Column (3) reflects the U.S. Government General Ledger Account numbers included on each line of the statement.

050404. Column (4) identifies the title of the general ledger account.

050405. Column (5) identifies the segment of the account balance that is applicable to each report line. (G = Government, NG = Non-Governmental (Public), G/NG = Government/Non-Government, and CNATP = Cost Not Assigned To Programs). Note: In addition to the breakout of account balances identified in column 5, when amounts include transactions between reporting entities, the account must be broken out by trading partner. Identifying codes for other federal agency trading partners are provided in Table 4-3.

Figure 6-2

★0602 INSTRUCTIONS FOR THE PREPARATION OF THE STATEMENT OF CHANGES IN NET POSITION

★060201. General Instructions. The Statement of Changes in Net Position reports the beginning net position, the items which caused net position to change during the reporting period, and the ending net position. The entity should include a consolidated and consolidating Statement of Changes in Net Position in annual financial statements per Table 1-1 and display information organized by responsibility segment, component, or otherwise in the same manner for the Statement of Net Cost. Formats are displayed using notional data to assist the user. All figures used in this financial statement should be based on preclosing balances.

060202. Line Item Instructions. In addition to the narrative below see the general ledger crosswalk in paragraph 060306 for a description of the accounts and attributes as applied to each line item.

A. Net Cost of Operations - Line 1. This is the net cost of operations reported on the Statement of Net Cost. See Appendix B for the required reconciliations.

B. Financing Sources (Other than Exchange Revenue) - Line 2.

1. Appropriations Used - Line 2.A. Appropriations are considered used as a financing source when goods and services are received, or benefits are provided, under authority of the appropriations. This is true whether the goods, services, and benefits are paid prior to the reporting date or are payable as of that date, and whether the appropriations are used for items which are recorded as expenses or are capitalized. In order to avoid double counting, appropriations used do not include dedicated tax receipts and donations because these sources are reported as nonexchange revenues. In addition, appropriations used by collecting entities to provide refunds of monies deposited to Treasury or the trust funds or to repay debt are also excluded because they do not provide budgetary authority.

2. Taxes and Other Nonexchange Revenue - Line 2.B. Revenues the federal government is able to demand or receive due to its sovereign powers. Normally not applicable for Department of Defense (DoD) reporting entities.

3. Donations - Nonexchange Revenue - Line 2.C. Voluntary gifts of resources to the federal government by nonfederal entities. Donations may be financial resources, such as cash or securities, or nonfinancial resources such as land or buildings. The amount of revenue arising from donations of nonfinancial resources shall be recognized in accordance with criteria in Statement of Federal Financial Accounting Standards (SFFAS) No. 6 “Accounting for Property, Plant, and Equipment” and should be valued at the estimated fair value at the time of the contribution. The exception, Stewardship property, plant, and equipment (PP&E), consists of National Defense PP&E, heritage assets, and stewardship land. Such PP&E is expensed when purchased, but no amount is recognized if it is received as a donation. Correspondingly, no revenue is recognized for such donations.

4. Imputed Financing - Line 2.D. Imputed financing equals the amount of imputed costs included in amounts reported on the Statement of Net Cost. Include on this line, amounts for civilian pensions and other retirement benefits paid by Office of Personnel Management above amounts contributed by employee and DoD reporting entity; and nonreimbursable amounts paid from the Treasury Judgement Fund. Additional information on imputed financing is disclosed in Note 17.B.

5. Transfers - in - Line 2.E. An intragovernmental transfer of cash or capitalized assets without reimbursement shall be recognized by the receiving entity as a transfer-in. The amount recognized shall be the transferring entity's book value. If book value is not known, the amount recognized should be the asset's estimated fair value at the date of the transfer.

★6. Transfers - out - Line 2.F. An intragovernmental transfer of cash or capitalized assets without reimbursement shall be recognized by the transferring entity as a transfer-out. The amount recognized should be the transferring entity's book value. If book value is not known, then the amount recognized should be the asset's estimated fair value at the date of the transfer. To the extent that exchange revenue included in calculating an entity's net cost of operations is required to be transferred to the Treasury or another federal entity, the amount transferred shall be recognized as a transfer-out. Enter transfers-out as a negative number.

★7. Other - Line 2.G. This line includes financing sources (nonexchange revenues) other than those identified in Lines 2.A. through 2.F. Material portions of amounts reported on this line should be disclosed in Note 17.C. A material portion is any component of other financing sources that represents more than 10 percent of the value of the line.

★8. Total Financing Sources (other than exchange revenues) - Line 2.H. Calculation: Sum Lines 2.A. through 2.G.

★C. Net Results of Operations - Line 3. Calculation: Line 2.H. less Line 1.

★D. Prior Period Adjustments - Line 4. Prior period adjustments are limited to corrections of errors and accounting changes with retroactive effect that can either increase or decrease net position depending on their nature, including those occasioned by the adoption of new federal financial accounting standards. Enter increases as a positive number; enter decreases as a negative number. Adjustments are included in the calculation of the net change in cumulative results of operations, rather than as an element of net results of operations for the period. Prior period financial statements should not be restated for prior period adjustments. Material portions of the amount reported on this line should be disclosed in Note 17.A. A material portion is any component which represents more than 10 percent of the value of the line.

★E. Net Change in Cumulative Results of Operations - Line 5. Calculation: Line 3 plus Line 4.

★F. Increase (Decrease) in Unexpended Appropriations - Line 6. The change from the beginning of the period in the amount of appropriations that have been made available but have not been used. Enter increases as a positive number; enter decreases as a negative number.

★G. Change in Net Position - Line 7. Calculation: Line 5 plus Line 6.

H. Net Position - Beginning of Period - Line 8. The amount is the net position reported on the prior year's balance sheet.

I. Net Position - End of Period - Line 9. This amount shall agree with the amount reported as net position on the current year balance sheet. Calculation: Line 7 plus Line 8.

★0603 GENERAL LEDGER CROSSWALK FOR THE STATEMENT OF CHANGES IN NET POSITION

The following provides an explanation of the information included in the columns of the crosswalk (all balances are preclosing balances, except where noted for lines 6 and 8):

060301. Column (1) represents the line number on the statement.

060302. Column (2) identifies the title of the line number on the statement.

060303. Column (3) reflects the U.S. Government Standard General Ledger account numbers included on each line of the statement.

060304. Column (4) identifies the title of the general ledger account.

060305. Column (5) indicates the balance or value selected for each account (E = End of period balance, B = Beginning of period balance, E-B = End of period balance less the beginning of period balance).

060306. Column (6) additional information to be used in developing the presentation of the identified data.

Table 7-1

070101. Footnote Disclosure. Any material differences should be noted and fully explained between amounts reported on the financial statements and budgetary reports as a result of the DoD FMR Appendix B, Reconciliation Requirements Statements, Section II. Reconciliation Requirements for the Statement of Budgetary Resources and the Report on Budget Execution (SF-133) (General Fund and Working Capital fund Reporting Entities). Footnote 18 shall provide material disclosures for the Statement of Budgetary Resources.

0702 INSTRUCTIONS FOR THE STATEMENT OF BUDGETARY RESOURCES

070201. General Instructions for the Preparation of the Statement of Budgetary Resources. In addition to the narrative below see the general ledger crosswalk in paragraph No. 0703 for a description of the accounts and attributes applied to each line item.

★A. The Statement of Budgetary Resources and the related disclosures provide information about how budgetary resources were made available, as well as their status at the end of the period. This statement is divided into three general sections: Budgetary Resources, Status of Budgetary Resources, and Outlays. This statement shall be prepared by reporting entities whose financing comes wholly or partially from budgetary resources. The Statement of Budgetary Resources shall be aggregated to reflect all the activity of the reporting entity for the year covered by the financial statement. Prior year information shall be presented to allow the reader to make appropriate comparisons with prior periods (required for FY 2000). The pre-closing trial balance figures should be the basis for each line item. The Office of Management and Budget (OMB) does not require consolidated and consolidating statements of budgetary resources through FY 1999 and the Department of Defense (DoD) has elected to prepare combined and combining statements for FY 1999. The statements will be appropriately titled combined and combining. Formats are displayed using notional data to assist the user. In addition, because the Department has elected to prepare combined and combining statements for FY 1999, disclose in Note 18, "Other Information," that intra-entity transactions have not been eliminated.

★B. Monitoring of budget execution is at the individual appropriation account level for DoD Component reporting entities. Budgetary information shall be aggregated for the combined Statement of Budgetary Resources principal statements. Budgetary information shall be disaggregated for each of the reporting entity's combining statement by major budget account groups and presented in the Required Supplementary Information section of the financial statements (see Chapter 12 of this Volume). Small budget accounts are aggregated in the supplementary information combining statement in an "Other General Funds Accounts" category.

★C. Recognition and measurement of budgetary information reported on this statement shall be based on budget terminology, definitions, and guidance in OMB Circular A-34, "Instructions on Budget Execution," dated November 1997. That Circular defines the terms shown in this statement. The statement illustrates in condensed form the information that Circular A-34 requires to be reported on the Report on Budget Execution (SF-133). For purposes of illustration only, a statement has been included in Table 7-1 to show the corresponding line numbers from Statement of Budgetary Resources to the SF-133.

070202. Instructions for the Preparation of the Statement of Budgetary Resources.

A. Budgetary Resources – Lines 1 through 6. This section of the statement is designed to present the total budgetary resources available to the reporting entity during the past fiscal year. These include new budget authority, obligation limitations, direct spending authority, unobligated balances at the beginning of the period or transferred in during the period,

spending authority from offsetting collections, and any adjustments to budgetary resources. The lines identified on the Statement of Budgetary Resources are a summarization of various lines of data identified on the SF-133. Additional guidance for the SF-133 is contained in OMB Circular No. A-34, dated November 1997. This guidance shall be referenced to obtain detailed explanations for data that is included in the lines identified in this section of the Statement of Budgetary Resources.

1. Budget Authority – Line 1. Include amounts for appropriations, borrowing authority, contract authority, net transfers (current year authority realized), and other amounts for indefinite appropriations available under existing law.

★2. Unobligated Balance, Beginning of Period – Line 2. Include the available, unobligated balance brought forward from prior fiscal years as of October 1 of the current fiscal year.

★3. Net Transfers Prior-Year Balance, Actual (+/-) – Line 3. Include also the unobligated balance of prior year budget authority actually transferred to (+) or from (-) the account and include current estimate of any balances transferred to (+) or from (-) the account under existing legislation.

4. Spending Authority from Offsetting Collections – Line 4. This line includes earnings, changes in unfilled customer orders, and transfers from trust funds.

★5. Adjustment – Line 5. Include amounts for recoveries of prior year obligations (actual and anticipated), amounts temporarily not available for obligation pursuant to the specific provision of the public law, prior year rescissions, and amounts for resources permanently not available.

★6. Total Budgetary Resources – Line 6. Sum of lines 1 through 5.

★B. Status of Budgetary Resources – Lines 7 through 10. This section of the statement is designed to display information about the status of budgetary resources at the end of the period. It consists of the obligations incurred, the unobligated balances at the end of the period that remain available, and unobligated balances at the end of the period that are unavailable. The total amount displayed for the status of budgetary resources shall equal the total budgetary resources available to the reporting entity as of the reporting date. The lines identified on the Statement of Budgetary Resources are a summarization of various lines of data identified on the SF-133.

★1. Obligations Incurred – Line 7. This line includes direct obligations and obligations financed from offsetting collections.

2. Unobligated Balances, Available – Line 8. Include amounts apportioned, exempt from apportionment, and other unobligated balances, available.

3. Unobligated Balances Not Available – Line 9. Include amounts apportioned for subsequent periods, deferred, withheld pending rescission, and other unobligated balances not available.

4. Total, Status of Budgetary Resources – Line 10. Sum of lines 7 through 9.

★C. Outlays – Lines 11 through 16. This section of the statement displays total outlays and reconciles obligations incurred to total outlays by displaying spending authority from offsetting collections, obligated balances at the beginning of the period, obligated balances transferred, and obligated balances at the end of the period. The lines identified on the Statement of Budgetary Resources are a summarization of various lines of data identified on the SF-133.

★1. Obligations Incurred – Line 11. Include amount identified on line 7 of this statement.

★2. Less: Spending Authority From Offsetting Collections and Adjustments – Line 12. This line includes spending authority from offsetting collections and adjustments that is earned, changes in unfilled customer orders, transfers from trust funds, and the actual amounts recovered from prior year obligations.

3. Obligated Balance, Net, Beginning of the Period – Line 13. This amount shall include the net amount of all unpaid obligations as of October 1 of the current fiscal year. This line should equal line 14 of the final SF-133 of the preceding fiscal year.

4. Obligated Balance Transferred, Net – Line 14. Include the net amount of all unpaid obligations actually transferred to (+) or from (-) the account during the current fiscal year.

★5. Less: Obligated Balance, Net, End of Period – Line 15. This line represents the net amount of all unpaid obligations being carried forward to the subsequent period, which includes accounts receivable, unfilled customer orders, undelivered orders, and accounts payable.

6. Total Outlays – Line 16. Sum of lines 11 through 15.

0703 GENERAL LEDGER CROSSWALK FOR THE STATEMENT OF BUDGETARY RESOURCES**070301. General Instructions for the General Ledger Crosswalk.**

A. This section provides a crosswalk from the U.S. Government Standard General Ledger (USGSL) accounts for the Statement of Budgetary Resources.

★B. The crosswalk lists the individual applicable posting accounts. Posting accounts are those which receive the original entry(s) of a transaction, as opposed to summary accounts which subtotal (or total) the balances of specified posting accounts.

★C. The lines on the financial statement that require calculations do not cite the USGSL account. This information is provided for each referenced line that is included in that calculation.

070302. General Ledger Crosswalk for the Statement of Budgetary Resources. The following provides an explanation of the information included in the columns of the crosswalk (all balances are preclosing balances, except where noted):

A. Column (1) represents the line number on the statement.

B. Column (2) identifies the title of the line number on the statement.

C. Column (3) reflects the USGSL account numbers included on each line of the statement.

D. Column (4) identifies the title of the general ledger account.

E. Column (5) indicates the balance or value selected for each account (E = End of period balance, B = Beginning of period balance, E-B = End of period balance less the beginning of period balance).

★F. Column (6) additional information to be used in developing the presentation of the identified data. Z = Account balance for this account should be reduced to zero prior to the preparation of the preclosing trial balance used to prepare this statement at year end.

CHAPTER 8

STATEMENT OF FINANCING★0801 FORMATS FOR THE STATEMENT OF FINANCING

Department of Defense

[Reporting Entity]

COMBINED STATEMENT OF FINANCING

For the year ending September 30, 1999

(\$ in thousands)

	FY 1999
1. OBLIGATIONS AND NONBUDGETARY RESOURCES:	
A. Obligations Incurred	\$ 777,777
B. Less: Spending Authority for Offsetting Collections and Adjustments	(111,111)
C. Donations Not in the Entity's Budget	111,111
D. Financing Imputed for Cost Subsidies	222,222
E. Transfers-In (Out)	111,111
★F. Less: Exchange Revenue Not in the Entity's Budget	(333,333)
G. Other	111,111
H. Total Obligations as Adjusted and Nonbudgetary Resources	<u>\$ x,xxx,xxx</u>
2. RESOURCES THAT DO NOT FUND NET COST OF OPERATIONS:	
★A. Change in Amount of Goods, Services, and Benefits Ordered but Not Yet Received or Provided - (Increases)/Decreases	(111,111)
★B. Costs Capitalized on the Balance Sheet - (Increases)/Decreases	(222,222)
★C. Financing Sources That Fund Costs of Prior Periods	(111,111)
★D. Other - (Increases)/Decreases	(xxx,xxx)
★E. Total Resources That Do Not Fund Net Costs of Operations	<u>\$ (x,xxx,xxx)</u>
3. COSTS THAT DO NOT REQUIRE RESOURCES:	
A. Depreciation and Amortization	xxx,xxx
B. Revaluation of Assets and Liabilities - Increases/(Decreases)	xxx,xxx
C. Other - Increases/(Decreases)	xxx,xxx
D. Total Costs That Do Not Require Resources	<u>\$ x,xxx,xxx</u>
4. Financing Sources Yet to be Provided	<u>xxx,xxx</u>
5. Net Cost of Operations	<u>\$ x,xxx,xxx</u>

Additional Information included in Note 19.

The accompanying notes are an integral part of these statements.

Figure 8-1

0802 INSTRUCTIONS FOR THE PREPARATION OF THE STATEMENT OF FINANCING080201. General Instructions.

★A. The Statement of Financing is designed to provide information on the total resources used by an agency and explain how those resources were used to finance orders for goods and services not yet delivered, to acquire assets and liabilities, and to fund the entity's net cost of operations. It is designed to report the differences and facilitate the reconciliation of accrual-based amounts used in the Statement of Net Cost and obligation-based amounts used in the Statement of Budgetary Resources. The computations and presentation of items in the Statement of Financing demonstrate that the budgetary and proprietary information in an agency's financial management systems are in agreement. All amounts used in this financial statement should be preclosing balances. The Office of Management and Budget (OMB) does not require a consolidated Statement of Financing for fiscal year (FY) 1999. Therefore, the Department of Defense (DoD) has elected to prepare for FY 1999 a combined Statement of Financing. The statements will be appropriately titled as combined. In addition, because the Department has elected to prepare combined and combining statements for FY 1999, disclose in Note 19 that intraentity transactions have not been eliminated.

B. Preparers of financial statements have flexibility as to the level of detail presented, i.e., the information should be presented for the reporting entity as a whole and, if the preparer elects, for the major suborganizations or responsibility segments or for the major budget accounts. Material disclosures pertinent to the Statement of Financing are provided at Note 19.

080202. Line Item Instructions. In addition to the narrative below see the general ledger crosswalk in paragraph 080306 for a description of the accounts and attributes applicable to each line item.

A. Obligations and Nonbudgetary Resources - Lines 1.A. through 1.H. The obligations and nonbudgetary resources section reports the computation of "Obligations Incurred" and adjustments for offsetting collections to expenditure accounts, recoveries of authority, and other items defined in the OMB Circular A-34. It also reports financing that is not recognized in the entity's budget. Financing sources other than exchange revenues which are not in the budget are added to obligations because they provide additional resources. Exchange revenues not in the budget are subtracted from obligations because they were subtracted from gross costs in the computation for net cost of operations.

1. Obligations Incurred – Line 1.A. This amount shall equal the obligations incurred as reported for the current year on the Statement of Budgetary Resources, Line 7. This line includes amounts for new orders placed, contracts awarded, services received, undelivered orders, expended authority, etc., that require payment some time during the same or future period.

★2. Less: Spending Authority from Offsetting Collections and Adjustments – Line 1.B. This line consists of three primary components: offsetting collections,

recoveries of authority, and changes in unfilled customer orders. Offsetting collections is a combination of collections from the public and other federal agencies for the various activities in which DoD engages. The recoveries of prior year authority component consist of budget authority that was recovered during the current year due to a reduction in a prior year obligation. The third and final component of this line is the change in unfilled customer orders. Unfilled customer orders are considered a budgetary resource at the time the order is accepted. Collections on those orders are also considered a resource. In order to avoid double-counting when relating net obligations to net outlays, the change in unfilled customer orders from the beginning of the period to the end of the period must be deducted from obligations incurred. This line includes the amount reported on the Statement of Budgetary Resources, Line 4.

3. Donations Not in the Entity's Budget – Line 1.C. Include “other than cash” amounts for donated revenue.

4. Financing Imputed for Cost Subsidies – Line 1.D. This amount includes the imputed financing sources for cost subsidies.

★5. Transfers-In (Out) – Line 1.E. Include the amounts for cash and capitalized assets that have been transferred in without reimbursement and transferred out without reimbursement. This amount should equal the net of lines 2.E. and 2.F. on the Statement of Changes in Net Position.

★6. Less: Exchange Revenue Not in the Entity's Budget – Line 1.F. This line should include amounts for nongovernment increases/decreases that are associated with nongovernment exchange revenue for accounts receivable and interest receivable. This line also includes other revenue that is associated with exchange revenue. Include interest earned on donations and investments in trust funds. This line is subtracted from obligations incurred due to the different recognition criteria for budgetary resources and revenue. In accordance with the Statements of Federal Financial Accounting Standards (SFFAS), revenue is recognized as intragovernmental receivables or public receivables. Under budgetary accounting intragovernmental receivables are recognized as a budgetary resource while public receivables are not recognized as a budgetary resource until they are actually collected. Therefore, any future collection of public receivables is going to be considered a budgetary resource, but not a financial revenue because it has already been recorded as a financial revenue. Therefore, changes in public receivables must be subtracted as a reconciling item in order to arrive at the net cost of operations on the Statement of Financing.

7. Other – Line 1.G. This line includes any other nonbudgetary revenue that is associated with nonexchange revenue. Any component of this line that represents more than 10 percent of the value of this line shall be separately disclosed.

8. Total Obligations as Adjusted and Nonbudgetary Resources
Line 1.H. Sum of lines 1.A. through 1.G.

B. Resources That Do Not Fund Net Costs of Operations. Some obligations or nonbudgetary financing sources do not result in expenses on the Statement of Net Cost for the period in which the obligation was made or the nonbudgetary resource recognized. Resources that do not fund net costs of operations commonly arise from three sources. One source is the change in goods, services, and benefits ordered but not yet received or provided. Another source is any good or service capitalized on the Balance Sheet. The third source is any item that is treated as a financing source yet to be provided in a prior period and that is being recognized as a budgetary resource in the current period. Because these items are included in obligations, as adjusted, and nonbudgetary financing sources, but not in the net cost of operations, they shall be subtracted in the reconciliation.

★1. Change in Amount of Goods, Services, and Benefits Ordered but Not Yet Received or Provided (Increases)/Decreases – Line 2.A. This line includes the net change in undelivered orders from the beginning of the period to the end. Net increases in undelivered orders and upward adjustments of prior-year undelivered orders should be subtracted from the net obligations and nonbudgetary resources; net decreases in undelivered orders and downward adjustments of prior-year undelivered orders should be added.

2. Costs Capitalized on the Balance Sheet (Increases)/Decreases – Line 2.B. This line includes obligations that do not affect net costs. Examples are: General property, plant, and equipment (PP&E), loans from liquidating funds, and nongovernment securities and investments. This amount should be subtracted from obligations and nonbudgetary resources.

3. Financing Sources That Fund Costs of Prior Periods – Line 2.C. Include on this line amounts received for budgetary resources in the current period that were previously reported as “financing sources yet to be provided.”

4. Other (Increases)/Decreases – Line 2.D. This line should include any other amounts that are not identified in lines 2.A. through 2.C. that are resources that do not fund net costs of operations. Any component of this line that represents more than 10 percent of the value of the line should be separately disclosed.

5. Total Resources That Do Not Fund Net Costs of Operations – Line 2.E. Sum of lines 2.A. through 2.D.

C. Costs That Do Not Require Resources. These are costs which do not require financing by either budgetary or nonbudgetary resources. Although there may be many expenses of this type, two of the most common are depreciation and expenses related to the revaluation of assets. Because these items are part of the net cost of operations but are not included in obligations, as adjusted, and nonbudgetary resources, they should be added in the reconciliation. As a practical matter, it may not always be feasible to report this information separately as displayed in the illustrated Statement of Financing.

1. Depreciation and Amortization – Line 3.A. Report those amounts for depreciation and amortization for General PP&E. This line should also include amounts for depletion.

2. Revaluation of Assets and Liabilities Increases/(Decreases) – Line 3.B. This line includes other gains and losses as a result of the revaluation of assets.

3. Other Increases/(Decreases) – Line 3.C. Include amounts for bad debts related to uncollectible noncredit report receivables. Include also amounts for the losses on the disposition of assets and the obligations associated with extraordinary items. Any component of this line which represents more than 10 percent of the value of the line should be separately disclosed.

4. Total Costs That Do Not Require Resources – Line 3.D. Sum of lines 3.A. through 3.C.

★D. Financing Sources Yet to be Provided – Line 4. The costs of the federal government are not always funded in the period the costs are incurred. Two examples most common to agencies funded by appropriations are the cost of increases in unused annual leave and the Federal Compensation Employment Act reimbursements to the Department of Labor. Costs of this nature are incurred in the reporting period, but are normally funded through appropriations in subsequent years. Future funding required for these costs is reported as “financing sources yet to be provided.” Because these costs are part of the net cost of operations but are not in obligations as adjusted, and nonbudgetary resources, they should be added in the reconciliation. Note that in a subsequent year, when budgetary resources are provided, the costs are subtracted in the section entitled “resources that do not fund net cost of operations.”

E. Net Cost of Operations – Line 5. This amount is determined by netting the “obligations as adjusted and nonbudgetary resources” and making appropriate adjustments for the total “resources that do not fund net cost of operations,” the total “costs that do not require resources,” and “financing sources yet to be provided.” The net cost of operations resulting from the reconciliation on the Statement of Financing shall be the same as the net cost of operations reported on the Statement of Net Cost (see Appendix B for the required reconciliation).

0803 GENERAL LEDGER CROSSWALK FOR THE STATEMENT OF FINANCING.

The following provides an explanation of the information included in the columns of the crosswalk (all ending balances are preclosing balances):

080301. Column (1) represents the line number on the statement.

080302. Column (2) identifies the title of the line number on the statement.

080303. Column (3) reflects the U.S. Government Standard General Ledger account numbers included on each line of the statement.

080304. Column (4) identifies the title of the general ledger account.

080305. Column (5) indicates the balance or value selected for each account (E = End of period balance, B = Beginning of period balance, E-B = End of period balance less the beginning of period balance).

080306. Column (6) additional information to be used in developing the presentation of the identified data.

CHAPTER 9

STATEMENT OF CUSTODIAL ACTIVITY★0901 FORMAT FOR THE STATEMENT OF CUSTODIAL ACTIVITY

Department of Defense [Reporting Entity] STATEMENT OF CUSTODIAL ACTIVITY For the year ending September 30, 1999 (\$ in Thousands)	
	<u>FY</u> <u>1999</u>
SOURCES OF COLLECTIONS	
1. Deposits by Foreign Governments	\$ 888,888
2. Other Collections	<u>222,222</u>
3. Total Cash Collections	<u>\$ 1,111,110</u>
4. Accrual Adjustments (+/-)	<u>111,111</u>
5. Total Custodial Collections	<u>\$ 1,222,221</u>
DISPOSITION OF COLLECTIONS	
6. Disbursed on Behalf of Foreign Governments and International Organizations	\$ 555,555
7. Increase (Decrease) in Amounts to be Transferred	222,222
8. Collections Used for Refunds and Other Payments	222,222
9. Retained by the Reporting Entity	<u>222,222</u>
10. Total Disposition of Collections	<u>\$ 1,222,221</u>
11. Net Custodial Collection Activity	<u><u>\$ 0</u></u>
<u>Additional information included in Note 20.</u> The accompanying notes are an integral part of these statements.	

Figure 9-1

0902 INSTRUCTIONS FOR THE PREPARATION OF THE STATEMENT OF CUSTODIAL ACTIVITY

★090201. General Instructions. The Statement of Custodial Activity is required for entities that collect nonexchange revenue for the General Fund of the Treasury, a trust fund, or other recipient entities. The collecting entities do not recognize collections that have been or should be transferred to others as revenues. Rather, they shall account for sources and disposition of the collections as custodial activities on the Statement of Custodial Activity. Material disclosures pertinent to the Statement of Custodial Activity are provided at Note 20. Format is displayed using notional data to assist the user. All figures in this statement should be based on preclosing balances.

090202. An exception to requiring preparation of the Statement of Custodial Activity is made when collecting entities have custodial collections that are nonmaterial and incidental to their primary mission. In these cases, the sources and disposition of the collections may be disclosed in accompanying footnotes.

090203. Line Item Instructions. In addition to the narrative below see the general ledger crosswalk in paragraph 090306 for a description of the accounts and attributes applicable to each line item.

A. Sources of Collections – Lines 1 through 5. Report in this section of the statement, cash collections using an identifier that describes the general source (i.e., other federal agency, foreign governments, or U.S. public). If any of these collections represent more than 10 percent of the value of total collections, then those collections should be separately disclosed under line 2. In Note 20, provide information that describes the purpose for which the deposits were received. If refunds are material in relation to gross collections, then disclose the purpose(s) of the refunds in Note 20. Funds provided in the context of Foreign Military Sales (FMS) are an example of applicable cash collections. A Statement of Custodial Activity shall be provided which reports the amounts of cash receipts and disbursement of the FMS trust Fund during the year.

1. Sources of Collections: Deposits by Foreign Governments – Line 1. Include the deposits by foreign government during the period.

2. Sources of Collections: Other Collections – Line 2. Include collections made from sources other than deposits by Foreign Governments.

3. Total Cash Collections – Line 3. This line equals the sum of lines 1 and 2.

4. Accrual Adjustments – Line 4. For the Department of Defense (DoD), this line is normally not applicable. However, the amount of advances not collected by the FMS billing date must be identified in Note 20.

5. Total Custodial Collections – Line 5. This line is the sum of lines 3 and 4.

B. Disposition of Collections – Lines 6 through 9. This section of the statement accounts for the disposition of the collections reported in the preceding section.

1. Disbursed on Behalf of Foreign Governments and International Organizations – Line 6. The net amount disbursed on behalf of foreign governments and international organizations is computed by subtracting refunds from gross amounts disbursed.

2. Increase (Decrease) in Amounts to be Transferred – Line 7. Report the change in liability for collections yet to be transferred. The liability may exist because it is a receivable, but has not yet been collected, or because collections already made have not yet been transferred to the entity for which collected as of the end of the reporting period.

3. Collections Used for Refunds and Other Payments – Line 8. Report the refunds and other payments made from collections on this line.

4. Retained by the Reporting Entity – Line 9. In some cases, collecting entities are permitted to retain a portion of amounts collected. Amounts retained shall be separately reported by the collecting entity.

5. Total Disposition of Collections – Line 10. This line is the sum of lines 5, 6, 7, and 8.

C. Net Custodial Collection Activity – Line 11. The total of the sources of collection section (total revenue) shall equal the total of the disposition of collections section (total disposition of revenue). The net custodial activity shall always equal zero.

0903 GENERAL LEDGER CROSSWALK FOR THE STATEMENT OF CUSTODIAL ACTIVITY.

The following provides an explanation of the information included in the columns of the crosswalk (all balances are preclosing balances, except where noted):

090301. Column (1) represents the line number on the statement.

090302. Column (2) identifies the title of the line number on the statement.

090303. Column (3) reflects the U.S. Government Standard General Ledger account numbers included on each line of the statement.

090304. Column (4) identifies the title of the general ledger account.

090305. Column (5) indicates the balance or value selected for each account (E = End of period balance, B = Beginning of period balance, E-B = End of period balance less the beginning of period balance).

★090306. Column (6) additional information to be used in developing the presentation of the identified data. Z = Account balance for this account should be reduced to zero prior to the preparation of the preclosing trial balance used to prepare this statement at year end.

CHAPTER 10**NOTES TO THE FINANCIAL STATEMENTS****1001 GENERAL**

★100101. This chapter provides format, content, and instruction for the preparation and presentation of notes to the principal statements. In addition, specific required disclosures of material departures from Statements of Federal Financial Accounting Standards (SFFAS) will be issued by memorandum each year for inclusion in the financial statements of the Department of Defense (DoD) reporting entities. All calculations used in the note schedules and tables shall match the rounding used in the principal statements.

★100102. In many cases, the underlying financial systems and operations that produce these statements were not designed to generate auditable financial statements in compliance with this form and content guidance. Consequently, diversions from generally accepted accounting principles and DoD policy exist in many of the Department's organizations. This is due largely, but not entirely, to long-standing systems deficiencies. The continuing system deficiencies remain a serious challenge to the Department--and realistically will require a number of years to correct. In cases where individual line items of the financial statements cannot be obtained or a substitution is made from the requirements herein, the deficiencies must be explained and the reason for noncompliance annotated in the related footnote. In addition, departures from federal accounting standards should be identified in Note 1 "Significant Accounting Policies," and may be included in the "Overview of the Reporting Entity."

★100103. The following table provides a summary of the note numbers, titles, and Chapter 10 Sections:

Note Number:	Title:	Chapter 10 Section:
1	Significant Accounting Policies	1002
2	Fund Balances With Treasury	1003
3	Investments, Net	1004

Table 10-1 (cont.)

★1002 NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

100201. Note 1 to the financial statements should describe the reporting entity and identify its major components. In addition, it should summarize the accounting principles and the methods of applying those principles, that management has concluded are the most appropriate for presenting the entity's significant assets, liabilities, equity, net cost of operations, changes in net position, and budgetary resources. Disclosure of accounting policies should identify and describe the accounting policies followed by the reporting entity and the methods of applying those principles. In general, the disclosure should encompass important judgements as to the valuation, recognition, and allocation of assets, liabilities, expenses, revenues, and other financing sources. Disclosure of accounting policies should not duplicate details presented elsewhere as part of the notes to the financial statements.

100202. The summary of significant accounting policies should disclose any significant changes, from the prior year, in the composition of the reporting entity or significant changes in the manner in which the reporting entity aggregates information for financial reporting purposes.

100203. In many cases, the underlying financial systems and operations that produce these statements were not designed to generate auditable financial statements in compliance with this form and content guidance. In cases where individual line items of the financial statements cannot be obtained or a substitution is made from the requirements herein, the deficiencies will be explained and the reason(s) for noncompliance annotated. At the discretion of entity management, such explanation may be included in the "Overview of the Reporting Entity;" but must be included in individual "Notes" to the financial statements or at Note 1, "Significant Accounting Policies."

100204. This section provides a **sample** Note 1. However, the specific wording shown will not be applicable to all DoD components. Each reporting entity must prepare Note 1 to describe its significant accounting policies.

Note 1. Significant Accounting Policies:

A. Basis of Presentation. These financial statements have been prepared to report the financial position and results of operations of the Department of Defense (DoD), as required by the Chief Financial Officers (CFO) Act of 1990, expanded by the Government Management Reform Act (GMRA) of 1994, and other appropriate legislation. The financial statements have been prepared from the books and records of the Department in accordance with "Department of Defense Financial Management Regulation" ("DoDFMR") as adapted from Office of Management and Budget (OMB) Bulletin No. 97-01, "Form and Content of Agency Financial Statements." These statements are in addition to the financial reports, also prepared by the DoD pursuant to OMB directives, that are used to monitor and control DoD's use of budgetary resources.

★B. Reporting Entity. The Department was created on September 18, 1947, by the National Security Act of 1947. The overall mission of the Department is to organize, train, and equip armed forces to deter aggression and, if necessary, defeat aggressors of the United States and its allies. Fiscal year (FY) 1999 represents the fourth year that the Department will prepare and have audited, DoD Agency-wide financial statements as required by the CFO Act and the GMRA.

1. The accounts used to prepare the statements are classified as entity/nonentity. Entity accounts consist of resources that the agency has the authority to use, or where management is legally obligated to use funds to meet entity obligations. Nonentity accounts are assets that are held by an entity but are not available for use in the operations of the entity. [List accounts and title categorized by fund type and grouped by entity and nonentity (see appendix A)]

2. The accompanying audited financial statements account for all resources for which the Department is responsible except that information relative to classified assets, programs, and operations have been excluded from the statement or otherwise aggregated and reported in such a manner that it is no longer classified. The audited financial statements are presented on the accrual basis of accounting as required by federal financial accounting standards.

C. Budgets and Budgetary Accounting. The Department's major activities are funded through general, working capital (revolving funds), trust, special, and deposit funds.

1. General funds are used to record financial transactions arising under congressional appropriations.

2. The Department expanded the use of businesslike financial management practices through the establishment of the Defense Business Operations Fund (DBOF) on October 1, 1991. On December 11, 1996, the DBOF became the Defense Working Capital Funds (DWCFs). The DWCFs ("the Funds") operate with financial principles that provide improved cost visibility and accountability to enhance business management and improve the decision making process. The Funds build on revolving fund principles previously used for industrial and commercial-type activities. The Department's working capital funds include industrial and commercial type transactions, e.g., supply management, distribution depot and depot maintenance type activity groups, and are composed of four divisions administered by the Departments of

the Army, Navy, Air Force and Defense Agencies. These activities provide goods and services on a commercial-like basis. Receipts derived from operations generally are available in their entirety for use without further congressional action.

3. Trust funds are used to record the receipt and expenditure of funds held in trust by the government for use in carrying out specific purposes or programs in accordance with the terms of the donor, trust agreement, or statute.

4. Special funds account for receipts of the government that are earmarked for a specific purpose.

5. Deposit funds generally are used to (1) hold assets for which the Department is acting as an agent or a custodian or whose distribution awaits legal determination or (2) account for unidentified remittances.

D. Basis of Accounting. Transactions generally are recorded on a budgetary basis, but are required to be reported (in these financial statements) on an accrual accounting basis. Under the accrual method, revenues are recognized when earned and expenses are recognized when incurred, without regard to receipt or payment of cash. Budgetary accounting is accomplished through unique general ledger accounts to facilitate compliance with legal and internal control requirements associated with the use of federal funds. The effect of known intrafund transactions are eliminated.

E. Revenues and Other Financing Sources. Financing sources for general funds are provided through congressional appropriations that are received on both an annual and a multi-year basis. Revenue for business fund activities is recognized according to the percentage completion method.

1. For financial statement reporting purposes under accrual accounting, operating expenses for general fund activities are recognized in the period incurred. Expenditures for capital and other long-term assets are not recognized as expenses until consumed in the Department's operations. Unexpended appropriations are recorded as equity of the U.S. Government.

2. Certain expenses, such as annual and military leave earned but not taken, are not funded when accrued. Such expenses are financed in the period in which payment is made.

F. Accounting for Intragovernmental Activities. The Department, as an agency of the federal government, interacts with and is dependent upon the financial activities of the federal government as a whole. Therefore, these financial statements do not reflect the results of all financial decisions applicable to the Department as though the agency was a stand-alone entity.

1. The Department's proportionate share of public debt and related expenses of the federal government are not included. Debt issued by the federal government and the related interests costs are not apportioned to federal agencies. The Department's financial statements, therefore, do not report any portion of the public debt or interest thereon, nor do the statements report the source of public financing whether from issuance of debt or tax revenues.

2. Financing for the construction of DoD facilities is obtained through budget appropriations. To the extent this financing ultimately may have been obtained through the issuance of public debt, interest costs have not been capitalized since the Treasury Department does not allocate such interest costs to the benefiting agencies.

★3. The Department's civilian employees participate in the Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS), while military personnel are covered by the Military Retirement System (MRS). Additionally, employees and personnel covered by FERS and MRS also have varying coverage under Social Security. The Department funds a portion of the civilian and military pensions. Reporting civilian pension benefits under CSRS and FERS retirement systems is the responsibility of the Office of Personnel Management (OPM). The Department recognizes an imputed expense for the portion of civilian employee pensions and other retirement benefits funded by OPM in the statement of net cost; and recognizes corresponding imputed revenue for the civilian employee pensions and other retirement benefits in the statement of changes in net position. The Department reports the assets, funded actuarial liability, and unfunded actuarial liability for the military personnel in the Military Retirement Trust Fund financial statements. The Department recognizes the actuarial liability for the military retirement health benefits in the DoD Agency-wide statements.

4. Each year, the Department's Components sell assets to foreign governments under the provisions of the Arms Export Control Act of 1976. Under the provisions of the Act, the Department has authority to sell defense articles and services to foreign countries, generally at no profit or loss to the U.S. Government. Customers are required to make payments in advance to a trust fund maintained by the Department of the Treasury from which the Military Services are reimbursed for the cost of administering and executing the sales. In FY 19**, the Department received reimbursements of \$xxx thousands for assets and services sold under the Foreign Military Sales program.

G. Funds with the U.S. Treasury and Cash. The Department's financial resources are maintained in U.S. Treasury accounts. The Department's cash receipts and disbursements are processed by the Defense Finance and Accounting Service disbursing offices, the U.S. disbursing offices at the Department of State's financial service centers as well as the Department of the Treasury and the Federal Reserve. The balance with the U.S. Treasury represents the aggregate of all unexpended balances. Material disclosures are provided at Note 2.

H. Foreign Currency. The Department conducts a significant portion of its operations overseas. Gains and losses from foreign currency transactions for five general fund appropriations (operation and maintenance, military personnel, military construction, family housing operation and maintenance, and family housing construction) are recognized and reported in the net cost statement. The gains or losses are computed as the variance between the exchange rate current at the date of payment and a budget rate established at the beginning of each fiscal year. Similar gains and losses for other appropriations are not recognized in the net cost statement. Instead, they are absorbed by budgetary transactions in which obligations are increased or decreased to reflect foreign currency fluctuations. Material disclosures are provided at Note 7.

I. Accounts Receivable. As presented in the balance sheet statement, accounts receivable includes accounts, claims, and refunds receivable from other entities. Allowances for uncollectable accounts are based upon analysis of collection experience by fund type. Material disclosures are provided at Note 4.

J. Loans Receivable. Loans are accounted for as receivables after funds have been disbursed. The amount of loans obligated but not disbursed are disclosed in Note 6. For loans obligated prior to October 1, 1991, loan principal, interest, and penalties receivable are reduced by an allowance for estimated uncollectible amounts. The allowance is estimated based on past experience, present market conditions, and an analysis of outstanding balances. For loans obligated on or after October 1, 1991, the loans receivable are reduced by an allowance equal to the present value of the subsidy

costs (due to the interest rate differential between the loans and U.S. Treasury borrowing, the estimated delinquencies and defaults net of recoveries, the offset from fees, and other estimated cash flows) associated with these loans.

K. Inventories and Related Property. Inventories, are reported at Latest Acquisition Cost (LAC). The LAC is determined by subtracting appropriate surcharges from the Standard Cost to arrive at the price most recently paid for a carried item. Gains and losses that result from valuation changes for inventory items are recognized and reported in the net cost statement and included in the calculation of the cost of goods sold. No gains or losses are recognized in the net cost statement as a result of changes in valuation for general fund operating supplies and materials. Such changes are reflected in the asset valuations and related invested capital as reported in the balance sheet statement. The related property portion of the amount reported includes operating materials and supplies, stockpile materials, seized property and forfeited property. Operating materials and supplies are valued at historical cost or an approximation of historical cost. Ammunition and munitions that are not held for sale are treated as operating materials and supplies. The consumption method of accounting for the recognition of expenses has been applied for operating materials and supplies, except where management determined that the purchases method is more appropriate as provided in SFFAS No. 3. Other material disclosures related to inventory and related property are provided at Note 8.

★L. Investments in U.S. Treasury Securities. Investments in U.S. Treasury securities are reported at cost, net of unamortized premiums or discounts. Premiums or discounts are amortized into interest income over the term of the investment using the effective interest rate method or other method if similar results are obtained. The reporting entity's intent is to hold investments to maturity, unless they are needed to finance claims or otherwise sustain operations. No provision is made for unrealized gains or losses on these securities because, in the majority of cases, they are held to maturity. Material disclosures are provided at Note 3.

★M. General Property, Plant and Equipment (PP&E).

1. The only type of PP&E that shall be reported on the FY 1999 Balance Sheet are General PP&E and Multi-use Heritage Assets. Information pertaining to National Defense PP&E, Heritage Assets and Stewardship Land must not be reported on the Balance Sheet. Rather, such information shall be reported in the Required Supplemental Stewardship Information. (See Chapter 11 of this Regulation for Stewardship Asset reporting requirements and instructions.)

2. The DoD Components shall include in Note 1.M. general information pertaining to the accounting principles and treatment for General PP&E. The following are examples of such general information that should be included in Note 1.M. Material disclosures are provided at Note 9.

★a. General PP&E is valued at historical acquisition cost plus capitalized improvements. General PP&E assets are capitalized when an asset has a useful life of two or more years, and when the acquisition cost equals or exceeds the DoD capitalization threshold of \$100,000. All General PP&E other than land, is depreciated on a straight-line basis unless the DoD Component has an exception to DoD policy, which, if applicable, should be disclosed. General PP&E land is not depreciated.

★b. If significant amounts of General PP&E are not valued at historical acquisition cost, the method used to value such assets should be disclosed. For example, if estimates have been used, DoD Components shall disclose how the

estimates were determined, such as the cost of similar assets at the time of acquisition or the current cost of similar assets discounted for inflation to the time of acquisition.

★c. Multi-use Heritage Assets are Heritage Assets that are used predominately for government operations (e.g., The Pentagon). Multi-use Heritage Assets are treated as General PP&E for reporting and accounting purposes. The acquisition costs of Multi-use Heritage Assets, and any capitalized improvements, are reported on the Balance Sheet and depreciated.

★d. For entities operating as business-type activities (Working Capital Funds (WCF), all PP&E use in its operation is categorized as General PP&E, whether or not it meets the definition of a Stewardship Asset. Heritage Assets not used in the operation of a WCF activity shall be reported on the Component's Heritage Asset Stewardship Report. Prior to FY 1996, General PP&E with an acquisition cost equal to or greater than \$15,000, \$25,000, and \$50,000 for FY 1993, FY 1994, and FY 1995, respectively, with an estimated useful life of two or more years, was capitalized. These remain capitalized and subject to depreciation for WCF activities even though General Fund activities wrote off previously capitalized assets in FY 1998 that did not meet the current DoD capitalization threshold of \$100,000.

N. Prepaid and Deferred Charges. Payments in advance of the receipt of goods and services are recorded as prepaid and deferred charges at the time of prepayment and reported as an asset on the Balance Sheet. Prepaid charges are recognized as expenditures and expenses when the related goods and services are received.

★O. Leases. Generally, lease payments are for the rental of equipment, space, and operating facilities and are classified as either capital or operating leases. When a lease is essentially equivalent to an installment purchase of property, (a capital lease), and the value equals or exceeds the current DoD capitalization threshold, the applicable asset and liability are recorded. The amount recorded is the present value of the rental and other lease payments during the lease term, excluding that portion of the payments representing executory costs paid to the lessor. Capital assets overseas are purchased with appropriated funds; however, title is retained by the host country. Leases that do not transfer substantially all of the benefits or risks of ownership are classified as operating leases and recorded as expenses during the period.

P. Other Assets. The Department conducts business with commercial contractors under two primary types of contracts-fixed price and cost. In order to alleviate the potential financial burden on the contractor that these long-term contracts can cause, the Department often times provides financing payments. One type of financing payment that the Department makes is based upon a percentage of completion. In accordance with SFFAS No. 1, these payments are reported as work in process and are not reported as advances or prepayments in the "Other Assets" line item. However, the Department has reported progress payments provided to contractors under the terms of fixed price contracts as an advance or prepayment in the "Other Assets line item. While our auditors do not agree with this presentation because SFFAS No. 1 does not address this type of financing payment, the Department treats these payments as advances because the Department becomes liable only after the contractor delivers the good in conformance with the contract terms. If the contractor does not deliver a satisfactory product, the Department is not obligated to reimburse the contractor for their costs and the contractor is liable to repay the Department for the full amounts of the advance.

Q. Contingencies.

1. At any given time, the Department may be subject to various legal and administrative actions and claims brought against it. These actions or claims primarily involve claims that may result from events such as aircraft, ship, and vehicle accidents, medical malpractice, property or environmental damages, and contract disputes.

★2. Most legal actions, other than contract claims, to which the Department may be a named party are covered by the provisions of the Federal Tort Claims Act and the provisions of Title 10, United States Code, Chapter 163, governing military claims.

★3. A liability is recognized for individual cases of pending, threatened, or potential litigation when it is extremely doubtful that the reporting entity will prevail, and the amount of loss can be reasonably estimated.

★4. Other contingencies are disclosed when conditions for liability recognition do not exist but there is at least a reasonable possibility that a loss or additional loss will be incurred.

★5. Material disclosures are provided in Note 13.

R. Accrued Leave. Civilian annual leave and military leave are accrued as earned and the accrued amounts are reduced as leave is taken. The balances for annual and military leave at the end of the FY reflect current pay rates for the leave that is earned but not taken. Sick and other types of nonvested leave are expensed as taken. Annual leave is accrued as it is earned and the accrual is reduced as leave is taken. Each year, the balance in the accrued annual leave account is adjusted to reflect current pay rates. To the extent appropriations are not available to fund annual leave earned but not taken, funding will be obtained from future financing sources.

S. Equity.

1. Equity consists of unexpended appropriations and cumulative result of operations. Unexpended appropriations represent amounts of authority which are unobligated and have not been rescinded or withdrawn, and amounts obligated but for which neither legal liabilities for payments have been incurred nor actual payments made.

2. Cumulative results of operations represents the difference since inception of an activity between expenses and losses, and financing sources including appropriations, revenue, and gains. Beginning with FY 1998, this included the cumulative amount of donations and transfers of assets in and out without reimbursement. In addition, there is no longer a segregation of cumulative amounts related to investments in capitalized assets, such as PP&E, or precredit reform loans, or a separate negative amount shown for future funding requirements. Cumulative results of operations for WCFs represents the excess of revenues over expenses since fund inception, less refunds to customers and returns to the U.S. Treasury.

T. Treaties for Use of Foreign Bases. The DoD Components have the use of land, buildings, and other facilities, which are located overseas and have been obtained through various international treaties and agreements negotiated by the Department of State. Generally, treaty terms allow the DoD Components continued use of these properties until the treaties expire. Capital investments in buildings and other facilities (for example, runways) located on the overseas bases are capitalized as stipulated in Note 1-M. These fixed assets are subject to loss in the event treaties are not

renewed or other agreements are not reached which allow for the continued use by the Department. Therefore, in the event treaties or other agreements are terminated whereby use of foreign bases is no longer allowed, losses will be recorded for the value of any nonretrievable capital assets after negotiations between the United States and the host country have been concluded to determine the amount to be paid the United States for such capital investments.

★U. Comparative Data. Comparative data is not required by OMB 97-01 until FY 2000 annual financial statements. Comparative data will be presented starting in FY 2000 in order to provide an understanding of changes in the financial position and operations of the Department's reporting activities.

★V. Undelivered Orders. The Department is obligated for goods and services which have been ordered but not yet received (undelivered orders) and thus do not represent a liability for payment.

1003 NOTE 2. FUND BALANCES WITH TREASURY★100301. Footnote Format.Note 2. Fund Balances with Treasury:

(\$ in Thousands)

1. Fund Balances:

Fund Type	Entity Assets	Non-Entity Assets	Total
a. Appropriated Funds	\$ xxx,xxx	\$ xxx,xxx	\$ xxx,xxx
b. Revolving Funds	xxx,xxx	xxx,xxx	xxx,xxx
c. Trust Funds	xxx,xxx	xxx,xxx	xxx,xxx
d. Other Fund Types	xxx,xxx	xxx,xxx	xxx,xxx
e. Total	<u>\$ xxx,xxx</u>	<u>\$ xxx,xxx</u>	<u>\$ xxx,xxx</u>

2. Fund Balance Per Treasury Versus Agency:

	Entity Assets	Non-Entity Assets
a. Fund Balance Per Treasury	\$ xxx,xxx	\$ xxx,xxx
b. Fund Balance Per [Reporting Entity]	xxx,xxx	xxx,xxx
c. Reconciling Amount	<u>\$ xxx,xxx</u>	<u>\$ xxx,xxx</u>

3. Explanation of Reconciliation Amount:

4. Other Information Related to Fund Balance With Treasury: _____

Figure 10-1

★100302. Instructions.

A. Entity Fund and Account Balances. Entity Fund Balance with Treasury represents the total of all obligated, but not yet disbursed, as well as all unobligated undisbursed account balances with the U.S. Treasury that are available for use by the Department, as reflected in the entity's records. Differences between this amount and the amount reported on Financial Management Service (FMS) Form 2108, "Year End Closing Statement" or submitted through Federal Agencies Centralized Trial Balance II (FACTS II) must be computed in Part B. and explained in Part C. The Fund Balance With Treasury line does not include any amounts for which The Department of the Treasury is willing to accept corrections to cancelled appropriation accounts, in accordance with SFFAS Number 1. The total amount reported shall include amounts for appropriations with extended obligation authority (e.g., Shipbuilding and Conversion). In Part A. disclose by fund type the entity assets and nonentity assets. Compute and provide totals by fund type in the Total column. The total amount reported in the column entitled "Entity Assets" should agree with line 1.A.1. of the Entity's balance sheet. In addition, if

any of the individual balances included in the “Other Fund Types” line 1.d. of the note are material, list them separately. Material balances are line item components that comprise more than 10 percent of line 1.d. “Other Fund Types.”

★B. Non-Entity Fund and Account Balance. The total amount reported in this note, part A, column entitled “Non-Entity Assets” should agree with line 2.A.1. of the balance sheet. Included are balances in deposit, receipt, suspense, clearing and related nonspending accounts, such as for collections pending litigation, awaiting determination of the proper accounting disposition, or being held by the entity in the capacity of a banker or agent for others, not available to finance the entity’s activities. If any component included in the “Other Fund Types” line 1.d. of the note are material, list them separately. Material balances are line item components that represent more than 10 percent of line 1.d. “Other Fund Types.”

★C. Reconciliation of Reporting Entity Fund Balance With Treasury Amount and Treasury FMS Balances. Instructions for parts 2. and 3. of note 2. Insert the Fund Balance With Treasury amount, from the U. S. Treasury on the “Fund Balance Per Treasury” line of Note 2. Part 2. Insert the Fund Balance With Treasury amount reported in the reporting entity general ledger account, at appropriation level on “Fund Balance Per [Reporting Entity]” line in Part 2. The amount reported as entity assets on line 2.b. of Note 2. should equal the amount of entity assets reported on line 1.e. of Note 2. The amount reported as nonentity assets on line 2.b. of Note 2. should equal the amount of nonentity assets reported on line 1.e. of Note 2. In addition, all amounts should agree with the reporting entity’s Fund Balance amount in the general ledger account. Compute any difference and report on the “Reconciling Amount” line of note. Explain the cause of any reconciling amount in Part 3. of the note between the amount of fund balance with Treasury in the entity’s records and the corresponding account balances reported on the Treasury’s end of period (post closing) balances in the FMS Form 2108 or FACTS II. Discrepancies due to time lag should be reconciled and discrepancies due to error should be corrected when financial reports are prepared.

★D. Other Information Related to Fund Balance With Treasury. Provide other information, in Part 4. of the note, necessary for understanding the nature of fund balances. At a minimum, reporting entities should disclose information on (1) amounts of unused funds in expired appropriations that are returned to Treasury, (2) amounts of funds categorized as obligated but not yet disbursed, and (3) amounts categorized as unobligated.

Figure 10-2

★100402. Instructions. Columns 1 through 4 are for disclosing amounts to be recognized on the balance sheet. Column 4 equals column 1 plus column 3, column 5 includes any reduction in value that is more than temporary and other adjustments, and column 6 equals column 4 plus column 5. Securities are normally recognized at cost or amortized cost on the Balance Sheet. However, market value is used for Balance Sheet purposes (except for pension and other retirement plans) when (a) there is intent to sell the securities prior to maturity, and (b) there is a reduction in value that is more than temporary. Column 6 is to be used to disclose the market value of all marketable securities and all nonmarketable market-based securities.

★A. Intragovernmental Securities. Investments are comprised of marketable and non-marketable securities.

1. Non-Marketable Securities. Non-Marketable par value Intragovernmental Treasury Securities are issued by the Bureau of the Public Debt to federal accounts and are purchased and redeemed at par exclusively through Treasury's Finance and Funding Branch. Non-Marketable Market-Based Treasury Securities are not traded on any securities exchange but mirror the prices of marketable securities with similar terms. All investments maintained by DFAS-HQ/ASRA are Non-Marketable Market-Based Treasury Securities (e.g., DoD Education Benefits Fund). The total net investment (column 4) in federal securities should agree with the amount reported on line 1.A.2. of the balance sheet.

2. Accrued Interest. The amount recorded as accrued interest represents the amount of interest accrued on investment securities but not received as of the date of the statement.

B. Other Securities. Any components of line 2.b. Note 3. that represents more than 10 percent of the value of the line should be separately disclosed.

C. Total. The sum of intergovernmental and other investments.

D. Other Information. Disclose other information relative to understanding the nature of reported investments or the "Other Adjustments" column such as permanent impairments.

Figure 10-3

★100502. Instructions. Present, the gross receivables, the allowance for estimated uncollectibles (with the public), the method used to estimate the allowance, and the net amount due as further explained in the following instructions. Do not include receivables related to direct or guaranteed loans, which are reported in Note 6.

A. Entity Receivables. These receivables arise from transactions among federal entities and from transactions of the federal government or an entity of the federal government with nonfederal entities. These receivables, when collected, can be used in the reporting entity's operations. Receivables a federal entity is authorized by law to include in its obligational authority or to offset its expenditures and liabilities upon collection are "Entity Receivables" and should be reported separately from "Non-Entity Receivables."

★1. Intragovernmental. Intragovernmental entity receivables are claims of a federal entity against other federal entities. Column 3 for this line must equal line 1.A.3. of

the balance sheet statement. No allowance for uncollectible accounts shall be reported for intragovernmental receivables.

★2. With the Public. Entity receivables with the public are claims of the federal government or an entity within the federal government against nonfederal entities. The term “nonfederal entities” encompasses domestic and foreign persons and organizations outside the U.S. Government. Net amount due for this line must equal line 1.B. of the balance sheet statement.

B. Non-Entity Receivables. These receivables arise from transactions among federal entities and from transactions of the federal government or an entity of the federal government with nonfederal entities. These receivables, when collected, cannot be used in the reporting entity’s operations and must be deposited or transferred to another account or fund.

★1. Intragovernmental. Intragovernmental nonentity receivables are claims of a federal entity against other federal entities. Column 3 for this line must equal line 2.A.2. of the balance sheet statement. No allowance for uncollectible accounts shall be reported for intragovernmental receivables.

★2. With the Public. Nonentity receivables with the public are claims of the federal government or an entity within the federal government against nonfederal entities. The term “nonfederal entities” encompasses domestic and foreign persons and organizations outside the U.S. Government. Net amount due must equal line 2.B. of the balance sheet statement.

★3. Other Receivables – Line 2.a.2. and Line 2.b.2. If any of the components of “Other Receivables” represents more than 10 percent of the value of the line, those components should be separately disclosed.

C. Allowance Method Used. Disclose the method(s) of calculating the allowance for estimated uncollectibles.

D. Other Information. Disclose any other information relative to Accounts Receivable, including but not limited to, the amount of interest accrued on uncollectible accounts receivable that have not been officially waived or the associated debt written off.

★1006 NOTE 5. OTHER ASSETS★100601. Footnote Format.

Figure 10-4

100602. Instructions.

★A. Other Entity Assets. List and describe each major category of intragovernmental and other assets not included on other lines on the statement. If any of the components of “Other Entity Assets,” either intragovernmental or with the public, represents more than 10 percent of the value of line, those components should be separately disclosed. The total of “Other Entity Assets-Intragovernmental” should agree with the amount reported on line 1.A.4. of the balance sheet statement. The total of “Other Assets” should agree with line 1.G. on the statement.

B. Other Information. Provide other relative information needed to understand the nature other entity assets. The Department will report financing payments for fixed price contracts as advances and prepayments on line A.2.a. as “Outstanding Contract Financing Payments.” At a minimum include the following language on the “Other Information” line for entity assets: “The Department has reported financing payments for fixed price contracts as an advance and prepayment, because under the terms of the fixed price contracts, the Department becomes liable only after the contractor delivers the goods in conformance with the contract terms. If the contractor does not deliver a satisfactory product, the Department is not obligated to reimburse the contractor for their costs and the contractor is liable to repay the Department for the full amount of the advance. The auditors disagree with the Department’s application of the accounting standard pertaining to advances and prepayments because SFFAS No. 1 does not address this type of financing payment.”

★C. Other Non-Entity Assets. List and describe each major category of intragovernmental and other nonentity assets not included on other lines on the statement. If any of the components of “Other Non-Entity Assets,” either intragovernmental or with the public, represents more than 10 percent of the value of the line, those components should be separately disclosed. The total of Other Non-Entity Assets Intragovernmental should agree with the amount reported on line 2.A.3. of the balance sheet. The total of Other Non-Entity Assets should agree with the amount reported on line 2.D. of the statement.

D. Other Information. Provide other information relative to other nonentity assets needed to understand the nature other nonentity assets.

★1007 NOTE 6. LOANS RECEIVABLE AND RELATED FORECLOSED PROPERTY, NET. If applicable, use the following note disclosure. Some examples of DoD direct loans or loan guarantees are Navy Ship Vessel Transfer Account and Family Housing Improvement Fund.

100701. A. Footnote Format.

Figure 10-5 (Cont.)

100702. Instructions.A. Identity.

1. Enter the names of the direct loan and loan guarantee programs operated by the reporting entity. The Federal Credit Reform Act of 1990 divides direct loans and loan guarantees into two groups: (a) Pre-1992 means the direct loan obligations or loan guarantee commitments made prior to FY 1992 and the resulting direct loans or loan guarantees, and (b) Post-1991 means the direct loan obligations or loan guarantee commitments made after FY 1991 and the resulting direct loans or loan guarantees. The definitions and explanations of terms and concepts in these instructions can be supplemented by referring to the Office of Management and Budget (OMB) Circular A-34, Section 12, and OMB Circular A-11, Section 33.

2. Section 506(a)(1) of the Federal Credit Reform Act exempts the credit activities of certain agencies, such as Federal Depositors Insurance Corporation and Tennessee Valley Authority. These agencies can report in accordance with other requirements.

3. Agencies should disclose that direct loan obligations and loan guarantee commitments made after FY 1991, and the resulting direct loans or loan guarantees, are governed by the Federal Credit Reform Act of 1990. The Act provides that the present value of the subsidy costs (which arises from interest rate differentials, interest subsidies, delinquencies and defaults, fee offsets, and other cash flows) associated with direct loans and loan guarantees be recognized as a cost in the year the direct or guaranteed loan is disbursed. Direct loans are

reported net of an allowance for subsidy at present value, and loan guarantee liabilities are reported at present value.

4. Agencies should also disclose whether pre-1992 direct loans and loan guarantees are reported on a present value basis or are reported under the allowance for loss method. (Under the allowance for loss method, the nominal amount of the direct loans is reduced by an allowance for uncollectible amounts, and the liability for loan guarantees is the amount the agency estimates will more likely than not require a future cash outflow to pay default claims; under the present value method, the nominal amount of direct loans is reduced by an allowance equal to the difference between the nominal amount and the present value of the expected net cash flows from the loans, and the liability for loan guarantees is the present value of expected net cash outflows due to the loan guarantees.) Depending on the reporting method selected by management for pre-1992 direct loans and loan guarantees, agencies should choose the appropriate format from the alternatives shown in sections B, D, and G, above. (Note: Agencies should follow either the net present value method or the allowance for loss method but not both. They may not change from one method to the other without the advance approval of OMB.)

5. Agencies should disclose that their loans receivable, net, or their value of assets related to direct loans, is not the same as the proceeds that they would expect to receive from selling their loans. When the reporting entity has made payments on behalf of borrowers which should be collected from the borrowers, the resulting receivables shall be reported in the same column as loans receivable for either direct loans or defaulted guaranteed loans. Receivables related to administrative costs of operating these programs shall be reported as accounts receivable in Note 5. and not as credit program receivables in this note.

B. Direct Loans Obligated Prior to FY 1992. For each program with pre-1992 Direct Loans, report Loans Receivable Gross and Interest Receivable in columns 2 and 3 respectively. If the present value method is used, report in column 4 the estimated net realizable value of related foreclosed property and report in column 5 the present value allowance. The sum of columns 2 through 4 less column 5 is reported as Loans Receivable, Net (column 6). If the allowance for loss method is used, report in column 4 the allowance for loan losses and in column 5, the estimated net realizable value of related foreclosed property. The sum of columns 2, 3, and 5 less column 4 is reported as Loans Receivable, Net (column 6).

C. Direct Loans Obligated After FY 1991.

1. For each program with post-1991 Direct Loans, report Loans Receivable, Gross, Interest Receivable and the estimated net realizable value of related foreclosed property in columns 2, 3, and 4, respectively.

2. Foreclosed property associated with post-1991 direct and acquired defaulted guaranteed loans shall be valued at the net present value of the projected cash flows associated with the property. To practicably accomplish this requirement, foreclosed property may be recorded at the estimated net realizable value at the time of foreclosure. A portion of the

related allowance for subsidy account should apply to the foreclosed property, but that amount need not be separately determined. Rather, the allowance account is subtracted from the sum of the credit program assets to determine the net present value of the assets. For guidance in recording transactions related to foreclosures, see Treasury's case 5B, Accounting for Collateral and Escrow Transactions for a Loan Guarantee Program Under the Credit Reform Act of 1990 (Present Value Reporting Approach), dated August 24, 1993.

3. Report the related allowance for subsidy cost in column 5. Report the sum of columns 2 through 4 less column 5 as the Value of Assets Related to Direct Loans (column 6).

D. Defaulted Guaranteed Loans from Pre-1992 Guarantees. For each program with pre-1992 Loan Guarantees, report gross receivables from defaulted guaranteed loans assumed for direct collection in column 2 and the related interest receivable in column 3. If the present value method is used, report the estimated net realizable value of related foreclosed property in column 4, and the present value allowance in column 5. The sum of columns 2 through 4 less column 5 is reported as Defaulted Guaranteed Loans Receivable, Net (column 6). If the allowance for loss method is used, report the allowance for loan losses in column 4 and the estimated net realizable value of related foreclosed property in column 5. The sum of columns 2, 3 and 5 less column 4 is reported as Defaulted Guaranteed Loans Receivable, Net (column 6).

E. Defaulted Guaranteed Loans for Post-1991 Guarantees. For each program with post-1991 Loan Guarantees, report gross receivables from defaulted guaranteed loans assumed for direct collection, related interest receivable, and the estimated net realizable value of related foreclosed property in columns 2, 3, and 4, respectively. Report the related allowance for subsidy cost in column 5. Report the sum of columns 2 through 4 less column 5 as the Value of Assets Related to Defaulted Guaranteed Loans Receivable (column 6). For foreclosed property, see the instructions for section C. The sum of the amounts reported in column 6 of sections B, C, D, and E shall equal the amount reported on the Balance Sheet as credit program receivables and related foreclosed property, net.

F. Guaranteed Loans Outstanding. For each loan guarantee program, report in column 2 the outstanding principal of guaranteed loans at face value. In column 3, report the amount of this outstanding principal that is guaranteed.

G. Liability for Loan Guarantees. For each program with pre-1992 loan guarantees, report in column 2 the liability for losses. If the present value method is used to calculate the liability, report in column 2 the present value of liabilities for losses on pre-1992 guarantees. If the estimated future default claims method is used, report in column 2 the estimated future default claims. For each program with post-1991 loan guarantees, report in column 3 the present value of the estimated net cash flows (outflows less inflows) to be paid by the entity as a result of the loan guarantees. Report the total of columns 2 and 3 as total liabilities for loan guarantees (column 4).

H. Subsidy Expense for Post-1991 Direct Loans. Report the direct loan subsidy expense, consisting of the following, at present value, as follows:

1. Current Year's Direct Loans. In column 2, the present value of the amount of the subsidy expense attributable to the interest rate differential between the interest rate to be collected from the borrowers and the interest rate to be paid on funds borrowed to finance the loans; in column 3, the present value of the estimated delinquencies and defaults (net of recoveries); in column 4, the present value of the estimated fees collected (offsetting expense); in column 5, the present value of other cash flows, including prepayments and proceeds of loan asset sales; and in column 6, the total of columns 2 through 5.

2. Direct Loan Modifications and Reestimates. In column 2, the subsidy cost of modifications of direct loans previously disbursed (whether pre-1992 or post-1991); and in column 3, reestimates of the subsidy cost of direct loans previously disbursed.

3. Total Direct Loan Subsidy Expense. The total subsidy expense for current year's direct loans, modifications, and reestimates.

I. Subsidy Expense for Post-1991 Loan Guarantees.

Loan Guarantees. Report the loan guarantee subsidy expense consisting of the following present values:

1. Current Year's Loan Guarantees. In column 2, the present value of the estimated payments for delinquencies and defaults on loan guarantees (net of recoveries); in column 3, the present value of the estimated fees collected (offsetting expense); in column 4, the present value of the amount of the interest supplement; in column 5, the present value of other cash flows; and in column 6, the total of columns 2 through 5.

★2. Loan Guarantee Modification and Reestimates. In column 2, the subsidy cost of modifications of loan guarantees previously made (whether pre-1992 or post-1991); in column 3, the reestimates of the subsidy cost of loan guarantees previously made.

★3. Total Loan Guarantee Subsidy Expense. The total subsidy expense for current year's loan guarantees, modifications, and re-estimates.

J. Administrative Expense. Report the portions of salaries and other administrative expenses that have been accounted for in support of the direct loan programs and loan guarantee programs. Report the expenses for the individual programs, if material.

K. Other Information.

1. Provide other information related to direct loan and loan guarantee programs, as appropriate, including any commitments to guarantee, management's method for

accruing interest revenue and recording interest receivable, and management's policy for accruing interest on nonperforming loans.

★2. If modifications were made, explain the nature of the modifications, the discount rate used in calculating the expense, and the basis for recognizing a gain or loss related to the modification. Also, if appropriate, disclose that the subsidy expense resulting from reestimates that is included in the financial statements is not reported in the budget until the following year.

3. With respect to the foreclosed property reported in sections B, C, D, and E, the following information should be disclosed: changes from prior year's accounting methods, if any; restrictions on the use/disposal of the property; number of properties held and average holding period by type or category; and number of properties for which foreclosure proceedings are in process at the end of the period.

1008 NOTE 7. CASH AND OTHER MONETARY ASSETS

100801. Footnote Format.

<u>Note 7. Cash and Other Monetary Assets:</u> (\$ in Thousands)		
	Entity Assets	Non-Entity Assets

5. Other Information:		

Figure 10-6

100802. Instructions.

A. Cash. The total of cash resources under the control of the reporting entity, which includes coin, paper currency, purchased foreign currency, negotiable instruments, and amounts on deposit in banks and other financial institutions. Cash available for agency use should include petty cash funds and other revolving funds, which will not be transferred into the general fund.

B. Foreign Currency. The total U.S. dollar equivalent of nonpurchased foreign currencies held in foreign currency fund accounts.

C. Other Monetary Assets. This amount represents other items including gold, special drawing rights, and U.S. Reserves in the International Monetary Fund. Any component of the "Other Monetary Assets" line that represents more than 10 percent of the total value that line shall be separately disclosed.

★D. Total Cash, Foreign Currency, and Other Monetary Assets. Entity cash equals line 1.D. of the balance sheet statement. Nonentity cash equals line 2.C. of the balance sheet statement.

E. Other Information. Disclose the value of Disbursing Officers (DO) cash included in nonentity assets. Disclose in "Other Information" any restricted cash. Restricted

cash includes holdings, which have not been transferred into the general fund as of the report date, which are unavailable for agency use (Non-Entity Cash). Restricted cash also includes cash held in escrow to pay property taxes and insurance for defaulted guaranteed loans. Disclose any restrictions on the use or conversions of cash denominated in foreign currencies; and the significant effects, if any, of exchange rate changes on the entity's financial position that occur after the end of the reporting period but before the issuance of financial statements. Disclose other information, as appropriate, such as the valuation rate for gold.

★1009 NOTE 8. INVENTORY AND RELATED PROPERTY, NET

★100901. Note 8. Summary of Inventory and Other Related Property, Net. Summary of the total amounts of inventories and other related property schedules in Note 8. (A.through F.). The summary total should agree with line 1.E. on the balance sheet statement.

3. Other Information:				
Legend: Valuation Methods				
LAC = Latest Acquisition Cost	NRV = Net Realizable Value			
SP = Standard Price	O = Other			
AC = Actual Cost				

Figure 10-8

★B. Instructions.

★1. Valuation. For each category of inventory, disclose the reported value (column 1), the allowance for gains/losses on inventory, if any (column 2), the net book value of the inventory (column 1 plus column 2), and the method used to value the inventory (column 4). The amounts identified in column 2, Allowance for Gains (Losses) in inventory represents the adjustment to the recorded value in column 1 that is required to arrive at historical cost (column 3). Use the following keys for column 4 as follows: LAC = Latest Acquisition Cost, SP = Standard Price, AC = Actual Cost, NRV = Net Realizable Value, or O = Other.

★2. Restrictions. Describe any restrictions on the use, sale or disposition of inventory. Disclose any restrictions on disposition of inventory as related to environmental or other liabilities.

★3. Inventory Held in Reserve for Future Sale. Inventory Held in Reserve for Future Sale consists of stocks maintained because they are not readily available in the market or because there is more than a remote chance they eventually will be needed. In the DoD these are principal and secondary items in inventory, except for ammunition, that are stratified in logistic reports as Economic Retention Stock and Contingency Retention Stock. Integrated Material Managers may retain stock up to the sum of the Approved Acquisition Objective, Economic Retention Stock, and Contingency Retention Stock. Economic Retention Stock is stock above the Approved Acquisition Objective that is more economical to retain than to dispose of. The methodology recommended by the DoD Materiel Management Regulation to set the maximum Economic Retention Stock level for an item is one based on an economic analysis that balances the costs of retention and the costs of disposal. Factors suggested for consideration by the DoD Components in an economic analysis of retaining item stocks are the potential long term demand for the item; potential repurchase costs; and, for items essential to the operation of a weapon system, the expected life of the system and the number of systems in use. Contingency Retention Stock is stock above the Approved Acquisition Objective and above the Economic Retention Stock level, if one exists, that is held to support specific contingencies. The DoD Components identify Contingency Retention Stock according to these categories: (1) Military contingency: Assets needed to meet military contingencies for U.S. Forces; (2) Potential security assistance: Assets held in expectation of foreign military demand under U.S. security assistance; (3) General contingency: Assets based on potential usefulness, for extreme procurement problems, or other special considerations involving nonmilitary contingencies, such as civil emergencies or natural disaster relief.

★4. Other Information. Disclose on line 3. "Other Information:" the general composition of inventory and the basis for determining inventory values, including any cost flow assumptions. Disclose changes from the prior year's accounting method, if any. The decision criteria for identifying the category to which inventory is assigned and changes in the criteria for identifying the category to which inventory is assigned. Disclose other required information relative to inventory not disclosed in Parts 1. or 2. of Note 8.A. In addition, disclose any amount included in inventory work in process that represents work in process at depot maintenance activities. The work in process at depot maintenance activities had to be recorded as Inventory work in process because the U.S. Government Standard General Ledger (USGSGL) does not contain an account for work in process that is not inventory. Due to this classification obstacle, include the following language in the other information section: "The amount reported as inventory work in process includes work in process at the depot maintenance activities. The work in process at the depot maintenance activities had to be recorded as inventory work in process because the U.S. Government Standard General Ledger does not contain an account for work in process that is not inventory."

3. Other Information:				
Legend: Valuation Methods				
LAC = Latest Acquisition Cost		NRV = Net Realizable Value		
SP = Standard Price		O = Other		
AC = Actual Cost				

Figure 10-9

B. Instructions.

★1. Valuation. For each category of OM&S, disclose the reported value (column 1), the allowance for gains (losses) on OM&S, if any (column 2), the net book value of OM&S (column 1 plus column 2), and the method used to value OM&S (column 4). The amounts identified in column 2 allowance for gains and losses in OM&S represents the adjustment to the recorded value in column 1 that is required to arrive at historical cost (column 3). Use the following keys for column 4 as follows: LAC = Latest Acquisition Cost, SP = Standard Price, AC = Actual Cost, NRV = Net Realizable Value, or O = Other.

2. Restrictions. Describe any restrictions on the use, sale or disposition of OM&S.

3. Other Information. Disclose on line 3. "Other Information:" the general composition of operating materials and supplies and the basis for determining operating materials and supplies values, including the valuation method and any cost flow assumptions. The decision criteria for identifying the category to which operating materials and supplies are assigned and changes in the criteria for identifying the category to which operating materials are

assigned. Disclose other information relative to OM&S not disclosed in Parts 1. or 2. of Note 8.B. Under other information, disclose the value of ammunition, munitions, and war reserves that are treated as OM&S. Also, disclose the method of accounting for the recognition of expenses that was applied for operating materials and supplies. In addition, disclose any amount of work in process at depot maintenance activities that was included as inventory work in process because the USGSGL does not contain an account for work in process that is not inventory. Due to this classification obstacle, include the following language in the other information section: "Work in process at depot maintenance activities is included as inventory work in process in Note 8A because the U.S. Government Standard General Ledger does not contain an account for work in process that is not inventory."

2. Other Information: _____					
1. See Figure 10-12 and Note 13 part 5 for additional information on Capital Leases					

Figure 10-11

★101002. Instructions. Report the following information for each major class of General PP&E (rows a – g above):

★A. Column 1. Report the depreciation/amortization method used: SL = Straight Line or O = Other. Explain in the note to the principal statements any other depreciation/amortization method used. See Under Secretary of Defense (Comptroller) (USD(C)) memorandum, dated October 22, 1998, subject “Revised Policy for the Depreciation of DoD General Property, Plant, and Equipment Assets” for additional guidance on the exception to the straight line method of depreciation allowed for DWCF activities.

★B. Column 2. Report the range of service useful lives by Major Asset Class. (e.g., 5 or 10 years, or 20 or 40 years) based on the DoD Standard Recovery Periods.

★C. Column 3. Report acquisition costs by Major Asset Class.

★1. For assets under capital lease, report the lesser of the present value (using either the lessor's implicit rate or the Treasury borrowing rate) of the rental or other lease payments during the lease term, excluding that portion of the payments representing executory costs paid to the lessor, or the fair value. Capital lease amounts reported must be identified as "Covered by Budgetary Resources" and "Not Covered by Budgetary Resources."

★2. For the Other major asset class, separately disclose any material amounts. Material is defined as any component of Other that represents more than 10 percent of the value of the line.

★D. Column 4. Report the accumulated depreciation/amortization, including the current reporting period depreciation, by Major Asset Class.

★E. Column 5. Report the net book value of each Major Asset Class, (acquisition cost less accumulated depreciation/amortization) column 3 plus column 4. The computation is a plus given that accumulated depreciation/amortization is usually a credit (negative) balance. The total of this column shall agree with the amounts on line 1.F. of the Balance Sheet.

★F. "Other Information." The DoD Components shall not supplement their General PP&E information with values from the Contract Property Management System (CPMS)(SF 1662) data base. Rather, the DoD Components shall include the following statement verbatim in the Other Information section of Note 9, General PP&E:

The value of DoD (replace DoD with Army, Navy or Air Force, as applicable) General Property, Plant and Equipment (GPP&E) real property in the possession of contractors is included in the values reported above for the Major Classes of Land and Structures, Facilities, and Leasehold Improvements. The value of GPP&E personal property (Major Classes of ADP Software and Equipment) in the possession of contractors is not included in the values reported above. The Department of Defense presently is reviewing its process for reporting these amounts in an effort to determine the best method to annually collect this information. However, preliminary results of the Department's review have indicated that the value of non-fully depreciated GPP&E personal property in the possession of contractors that would be reported on the DoD (replace DoD with Army, Navy or Air Force, as applicable) financial statements is immaterial in relation to the Department's total assets.

In addition disclose on line 2 information relative to Component General PP&E, such as the nature and extent of significant amounts of assets that are reported at zero or nominal value, restrictions on the use or convertibility of General PP&E (i.e., Outside the Continental United States (OCONUS) real property), capitalization threshold, and adjustments resulting from changes in accounting standards. If the acquisition cost is unknown for certain types or significant amounts of General PP&E, the DoD Components must disclose the valuation method used. The Department has major efforts underway to value its general PP&E. If these efforts are completed and result in either (1) the validation of the recorded costs, (2) adjustments to the recorded costs, or (3) a statistically derived total cost amount, such results shall be disclosed in sufficient detail to provide an understanding of the method used to determine the amounts reported. However, if the efforts are not completed in time to report the General PP&E cost

amounts in FY 1999, the applicable DoD Component(s) shall disclose that such efforts are ongoing and should be completed for FY 2000 reporting and are expected to result in reasonably accurate property amounts.

Figure 10-15 (cont.)

★101302 Instructions.

★A. Intragovernmental Versus Public. Environmental cleanup costs shall be reported as intragovernmental if it is known that the reporting entity will be billed by another federal entity for the cost of the clean up. If it is not known at the balance sheet date who will conduct the clean up or if the reporting entity will be billed by a contractor, then the environmental cleanup costs shall be classified as public.

★B. Accrued Restoration Costs. Accrued restoration (cleanup) liabilities represent the cost to correct environmental problems that were created in the past. These liabilities relate to PP&E, including acquired land, and Stewardship Land, as those major asset

categories are described in Chapter 6 of Volume 4 of this Regulation. Environmental restoration activities may be conducted at operating installations, base realignment, and closure (BRAC) installations, or at formerly used defense sites, in accordance with applicable statutes and implementing regulations. Environmental restoration measurements involve the use of cost estimates that consider, on a current cost basis, the anticipated costs of the level of effort required to affect the restoration, as well as, applicable legal and/or regulatory requirements. Such cost estimates should be based on the current technology available. Site inventory and estimated cost data prepared for the Defense Environmental Restoration Program Report to Congress shall be used by the DoD Components as the baseline for environmental restoration (cleanup) liability measurement (e.g., the current cost to acquire the required services). Refer to Section G of the document titled, "Management Guidance for the Defense Environmental Restoration Program," and "Accrued Environmental Restoration (Cleanup) Liabilities," Chapter 14 of Volume 4 of this Regulation, (located at the following Internet address: http://www.dtic.mil/comptroller/fmr/04/04_14.pdf) for further guidance. The estimated liability may be a specific amount or a range of amounts. If some amount within the range is considered a better estimate than any other estimate, that amount should be used. If no amount within a range is considered a better estimate than the other estimates, then the minimum amount in the range should be used, and the range disclosed. Current and noncurrent amounts reported must be identified as "Covered by Budgetary Resources" and "Not Covered by Budgetary Resources."

★C. Other Environmental Liabilities. Other environmental liabilities relate to the final disposition of property, structures, equipment, munitions, and weapons. It also includes the preservation and management of training ranges at active installations. Any component of the other environmental liabilities line that represents more than 10 percent of the value of the line shall be separately disclosed. Disposal measurements involve the use of cost estimates that consider, on a current cost basis, the anticipated level of effort required to dispose of the item, as well as the cost of complying with associated legal and/or regulatory requirements. Such cost estimates should be based on the current disposal or reuse technologies available. Cost estimates prepared in accordance with the guidance in Chapter 13 of Volume 4 of this Regulation, "Accrued Environmental and Nonenvironmental Disposal Cost Liabilities," (located at the following Internet address: http://www.dtic.mil/comptroller/fmr/04/04_13.pdf) shall be used by the DoD Components as the baseline for other environmental liability measurement. The estimated liability may be a specific amount or a range of amounts. If some amount within a range is considered a better estimate than any other estimate, that amount should be used for liability recognition. If no amount within a range is considered a better estimate than the other estimates, then the minimum amount in the range should be used, and the range disclosed. Current and noncurrent amounts reported must be identified as "Covered by Budgetary Resources" and "Not Covered by Budgetary Resources."

★D. Disclosure Requirements. Disclose environmental cleanup cost information in accordance with SFFAS No. 5 and SFFAS No. 6. Include the: (1) sources of cleanup requirements; (2) method for assigning estimated total cleanup costs to current operating periods; (3) unrecognized portion of estimated total cleanup cost associated with general PP&E; (4) material changes in total estimated cleanup costs due to changes in laws, technology, or plans, and the portion of the change in estimate that relates to prior period operations; and (5) nature of

estimates and the disclosure of information regarding possible changes due to inflation, deflation, technology, or applicable laws and regulations. Include all environmental liabilities not included elsewhere on the statement. Provide other information necessary for understanding Environmental cleanup liabilities.

★E. Definitions. While some categories of Other Environmental Liabilities in Note 12 are self-explanatory (nuclear powered aircraft carriers, submarines, and other ships), the definitions below are provided for clarity and consistency of reporting:

1. Other National Defense Weapon Systems. Includes other National Defense weapons systems disposal liabilities associated with hazardous materials that are not otherwise appropriately categorized in a Note 12 line item. This includes environmental liabilities associated with other National Defense weapons systems items reported in the Required Supplementary Stewardship Information. Include in the narrative disclosure, information on the components and amounts that are included in this Other National Defense Weapon System line item. Any component of this line that represents more than 10 percent of the total of the line shall be separately disclosed. The definition of a weapon system is a combination of one or more weapons with all related equipment, materials, services, personnel and means of delivery and deployment (if applicable) required for self-sufficiency.

2. Chemical Weapons Disposal. Includes types of weapons, the filler of which is primarily a chemical agent. The Army, as executive agent for the disposal of chemical weapons will compile this liability amount and provide the information for reporting in the DoD agency-wide financial statement as part of the Treasury Index Other Defense Organizations General Funds.

3. Conventional Munitions Disposal. Includes weapons which are neither nuclear, biological, nor chemical.

4. Other Asset Disposal. Includes all other environmental liabilities not otherwise applicable to the categories identified in Note 12. However, this category requires disclosure in a narrative format to Note 12 which specifically identifies both a description of similar groups of items included and the liability amount for each grouping. In addition, if any component of this line represents more than 10 percent of the balance of the line, that component shall be separately disclosed.

4. Other Information: _____			

Figure 10-16 (cont.)

101402. Instructions.

★A. Other Liabilities Covered by Budgetary Resources. Include all other liabilities not included elsewhere on the statement. Separately report other liabilities covered by budgetary resources and those not covered by budgetary resources, and separately disclose the current portion of other liabilities covered by budgetary resources. Sections 1 and 2 of Note 13 will be used to disclose “Other Liabilities Covered by Budgetary Resources.” The total amount disclosed as “Other Liabilities Covered by Budgetary Resources” should equal the total of lines 4.A.4. and 4.E. of the balance sheet. Provide other information necessary for understanding other liabilities.

★1. Contingent Liabilities Included on Balance Sheet. Contingent Liabilities are reported on the Other Liabilities line if all of the following conditions are met: (1) a past event or exchange transaction has occurred, (2) a future outflow or other sacrifice of resources is probable, and (3) the future outflow or sacrifice of resources is measurable.

a. Report the dollar amount of the probable loss.

b. If a specific dollar amount of the loss is not known, but a range of amounts is known, then report the low end of the range and disclose the range on line 2.

★2. Information Disclosed and Not Included on the Balance Sheet. A contingent liability should be disclosed if one or two of the conditions for liability recognition identified in paragraph 101402.B.1. above are met and there is at least a reasonable possibility that a loss or an additional loss may have been incurred. These liabilities may involve individual or aggregated cases of pending, threatened, or potential litigation.

a. Disclose specific amounts or ranges of losses that are reasonably possible.

b. Disclose the fact that an amount or range of amounts cannot be determined. In addition, the entity should disclose the nature of the contingency and an estimate of the obligations related to canceled appropriations for which the reporting entity has a contractual commitment for payment.

★3. Temporary Early Retirement Authority. Report the amount of temporary early retirement liability that has been incurred. In Column 1 identify the amount to be paid during the year following the reporting FY. In the noncurrent column report the balance.

★4. Other Information. Provide other information relevant to other liabilities that is not disclosed in the above categories.

★B. Other Liabilities Not Covered by Budgetary Resources. Include all other liabilities not included elsewhere on the statement. Separately disclose the current portion of other liabilities not covered by budgetary resources. Sections 3 and 4 will be used to disclose “Other Liabilities Not Covered by Budgetary Resources.” The total amount disclosed as “Other Liabilities Not Covered by Budgetary Resources” should equal the total of lines 5.A.4. and 5.E. of the balance sheet. Provide other information necessary for understanding other liabilities.

★1. Other Actuarial Liabilities. Includes actuarial liabilities not addressed on lines 4.C. and 5.C. of the Balance Sheet. Any component of the Other Actuarial Liability that represents more than 10 percent of the value of the line shall be separately disclosed.

★2. Judgement Fund Liabilities. Relates to the Department’s reimbursement to the Judgement Fund for claims paid by the Judgement Fund related to DoD.

★3. Workman’s Compensation Reimbursement. Related to the Department’s reimbursement to the Department of Labor for estimated actuarial liabilities for future workers’ compensation benefits.

★4. Contingent Liabilities Included on the Balance Sheet. Contingent Liabilities amounts are reported on the “Other Liabilities” line of the Balance Sheet if all of the following conditions are met: (1) a past event or exchange transaction has occurred, (2) a future outflow or other sacrifice of resources is probable, and (3) the future outflow or sacrifice of resources is measurable.

a. Report the dollar amount of the probable loss.

b. If a specific dollar amount of the loss is not known, but a range of amounts is known, then report the low end of the range and disclose the range on line 2.

★5. Information Disclosed and Not Included on the Balance Sheet. A contingent liability should be disclosed if one or two of the 3 conditions for liability recognition identified in paragraph 101402.B.1. above are met and there is at least a reasonable possibility

that a loss or an additional loss may have been incurred. These liabilities may involve individual or aggregated cases of pending, threatened, or potential litigation.

a. Disclose specific amounts or ranges of losses that are reasonably possible.

b. Disclose the fact that an amount or range of amounts can not be determined. In addition, the entity should disclose the nature of the contingency and an estimate of the obligations related to canceled appropriations for which the reporting entity has a contractual commitment for payment.

★6. Other Information. Provide other information relevant to other liabilities that is not disclosed in the above categories.

★C. Nonenvironmental Disposal Liabilities. Nonenvironmental disposal (removal, transportation, demilitarization, and final dismantlement and disposal) liabilities relate to the final disposition of property, structures, equipment, munitions, nuclear powered assets (when distinguishable from environmental disposal), and to other national defense weapons systems. Nonenvironmental disposal liabilities do not include range preservation and management activities that are treated as environmental disposal. Disposal measurements involve the use of cost estimates that consider, on a current cost basis, the anticipated level of effort required to dispose of the item, and the current disposal or reuse technologies available. Cost estimates prepared in accordance with the guidance in Chapter 13 of Volume 4 of this Regulation, “Accrued Environmental and Nonenvironmental Disposal Cost Liabilities” (located at the following Internet address: www.dtic.mil/comptroller/fmr/04/04_13.pdf), shall be used by the DoD Components as the baseline for nonenvironmental disposal liability measurement. The estimated liability may be a specific amount or a range of amounts. If some amount within a range is considered a better estimate than any other estimate, that amount should be used for liability recognition. If not amount within a range is considered a better estimate than the other estimates, then the minimum amount in the range should be used. Current and noncurrent amounts reported must be identified as “Covered by Budgetary Resources” and “Not Covered by Budgetary Resources.”

1. Disclosure Requirements. Disclose any other information necessary for understanding the nature of the liabilities.

2. Definitions. While some categories of Nonenvironmental Disposal Liabilities in Note 13 are self explanatory, (e.g., nuclear powered aircraft carriers, submarines, and other ships), the definitions below are provided for clarity and consistent reporting.

a. ★Other National Defense Weapons Systems. Includes other National Defense weapons systems disposal liabilities that are not associated with the removal and disposal of hazardous materials that are not otherwise appropriately categorized in a Note 13 line item.

b. ★Conventional Munitions Disposal. Includes weapons which are neither nuclear, biological, nor chemical.

c. ★Other Asset Disposal. Includes all other nonenvironmental liabilities not otherwise applicable to the categories identified in Note 13. However, this category requires disclosure in a narrative format to Note 13, which specifically identifies both a description of similar groups of items included and the liability amount for each grouping.

★101403. Leases Footnote Format Note 13 Part 5. Leases.

<u>5. Leases:</u>

b. <u>Liabilities Covered by Budgetary Resources</u>				<u>\$ x,xxx,xxx</u>
c. <u>Liabilities Not Covered by Budgetary Resources</u>				<u>\$ x,xxx,xxx</u>

Figure 10-17

101404. Instructions. SFFAS Nos. 5 and 6 provide the criteria for liability and asset recognition with respect to capital leases.

A. Entity as Lessee.

1. Future Payments Due. Enter future lease payments, by major category, for all noncancelable leases with terms longer than one year.

2. Covered by Budgetary Resources vs. Not Covered by Budgetary Resources. Separately disclose the portions of the capital lease liability covered by budgetary

resources and not covered by budgetary resources (see Appendix B of OMB Circular A-11 for additional guidance but observe a difference in terminology that the term “capital leases” as used in this includes “capital leases and lease purchases” as the terms are used in Circular A-11).

★B. FY Information. The information presented in the FY column must be an actual FY. For example, if year 1 was FY 2000 then year 2 would be FY 2001, etc.

★ c. Market value of investments in market-based and marketable securities _____				

Figure 10-18

★101502. Instructions. (Note: The information required by Note 14 shall only be reported by the entity that administers pension and/or other retirement benefit(s), except for line 3.a. Workmen's Compensation (FECA)).

A. Pension and Health Care Benefits. The Military Retirement Trust Fund and the Military Post Retirement Health Benefits program shall report the actuarially determined present value of all future pensions and/or retirement benefits earned to date, using the "aggregate entry age normal" method (refer to Chapter 10 of Volume 4 of this Regulation for

further guidance). Current and noncurrent amounts reported must be identified as “Covered by Budgetary Resources” and “Not Covered by Budgetary Resources.” In the required Note columns, enter:

1. Column 1. Actuarial present value of projected plan benefits accrued to date. For pensions, this would be the projected benefit obligation.
2. Column 2. Assumed interest rate used to discount the projected plan benefits cost to its present value.
3. Column 3. Net assets, if any, available to pay benefits.
4. Column 4. Actuarial liability not covered by budgetary resources, i.e., the actuarial present value of projected plan benefits (column 1) less fund assets (column 3).
- ★5. Other Information. Disclose, as other information, the actuarial, economic, and health care cost trend assumptions used in the calculations.

B. Insurance/Annuity Programs.

★C. Other.

1. Voluntary Separation Incentive Program. The Voluntary Separation Incentive Fund (recorded on Treasury’s books) is used to accumulate funds to finance, on an actuarially sound basis, the liabilities of DoD incurred under this program. The Voluntary Separation Incentive Fund covers program costs, including the salary and benefits, for qualified military personnel who opt for early retirement. Voluntary Separation Incentive payments are paid using the trust fund managed by DoD, Office of the Actuary and reimbursed annually by the services from their military personnel accounts. Accrual provisions should be established for the pool of military personnel who have selected this option. The amount of the liability accrual will be determine by actuarial data provided by the DoD, Office of the Actuary.

Voluntary Separation Incentive expense information for the payment to the Fund will be reported on the Military Services financial statements in the military personnel appropriation grouping. This expense is to be coded for elimination purposes against the Other Defense Organization, General Fund-All Other Defense Agencies General Fund Accounts. The Other Defense Organization, General Fund-All Other Defense Agencies General Fund Accounts will code the related revenue for elimination purposes against the Military Department-Military Personnel. Defense Finance and Accounting Service (DFAS) Headquarters Reporting Division A will provide the DFAS Centers with the amounts paid into the Fund by each Military Service. Further details concerning the elimination coding procedures and information will be sent under correspondence.

- a. Column 1. Actuarial present value of projected plan benefits accrued to date.

b. Column 2. Assumed interest rate used to discount the project benefits cost to its present value.

c. Column 3. Net assets available to pay benefits.

d. Column 4. Actuarial liability not covered by budgetary resources, i.e., the actuarial present value of projected plan benefits (column 1) less fund assets (column 3).

3. DoD Education Benefits Fund. The DoD Education Benefits Fund is designed to accumulate funds for the Educational Assistance program. This program promotes the recruitment and retention of members for the All-Volunteer Forces program and the Total Force Concept of the Armed Forces and aids in the readjustment of members of the Armed Forces to civilian life after separation from military service.

a. Column 1. Actuarial present value of projected plan benefits accrued to date.

b. Column 2. Assumed interest rate used to discount the project benefits cost to its present value.

c. Column 3. Net assets available to pay benefits.

d. Column 4. Actuarial liability not covered by budgetary resources, i.e., the actuarial present value of projected plan benefits (column 1) less fund assets (column 3).

4. Workman's Compensation (FECA) Liability Entries. Workman's compensation is a benefit coverage for death, disability, medical, and miscellaneous cost for approved cases of on the job incidents. Workman's compensation claims are submitted to and approved by the Department of Labor (DoL). DoL pays the claim holders. DoL then prepares a chargeback billing to the responsible Agencies. DFAS-KC Agency Reconciliation Branch receives a summary DoD chargeback bill. P.L. 93-416, Section 8147 (the FECA law) essentially gives Agencies two years to pay this chargeback bill, allowing time for the amount for the amount to be included in their budgets. Therefore, there should be an unfunded liability in the CFO Statements for these two years, which may be split into current for the portion to be paid in the following year. Under the FECA law once funding is received, it should be paid within 30 days. If DoD still has some amounts outstanding, these amounts should be reflected as a funded liability and an explanation is required.

a. Column 1. Actuarial present value of projected plan benefits accrued to date.

b. Column 2. Assumed interest rate used to discount the project benefits cost to its present value.

c. Column 3. Net assets available to pay benefits.

d. Column 4. Actuarial liability not covered by budgetary resources, i.e., the actuarial present value of projected plan benefits (column 1) less fund assets (column 3).

★D. Total, Lines A+B+C. For columns 1, 3, and 4, enter the sum of the totals on lines A., B., and C. above. The total funded actuarial liability (column 3) should agree with line 4.C. on the Balance Sheet, and the liability not covered by budgetary resources (column 4) should agree with line 5.C.

E. Other Disclosure Information. Provide the following minimum disclosures related to pensions and other actuarial liabilities: (1) total liability; (2) separate amounts for the liability covered by budgetary resources and not covered by budgetary resources; (3) assumptions used to calculate the liability; (4) individual components of the expense for the period; and (5) the market value of investments in market-based and marketable securities pertaining to pensions and other post retirement benefits investments.

1. Actuarial Cost Method Used. Provide a description of the actuarial cost method used to compute the projected plan benefit cost.

2. Assumptions. Disclose the actuarial, economic, and health care cost trend assumptions used in the calculations.

★1016 NOTE 15. NET POSITION

★101601. Footnote Format.

<u>Note 15: Net Position:</u>	
(\$ in Thousands)	
1. Unexpended Appropriations	
a. Unobligated,	
(1) Available	\$ x,xxx,xxx
(2) Unavailable	x,xxx,xxx
b. Undelivered Orders	<u>x,xxx,xxx</u>
c. Total Unexpended Appropriations	<u>\$xxx,xxx,xxx</u>
2. Other Information: _____	

Figure 10-19

★101602. Instructions.

A. Unexpended Appropriations. This amount includes the portion of the entity's appropriations represented by unobligated balances and undelivered orders. Unobligated balances should be segregated to show available and unavailable amounts. The unexpended appropriations unobligated, available and unexpended appropriations unobligated, unavailable must agree with the Statement of Budgetary Resources, line 8 and line 9, respectively. The undelivered orders amounts should be developed by using USGSGL accounts 4801, undelivered orders - unpaid and 4802, undelivered orders - paid.

★B. Other Information. Provide other information relevant to unexpended appropriations that is not disclosed in the above categories.

1017 NOTE 16. FOOTNOTE DISCLOSURES RELATED TO THE STATEMENT OF NET COST

101701. NOTE 16.A. Suborganization Program Costs. (Optional) For some entities, the organizational structure and operations are so complex that supporting schedules should be used to fully display their suborganizations' major programs and activities. Supporting schedules similar to those illustrated below should be included in the notes to the financial statements and present detailed cost and revenue information supporting the summary information presented in the Statement of Net Cost. Reconcile program costs in Note 16.A. with program costs in Consolidating Statement of Net Cost. Include the following language as "Other Information:

The Department has identified the Government Performance and Results Act (GPRA) performance measures based on missions and outputs. However, the Department is unable to accumulate costs for major programs based on those performance measures, because its financial processes and systems were not designed to collect and report this type of cost information. Until the processes and systems are upgraded, the Department will break out programs by its nine major appropriation groupings.

Figure 10-20

101702. NOTE 16.B. - Cost of National Defense PP&E. The cost of acquiring, constructing, improving, reconstructing, or renovating National Defense PP&E assets shall be recognized as a cost in the Statement of Net Cost in the period incurred. These costs shall be separately reported on the face of the statement or disclosed in the footnotes, depending on the materiality.

101703. NOTE 16.C. - Cost of Stewardship Assets. The cost of acquiring, constructing, improving, reconstructing, or renovating Stewardship assets shall be recognized in the Statement of Net Cost in the period incurred. These costs shall be separately reported on the face of the statement or disclosed in the footnotes, depending on the materiality.

101704. NOTE 16.D. - Stewardship Assets Transferred. If the cost of heritage assets and stewardship land transferred from other federal entities or acquired through donation or devise is not known, then the receiving entity shall disclose the fair value. If the fair value is not known or reasonably estimable, information related to the type and quantity of assets received shall be disclosed (see SFFAS No. 6).

101705. NOTE 16.E. - Exchange Revenue. Reporting entities that provide goods and services to the public or another government entity should disclose specific information related to their pricing policies and any expected losses under goods made to order. These disclosures are described in SFFAS No. 7.

101706. NOTE 16.F. - Amounts for FMS Program Procurements From Contractors. This note provides a disclosure of management's estimate of amounts related to FMS program procurements from contractors during the period. The amounts disclosed are not included in the net cost principal or supporting statements. These amounts and this note are applicable to only the DoD Agency-wide financial statements. Suggested wording for this footnote is, "Amounts pertaining to FMS items provided by DoD contractors are not reported in the Statement of Net costs. In FY ____, we estimate these amounts to be \$ _____. A Statement of Custodial Activity is provided which reports the amounts of cash receipts and disbursements of the FMS Trust Fund during the year."

101707. NOTE 16.G. Benefit Program Expenses.

A. Footnote Format.

<u>Note 16.G. Benefit Program Expense:</u>	
Reporting Entity	
For the year ended September 30, xxxx	
(\$ in Thousands)	
1. Service Cost	\$ x,xxx,xxx
2. Period Interest on the Benefit Liability	\$ x,xxx,xxx
3. Prior (or Past) Service Cost	\$ x,xxx,xxx
4. Period Actuarial Gains or losses	\$ x,xxx,xxx
5. Gains/Losses Due to Changes in Medical Inflation Rate Assumption	\$ x,xxx,xxx
6. Total	<u>\$ x,xxx,xxx</u>

Figure 10-21

B. Instructions. Benefit Plan administering entities must disclose the Benefit Program Expenses as shown in Table 10-17. Within the DoD, this disclosure requirement applies to only the Military Retirement Trust Fund and the Military Post Retirement Health Benefits Program.

1. Service Cost. The service costs represent that portion of the actuarial present value (using the aggregate entry age normal actuarial method) of pension plan

and other retirement benefits and expenses that is allocated to a valuation year by the actuarial cost method.

2. Period Interest on the Benefit Liability. Disclose the interest on the benefit liability for the period. This cost is based on the future benefit obligation at the start of the period and increases the net pension cost.

3. Prior (or Past) Service Cost. The prior (or past) service cost resulting from any change in the future benefit obligation that results from a plan amendment (new plan initiation).

4. Period Actuarial Gains or Losses. The period actuarial gains or losses are those gains or losses that result from deviations between actual experience and the actuarial assumptions used, or from changes in actuarial assumptions.
